- Support small business backup needs with remote FTP access and RAID0, RAID1, and JBOD backup setup configurations
- DLNA support for compatibility with DLNA certified products

Network Storage Appliance for Home & Small Business

NSA220

Network Storage Appliance for Home & Small Business

Benefits

Securely Backup Sensitive Information

The information on your computer is precious and in the case of correspondence, business memos, music, photos and videos, may be irreplaceable. Rather than worry about hard disk drive failure, theft, fire or other disasters that can permanently erase your files, back them up securely with ZyXEL's NSA220. Capable of storing terabytes of data, the NSA220 delivers bullet-proof RAID backup capabilities to ensure your valuable files are impervious to standard causes of data loss. And as a network storage appliance, the unit attaches quickly and easily to your network, enables all networked computers to share the data, and transfers even the biggest files at blazing speeds.

Perfect for Entertainment

Built-in DLNA support makes the NSA220 the perfect storage server able to be controlled by any DLNA certified device. Pull up pictures and/or videos stored on the NSA220 onto your wide screen television for easier viewing in the living room with a DLNA-certified media adapter such as the ZyXEL DMA1000. iTunes server support enables you to centrally manage and share your music, videos, and photos using iTunes installed on your networked PCs.

### Small Form Factor with a Business Feature Punch

Powerful business features such as RAID0, and RAID1 are all included within the NSA220, enabling you to ensure the safety of your data even if a drive within it fails. You can even remotely access the NSA220 using FTP when you're on the road and need specific files in a pinch. Create multiple backups using RAID1 standards at the click of a button. And award-winning MeMeo software is bundled with your NSA220 to provide you with the latest and easiest-to-use backup management features for your PC.

ZyXEL

Specifications

Systems Certification	Embedded Linux Kernel 2.6
Disk Management	Internal Disk (RAID 0, RAID 1, JBOD)
