

# VRManager™ Manual

2/2008 4510-0003-5.2

#### WARNING!

Toll fraud is committed when individuals unlawfully gain access to customer telecommunication systems. This is a criminal offense. Currently, we do not know of any telecommunications system that is immune to this type of criminal activity. AltiGen Communications, Inc., will not accept liability for any damages, including long distance charges, which result from unauthorized and/or unlawful use. Although AltiGen Communications, Inc., has designed security features into its products, it is your sole responsibility to use the security features and to establish security practices within your company, including training, security awareness, and call auditing.

## Introduction

### About This Manual

This manual provides instructions for installing and using VRManager.

VRManager performs recorded file management — indexing, converting, tracking, playback, reporting, and other critical functions for call center customers who would like to keep recorded files for administrative, legal, or quality assurance purposes.

### Requirements

VRManager requires the following:

- VRManager License
- AltiWare AltiContact Center (ACC) (5.2 or higher) or AltiContact Manager (ACM) (5.2 or higher)
- CPU: Pentium IV 2.0 G (minimum)
- Memory: 256 MB
- HD: IDE RAID 0-1 (minimum)
- NIC
- Microsoft Windows 2000/XP/2003
- Java 2 Runtime Environment (SE v1.4.2)
- MDAC (Microsoft Data Access Components) 2.8 or higher version
- Microsoft Internet Explorer 6.0 or later. A minimum installation is sufficient, and Internet Explorer does not have to be the default browser.

### VRManager License

VRManager requires a **VRManager License** to be installed at the AltiWare ACC/ACM system. You can verify the licenses when you run AltiWare Administrator by selecting **About AltiWare Administrator** on the **Help** menu, then clicking the **License Information** button to view a window that displays licenses and session information.

# **Installing VRManager**

Install VRManager on a *different system* than the one on which the AltiWare ACC/ACM server is installed.

If you are upgrading, you can upgrade from VRManager 5.0B or 5.1 only. If you have VRManager 5.0A installed, you must first upgrade to VRManager 5.0B.

### Pre-Setup Required for MSDE 2000

The MSDE 2000 database is installed with the VRManager **Setup** program. MSDE 2000 requires certain settings in order to install successfully. Before running **Setup**, please ensure the following.

- File and print sharing must be active on your operating system. To verify:
  - 1. In Control Panel, double-click Network Connections.
  - 2. On the Advanced menu, click Advanced Settings.
  - 3. On the Adaptors and Bindings page, ensure that File and Print Sharing for Microsoft Networks is selected.
- Make sure that **Silently succeed** is selected in the local security options named below.
  - 1. In Control Panel, double-click Administrative Tools.
  - 2. Double-click Local Security Policy.
  - 3. Expand Local Policies.
  - 4. Select Security Options.
  - 5. Ensure that the following option in the right pane is set to **Silently succeed** before installing:
    - On Windows XP and Windows 2003: Devices: Unsigned driver installation behavior.
    - On Windows 2000: Unsigned non-driver installation behavior.

• Problems can occur if you use a Terminal Services or Remote Desktop connection to attempt to install a new instance of MSDE 2000. If problems are encountered, restart the VRManager **Setup** program from the local computer without using Terminal Services or Remote Desktop.

### Installing VRManager Service

To install VRManager service, you will use one of two methods: **Fresh** install and **Upgrade from previous version**.

#### Fresh Install

If you do a fresh install, the installation program installs MSDE 2000 and Jservice Loader on your PC automatically.

1. Run the **Setup** program and follow the installation instructions as they appear on the screen.

뤻 VRManager - AltiGen Installation Wizard	X
<b>Custom Setup</b> Select the program features you want installed.	
Click on an icon in the list below to change how a feature is in Voice Record Manager Service Voice Record Manager Admin Voice Record Manager Client	nstalled. Feature Description This feature will be completely removed. This feature frees up 160KB on your hard drive.
InstallShield	Next > Cancel

2. In the **Custom Setup** screen, choose to install **Voice Record Manager Service** and **Voice Record Manager Admin**. If you plan to use VRM Client at this system, also select **Voice Record Manager Client**. Then click **Next**.

After installation, you can run VRManager Admin from **Start > Programs** > **VRManager > VRM Admin**.

### Upgrade from Previous Version

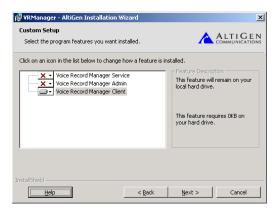

To upgrade from VRManager 5.0B or 5.1:

- 1. Stop the VRM service.
- 2. Run the **Setup** program.
- 3. Follow the installation instructions as they appear on the screen. In the Custom Setup screen, choose to install Voice Record Manager Service and Voice Record Manager Admin. If you plan to use VRManager Client at this system, also select Voice Record Manager Client.

### Installing VRManager for a Client

To install VRManager for a client system:

1. Run the **Setup** program and follow the installation instructions as they appear on the screen.

2. In the Custom Setup screen, choose to install Voice Record Manager Client or Voice Record Manager Admin.

If you install VR Admin on a client system, some **Browse** buttons will not appear.

After installation, you can run VRManager Client from **Start > Programs** > **VRManager > VRM Admin or VRM Client**.

Note: If VRManager is run behind a firewall, open TCP port 10040. (VRManager may not work behind NAT.)

### **Setting Access Privileges**

- The directory of centralized records in the ACC/ACM server must be shared fully with the VRManager user. This user not only requires privilege to read/write to the shared folder, but also read/write to the local folder.
- The destination of the backup location must be valid and accessible in the local computer or remote computer. The user must have full privilege to read/write to the shared and local folders.
- In Windows 2003 Server, the default setting of the OS security is very robust, so caution should be used when setting users' access privileges.

# **Using VRManager Admin**

To run VRManager Admin:

1. Choose **Start > Programs > VRManager > VRM Admin**. The VRM Admin Login dialog box opens.

VRM Admin Login 🔰	<
VRM Server 10.10.1.33	J
Password ******	]
🔀 Save Password	
OK Cancel	)

- 2. Enter the **VRM Server** IP address or server name and **Password**. (Default password is 22222.)
- 3. Check the **Save Password** checkbox if you want VRM Admin to remember the password the next time the program is run.
- 4. Click OK.
- Note: Each Windows user has his own VRM Admin login setting.

#### **VRM Admin Window**

VRM Admin has five configuration pages:

- User
- Pooling
- Storage
- Log
- AltiWare ACM

### **User Page**

The VRM **User** page displays the **User List** for VRManager clients and shows the workgroups, extensions, and systems that the user can query. From this page, an administrator can add, edit, and delete users; limit their queries to certain workgroups, extensions, and systems; change user passwords; and change the VRM Admin password.

sion TenantID SystemID

nin Password

#### Adding Users

To add a new VRManager Client user:

1. Click the **New** button.

New User	×
User Name	
New Password	
Comfirm Password	
	OK Cancel

In the New User dialog box, enter a **User Name**, **Password** and **Password Confirmation**. (The account name is NOT case-sensitive. For example, VRManager does not differentiate between the name "John" and "john" in a user account name.)

- 2. Click **OK**. The new user is displayed in the **User List** field.
- 3. To limit this user's queries to certain workgroups, extensions, and systems, select the new user and click the **Edit** button. Enter the workgroup numbers in the **Workgroup** text box, the extension numbers in the **Extension** text box, and system IDs in the **System ID** text box. Separate entries with a comma. (To allow the user to query *all* workgroups or all extensions, leave those text boxes empty.)

#### Editing a User

To edit a user:

1. Select the user on the User page and click the **Edit** button.

lit User's Profile	
Name: SCOTT	Change Password
Workgroup	
100,200,300	
Extension	
210,220	
Tenant ID	System ID
	OK Cancel

2. Make your changes, and click **OK**.

#### Changing the Admin Password

To change the VRM Admin password:

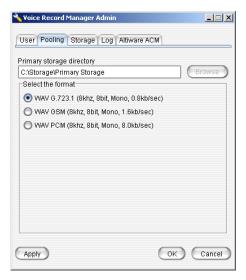

1. Click the **Change Admin Password** button. The Change Admin Password dialog box opens.

Change Admin Passw	vord 🔀
Old Password	
New Password	
Comfirm Password	
	OK Cancel

- 2. Enter the information in the **Old Password**, **New Password** and **Confirm Password** fields.
- 3. Click OK.

### **Pooling Page**

The pooling page lets you set the location of the primary storage directory. Use the **Browse** button to select the location. VRM Admin pools the newly recorded files from the AltiWare server, and saves them into the primary storage directory in the .wav format you select here (G.723.1, GSM, PCM).

**Note:** The **Browse** button is not available if VRM Admin is running on a different server than VRM Service.

### Storage Page

On the **Storage** page you can set backup conditions for the storage of voice records.

🔧 Voice Record Manager Admin
User Pooling Storage Log Altiware ACM
Backup Condition
O Automatic delete record without backup
Delete records older than day(s)
Delete records when free space below MB
Delete records when free space below %
Schedule Backup
🗙 Start when free space below 100 MB
🗙 Start when free space below 1 %
Schedule Details
Backup storage C1Storage\Backup Storage Update
Execute Now
(Apply) OK Cancel

Select one of the following conditions:

• Automatic delete record without backup - if selected, VRM Admin will delete records without backing them up. To set additional automatic delete parameters, select any of the following options:

— Delete records older than x day(s)

- Delete records when free space below x MB

- Delete records when free space below x %
- Schedule Backup if selected, VRM Admin will automatically back up, then delete records. To specify backup parameters, select any of the following options:
  - -Start when free space below x MB
  - Start when free space below x %

**Schedule** - for detailed settings, click the **Details** button. In the Details dialog box, use the drop-down list to select the **Schedule Task** (Daily/Weekly/Monthly), use the up/down arrows to select the **Start Time** and to define the **Daily Schedule** (every x days),

Weekly Schedule (any day in every x weeks), or Monthly Schedule (any date in every month), then click Apply.

×
_

Use the **Advanced** button to set a **Start Date** and **End Date**; or check the **Repeat Task** checkbox to set up parameters for a continuous schedule, then click **OK**.

Advanced	×
Start Date	2004-10-28
End Date	2004-10-28
🗌 Repeat Task	
Until O Time 09:18	Minute(s) :39 0 Hour(s) 0 Minute(s)
	OK Cancel

Check the **Show multiple schedules** checkbox to display and set up more than one schedule. You can add new multiple schedules, then modify them.

• **Backup Storage** - enter the location for the backup storage, or use the Update button to select a new location. If you click the Update button, the following dialog box opens:

ackup storage		×
💿 Local Storage	O Network Storage	
am Files\AltiGen\VF	RManager(VRMbackup	Browse
User Name	Password [	
	ОК	Cancel

You can enter a local path or network path. The destination of the backup location must be valid and accessible in the local computer or remote computer. The user must have full privilege to read/write to the shared and local folders. Also, VRManager supports backup to DVD/RW; simply enter the path for the DVD/RW location.

- **Note:** The **Browse** button is not available if VRM Admin is running on a different server than VRM Service.
- Execute Now button clicking this button will begin backup of records.

When you have finished setting backup parameters, click Apply or OK.

### Log Page

A log file for the VRM server is created each day named "yyyymmdd.log" (for example, 20040404.log). A daily report for the VRM server is also created "yyymmdd.rpt" (for example, 20040404.rpt). The Log window allows an administrator to set the directory paths for VRM log and report.

**Note:** The **Browse** buttons are not available if VRM Admin is running on a different server than VRM Service.

🌂 Voice Record Manager Admin	
User Pooling Storage Log Altiware ACM	
Set Log Directory

Delete the log files older than 60 da	ay(s)
Set daily report directory	
C:\Program Files\AltiGen\VRManager\reports	Browse
Delete the report files older than 60	day(s)
Send daily report by mail Mail Configu	ration Test
• When there is a warning or error	
O Always	
Apply	OK Cancel

- Set Log Directory use the Browse button or enter a path in the field to specify where you want log files to be saved; check the Delete the log files older than x days checkbox to delete archived log files.
- Set Daily Report Directory use the Browse button or enter a path in the field to specify where you want daily report files to be saved; check the Delete the log files older than x days checkbox to delete archived daily report files.
- Send daily report by mail if you check this option, VRM will send a report When there is a warning or error or Always. Use the Mail Configuration button to configure the recipient's email address. Use the Test button to send a test email.

Click Apply or OK when finished.

#### AltiWare ACC or ACM Page

The **AltiWare ACC** or **ACM** page displays the AltiContact Center or AltiContact Manager servers and centralized recording directories that VRManager will access. Here, administrators can add or delete ACC/ACM servers, and specify the centralized recording directory for the specified ACC/ACM server.

🌂 Voice Record Manager Admin	
User Pooling Storage Log 7	Altiware ACM
Altiware ACM server list	
10.10.0.8	
	New Delete
Centralized Recording Directory	
User Name	Password
Apply	OK Cancel

#### **Adding Servers**

To add a new ACC/ACM server, do the following:

#### At the AltiServ system

- 1. Make sure the Centralized Storage directory is located on the local drive on the AltiServ system.
- 2. Share the storage directory with Full Control to a domain user or local administrator.

#### At the VRM Server

1. In the **AltiWare ACC** or **ACM** page of VRM Admin, click the **New** button. The Add New Server dialog box appears.

dd New Server	×
ACM Server Address	
Centralized Recording D	Directory
User Name	Password
	OK Cancel

2. Enter the ACC or ACM Server IP Address, Centralized Recording Directory (the Share name of the centralized recording folder), User Name and Password. Then click OK. If the user account belongs to an NT domain, you must enter "NTDOMAIN; username" in the User Name edit box. If the account is local Administrator, just enter administrator.

After adding a new server, VRM Service immediately checks the AltiWare server for the **VRManager License**.

The newly added server is displayed in the **AltiWare ACC** or **ACM Server List** field.

**Note:** VRManager starts converting all voice recording data as soon as the ACC/ACM Server information is added to the AltiWare ACC or ACM Server List.

#### Changing the Centralized Recording Directory

To edit an ACC/ACM server's location for the centralized recording directory, highlight the ACC/ACM server in the server list, then input the new location in the **Centralized Recording Directory** field.

#### 18 VRManager

# **Using VRManager Client**

To run VRManager Client:

•

 Choose Start > Programs > VRManager > VRM Client. A Login dialog box opens

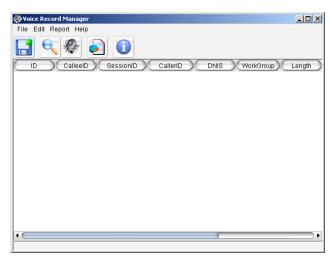

Login		x
VRM Server		
Username		
Password		
🗐 Save Pas	sword	
	Ok Cance	Ð

- 2. Enter the VRM Server IP address or server name, User name and Password.
- 3. Check the **Save Password** checkbox to have VRM Client remember the password the next time the program is run.
- 4. Click OK.

Note: Each Windows user has his own VRM Client login setting.

### VRM Client Main Window

When you start VRM Client, the first window you see is the VRM Client main window.

At the top is a menu bar, and below is a quick-access toolbar. At the bottom is a scroll bar for viewing the display columns.

**Note:** Each Windows user has his own VRM Client display column in the main window.

### Menu Bar

Using the menus, you can perform the following functions:

- File Save As, Export to File, Change Password, Exit
- Edit Search, Play, Display Column, Option
- Report Generate report
- Help VRM Client version information

#### **Quick Access Toolbar**

The toolbar contains buttons that are menu shortcuts:

#### File Menu

#### **Saving Files**

To save a file, click on a voice record in the main window to highlight it, and click the **Save As** button. OR, right-click on a voice record, and select **Save As**. OR, click on a voice record to highlight it, and choose **File > Save As** from the main menu.

#### Change Password

To change your password:

- 1. Choose **File > Change Password** from the main menu.
- 2. In the **Change User Password** dialog box, enter the necessary information in the **Old Password**, **New Password** and **Confirm Password** fields, then click **OK**.

Change User Passwo	rd 🔀
Old Password	
New Password	
Confirm Password	
	Ok Cancel

The new password applies at the next log in.

#### Edit Menu

#### **Searching Voice Records**

To search voice records, choose **Edit** > **Search** or click the **Search** button in the toolbar. In the Search dialog box, you can search based on the following conditions:

From	>= •	Aug 11, 2005	• 00 •	. 00 🗸
То		Aug 12, 2005	• 23 •	• : 59 •
CalleeID			Length	
CallerID			SessionI	D 💶 🔽
DNIS			Commer	nt 😑 📃
WorkGrou	p (=			

The relational symbols for each condition include:

= (equal)

```
< (greater than)
```

```
> (less than)
```

```
>= (less than or equal to)
```

<= (greater than or equal to)

<> (not equal)

like (look for sub-string)

```
btwn (between)
```

```
in—searches the results in sets; for example, CallerID "In" "101 AND 102" means CallerID equals 101 or CallerID equals 102.
```

#### Notes

- Typing "OR" in upper case in the edit box means "or."
- Typing "AND" in upper case in the edit box means "and."
- To leave out a condition, leave the edit box empty.
- The date/time format is the same as the system format of the operating system.

• Only the **Comment** column will be editable directly from the main view window.

#### **Playing Voice Records**

To play a voice record:

Click on a voice record in the main window to highlight it, and click the **Play** button. OR, right click on a voice record and select **Play**. OR, click on a voice record to highlight it, and choose **Edit** > **Play** from the main menu.

Note: Deleted voice files are not played.

#### **Displaying Columns**

You can select which columns you want displayed in the main view window. These are the column headers you can select from:

- ID
- Callee ID
- Session ID
- Caller ID
- DNIS
- Workgroup
- Length

- Date
- State—there are three states that a record file can be in:
  - -Delete if in this state, a record cannot be played or saved.
  - *Backup* if in this state, you must manually put the right backup media in the path if you back up the record and remove it.
  - -Normal if in this state, the file can be played or saved.
- Comment

To select columns for display:

1. Choose **Edit > Select Column**.

The Select Column dialog box opens. The fields in the **Visible** list are displayed as columns under the VRM toolbar.

Columns				
Available		Visible		
		ID		
		CalleeID	m	
		SessionID		
	( >> )	CallerID	Up	)
		DNIS		
		WorkGroup	Down	
		Length		_
	( << )	Date		
	$\square$	State		
		Comment	-	

- 2. Use the arrow keys (< or >) to move a field from one list to the other. You can use the << or >> buttons to move the entire group of fields from one list to the other.
- 3. Click **OK** when finished.

#### Sorting

In the main view window, you can click on a specific column heading to sort records in ascending or descending order on that field. You can use the scroll bar at the bottom of the window to view all the displayed columns.

#### Media Player Option

VRM client plays the selected file using a media player defined by the user. If the media player is not defined, VRManager does not play the file, and instead opens the Media Player Location dialog box so you can assign a media player. You can also select the media player by going to **Edit** > **Option**. In the **Option** dialog box, select the Media Player Location by typing the path in the field or using the browse button (...), then click **OK**.

Option	×
Media Player Location	
	Ok Cancel

#### **Report Menu**

You can generate reports based on agent, workgroup, DNIS or date.

To generate a report:

1. Choose **Report** from the main menu or click the **Report** button. The Report Generation dialog box opens.

Report Generation	×
Report Type	
From Oct 28, 2004 To Oct 28, 2004	•
O Group by Agent Extension	
CalleelD	
O Group by Work Group	
WorkGroup	
Group by DNIS	
DNIS	
<ul> <li>Group by Day (Daily Summary)</li> </ul>	
Ok Ca	ancel

- 2. In the Report Generation dialog box, click the Down arrow to select From and To dates from a calendar.
- 3. Select one of the following format options:
  - **Group by Agent Extension**—enter the extension in the Callee ID field.

- **Group by Workgroup**—enter the workgroup number in the Workgroup field.
- Group by DNIS—enter the DNIS number in the DNIS field.
- **Group by Day** (Daily Summary)—formats report based on date period summary for each day.
- 4. Click OK.
- VRM Client generates a separate **Report** window displaying the selected report parameters. From there, you can select **Print Setup**, **Preview**, **Print**, or **Export** (as a tab-separated text file).

ort Result			×
