

4-CH & 8-CH Digital Video Recorder

Quick Installation Guide

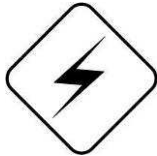

Version: 1.4

WARNINGS, CAUTION & COPYRIGHT

WARNINGS

Reduce the risk of fire or electric shock. And do not expose this product to rain.

Do not insert any metallic object through ventilation grills.

CAUTION	
	
The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to presence of insinuated “dangerous voltage” within the products enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons	The exclamation point within an equilateral rhombus is intended to alert the user to the presence of important operating and maintenance (servicing) instruction in the literature accompanying product.
RISK OF ELECTRIC SHOCK DO NOT OPEN	
TO REDUCE TE RISK OF ELECTRIC SHOCK DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE REFER SERVICING TO QUALIFIED SERVICE	

USER OF THE SYSTEM ARE RESPONSIBLE FOR CHECKING AND COMPLYING WITH ALL FEDERAL, STATE, AND LOCAL LAWS AND STATUTES COIPCERNING THE MONITORING AND RECORDING OF VIDEO AND AUDIO SIGNAL. ULTRAK SHALL NOT BE HELD RESPONSIBLE FOR THE USE OF THIS SYSTEM IN VIOLATION OF CURREENT LAWS AND STATUTES.

- 1) The apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.
- 2) **CAUTION-Danger of explosion if battery is incorrectly replaced.**
Replace only with the same or equivalent type.
- 3) The apparatus with CLASS I construction shall be connected to a MAINS socket outlet with a protective earthing connection.
- 4) The batteries installed shall not be exposed to excessive heat such as sunshine, fire or the like.
- 5) The plug or appliance coupler shall remain readily operable for the purpose of disconnection from the mains

Package Accessories

Power Adaptor

IR Remote Controller and Batteries

Software/Operation manual CD

1. Specification

KA-6614 (4CH)			
OS System	Embedded Linux	Password Security	Multi-level password(3 levels, up to 18 accounts) protection
Compression	H.264 - Video ; ADPCM - audio	RS-485	No
Multiplex operation	Simultaneous	DVD	No
Live Display	NTSC : 720x480 30 fps PAL : 720x576 25 fps	Event log	Yes
Split Screen	1/ 4/ CH	Buzzer	Yes
Freeze	Yes	Partitions	Configurable "Motion partition size" and "Auto-overwrite"
Sequential switch	User adjustable	Backup	USB 2.0,DVD-RW,DVD-R,card readers...
Live Digital Zoom	X2 X4	Protocol	TCP/IP,HTTP,PPPoE,DHCP,DDNS,FTP,TSP
Recording playback	NTSC : 720x480 60fps 720x240 120fps 360x240 120fps PAL : 720x576 50fps 720x288 100fps 360x288 100fps	Network	RJ-45 10/100 baseT Ethernet connector
Watermark	Yes	Web	Remote setup, monitoring backup
Recording Mode	"Manual" "Schedule" "Alarm" "Motion"		Remote software upgrade
Pre-record Mode	0-10 sec		IE software for Multiple DVRs (64ch Display on Screen)
Post-record time	0-60 minutes		Configurable HTTP/Control/Data port
Playback Search	Video Loss,Event,Date/Time,Smart search	E-mail	Notification to stationary or mobile devices
Main monitor	BNC x 1 , 1Vp-p/ 75ohm ,	Video	4 split screen display & SEQ mode for IE
Call monitor	No		Electronics maps
VGA monitor	VGA D-SUB x1		Dual streaming live view
Loss detection	Yes	FTP	Alarm video/audio file storage
Motion detection	Support configurable detection area & sensitivity	HDD	1 sets of 3.5" SATA HDD
Audio input	2 RCA-jack connectors (100m V-2Vrms)	Watch Dog Timer	Yes
Audio Output	1 RCA-jack connectors (up to 2 Vrms)	Remote user	Up to login 6 User
Alarm Input	No	Bandwidth	TCP/IP type dynamic sliding windows control
Alarm Output	No	Remote stations	PC base,smart phone,or PDA
Trigger	Video Loss,Motion	Dimension / Weight	220(W)x190(D)x45(H) mm
Multi-Language	Chinese/English/Japanese/French/Spanish Polish/Russian	Power support	DC 12V
	Turkish/Greek/Portuguese/Korean/Italian/...ODM welcome	Temperature	0°C ~ +45°C
System recovery	Auto power on after power loss recovery	Timer	Built-in real tie clock

KA-6618 (8CH)

OS System	Embedded Linux	Password Security	Multi-level password(3 levels,up to 18 accounts) protection
Compression	H.264 - Video ; ADPCM - audio	RS-485	2-pin for connector for keyboard / PTZ control
Multiplex operation	Simultaneous "Record,Live,Playback,Backup,Control&Remote"	DVD	No

7	MENU /ESC	14	Play / Pause	21	Speaker

NOTE :

The BACKUP function means the COPY function in the DVR setting

7. Function Control Illustration

The Chapter will explain How to use the function of panel button. Please follow the illustration item as below:

MENU/ESC Button:

In the MONITOR mode, press the button to change the viewing mode to the Menu. The “SETTING” mode offers 10 kinds of sub-mode. Please select the sub-mode through the “Control” button. The default selection is “Log In/Out”.

In the SETTING mode, the button function will change to ESC function. If you press the button in the “SETTING” mode, then will go back to the MONITOR mode. The DVR will record all modification automatically.

MODE :

In the MONITOR mode, press this button to select between live mode and playback mode. In some dialogs, this button is used as a miscellaneous function key.

SEQ :

In the MONITOR or PLAYBACK mode, the monitor will go into the full screen auto switch; the default time is 2 seconds. Found on the chapter of “**AUTOSEQ SET**”.

QUAD/CALL:

In the PLAYBACK mode, press this button to switch to “Quad” display or return from full screen display of the focus camera. In some dialogs, this button is used as a miscellaneous function key.

In MONITOR mode, press this button to enter/exit PTZ Control mode function. In the other displays, press this button to escape to the upper level display.

+

In MONITOR or PLAYBACK mode, press these buttons to add the volume.

In PTZ control mode, press these buttons to zoom out the camera.

In MONITOR or PLAYBACK mode, press these buttons to less the volume.

In PTZ control mode, press these buttons to zoom in the camera.

Rec:

The DVR support multiple working. You can view, record, playback and remote control at the same time. The DVR will automaticity record the image on DVR boot finish. Press this button to force manual recording. To stop manual recording, press it again. (REC will be shown on the lower-right corner of the screen if manual recording is ON).

SEARCH/COPY:

Press this button to enter the SEARCH SETTING mode. To search the playback image through different method: Search By Time, Event, Smart Search, Archived Files and POS Search.

In the PLAYBACK mode, press the button to pop-up BACKUP windows to copy the recording image.

Press the STOP button to stop recording image, and then press the LIVE DISPLAY to go back to the MONITOR mode.

F.R/F.F Button

In the PLAYBACK mode the button will support the Fast Rewind and Fast Forward function

PLAY/Pause:

In the PLAYBACK mode of "Play State" or "Rewind State", it can play and pause on the recording image directly.

STOP:

In the PLAYBACK mode, you can press the Stop button anytime to stop the playback image.

MOUSE RIGHT KEY:

You can be click the mouse “right-click” used as MENU/ESC key.

8. The 4 CH Rear Panel (KA-6614)

Hardware Interface

1	CAM Input (1 CH)	9	CAM Input (4 CH)
2	CAM Input (3 CH)	10	Monitor Out
3	Audio Output	11	Audio input (IN2)
4	Audio input (IN1)	12	RJ45 Ethernet Connector
5	VGA Connector		
6	USB Mouse		
7	DC 12 V Power Adapter		
8	CAM Input (2 CH)		

NOTE :

The mouse must set up before the DVR power on.

9. The 4 CH Rear Panel (KA-6714)

Hardware Interface

1	CAM Input (1 ~ 4 CH)	9	RS485 Connector and Alarm 4 in 2 out
2	Audio Output	10	3.5 mm IR Receive
3	Audio input	11	DC 12 V Power Adapter
4	VGA Connector		
5	Power Switch ON/OFF		
6	USB Mouse		
7	Moniter (MAIN OUT)		
8	RJ45 Ethernet Connector		

NOTE :

The mouse must set up before the DVR power on.

6. The 8 CH Rear Panel (KA-6618)

Hardware Interface

1	CAM Input (1 CH~8CH)	9	Alarm 4 in 2 out / RS-485
2	Audio Output	10	IR extend
3	Audio input (IN1~IN2)	11	DC 12 V Power Adapter
4	VGA Connector		
5	Power switch		
6	USB Mouse		
7	Monitor Out		
8	RJ45 Ethernet Connector		

NOTE :

The mouse must set up before the DVR power on.

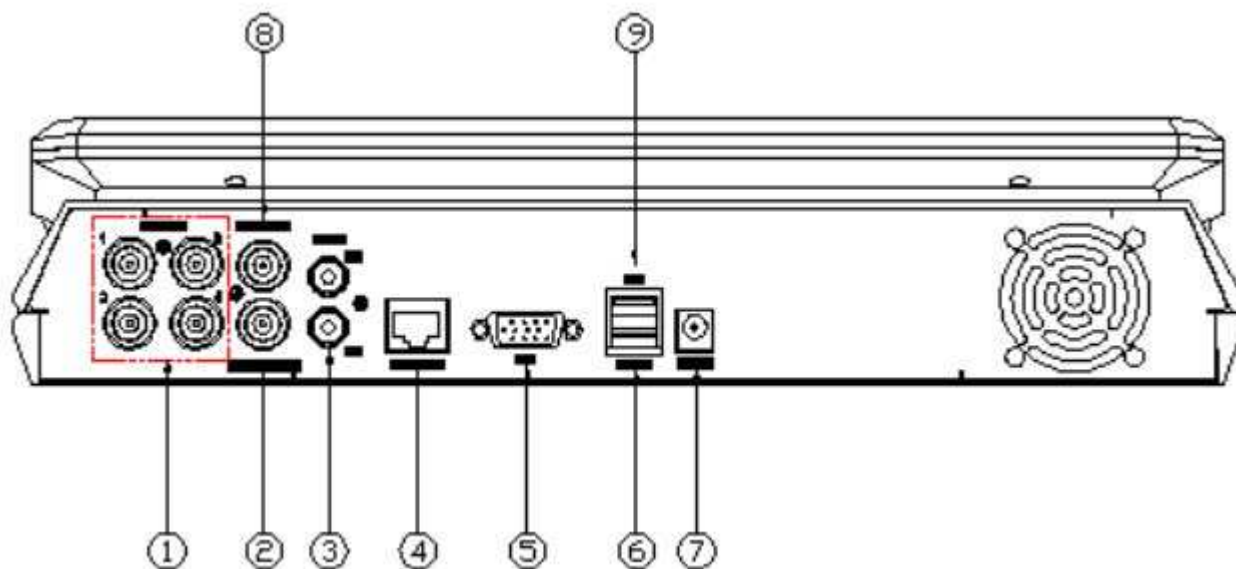

10. Economy 8 CH Rear Panel

Hardware Interface

1	CAM Input (1 ~ 8 CH)	9	RS485 Connector and Alarm 4 in 2 out
2	Audio Output	10	3.5mm IR Receive
3	Audio input	11	DC 12 V Power Adapter
4	VGA Connector		
5	USB Mouse		
6	Power Switch ON/OFF		
7	Moniter (MAIN OUT)		
8	RJ45 Ethernet Connector		

11. The 4 CH Rear Panel (KA-2814)

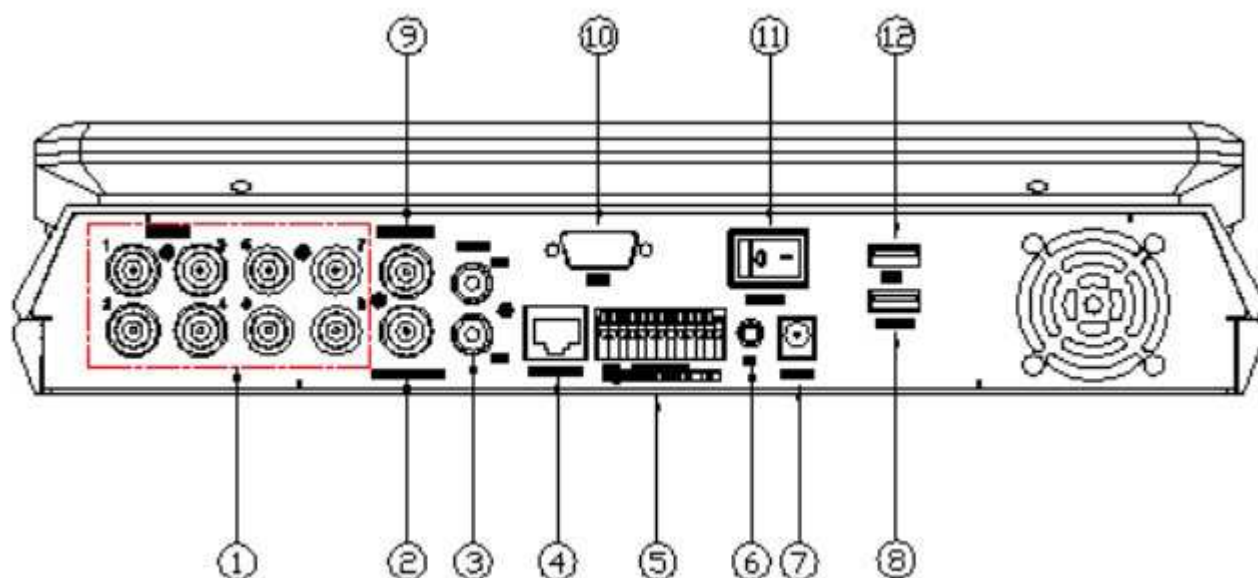

Hardware Interface

1	CAM Input (1 ~4CH)	9	USB Connect
2	Monitor Out		
3	Audio input (IN1) (IN2)		
4	RJ45 Ethernet Connector		
5	VGA Connector		
6	USB Mouse		
7	DC 12 V Power Adapter		
8	Audio Output		

NOTE :

The mouse must set up before the DVR power on.

12. The 8 CH Rear Panel (KA-2818)

Hardware Interface

1	CAM Input (1 ~8CH)	9	Audio Output
2	Monitor Out	10	VGA (Reserve)
3	Audio input (IN1) (IN2)	11	Power Switch ON/OFF
4	RJ45 Ethernet Connector	12	USB Connector
5	RS485 Connector and Alarm 4 in 2 out		
6	3.5mm IR Receive		
7	DC 12 V Power Adapter		
8	USB Mouse		

NOTE :

The mouse must set up before the DVR power on.

13. Image Input and Output

The DVR provides 4CH video input and output.

Video Input

Cameras connect to BNC connectors.

Monitor Output

Connect TV monitors to the BNC connector for main monitor display.

VGA

Connect VGA monitor to the VGA connector for display.

NTSC/PAL Switch

Select NTSC or PAL according to the local TV system.(adjust switch inside the main board)

NOTE :

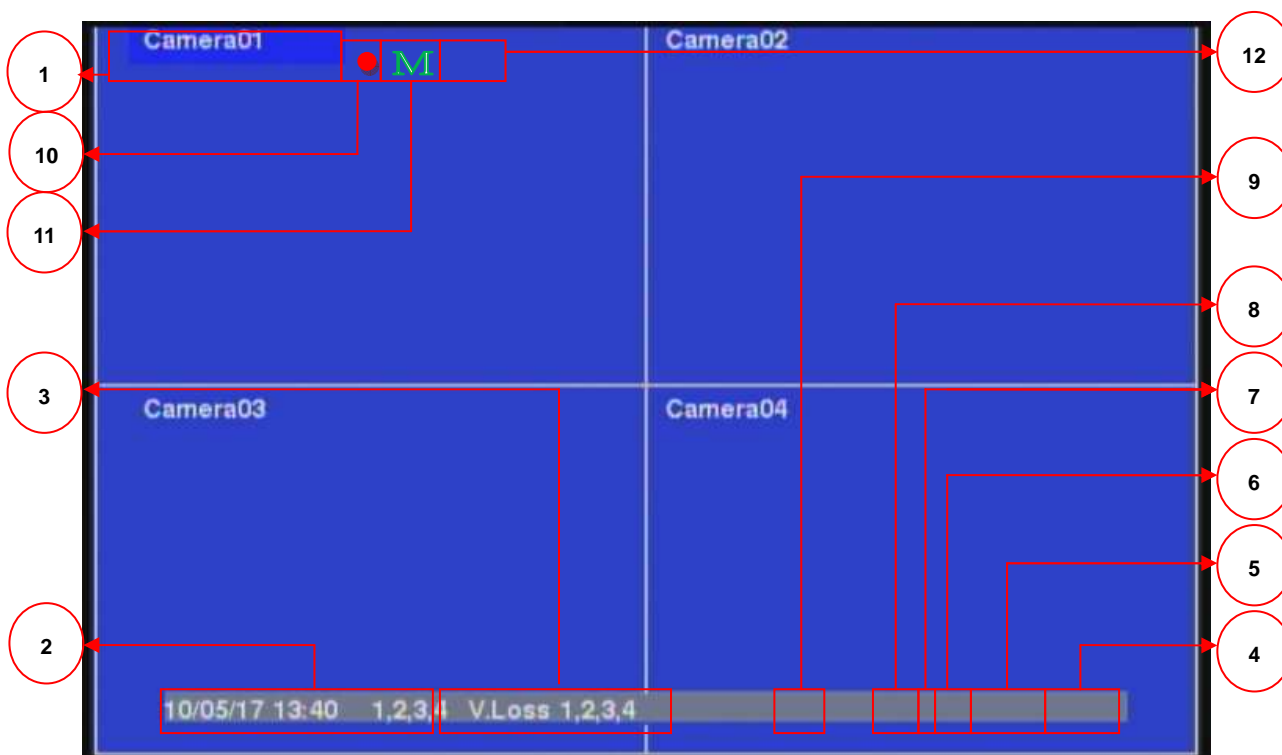

You must select the DVR system before DVR booting. If you want to change the DVR system, please power off the DVR first.

Network

You can view the DVR image through “IE browser” for remote control and remote recording function. Connect this unit to a 10/100Base-T Ethernet network through this port.

14. Monitor Display Illustration

MONITOR Mode

MONITOR Mode Display illustration

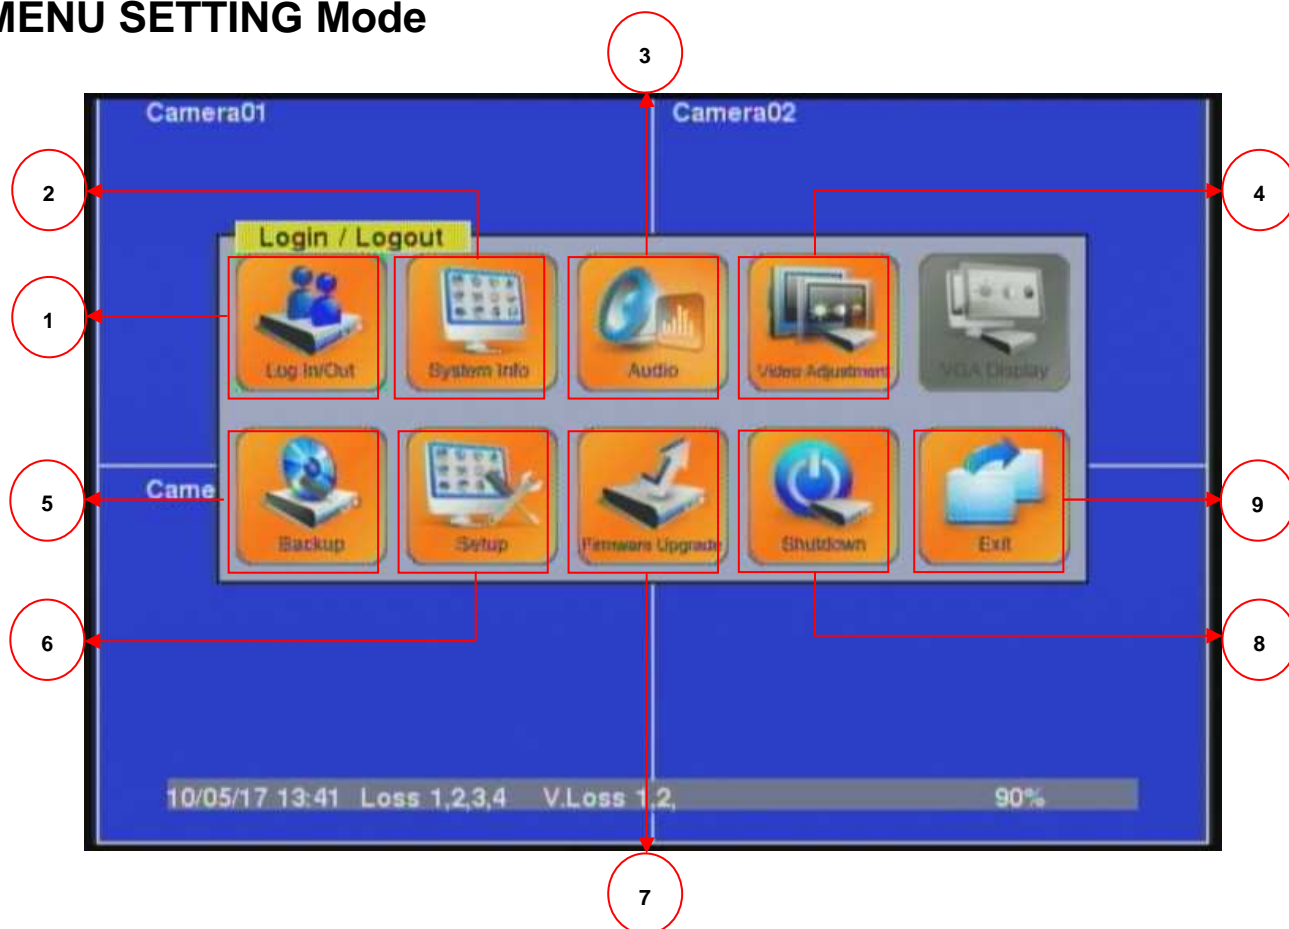

Number	Item	Camera explanation
1	Camera name	Image name of display
2	Date / Time	Show the real time date and time information.
3	Scrolling Banner	It will show the status of motion, alarm, V. loss, HDD and DVR state.
4	Normal Rec Size	Normal recording percentage
5	Alarm Rec Size	Alarm recording percentage
6	Audio	enable the audio function
7	Digital Zoom	enable the digital zoom x2/x4 function
8	Rec	The force manual recording mode
9	SEQ Sign	enable the SEQ function
10	Record Status	Icon means under recording mode
11	Motion Status	Icon means under motion mode
12	Alarm Status	Icon means alarm connection

PLAYBACK Mode

PLAYBACK Mode Display illustration		
Number	Item	Explanation
1	Camera name	The playback recording image name
2	Date / Time	Show the real time date and time information.
3	Scrolling Banner	It will show the status of motion, alarm, V. loss, HDD and DVR state.
4	Normal Rec Size	Normal recording percentage
5	Alarm Rec Size	Alarm recording percentage
6	Audio	Enable the audio function
7	Digital Zoom	Enable the digital Zoom x2/x4
8	Rec	The force manual recording mode
9	Backup State	The backup function mode
10	Playback Sign	Enable all playback functions
11	Date / Time	Show the recording date and time information.

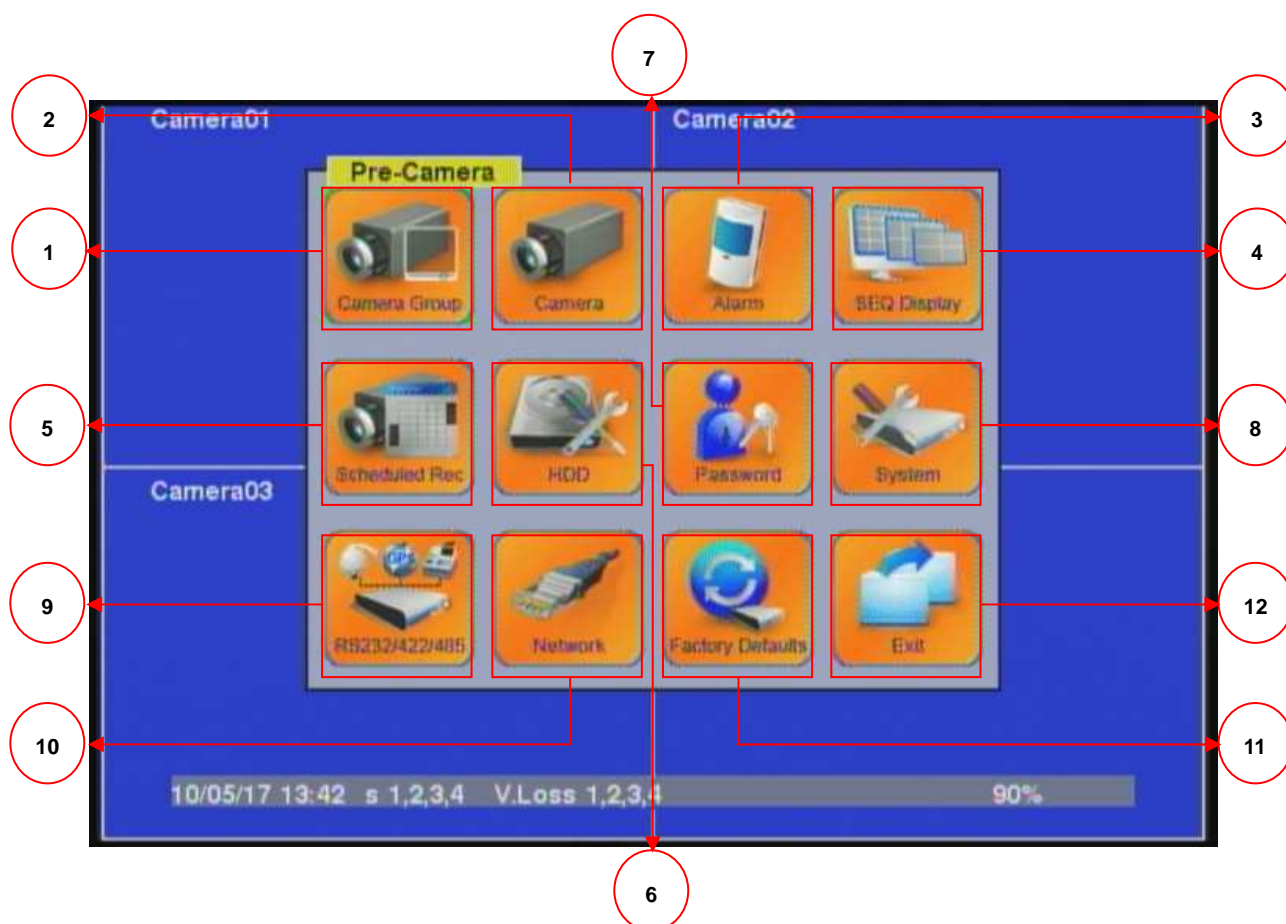

MENU SETTING Mode

MENU SETTING Mode Display illustration

Number	Item	Explanation
1	Log In/Out	Login the DVR through the account
2	System info	Show the DVR system information
3	Video Adjustment	Adjust the camera setting
4	VGA Display	Adjust the VGA setting
5	Backup	Use the backup function
6	Setup	Enter the SETTING Mode
7	Firmware	Update the DVR firmware through USB Flash
8	Shutdown	Power off the DVR
9	Exit	Leave the MENU SETTING mode

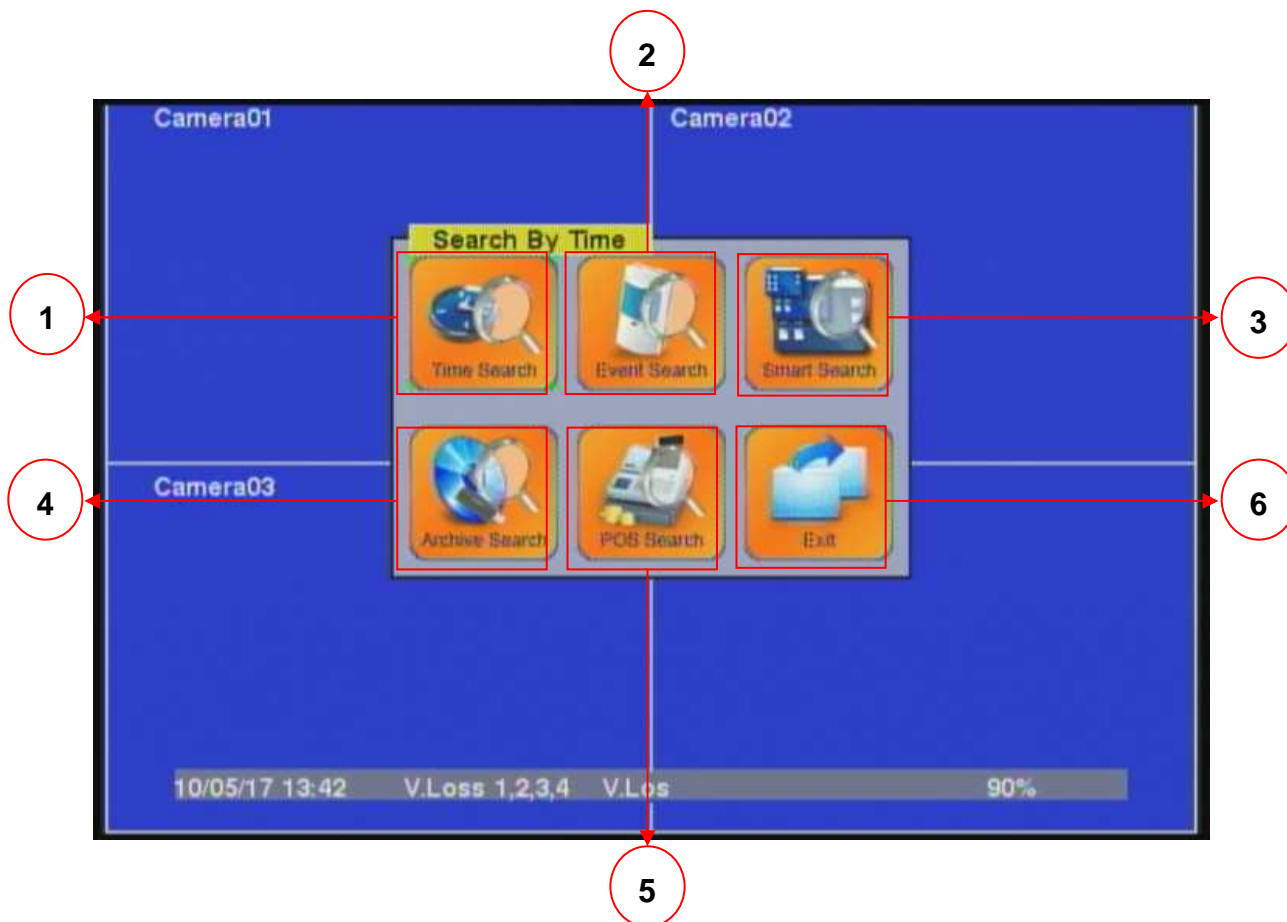

SETUP SETTING Mode

SETUP SETTING Mode Display illustration

Number	Item	Explanation
1	Camera Group	Set up the DVR resolution, PTZ and Watermark
2	Camera	Set up the camera info, motion, quality and fps
3	Alarm	Set up the extra alarm function
4	SEQ Display	Set up the SEQ setting
5	Schedule Rec	Set up the alarm, motion or always recording
6	HDD	Set up the HDD recording and figure
7	Password	Manage the DVR's account
8	System	Set up the DVR time and language
9	RS485	Set up the RS485 figure
10	Network	Set up the IP, DDNS, mail and FTP function
11	Factory Default	Reset DVR default setting
12	Exit	Leave the SETUP SETTING mode

SEARCH Mode

SEARCH Mode Display illustration

Number	Item	Explanation
1	Time Search	Select the date and time to playback recording image
2	Event Search	Select the event to playback recording image
3	Smart Search	Choice the motion area to playback the recording image
4	Archive Search	Search the backup device recording image
5	POS Search	Define the keyword of pos recording data for playback
6	Exit	Leave the SEARCH mode

15. Mouse Control Illustration

When installing and using the mouse interface, the main menu interface will be needed to operate with mouse.

Mouse Control Illustration			
1	Menu	9	PTZ Setup
2	Search	10	Mode
3	ESC	11	Alarm Reset
4	In The PLAYBACK Control	12	Scheduled Record
5	Backup	13	GPS/POS/ OSD Display
6	Split-Window Display (7 mode)	14	X2
7	SEQ	15	Adjust Volume
8	Switch Bar	16	Single Display the camera channel

16. Audio Input and Output

Connect audio IN or OUT devices through RCA interface.

Audio Input

These RCA connectors accept audio signals supplied from external devices.

Audio Output

These connectors supply audio signals to external devices. Recorded audio will be supplied from AUDIO OUT during playback.

NOTE :

The Audio function cannot guarantee power issue. Please notice whether the microphone spec can use or not.

17. Other Interface

The DVR have some application function for User. Please see the illustration as below:

USB Connector (Rear panel)

Connect the USB mouse to this connection.

USB Connector (Front panel)

Connect this port to USB 2.0 compatible storage device, such as USB 2.0 disk drive, DVD+RW, , etc.

PTZ Device:

RS-485 Connector

Connect this connector to RS-485 compatible PTZ camera(s) or keyboard. Please set the Selector Switch correctly.

If must join two pieces PTZ of the above, Need to use the parallel way to join PTZ.

Alarm IN and OUT:

The DVR can work TTL/COMS alarm signal for the LOW & HIGH of potential or the N.O & N.C state.

ALARM INPUT :

Support 4 ch alarm input. The extra device connects one for the alarm input, the other for GND. Connect these connectors to external devices such as sensors or door switches.

ALARM OUTPUT :

Support 2 alarm output. Connect these connectors to 1 Normally Closed (NC) alarm outputs and 1 Normally Open (NO) alarm outputs. Because of the DVR cannot supply any power for extra device, you can connect the power adapter through COM to provide electric power. When alarm trigger, the alarm output will work.

RS-485:

In SETUP SETTING Mode, press **Direct Control** button to change the highlighted option to **RS-485**, and then press **ENTER** to call up RS-485 Setup as shown.

18. DVR Quick Setup Guide:

This quick start guide will help you become familiar with our DVR in a very short time.

How to play basic PLAYBACK function:

In the search menu, select “Search by Time”

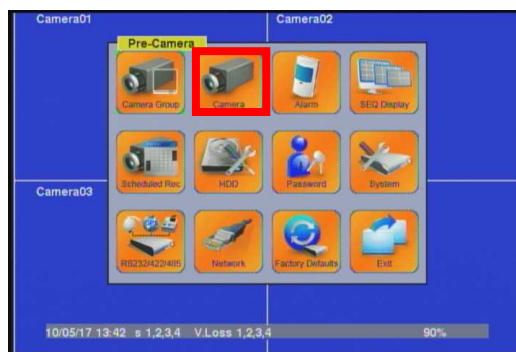

Then set Year, Month, Date, Hour, Minute, execute “PLAY”.

How to quick setup RECORD function:

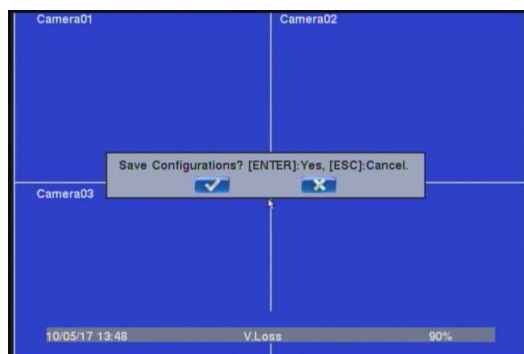

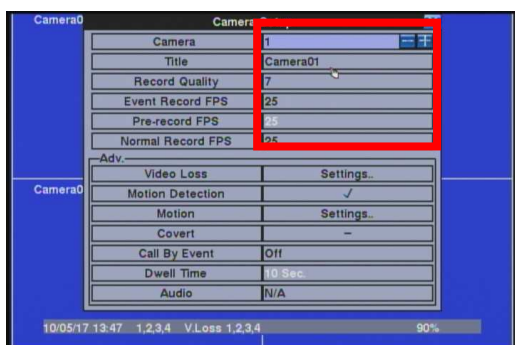

Select “SETUP” of the main menu.

Select “Camera”

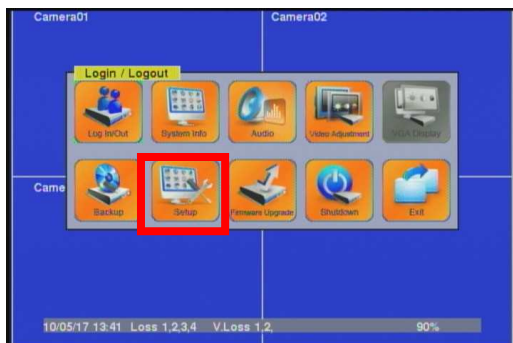

Set each channel of “Title, Record Quality, Record Fps.”

Confirm this setting and save.

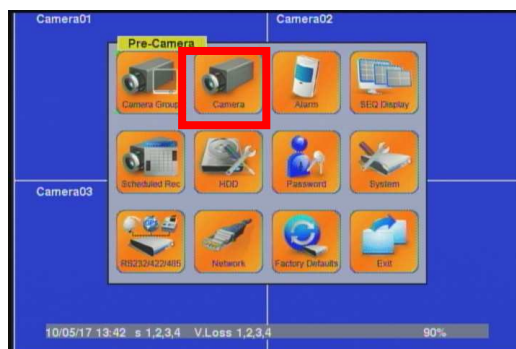

How to setting MOTION function:

Select "SETUP" of the main menu.

Select "Camera"

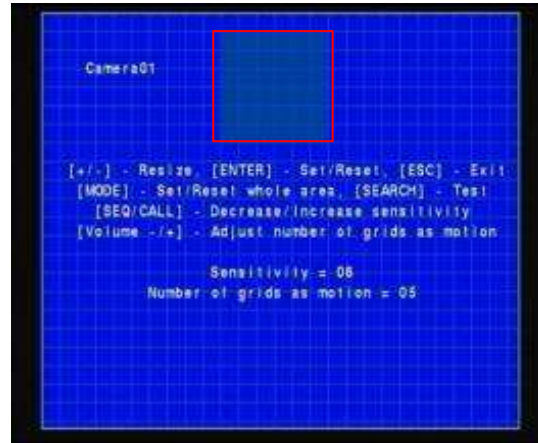

Select Detection to enter the "Settings"

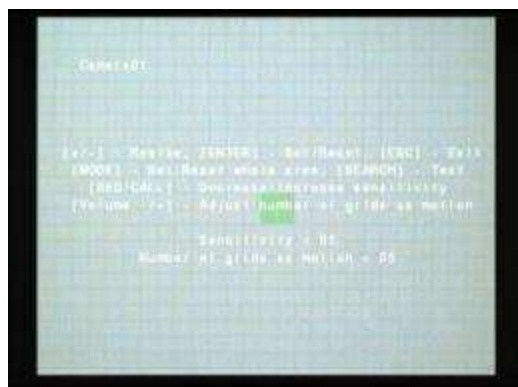

Into Motion mode.

In the Motion mode, press "+/-" button to enlarge or reduce the area.

Press the button to set/reset the whole video area

Press the button to test the motion detection of the camera

Choose the area where you want to displace, Click "ESC" to save this config setup

19. Network:

In SETUP SETTING Mode, press **Direct Control** button to change the highlighted option to **Network**, and then press **ENTER** to call up Network Setup as shown.

The screenshot shows a 'Network Setup' window with tabs for 'Static IP', 'E-mail', 'FTP', and 'Adv.'. The 'Static IP' tab is active, displaying fields for IP Address (192.168.100.100), Net Mask (255.255.255.0), Gateway (0.0.0.0), and DNS (0.0.0.0). Below this is a 'PPPoE' section with fields for Username (87898700@ip.hin) and Password (23726693). At the bottom is a 'DDNS' section with fields for Type (N/A), URL, Username, and Password. The status bar at the bottom shows the date/time (10/05/17 13:52), a value (2,3,4), V.Loss (1,2,3,4), and a percentage (90%).

Net Type	Static IP	E-mail	FTP	Adv.
Static IP				
IP Address	192 . 168 . 100 . 100			
Net Mask	255 . 255 . 255 . 0			
Gateway	0 . 0 . 0 . 0			
DNS	0 . 0 . 0 . 0			
PPPoE				
Username	87898700@ip.hin	Password	23726693	
DDNS				
Type	N/A			
URL				
Username		Password		

10/05/17 13:52 2,3,4 V.Loss 1,2,3,4 V. 90%

The Network Setup allows the administrator to setup all Ethernet network related parameters. Please check with your network administrator to set these parameters correctly.

The general operations are as below:

Direct Control

Press these buttons to select the items.

MENU/ESC

Press this button to escape from this screen, and return to Setup Menu display. If the Save dialog is shown, press **ENTER** to exit and save, **MENU/ESC** to exit without saving.

Following is a brief description for each item and its specific operations:

- **Net Type** – Static IP, PPPoE, or DHCP. DHCP can only be used for intranet (LAN) access, while Static IP and PPPoE can be used for both internet & intranet access. Press **+/-** buttons to change the Net Type.
- **IP Address** – Ethernet IP address for the system. To get the static IP address, please contact your local ISP (Internet Service Provider).

-
- **Net Mask** – Net Mask for the IP address.
 - **Gateway** – Gateway IP address for the system.
 - **DNS** – DNS (Domain Name Server) IP address for the system.
 - **Username** – PPPoE username for the system if PPPoE is used.
 - **Password** – PPPoE password for the system if PPPoE is used.
 - **DDNS Type** – Dynamic, Static, Custom DDNS (Dynamic Domain Name Server) type, etc. Please contact your local DDNS Service Provider to get the DDNS URL, username, and password. Press +/- buttons to change this item.
 - **URL** – the URL (Uniform Resource Locators) for the system if PPPoE is used.
 - **DDNS Username** – DDNS username for the system if PPPoE or Static IP is used.
 - **DDNS Password** – DDNS password for the system if PPPoE or Static IP is used.

NOTE :

If DDNS Type is Free DNS, the URL must be appended with “,hash”, where hash is extracted from the grab URL batch file that is downloaded from freedns.afraid.org

DDNS Application

The DDNS service will provide the function. The domain name corresponds with IP address. But you need to apply for account from DynDns.org website. The DynDns.org website provides the free service to the world's user. This chapter will teach the step by step method, please follows the function illustration as below:

1. Please input the “DynDns.org” website (<http://www.dyndns.com/>) on Internet Explorer then click the “Connect” button.

The screenshot shows the DynDNS website's account creation page. The main page has a yellow header with the DynDNS logo and navigation links. The 'Create Your DynDNS Account' section contains a form with the following fields:

- User Information:**
 - Username:
 - Email Address:
 - Confirm Email Address:
 - Password:
 - Confirm Password:
- About You (optional):**
 - How did you hear about us?
 - Why do you need an account?

Two red arrows originate from the main page. One arrow points from the 'User Information' section to a detailed view of the 'User Information' form on the right. The other arrow points from the 'Terms of Service' section to a detailed view of the 'Terms of Service' on the right. The detailed views show the form fields and the terms of service text in more detail.

Terms of Service

Please read the acceptable use policy (AUP) and accept it prior to creating your account. Also acknowledge that you may only have one (1) free account, and that creation of multiple free accounts will result in the deletion of all of your accounts.

4. NO RESALE OR REBRANDING OF DYNDNS (K) SERVICES

Your right to use the Services is personal to You. You agree not to reproduce, duplicate, copy, sell, trade, or resell, whether by itself or in concert with one or more additional services: (a) any portion of the Services (including Your username); (b) use of the Services; or (c) access to the Services.

Additionally, You agree not to use the Services in a way that: (a) separates the "DynDNS" trademark from the Services (or any portion thereof); (b) obscures the connection between the "DynDNS" trademark and the Services (or any portion thereof); or (c) otherwise rebrands the Services (or any portion thereof) in any way.

☒ I agree to the AUP: ☒

☒ I will only create one (1) free account:

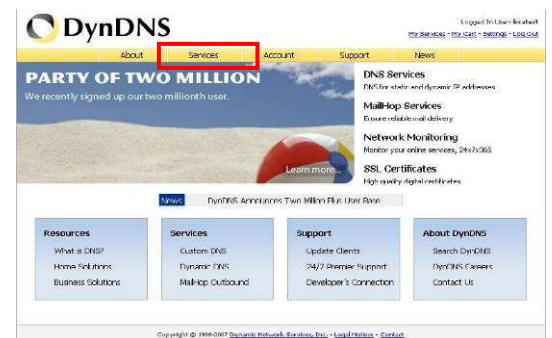

The screenshot shows the DynDNS website's 'Account Created' page. At the top, the DynDNS logo is on the left, and a navigation bar on the right contains links for 'User', 'Pages', 'New Password?', 'Create Account', and 'Login'. Below the navigation bar is a secondary menu with links for 'About', 'Services', 'Account', 'Support', and 'News'. The main heading is 'Account Created'. The text below states: 'Your account, k0a3akeu, has been created. Directions for activating your account have been sent to your email address: j3m3e.v3u3g@k3c3.com.ua. To complete registration, please follow the directions you receive within 48 hours.' A note mentions that a confirmation email will arrive within 5 minutes and that spam filters allow all messages from support@dynDNS.com to be delivered. A 'Search' box is located on the left side of the page.

The screenshot shows the Dynatrace console interface. At the top, there's a navigation bar with the Dynatrace logo and the text "Dynatrace. Instant. Intelligence. Between. Devices." Below this, a message states: "Your Dynatrace Account has been created. You need to verify the credentials and add your email address to complete the account setup." The message includes the account name "Dynatrace User - example@dynatrace.com", the email "example@dynatrace.com", and the password "12345678901234567890". A link "https://www.dynatrace.com/console/your-dynatrace-account" is provided to view the account page. Below the message, there's a section titled "On the next screen, the Dynatrace dashboard will be the first thing of all of your available services." This section lists the services available: "OneClick deployment, Dynatrace SaaS, and the full Dynatrace suite of web, mobile, AIO, on-premises accounts are available for you to explore. You can also explore the full suite of the Dynatrace suite of services on the Dynatrace website. The Dynatrace suite of services is available for you to explore. The Dynatrace suite of services is available for you to explore. The Dynatrace suite of services is available for you to explore." At the bottom, there's a section titled "Access:" which lists "The Dynatrace Tools" and "Dynatrace. Instant. Intelligence. Between. Devices." Below this, there's a note: "This sample has been expanded for dynamic and deployment context to show the account, and is intended to be a first step."

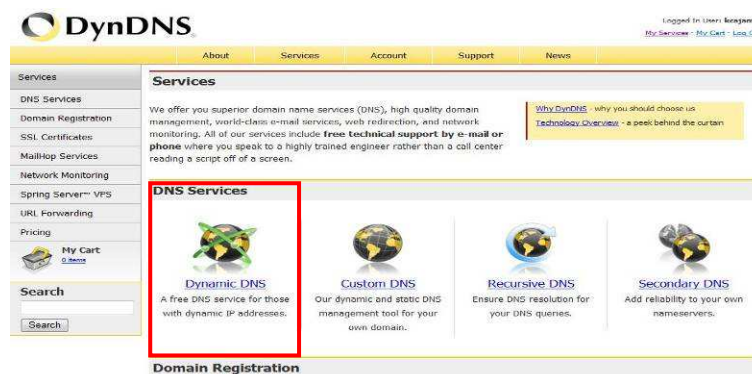

6. Click the red square to finish the creative account.

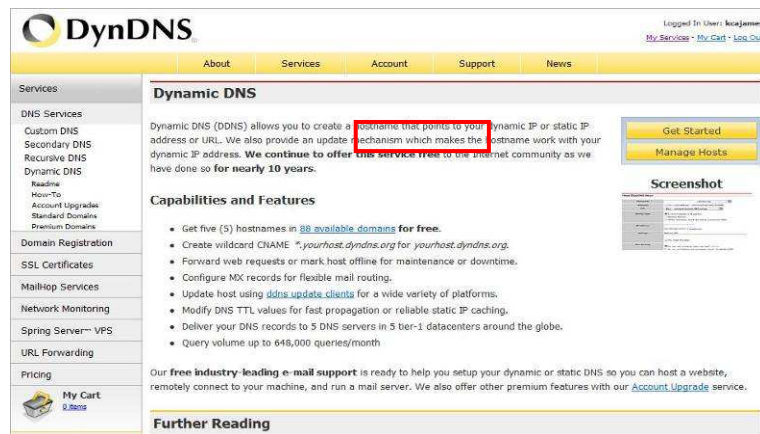

7. You can login to DynDns.org, please input the username and password on main webpage. And click the “Service” button to set up the DDNS function.

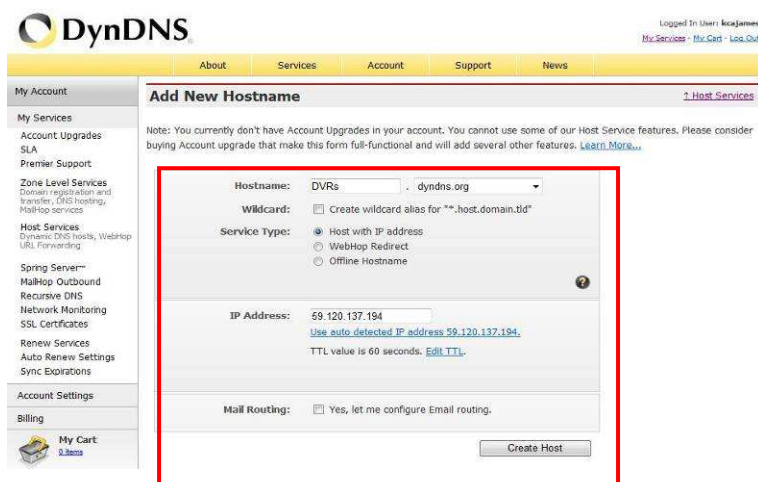

8. Please select the “Dynamic DNS” button.

9. Click the “Get Started” button to add the new Hostname.

10. Set up the “Hostname” and “IP Address” by yourself. You can enter your favor domain name to “Hostname”, and input correct “IP address” to IP Address. Finally, click the “Add Host” to finish the setting.

11. The DDNS information will display on the webpage in the end.

12. Please try to connect to the DVR through domain name.

13. If you cannot connect the DVR through domain name, you can test the DDNS service on your PC.

14. Please open the “command mode” from “**Start Menu**”.

15. Input the command: c:\>ping xxxxx.dyndns.org [ENTER].

NOTE : The “xxxxx” is your domain name.

16.If the command mode display the figure information.
Your DDNS is correct.

```
C:\WINDOWS\system32\cmd.exe
G:\>ping 168.95.1.1

```

E-Mail Setup:

In Network Setup, press **ENTER** to call up E-mail Setup as shown when the highlighted option is **E-mail**.

E-mail Setup	
SMTP Server	msa.hinet.net
SMTP Port	25
Authentication	---
Username	
Password	
Mail From	
Mail To #1	
Mail To #2	
Mail To #3	
Mail To #4	
Mail To #5	
Attachment	N/A

10/05/17 13:52 V.Loss 1,2,3,4 V.Loss 90%

The E-mail Setup allows the administrator to set e-mail related parameters. When an event occurs and E-mail is enabled for the corresponding action, an e-mail will be sent based on the parameters set here. The general operations are as below:

Direct Control

Press these buttons to select the items.

MENU/ESC

Press this button to escape from this screen, and return to Network Setup display. If the Save dialog is shown, press **ENTER** to exit and save, **MENU/ESC** to exit without saving.

Following is a brief description for each item and its specific operations:

- **SMTP Server** – SMTP mail server name.
- **SMTP Port** – the SMTP port for e-mail transmission. The default value is 25.
- **Authentication** – whether the SMTP mail server requires authentication. Press **ENTER** or **+/-** to check/uncheck this item.
- **Username** – username if the SMTP mail server requires authentication.
- **Password** – password if the SMTP mail server requires authentication.
- **Mail From** – the e-mail address of this DVR unit, i.e. the sender of the e-mails originated from the triggered events.
- **Mail To #1-5** – the receivers' e-mail addresses. The system can send the e-mails originated from the triggered events to up to 5 different receivers.

FTP Setup:

In Network Setup, press **ENTER** to call up FTP Setup

FTP Setup	
FTP Server	192.168.1.253
FTP Port	21
Username	admin
Password	admin
Prefix Of Filename	

10/05/17 13:52 4 V.Loss 1,2,3,4 V.Los 90%

The FTP Setup allows the administrator to set FTP related parameters. When an event occurs and FTP is enabled for the action, the recorded video/audio for that event will be sent to the FTP server based on the parameters set here.

The general operations are as below:

Direct Control

Press these buttons to select the items.

MENU/ESC

Press this button to escape from this screen, and return to Network Setup display. If the Save dialog is shown, press **ENTER** to exit and save, **MENU/ESC** to exit without saving.

Following is a brief description for each item and its specific operations:

- **FTP Server** – FTP server web/IP address.
- **FTP Port** – the FTP port. The default value is 21.
- **Username** – username for this DVR unit in the FTP server.
- **Password** – password for this DVR unit in the FTP server.
- **Prefix Of Filename** – the prefix of the filenames for the files sent to the FTP server. If it's

empty, the filenames will be “cam..”; if not, the filenames will be “Prefix-cam..”. For example, if the prefix is “DVR01”, then the filenames will be “DVR01-cam..”.

Advanced Network Setup:

In Network Setup, press **ENTER** to call up Advanced Network Setup as shown when the highlighted option is Advancing function.

Advanced Network Setup	
Control Port	67
Data Port	68
HTTP Port	80
WAP Picture Quality	Normal
Video Stream	Record
DVR Name	
CMS Server URL #1	
CMS Server URL #2	
IP Filter 1	* * * *
IP Filter 2	
IP Filter 3	
IP Filter 4	
MAC Address 00:50:56:6D:00:C7	

10/05/17 13:52 1,2,3,4 V.Loss 1,2,3,4 90%

The Advanced Network Setup allows the administrator to set advanced network parameters. If the user is not familiar with network administration, please **DO NOT** modify the items in this dialog. The general operations are as below:

Direct Control

Press these buttons to select the items.

MENU/ESC

Press this button to escape from this screen, and return to Network Setup display. If the Save dialog is shown, press **ENTER** to exit and save, **MENU/ESC** to exit without saving.

Following is a brief description for each item and its specific operations:

- **Control Port** – the control port for remote access. The default value is **67**.
- **Data Port** – the data port for remote access. The default value is **68**.
- **HTTP Port** – the HTTP (web page) port for remote access. The default value is **80**.

■ **WAP Picture Quality** – the WAP picture quality if WAP access is supported for the DVR. Press +/- buttons to change the value.

■ **IP Filter #1-4** – the IP filters #1-4 for remote access. Only those PCs with IP addresses matching one of the IP filters can access the DVR remotely.

NOTE :

If the Control Port or Data Port is not available or accessible during remote access, the system will reset the ports to their default values, i.e. 67/68.

Factory Default:

The DVR can repeat to get the factory default figures through this function. Press the “Direction Control” button to reset the DVR to factory default figure. You also can use the mouse to do it.

NOTE :

When you want to reset the default setting, the DVR will pop-up the confirmation window to check again with customer.

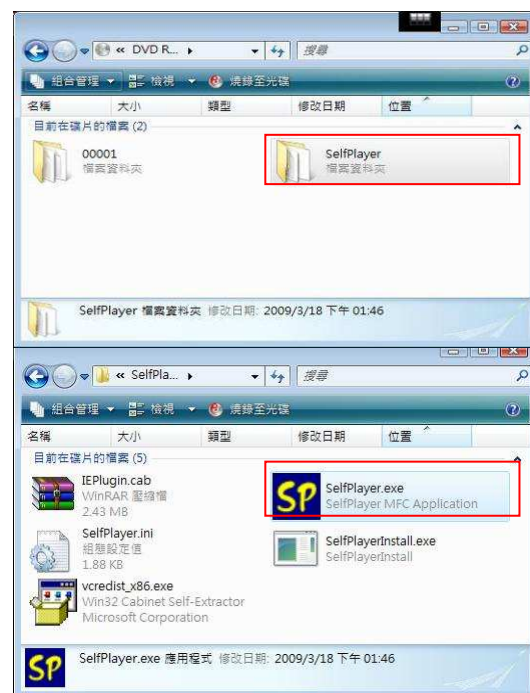

20. USB / DVD Playback

After the backup image finish, the USB flash/DVD will include the “SelfPlayer” software and backup recording image file. You can direct to view the backup image through PC/Laptop. You need to plug the USB flash/DVD into PC, and then open the disk of USB flash/DVD.

Click "SelfPlayer.exe" to execute the DVR software

Click the “File” area then click the “Open” button to select the backup recording file. Open the USB/DVD disk located driver letter. (Example F:). The Backup file default name is the “0001”.

After select the backup recording file,
the DVR will automatically play the image.
Click the channel to display the full image on the monitor

21. Remote view

You can remote view the image of DVR through internet on the world. Just input the IP address or domain name on "I.E Browser". The remote function would support viewing image, playback image and recording image.

System Requirements of Remote PC

It is recommended to access the digital video/audio recorder using a PC that meets the following system requirements.

- **PC**
IBM PC/AT compatible with Intel® Pentium® 4, 1.7 GHz or above CPU.
- **OS**
Microsoft® Windows® XP, Windows® 2000 with SP4, or Windows® Vista.
- **Monitor**
1024 x 768 or above.
- **Memory (DRAM)**
512MB, or 1024MB for Windows® Vista.
- **Web Browser**
Microsoft® Internet Explorer® 6.0 or above.
- **DirectX**
Microsoft® DirectX® 9.0 or above.
- **Others**
Windows XP KB319740 Package if Windows XP SP2 is installed.

DirectX® End-User Runtime 9.0

It has been installed in your PC successfully. If not, please logon to web page to get the free download of it.

NOTE :

Web Page:

<http://www.microsoft.com>

Windows XP KB319740 Package

It has been installed in your PC successfully if the PC is running **Windows XP SP2**. If not, please logon to web page to get the free download of it, or install it from the corresponding directory in the CD. (This package is a bug fix for Windows XP SP2.)

NOTE :

Web Page:

<http://www.microsoft.com/downloads/details.aspx?FamilyId=9B5EDFC8-A4BB-4080-9063-6518166E2DAB&displaylang=en>

The VGA Setting from PC/Laptop

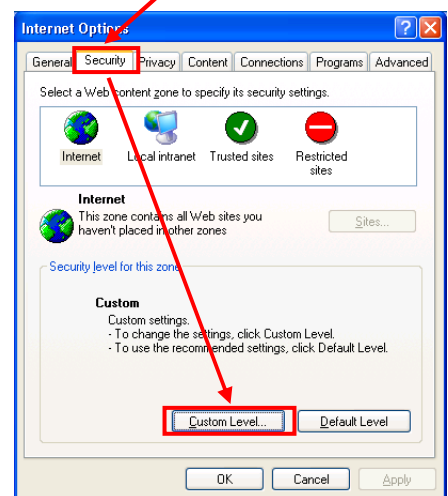

Please go to Start->Setup->Control, select Display->Settings, and set the Screen Resolution to at least 1024x768 and Color to 32-bit.

You need to change the security setting of I.E Browser. Please follow the step by step illustration as below:

Open the I.E Browser → select the “Tools” → “Internet Options”.

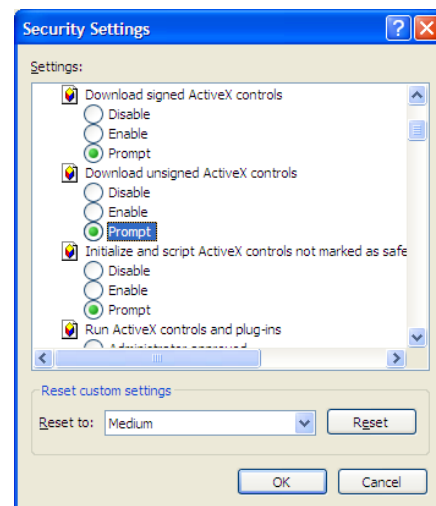

Select the “Security” bookmarker → Custom Level→ Security Settings→

NOTE :

The domain name or IP address of the digital video/audio recorder has been set as trusted web site in your PC, and the (https:) server verification for trusted web site is unchecked. If not, please go to Tools->Options->Security in your I.E. to do the settings. For I.E. 7, please set the Security level for this zone to Low.

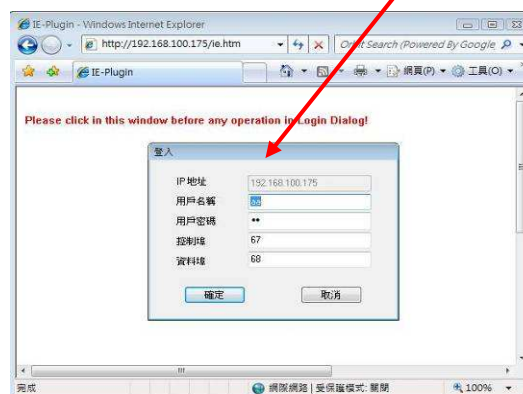

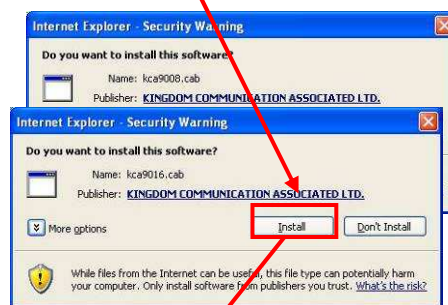

Enabled or Prompt the selection of Download unsigned ActiveX controls, and then click the “OK” button to leave setting.

Open the I.E Browser and input the IP address or domain name of DVR. Press the “connect” button.

The I.E Browser will pop-up the window, please click the “Install” button to set up the software of ActiveX. After install finish, the Internet Explorer pop-up the window again. Please input the user name and password to enter the network viewing mode.

NOTE :

The default username is “abc”. However, the default password is “123”. The account is the same the DVR account

After the above-mentioned items have been done correctly, restart your web browser and enter the domain name or IP address (EX. <http://192.168.1.100> if HTTP port is 80, or <http://192.168.1.100:800> if HTTP port is 800) of the digital video/audio recorder in the Location/Address field of the web browser. The plug-in software in the system will be downloaded and run automatically in the web browser.

NOTE :

Please note that up to 8 users can logon this DVR simultaneously.

The video images can be displayed in several types of split-window screens, including 1/4/9/16-Window for single DVR and 25/36/49/64 for multiple DVRs. And the focus window is surrounded by a frame border. In addition to the video windows, there are different icons on the lower corner and the right corner of the screen for status display and control.

NOTE :

The “.L” following the camera title stands for Live display, “.P” for Playback, and the camera title with white background has detected motion.

NOTE :

The frame rate is limited by the bandwidth of the network and the pre-record IPS of the camera

The picture quality depends on the recording resolution and recording quality of the camera

About the IPS and quality setting please make reference to the chapter of **Camera**.

When the user leaves I.E., you may be asked to save changes to files, please click on OK or Yes to save the changes. The operations and descriptions for these icons are as below:

In video window, right-click the mouse button to call up Camera/Playback/Print Dialog. (Left) click on Playback or Camera number to change the window to the corresponding camera and live/playback mode. The user may also click on the “Print” button to print the video to the printer, or “Snapshot” the video.

22. Support GPS / POS

The DVR can support all GPS / POS on the market.

Please reference to the details manual in the CD.

23. Support Hardware List

There are many HDD spec. Please suggest the list to buy the applicable hardware that combine with the DVR. The DVR can support the HDD size until 2TB.

HDD Factory	Type	Size
WD	WD1600AVJS	160 GB
	WD2500AVJS	250 GB
	WD3200AVJS	320 GB
	WD5000AVVS	500 GB
	WD6400AVVS	640 GB
	WD7500AVVS	750 GB
	WD10EVVS	1 TB
Hitachi	HDP725016GLA380	160 GB
	HDP725025GLA380	250 GB
	HDT721032SLA360	320 GB
	HDP725050GLA360	500 GB
	HDT721064SLA360	640 GB
	HDS721075KLA330	750 GB
	HDT721010SLA360	1 TB

NOTE :

The DVR almost support all HDD on the market. The list is the reference data for user.

24. Support USB Flash and DVD List

There are many USB Flash and DVD spec. Please suggest the list to buy the applicable hardware that combine with the DVR.

Type	Format
USB-Storage Enclosures 5.25"	Macpower's Alumni Prefect USB 2.0 - PF-U2MS.
