FORWARD VISION SOLUTIONS LTD
All items are supplied in accordance with our general terms and conditions of business, a copy of which is available on request.

Welcome to Forward Vision Solutions Brochure

Forward Vision Solutions is recognised as one of the UK's most successful audio-visual and video conferencing system integrators and installers. With more than 20 years experience in the audio - visual industry, we have managed a wide range of projects. When it comes to sourcing the right equipment, you'll have plenty of choice whether its:

- Projectors
- Plasma/ LCD Screens
- Interactive Writing Boards
- Video Conferencing/Audio Conferencing
- Room Controls and Audio Equipment
- Office furniture including Rail Systems

Building strong relationships with manufacturers enables us to respond to your needs quickly, by providing quality advice, products and customer care. We have developed an excellent working relationship with many of the worlds leading manufacturers. Having this overview of what the market has to offer enables us to guarantee impartial advice on the right equipment and provide on-site demonstrations when required.

Nothing is more important to us than the image you project. If you look good, we look good. That's why we make a very simple promise to our clients; we'll provide the best - in consultancy, technology and service.

- Training rooms
- Lecture theatres
- Exhibitions
- Seminar rooms
- Receptions
- Meeting Rooms
- Video conferencing Rooms
- Presentation Areas

Forward Vision Solutions has designed and installed many high profile company boardrooms throughout the UK, from the technical specification and configuration of your equipment, to joinery and room design. Our team of professional consultants can advise on how to enhance and complement your presentation environment.

The need for high quality audio visual facilities within any meeting room environments is important. A variety of media options are available and must be catered for, however, the importance of any system installed must be that it remains simple to operate and user friendly.

Does Your Building Comply? Disability Discrimination Act 1995 (DDA)

Part 3 of the Act stipulates: That it is the duty of a service provider to make any reasonable adjustments. A service provider may have to provide an Auxiliary Aid or service, if it would enable (or make it easier for) disabled people to make use of their goods, facilities or services.

Under the Building Regulations 1991 it is a requirement to provide access and facilities for disabled people, particularly 'Aids to Communication'.

Forward Vision Solutions

We can rise to the challenge, if you want to stand out from the crowd, be different; Forward Vision Solutions are able to offer the very latest in knowledge of products, design, and implementation.

And because every client's requirements are different, we will work closely with you to determine the right solution for your needs, budget and environment. We will consult you at every stage; from the initial design to final installation.

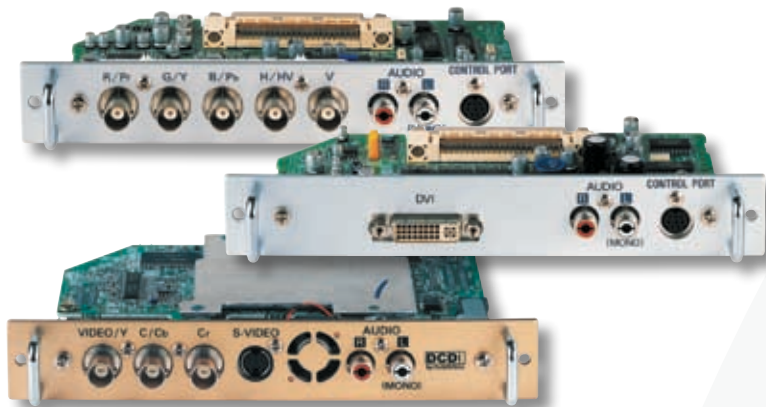

Should your project involve other fields such as electrical, CCTV, aerials, networking and fibre then these are all requirements that our projects team have the knowledge and experience to cater for with just one point of contact. This will reduce the need for you to have to co-ordinate separate companies.

All our engineers are fully trained and accredited, so you can be assured of professional installations that are carried out efficiently and in a cost effective manner with minimal disruption to your business.

If you have the responsibility for Audio Visual equipment, you'll need to give some thought to its maintenance or repair, sooner or later. But there's no need to let it become a headache.

HERE AT FORWARD VISION SOLUTIONS WE HAVE THE ANSWER!!

Our service is fast and efficient; with simple to set up maintenance repair contracts for both installed systems and portable. Or "pay as you go" we have the support package for you.

A preventative Service and Maintenance agreement gives you a cost effective way of extending the life of your equipment, preventing problems before they occur. Our on-site Service and Repair Centre stocks a wide range of spare parts from cables and remotes to lamp units and beyond, to ensure the highest level of after sales care is delivered in a professional friendly manner.

When you are using any equipment supplied by Forward Vision Solutions you are normally facing tight deadlines as well as an audience of busy people. The last thing you need is for your equipment to let you down! To ensure your equipment is always operating at its peak performance we've put together a range of maintenance options designed to give you complete peace of mind. Free technical support comes as standard - and we offer field maintenance and extended warranty contracts, on-site technicians, warranty and out of warranty repairs - indeed anything you might want in terms of post sales support.

To ensure your equipment is always operating at its best performance, the following options are available:

- Preventative maintenance visits
- On-site repair or swap out
- Response times from 4-24 hours
- Internal and External cleaning
- Coverage of all parts and labour subject to the age of the equipment
- Loan Equipment

For those who choose not to take out additional warranty or service cover, we offer a series of maintenance services including; repairs, upgrading and amending control systems such as AMX, Crestron and loan equipment.

NOTE: All contracts exclude damage to equipment through misuse or consumables i.e lamps, cables, and fuses.

Forward Vision Solutions Hire provides time for you to prepare for that important presentation

Whatever your requirements are, from Data Projectors, Plasma Screens to PA Systems, Videoconferencing, Audio conferencing or large conferences/ events, whether requirements are for one day, three days one month or longer, our flexible approach means we can accommodate your needs, and with our close working relationship with the manufacturers provides us with the ability to offer competitive daily, weekly and monthly rates.

Conferences and Events

Organising successful events today requires a host of skills. Including the ability to source the latest products and skilled personnel to work them. With 20 years experience of supplying cutting edge technology for events nationwide we are able to make sure that you create the best impression when communicating with your internal and external customers.

We are able to come up with bespoke ideas for conferences and events and show you how to integrate the latest technologies to create a real WOW factor. We are able to produce conference set graphics and banners to adhere to your corporate guidelines and hire a wide range of equipment from plasma and projectors to PA systems and videoconferencing.

We can either deliver the equipment only or provide full technical hands on support throughout the duration of your event, you choose.

With our nationwide coverage our flexible skilled staff ensure the goods are delivered at your chosen venue the day before the event at no additional costs to you.

SANYO - the UK's Number One Projector brand for the past six consecutive years (Source: Decision Tree Data)

Whether for training and education or annual shareholders meetings, no other manufacturer offers as wide a range of products as SANYO. From widescreen home cinema projectors and mobile presentation systems to high-end fixed installations - SANYO has a projector to suit your needs.

All models draw on SANYO's experience and expertise as one of the world's leading electronics' manufacturers.

SANYO's extensive research and development programme and its reputation for reliability has made the company the first choice for many of the UK's leading organisations and has positioned SANYO as the UK's official number one LCD projector brand for the past five consecutive years. Equipped with the latest features and cutting-edge technology, SANYO projectors are guaranteed to be a very bright investment!

Get the most from your projector assets.

SANYO Network Projectors give a level of flexibility to your business in enabling you to deliver a vast array of presentation content to a variety of different office locations.

Businesses can benefit immensely from a SANYO Projector Network, making life easier whilst increasing office efficiency. When a projector is connected to a network the ability to transfer information becomes incredibly simple - eliminating the stress associated with having to back up and carry important presentations on CD or loading to a USB memory device.

In addition a SANYO networkable projector enables your business to take control of your projector assets and carry out projector maintenance on a pro-active basis. Even via a remote location you can check important features such as lamp life and operating temperature.

There's simply a world of possibilities with SANYO's network solutions!

Let SANYO take away the stress!

To ensure that your company processes run smoothly, your projector should be considered as part of your overall network-regardless of whether it is a fixed installation or ultra-portable business projector.

Just in the same way that an IT manager can remotely 'dial-up' a networked computer a SANYO networked projector can be maintained in exactly the same way, saving time and enabling maintenance to be carried out with greater efficiency.

As one of the world's leading LCD projector manufacturers, SANYO is one of the first to recognise the opportunities of a networked projector solution. Administrators can maintain and configure projectors either over a corporate network or remotely via the internet.

Warnings are automatically displayed and therefore operating issues can be proactively resolved rather than waiting for general operating faults to occur.

Life is made much easier for the presenter too. Thanks to The wireless LAN connection feature between a computer and the projector, you'll be spared the embarrassment and time consuming activity of messing with wire connections before giving that all important presentation, leaving you free to concentrate on the task at hand.

Ultraportable

For presentations on the move you can rely on a SANYO Ultraportable Projector and with brightness as high as 4000 ANSI Lumens; you don't have to sacrifice power for portability. SANYO's Ultraportable Projector range offers easy set up leaving you the freedom to give stylish and effortless presentations without the worry of plugging in cables. These models also have a Wireless/Wired network option.

Portable

SANYO Portable Projectors are versatile enough to be used for a variety of applications and the high brightness makes them ideal for large meetings rooms, conference rooms, training and classrooms. With the exclusive SANYO PJ-NetPlus™ technology you can control a series of projectors via a computer network using the internet. Plus you can send content over the network using the PJ-NetPlus™ option.

Fixed / Large Venue

Manufactured to the very highest standards, SANYO's ground breaking range of Large Venue Projectors offer extremely high levels of brightness designed for a variety of high-end applications. These high quality multimedia projectors deliver superb image quality in order to meet the increasing demand for wider screen presentations in theatres and auditoriums.

Crystal Clear Solutions

Mitsubishi Electric's Visual Information System is a world leading manufacturer of high quality innovative display solutions. It uses the very latest LCD and DLP technology in its comprehensive range of pioneering data/video projectors. No matter what your requirement may be Mitsubishi can supply a product that can integrate seamlessly into your project requirements from projection that will continually provide high quality crystal clear presentation solutions for business retail and the education sector.

Ultra Portables

Mitsubishi's range of cost effective projectors includes both SVGA and XGA options, which provide a portable, bright solution for travelling sales people, businesses with small to medium sized meeting rooms and the education market where cost is an important factor. All ultra portable projectors feature high brightness and contrast ratio levels, good colour reproduction, at least 4000 hours of lamp life and anti theft features. All come with Mitsubishi's fully comprehensive three year loan replacement warranty.

Premium Ultra Portables

Designed as a higher end solution with increased functionality and features, premium ultra portables are suitable for permanent installations within medium to large venues, whilst still being light enough to be moved from room to room. This projector range comes with a number of picture enhancing features including sRGB, ColourEnhancer™ technology and 3D CineView. All improve image quality and colour reproduction for fine detail high quality presentations. Other benefits include a side loading lamp which eliminates the need to remove the projector from its installation position for lamp replacement.

Installation

Mitsubishi's range of high end installation projectors are specifically designed for permanent install within large venues such as conference rooms, lecture theatres or retail applications. Optional lenses ensure that the projector is suitable for most applications, as well as benefiting from a motorized lens and lens shift function. Wireless and networking options are available as well as a range of versatile connections.

With the recent increase in demand and a natural move in the market for widescreen display solutions, Mitsubishi currently offers one of the industries largest choices of highly specified WXGA projectors. These models also ensure total HD compatibilities and future proofing features. All installation projectors produce beautifully clear accurate images and data for superb eye catching presentations.

Mitsubishi's comprehensive range of data/video projectors all come with a three year loan replacement warranty. (Warranty terms for education and home cinema projectors may differ please request full terms and conditions)

SONY

Since its introduction, there has been a lot of interest surrounding high definition. No longer is svga resolution acceptable, xga has become the minimum and now consumers are looking towards even higher resolution. Video Conferencing has now been introduced in high definition; this in turn creates a demand for higher resolution displays and projectors. SONY offer an extensive range of projectors which cover low end education models right up to sxga+ installation models. SONY'S cutting edge bright era technology in the installation range uses inorganic LCD panels to increase the aperture ratio reducing the space between pixels thus creating clearer crisper images.

- Stylish installation projectors that present natural resolution high-resolution images
- Inorganic LCD Panels increase the aperture ratio preventing the chicken wire effect
- A high quality installation projector that delivers crisp natural images and video.

Sony Multimedia Projectors

SONY'S stylish projector features an LCD panel with 3LCD technology and a powerful lamp for accurate image reproduction at brightness of 2100 ANSI lumens. Also, this projector is extremely slim and lightweight. Its stylish body has been designed with rounded edges that fit easily into your hand, making it ideal for applications that require portability. Furthermore, the projector is extremely easy to use, thanks to the Advanced Intelligent Auto Set-up function, which includes Auto Focus and many other convenient functions and features. Stylish, feature-rich, and easy to use, This is ideal for mobile business people who want to stay focused on their presentations, not their equipment.

New C-series Range

Three of the new C-series range models are equipped with SONY AirShot network presentation technology. This unique feature allows presenters to send content from their PC to a projector via a standard RJ45 network connection. The projector can be in a remote location while the presenter has complete control on what the audience is viewing. In addition, an optional projector management tool called Ziris Manage Lite allows the IT or facilities manager to remotely manage and control all network enabled Sony projectors.

Panasonic

Panasonic Plasma

Panasonic Plasmas set a new standard in display technology, at home or in the work place. These high-end displays are available in a range of sizes from smaller 37" and 42" displays to larger than life 50" and 65" wide screen models. Panasonic are aware of the impact of ambient lighting on the quality of flat panel display images and have engineered their displays to eliminate this obstacle. Utilising high brightness and contrast ratios, Panasonic plasmas deliver exceptional image quality under any room lighting conditions. Panasonic plasmas display billions of colours and up to 2048 shades of graduation. These subtleties help create more realistic images with bolder primary colours and more life like skin tones. A host of Panasonic Imaging technologies combine to achieve the industry's highest graduation and outstanding 10,000:1 contrast ratio on the smaller sized displays. Fan-less operation also ensures that ambient noise does not affect your viewing experience. For customisable installations vertical Mounting is available along with either black or silver bezels.

All Panasonic series 9 plasma displays are supplied with a 2 year on-site warranty. All Panasonic plasma display prices exclude terminal boards.

SAMSUNG

Samsung - LCD

The Samsung range of LCD displays represents the ultimate in flexibility, picture quality and style. These incredible displays contain every feature you could expect from the industry leading LCD manufacturer and is available in a wide range of sizes to suit your every need. In addition to these great features, 4:3 or wide screen viewing is possible with selected models depending on your viewing preference. Extremely clear and responsive image quality is combined with stylish and practical design that ensures comfort and portability. Samsung LCDs are ergonomically designed and easy to use, with an innovative power saving system. For custom installations the displays can be wall or arm mounted.

The Samsung range of LCD screens are supplied in a wide variety of sizes and aspect ratios from 17" to 46". All have a 1 year swap out warranty.

Samsung - Plasma

Samsung plasma displays provide stunning big picture quality executed in an amazingly thin and light form factor. Samsung plasma panel technology is some of the most advanced in the world and includes the latest DNle™ picture enhancement circuitry to allow the ultimate viewing experience. DNle™ improves contrast, white level, picture detail and incorporates digital noise reduction to improve lower quality video. Fan less ventilation eliminates high noise output, whilst also preventing picture distortion often associated with fan ventilation plasma displays. An ongoing problem with conventional plasma displays is image burn in. This occurs when a single image is displayed continuously on the screen over a long period of time. The result is burn in of the image into the screen itself, thus degrading viewing. Samsung plasma displays incorporate auto pixel shift technology. The picture automatically shifts by 1 pixel in all directions every second, non visible to the naked eye, thus preventing burn in.

Samsung supply plasma screens in 42, 50 and 63" screen sizes. All screens come with a 2 year swap out warranty.

Mitsubishi's range of LCD displays has been designed to suit all digital signage applications within retail environments, public information points, reception areas and meeting rooms. The range includes 32", 37", 42", and 46" options that all produce high definition images and come equipped with a host of features including a screen saver function, fast response times, high contrast and high brightness levels. All can be viewed in either a landscape or portrait for impressive, maximum input displays.

All are manufactured to the highest quality, and come with a three year warranty providing endless crystal clear images.

SANYO

Weatherproof

Outdoor LCD Panel

There are so many applications that the SANYO Weatherproof LCD panel can be used for including:

- Sports Clubs, Gyms and Swimming Pools.

The SANYO Weatherproof LCD is resistant to problems that moist and humid environments can create, meaning it can be used in a vast range of outdoor public areas. Point-of-information and advertising displays are just two uses.

- Golf Courses, Tennis Courts and Football Stadia.

The SANYO Weatherproof LCD will suit a host of outdoor sport's venues such as golf, tennis, football, rugby and athletics clubs. The unique weather resistant design is fully protected from the elements so there are literally hundreds of outdoor applications.

A+K PADS

Gets to the Point

Digital Signage is all about getting the right message to the right people at the right time. Attracting attention and communicating effectively with your target audience is simple with A+K PADS Digital Signage.

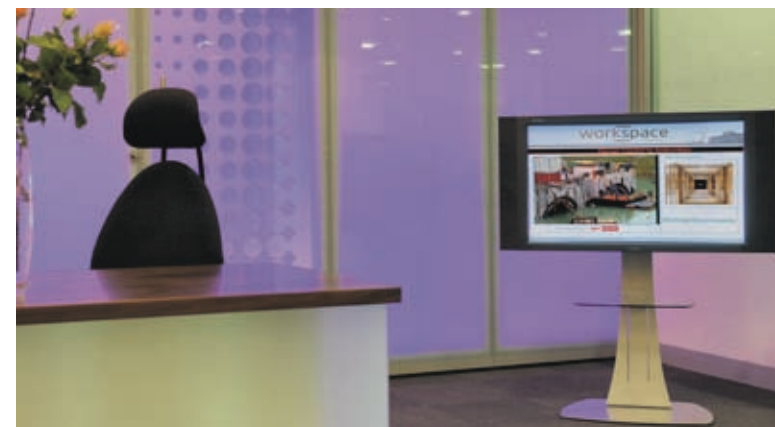

Get the Message...

Setting the standards in Digital Signage technology, A+K PADS software and hardware provides a flexible, intuitive and fully scalable solution which handles all multimedia materials and offers unparalleled functionality as standard.

- Reliable
- Flexible
- Fully Scalable
- Simple to use

Quick to set up and easy to use, A+K PADS allows you to design, create and display all sorts of real-time or multimedia information. Whatever your message and wherever you want it to be seen, A+K PADS provides the perfect Digital Signage solution.

A+K PADS is available as a Standalone or Networked solution, as a Software only option and has no restrictions associated with set layouts so you can design the screen to reflect exact requirements.

Use A+K PADS to:

- Welcome
- Communicate
- Engage
- Involve
- Educate
- Motivate
- Inform
- Advertise
- Update
- Announce
- Direct

A+K PADS Software Only

The most cost effective way to introduce A+K PADS into your working environment is with A+K's software only option which allows customers to use A+K PADS in conjunction with existing hardware.

A+K PADS 3.1 Standalone

A+K PADS 3.1 Standalone is our response to extensive requests in the market for a simple, yet powerful solution for a small digital signage application. It is a market entry package for digital signage in locations with only one public display, combining the full capabilities of screen design with the functionality for displaying presentations. Together with a PC and a display the software gives you a state-of-the-art solution for displaying dynamic information. A+K PADS 3.1 Standalone is an easy to use but extremely powerful solution. Providing an ideal entry-level solution the Standalone system allows the user to create and display all sorts of real-time or multimedia information.

A+K PADS 3.1 Professional

A+K PADS 3.1 Professional is not just another digital signage product. With applications for designing, scheduling, distribution, displaying and analysing any type of content including real-time data, A+K PADS Professional is THE solution for every environment where you want to make information publicly available.

Polycom

Founded in 1990, PolyCom is the only company today delivering end-to-end rich media collaborative applications for voice, video, data and the web from desktop and mobile personal systems to room systems to the network core. PolyCom's vision is to enable people to connect anytime, any place and with any device in a virtual experience as natural as being there.

Our full range of high-quality, easy to deploy, manage and use voice and video communications endpoints, video management software, web conferencing software, multi-network gateways and multipoint conferencing enable organizations of all sizes to increase productivity and agility. PolyCom delivers business value by cutting costs, simplifying system management, fostering real time collaboration and decision making, and improving relationships with employees, customers and partners.

VSX5000 - Set Top

- Ideal for smaller conference spaces and groups.
- Excellent price performance.
- Premium video and audio performance, with essential functions.
- Easily share data with all conference participants.
- Connects to any TV or XGA display, and operated by Polycom universal remote.

Viewfinder VSX7000s - Set Top

- Ideal for medium to large rooms of up to 40 people.
- Incredibly natural imaging using the latest in video technology and standards.
- Embedded speaker and subwoofer for superior audio performance delivering high-quality sound.
- Easily share presentations, movie files, audio clips and pictures during a video conference.
- Versatile, connecting to any TV or XGA display.

Viewfinder VSX8000 Rack Mountable

- Ideal applications include custom-tailored boardrooms, large integrated rooms and auditoriums.
- Slim, sleek form for efficient rack-mount installation.
- Industry's most advanced video technology, Pro-Motion™ offers smooth, natural motion and sharp clear images for outstanding video.
- Industry's best audio Polycom StereoSurround™ delivers crisp, natural voice clarity even when multiple parties are speaking.
- Show high resolution images, movies or presentations in your meeting while also sharing video.

VSX3000 - LCD

- Ideal for the executive office or small meeting space of up to 4 people.
- Conserves desk space with a small footprint and a 17" LCD that doubles as a PC monitor.
- Incredible video using the latest in video technology and standards.
- Superior audio performance with stereo microphones and speakers.
- Easily share data, videos and pictures with all conference participants.

Viewfinder VSX7000e

- Ideal for medium to large rooms of up to 40 people.
- Fits seamlessly with any meeting room, flat panel displays, plasmas and LCD's.
- Industry's most advanced video technology, Pro-Motion™ offers smooth, natural motion and sharp clear images for outstanding video.
- Industry-leading audio capabilities with Polycom StereoSurround™ offering voice clarity during simultaneous conversations.
- Call any standard base conferencing system easily without worrying about audio and video compliance.
- Easily share presentations, movie files, audio clips and pictures during a video conference.
- Versatile, connecting to any TV or XGA display.

Polycom HDX

Video Conferencing quality has increased exponentially over the last couple of years. To comply with the increasing demand for high definition, Polycom now delivers HD video conferencing. The 9000 series HDX codec's allow for high definition conferencing that is arguably more detailed than reality. Polycom have also progressed people and content with the introduction of people on content. This superimposes the presenter on the data being shared thus making the presentation truly interactive. With the 9000 series codec's high resolution, siren 22 audio and people on content, Polycom has raised the bar in video conferencing.

- Video Conferencing at 720p resolution.
- Incredible high resolution presents clear images exposing every detail.
- Siren 22 presents 22khz audio for natural sounding crisp audio.
- The combination of high resolution video and high quality sound delivers the most advanced video conferencing.

Polycom RPX Real Presence Experience

These fully integrated, all inclusive, freestanding, modular environments bring communication to an entirely new level. Each luxurious environment is symmetrically designed for the ultimate optical and acoustic collaboration experience. The design of the Polycom RPX 200 and 400 series systems combine a beautifully designed environment with life size videoconferencing capabilities. With patented EyeConnect techniques for nearly perfect eye to eye contact, close to DVD quality, and with no noticeable audio or video delay, teams can interact productively in real time with colleagues virtually anywhere in the world. By design, the projectors and cameras are discretely hidden the entire environment from floor to ceiling is pre-fabricated and assembled on site. The RPX systems are compatible with any H323 system so you can maximize your existing investment.

SONY Video Conferencing

SONY provides another video conferencing option. The product line has a lot of functionality, looks great and is very competitively priced. Most importantly it is very simple to use. This simplicity is epitomized in the incredible memory stick function. All SONY video conferencing units have a slot for a memory stick. This can be used to back up a system, store conferences and most importantly initiate a call. Simply insert a programmed memory stick into the codec and sit back and prepare to conference as the system automatically dials. SONY provides very intuitive conferencing at incredibly competitive prices.

This is competently covered by the sleek G series; The G50 is a very functional rack mounted codec that can support up to six sites when multi-calling, three monitors and two cameras. It also can be used to stream conferences to remote desktops. The G70 can support eight motors, four cameras including the SONY intelligent face and voice-tracking camera, and is capable of dual streaming.

- Pound for pound, Sony G-series cannot be beat for price and functionality.
- Incredibly easy to use memory stick function.
- A must have for people who want easy affordable conferencing without losing the functionality.

Teleportel

Video conferencing has seen the end of talking heads, poor resolution and the two-dimensional figure. With Teleportel's exciting, cutting edge technology it is now possible to be in two places at the same time. Teleportel transforms your image into a 3-D likeness that will deliver face-to-face contact creating a more natural conferencing experience. This is the closest to meeting in person without actually leaving your office or home.

- Creates a 3D image of the those partaking in the conference.
- The cutting edge mirror technology will transform any codec and display into a three dimensional image.
- You can actually look someone in the eye while conferencing, increasing the natural feeling of the meeting.
- The closest you can come to an actual face to face meeting.

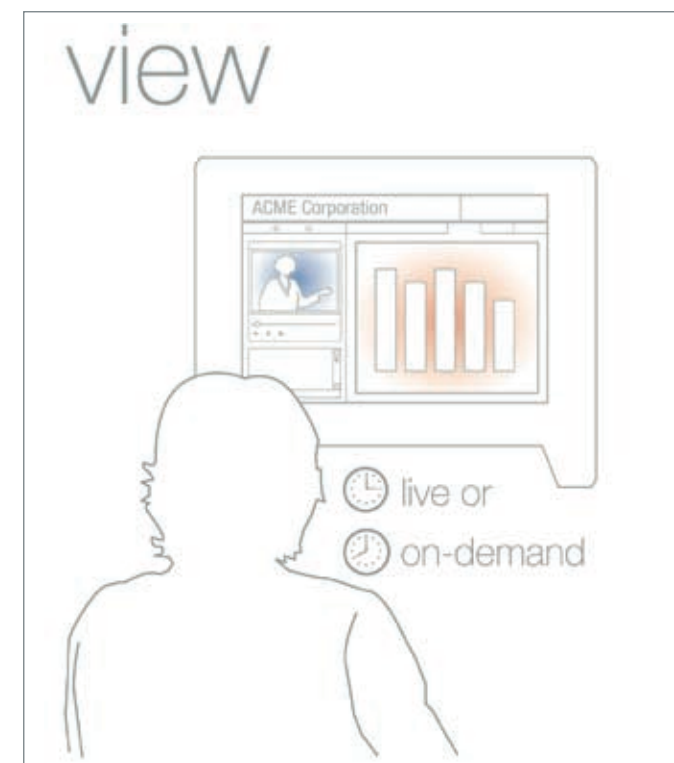

Desktop Conference System

Sony offers the TL range; The TL30 is an all in one desktop conference system. Only functional over IP it offers a 17 inch display with integrated camera and audio. It can also serve as computer monitor, therefore switching between conferencing and desktop could not be easier. The executive version is the TL50; this can be used over ISDN and has a 20-inch display that can be used as a PC monitor or multimedia player.

- Sony offers the most complete desktop range.
- TL30 is the most reasonably priced complete IP only conference solution.
- TL50 doubles up as a multimedia display or complete conference solutions with stylish 20" monitor.
- You can easily switch between conferencing, PC, or watch television while conferencing.

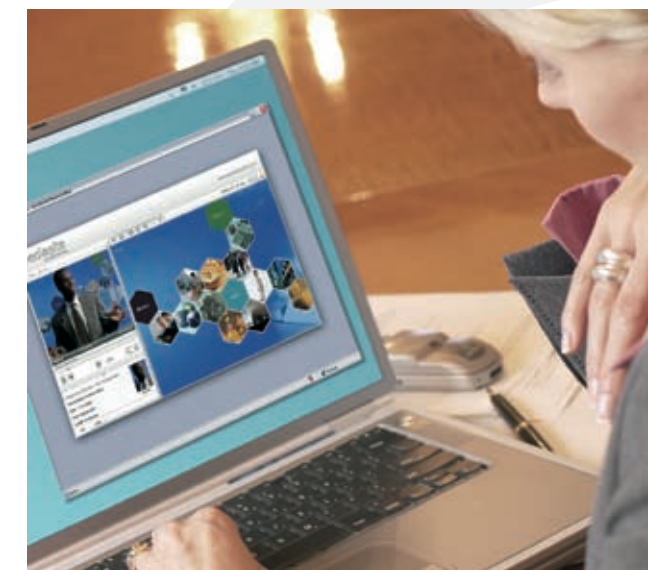

mediasite
by sonicfoundry

Mediasite

Mediasite is a great addition to video conferencing. It is Sonic Foundry's award winning rich media encoding and live streaming solution. This allows users to record presentations, events and video conferences quickly and with great ease. The Rich Media Server software is the Key to the Mediasite experience, enabling you to broadcast live, publish anywhere on the web, organize, secure and catalogue your content. This is the only solution that allows synchronized broadcast/playback of your video, audio and data. You can even edit presentations after they have been recorded. Sonic Foundry offers a rack mountable system and also a portable recorder with integrated 17-inch monitor for mobile applications.

- An excellent extension of Video conferencing
- Users can record presentations and conferences quickly and easily
- Also able to broadcast live and publish anywhere to web.
- A great tool that can immediately deliver information to the people who need it most, great for training or delivering important news.

ClearOne Communications

ClearOne

ClearOne are a communications solutions company that develops and sells audio conferencing systems and other related products for audio, video, and web conferencing applications. The reliability, flexibility, and performance of their extensive range of solutions create a natural communications environment that saves organisations time and money by enabling effective and efficient communication.

Tabletop conferencing - MAX™ Wireless

Interact naturally - without wires in your way on the table or the floor. MAX™ Wireless brings you ClearOne's industry-leading professional audio technology and advanced processing for crisp, clean sound in an easy-to-use conferencing phone. Simply plug in the base unit and start talking. With MAX Wireless you can experience high quality, secure wireless conference calls in your executive office or small conference room.

Easy set up and operation - just plug the base station into a power outlet and analog telephone jack.

150-foot signal range - use in multiple rooms without moving the base station.

12-hour battery life - conduct lengthy conferences without recharging.

Automatic Level Control - automatically adjusts microphone volume levels based on how loudly participants in the local room are talking to improve voice quality for far-end participants.

Automatic Gain Control - automatically adjusts loudspeaker volume based on the incoming audio signal from the far end to provide clear, intelligible audio in the local room.

64-bit encrypted communication - ensures secure conferencing

MAX comes with a single wireless conference phone that can be used anywhere within 150 feet of the base unit. Perfect for use in:

- Small conference rooms - up to 8 people.
- Executive offices.
- Home offices.
- Rooms without phone lines within 150 feet of the base unit.

Premium conferencing - RAV (pronounced rave)

ClearOne's Premium Conferencing products are revolutionary audio conferencing systems that feature the sophisticated audio technologies found in ClearOne's XAP installed product line, and are as easy to set up and use as their tabletop phones.

RAV is a complete, out-of-the-box audio conferencing system that includes an audio mixer, loudspeakers, microphones and a wireless or wired control device. It can be used as a higher-quality alternative to premium and standard conference phones for stand-alone audio conferencing. It also easily connects to common rich-media devices, such as video or Webconferencing systems, for enhanced audio performance.

RAV offers many powerful audio-processing technologies from ClearOne's XAP® product line without the need for complex and costly professional installation and programming. It features Distributed Echo Cancellation®, noise cancellation, microphone gating and a drag-and-drop graphical user interface for easy system set-up, control and management.

POLYCOM®

Polycom

Polycom makes the world's most popular conference phones, with nearly 2 million in use today. There are Polycom phones available to fit every need, from desktops and small offices to large conference rooms. Explore our line up of conference room, desktop, and wireless solutions:

VTX 1000

The SoundStation VTX 1000 enables you to speak naturally from 2 feet to 20 feet away from the microphone, so those on the remote end of the call can hear you clearly - leading to increased productivity, faster decision making, a higher competitive advantage, and much happier conference call participants.

As the world's first high-fidelity, wideband conference phone, the SoundStation VTX 1000 covers the full range of the human speech spectrum, making every voice, word, and syllable crystal clear - you'll think you were all in the same room! It's like going from black-and-white to color TV.

SoundStation 2 Wireless

Now there's a conference phone without cords that gives you the freedom to conference anywhere where team collaboration is important - even in rooms where there are no phone lines. With superior voice quality to the award winning SoundStation, proven 2.4 GHz or 1.9 GHz wireless technology, added security of voice encryption, up to 24 hours of talk time, and the ability to dial through a cell phone, the SoundStation2W is the new standard for everyday conferencing.

Crestron Overview

Simplify and streamline the technology in your boardrooms, conference rooms or throughout the facility. Crestron has evolved far beyond the touch panel and control system, becoming the definitive source for centrally and globally controlling, managing and presenting information. Control and automate the lights, drapes, screens, air conditioning and AV equipment all from an intuitive easy to use touchpanel, remote or custom keypad.

AV Control

Control and source from projector, screen to dvd or sound system all from a intuitive touch panel.

Presentation Tools

Our presentation and collaboration tools make multi media presentations and remote meetings simple and professional.

Remote Management

Crestron addresses the needs of the facilities and IT managers seeking to monitor and manage a variety of technologies over a single network. Crestron solutions centralizes control of audio and video devices, security cameras, lighting and HVAC.

Drapes, Shades and Screens

Cant see a presentation due to harsh sunlight, no need to interrupt your presentation at the touch of a button you can lower the drapes and projection screen.

Lighting Control

Crestron brings the most comprehensive line of users interfaces to commercial lighting and dimming control, plus the ability to remotely monitor, manage and control buildings over a standard IP network.

Temperature Control

Temperature settings can be automatically adjusted based on time of day or room usage. If you are working up a sweat as you give your presentation you can change the temperature right from your touch panel.

AMX

AMX simplifies the automation and integration of your audio/video, environmental and communications technologies through intuitive user interfaces.

Command

This is your window into the world of control. AMX Modero Touch Panels display sharp icons, vivid graphics and seamless video. Instantly take control of any integrated piece of audio/video, environmental and communications equipment by simply pressing on-screen command buttons.

Control

The AMX Control System is the catalyst for making control happen throughout your equipment. The controller translates information between touch panels and the connected equipment to obtain the desired results. These could be as simple as controlling a single component or as complex as managing hundreds of integrated devices, all at the touch of a button.

Communication

The AMX Control System is engineered to communicate with any electronic equipment such as cameras, pagers, PDA's, intercoms, video monitors, plasma screens, DVD and VCR players, lighting, thermostats, personal computers and more.

Versatility

As demands have evolved, AMX have developed the most versatile range of Touch Panels with more than 30 different models available in 8 different sizes. Whether a table top or wall mount, wired or wireless, or 4" to 17", standard or widescreen, AMX provides the perfect Touch Panel solution for every need.

AMX Keypads

AMX Keypads complement the clean design and distinctive functionality you have come to depend on with the AMX award-winning Touch Panels.

Available in multiple models, styles, sizes, color and capabilities, they offer similar levels of control but at a much lower price point.

SMART Interactive Whiteboard

People choose the SMART Board interactive whiteboard because it helps energise presentations and motivate learners. In 1991, it was the world's first interactive whiteboard. Today, it is the world's leading interactive whiteboard. Combining the simplicity of a whiteboard with the power of a computer, the SMART Board interactive whiteboard engages students and audiences around the world. The touch-sensitive display connects to your computer and digital projector to show your computer image. You can then control computer applications directly from the display, write notes in digital ink and save your work to share later. Best of all, the full-featured SMART Board interactive whiteboard is incredibly easy to use. If you can use a computer, you can use a SMART Board interactive whiteboard. The key feature of the board is the intuitive use. You can write, erase and perform mouse functions with your finger, a pen or an eraser - you need no proprietary tools. Pick up a pen or the eraser, and the pen tray automatically detects which tool you've selected. Buttons activate the On-Screen Keyboard, right-click and help function. The board is also compatible with all PC applications. You can capture your work to the SMART Board software as a screen shot that you can edit, or save your notes directly into several software applications, including Windows versions of Microsoft PowerPoint, Word and Excel.

SMART In Wall Interactive Whiteboard

With the largest interactive screen size on the market, SMART's in-wall interactive whiteboards transform your ability to share information while blending with your existing décor. These models are installed within a wall, maximising available space while providing the sophistication of a rear-projection system. You can choose between an all-in-one solution that includes a complete projection system or a screen-only model to work with your own projector and mirror setup.

With the SMART Board 600i interactive whiteboard system, the simple push of a button puts you in control of a powerful multimedia environment.

It's never been easier or more convenient to use interactive technology to make corporate presentations more memorable and classroom learning more engaging.

The all-in-one design brings an interactive whiteboard, projector and audio system together. It also addresses all of your technology needs by acting as a central hub for other audiovisual devices. Simply plug a VCR, DVD player or document camera into the extended connection panel and switch between them using the interactive whiteboard's on-screen menu.

Dynamic learning and effective collaboration are literally at your fingertips.

SMART Symposium

Equipped with the same software as SMART Board interactive whiteboards, Symposium interactive pen displays are perfect for presenting to groups large and small. The pen display's interactive screen connects to your computer and shows its image. Using the attached pen, you simply touch the screen to control applications and write notes. With a projector displaying this image on a large presentation screen, your audience can easily follow your annotations and presentations.

SMART Airliner Wireless Slate

With the AirLiner slate you can interact wirelessly with your SMART Board interactive whiteboard or Symposium interactive pen display from 52 feet (16 m) away. The battery-free tethered pen lets you control any software application, write notes and highlight information in digital ink. SMART's AirLiner wireless slate enables you to teach from anywhere and allows students to interact with information from their seats. Multiple slate users can write at the same time as someone using a SMART Board interactive whiteboard.

SMART Expression Multimedia Cabinets

The pre-wired, lockable and mobile Expression Multimedia Cabinet allows you to integrate, secure and share your equipment easily. Now you can control components such as a computer, DVD player, VCR or projector, and enjoy the convenience of one-button start-up and a master volume control. The projector cavity inside the unit both protects your projector and reduces the distance required between it and your screen. The source switch allows you to choose whether your projector displays images from an internal computer or a laptop.

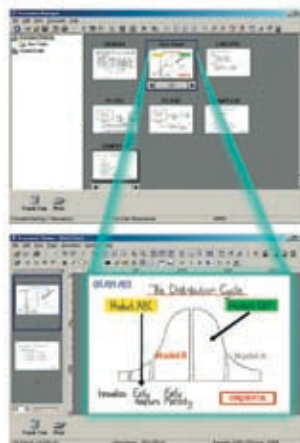

PC Interface

Document Management System

Panaboard UB-5315, UB-5815 and UB-5310 comes with utility software that consists of Document Manager and Document Viewer. The meeting contents on the Panaboard screen will become meeting minutes with some annotation by Document Viewer function. The Document Manager makes it easy to file and distribute the meeting minutes quite easily. Supported saving file format is BMP, TIFF, PNG and PDF.

The scanned image is monochrome.

The annotation function is used to make the coloured text.

Panaboard takes notes instead of you - Improves your presentations and meetings

- All-in-one slim design - no protruding paper tray.
- Panaboards come with an integral printer for easy operation.
- Plain paper printing with multiple copies (except UB-5310).
- Can work as a PC printer.
- Can be controlled from PC.
- Keeps 100% audience attention and increases participation.
- Increases efficiency and reduces meeting time.
- Can be wall-mounted or used with floor-stand option.
- Provides multi-copies, logic control and PC interface.

Printer Driver

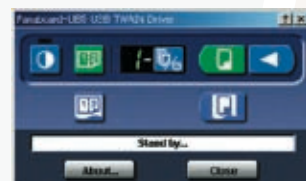

The Panaboard can work as a PC printer.

In a meeting, if you need to print out some documents, the Plug & Play of USB makes it easy to print out documents from the Panaboard.

Twain Driver

By just one click you can scan the image on the Panaboard screen as image data to your computer and from your computer, you can control the Panaboard function just like operating the Panaboard control panel.

Hitachi EM Panel

The interactive pen display is the perfect help for professional, modern and vivid presentations.

- The whole PC control conveniently takes place via the display.
- Intuitive working with the pen directly on the display.
- The pen allows remarks, amendments, accentuations and much more during the presentation.
- The presentation is projected via the data/video projector - teaching or lectures are no longer confined to the usual board dimensions.
- The presenter never stands in the projectors' gleam of light.
- Up to 6 pen displays can be connected to one PC via VGA splitter box and USB-Hub.

KEF

From the beginning KEF was destined to become a company with a flair for the unusual, and controversial in terms of loudspeaker engineering and design. The cornerstone of KEF's 35 year success is quality, honesty and innovation. The company is professional from top to bottom.

Ci50 Soundlight

The Ci Series Ci50 Soundlight System is best suited where high quality background music and speech reinforcement require hi-fi performance. Such as Multi rooms, lounges, Boardrooms and offices. The system comprises of four satellite speakers, dual ported subwoofer, bass unit and passive crossovers for in-ceiling void installations.

Ci series REFERENCE 2000

Ci Reference

The reference series is a true audiophile in wall loudspeaker. The driver configuration is mounted in a 19mm thick baffle, and it is powder coated in a steel fixing frame which is moisture resistant allowing installation into the harshest of environments. The speaker can be mounted either horizontally or vertically and has a 200w power handling capability.

Ci100QR

Ci100QR

This speaker is purpose built for flush mounting into walls and ceilings and provides a true hi-fi quality sound for boardrooms and offices. To conform to architectural specifications the bezel and grill can be painted to match the interior design.

Ci130DS

Ci130DS

The Ci130DS is a 2 way, 3 driver flush mounted speaker with a power handling of 60 watts. The speaker can be wall or ceiling mounted and has a stainless steel bezel and grill. This speaker is best suited for a high quality surround sound system.

Ci160.2FS

Ci160.2FS

This speaker is a flush mounted full range speaker, with a smooth high frequency range and good bass extension. The speaker offers 80w power handling and it is best suited for high quality music and speech reinforcements applications requiring hi-fi performance such as conference rooms, boardrooms and offices.

Ci400

Ci400

This speaker was developed from the award winning KHT2005. The discrete, but aesthetically pleasing cast aluminium enclosure houses a speaker designed to provide ultra wide dispersion and uniform sound quality throughout the listening area. The adjustable ball joint between the cabinet and bracket provide true installation flexibility.

Ci200.2QT

Ci200QT

This speaker is a ceiling mounted speaker with a motorized tilt. There are five preset tilt positions which are triggered from either automatic "music sensing" mode or from a variety on specified control systems. The 2-way speakers have a 100w power handling and is best suited for high end applications.

SENNHEISER

For more than 50 years, the name Sennheiser has stood for top-quality products and tailor-made solutions in all areas of sound recording, transmission and reproduction. Microphones of every kind, RF transmission equipment ranging from vocals microphones to complete systems for musicals, conference and visitor guidance systems, products for the hearing impaired and headsets for aviation - Sennheiser products have become firmly established at the pinnacle of audio technology throughout the world.

Sennheiser Evolution UHF Diversity Wireless Microphone

Handheld, Lapel or Headset Mics

The evolution wireless concept is simple - it means that now there's a cost effective solution for every type of wireless microphone application.

Evolution wireless liberates performers and crew alike from the inconvenience and visual intrusion of microphone cables.

All models in the evolution wireless range share a robust metal construction for years of dependable life on the road.

- Full range of microphones and ceiling mounts, are available including Goose Neck, Table Mount or Ceiling Mount.

Installed sound

The ME 34 is a permanently polarized condenser microphone capsule for use with Sennheiser MZH goosenecks. This cardioid capsule is suitable for a very wide range of applications including: conference, public address, studio, broadcast, video and others. The MZH 3015 is a metal gooseneck for use with the ME 34, ME 35 and ME 36 microphone heads. The rugged, matte black gooseneck is fitted with a balanced, floating XLR-3 output, enabling the microphone to be powered from 12 – 48 V phantom power.

Lavalier Microphones

The MKE 2 P-C is a high-quality, sub-miniature clip-on lavalier microphone which has a multitude of applications where other clip-on microphones prove too obtrusive because of their larger size. It fulfils the most stringent sound quality demands and is extremely robust. It is suitable for both speech and instrument.

ARX ZR SERIES Power Amplifiers

For the ZR series we asked amplifier users, installers and distributors around the world for their input. Their responses have resulted in a range of amplifiers designed from the ground up for the intensive duty cycle that today's standards of production demand: More Power, More Protection, Less weight, Less heat, and most of all better sound.

ARX EQ130

Building on 20 years of EQ design and manufacture, ARX once again redefines the standard for Graphic Equalizers with the all-new EQ130!

Phonic Mixers

The AM Series mixers are compact and versatile with anywhere between 5 and 24 mono Mic/Line and stereo inputs. Ultra low noise pre-amps ensure high quality sound when used in project studios or sound reinforcement. Low-cut filters on mono channels eliminate unwanted sounds like stage rumble, P-pops, wind noise and low frequency recording studio room resonances.

The multi-band EQ on mono channels gives you total control over your mix. The AM series also makes monitoring the mix easy with its dual multi-segment LED level meters and high volume headphone outputs.

Tascam

Utilizing the latest FireWire technology, the Tascam FW-1082 is a complete studio solution with audio I/O, MIDI I/O and a full-featured control surface in one affordable package. Whether you're just starting out or looking to upgrade your hardware, the FW-1082 is an ideal choice for a compact recording system.

All in One PA System

The DS-12RF is a versatile bi-amplified 2 way loudspeaker system which includes an Evolution 100 series receiver and a choice of evolution 100 microphones. An instant PA system with no connecting cables for conferences, presentations, live music and wireless communication links.

The built in amplifier is bi-amplified and capable of delivering 150W RMS to the 12" and 50W RMS to the 1" compression driver.

The DS-12RF includes wireless receiver with level control, line input with level control, mic input with level control, insert jack, line output and master gain level control.

JBL Control1Xtreme

JBL Control1Xtreme are ultra compact monitors with rugged moulded cabinets. Laminate domed tweeters with a poly laminate bass/mid range driver cones. Magnetic shielding for video applications. 125 watt of Power handling.

Australian Monitor AV25/40

The AV series are a range of active 2 way stereo speaker systems ideal for use in small to medium presentation situations and are an excellent alternative to built in plasma speakers. They comprise one active and one passive speaker and include wall brackets for mounting. These high quality speakers are available in black or white.

ONKYO

ONKYO a world leader in the manufacturing of audio components for home and commercial use. Established in 1946 Onkyo have built a brand based on simplicity and quality of product. Their product range covers the full spectrum.

TX8222

Built for those people who value the benefits of time-proven amplification design, the TX-8222 takes core Onkyo technology, and an array of features you'll actually use, to bring you a no-nonsense stereo receiver that will deliver audio and radio signals with agreeable quality.

A9211

High-quality construction and exceptional sonic reproduction never go out of style. That's why our engineers left off the non-essential frills associated with conventional designs, and focused on the important aspects of amplifier design, like a high-current impedance-drive capability, discrete output stages, a large shielded transformer, extruded heat sinks, and multiway binding posts. The result? An integrated amplifier that shines where it really counts - in its sound quality.

TXSR703E

The latest incarnation in one of Onkyo's most well performing receivers - The THX Select2 Certified TX-SR703E looks set to impress at the mid-range. It fronts up with some pretty impressive credentials, like the build quality and quality parts of its predecessor. To support a powerful 130 watts per channel, you'll want a noise-free signal from all your movie and music sources achieved by the inclusion of Onkyo's Vector Linear Shaping Circuitry (VLSC). Also, crossover adjustment from 40 Hz to 200 Hz with 10/20 Hz steps enables you to more accurately create the sonic booms and crashes that enliven home theater and provide a cinematic experience level beyond belief.

Wireless Microphones

The Revolabs Solo Tabletop wireless boundary microphone provides unmatched audio flexibility and performance in conferencing, education and other mission critical applications.

Each wireless microphone uses its own secure communications channel to maximize quality, security and control. The tabletop microphones are available in omni and directional microphone patterns.

The Solo Desktop Wireless Microphone system brings unmatched audio performance to the individual work space. It provides full duplex audio with the freedom of natural mobility.

The Revolab Solo Executive 8 channel wireless microphone system seamlessly mixes with other AV conferencing equipment such as mixers and videoconferencing and can be easily controlled by room control systems. You can choose from wearable, handheld and tabletop microphones.

The system comes in a 4 or 8 microphone format.

The Orbiter

The Orbiter is an exciting new projector mounting solution. Its ingenious design allows the orbiter to fit in small ceiling cavities and is the only lift that can be installed in a angled ceiling, making it uniquely versatile. The lift conceals your projector above the ceiling and quickly rotates it into the show position at the touch of a switch or wireless panel. Orbiter will add a touch of class and sophistication to any room.

The Phantom

The all new and totally unique Phantom is a clever alternative to other projector lifts. It quickly and quietly dips the projector out of the ceiling and into the show position at the touch of a switch. The Phantom is supplied with a universal bracket for easy attachment of a variety of projector models. The mount can also be used to videoconferencing cameras and speakers.

LCD Projector Lift

Most popular projectors fit comfortably inside the ceiling recessed unit. The bomb bay style closure doors are standard. The lift contains an innovative current sensor that delays closing of the unit until the projector fan has shut off. Available in different sizes with different system options. Warranty for one year against defects in materials and workmanship.

Revelation Projector lift

The Draper Revelation permanently conceals the projector and its noise above the ceiling at all times.

You will only see a hinged door in the ceiling which is finished in a white powder coat. The dual first surface mirror system combine to produce a brilliant image from your projector. Available in different sizes and with different system options. Warranty for one year against defects in materials and workmanship.

dnp - Get the perfect image

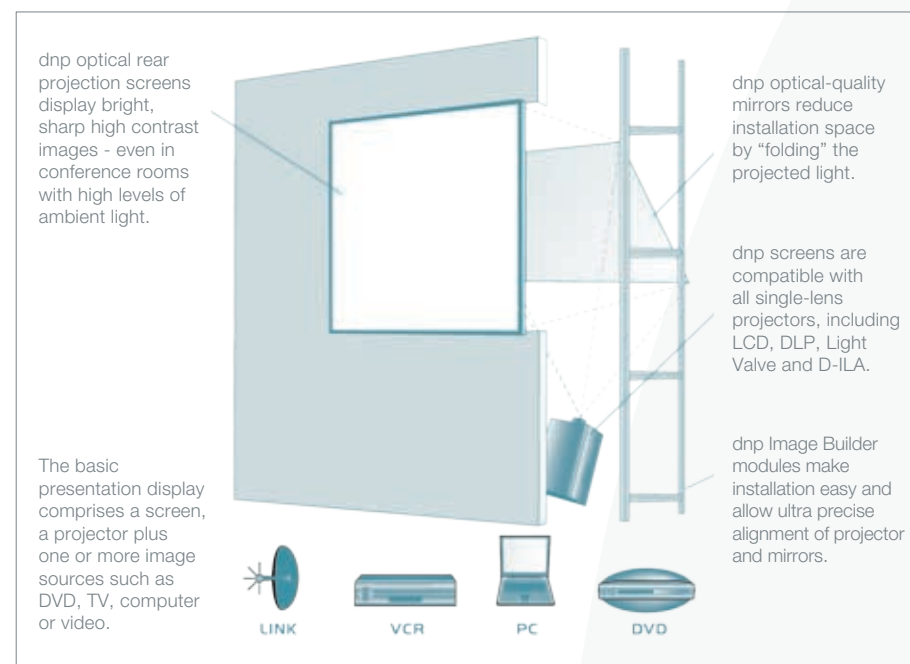

All conference rooms are different. But most of them have one thing in common; the need for a high contrast display.

Today, most architects specify high levels of natural ambient light when they design meeting and conference rooms. This means that the presentation display will be exposed to high levels of ambient light.

The screen is the face of the entire presentation system, though it only represents a small part of the total AV budget. It is where the message is delivered.

dnp offers the world's most complete range of high-contrast screens for conference rooms, which take you to the cutting edge of visual presentation:

- 5-15 times higher contrast level than the best front projection screens.
- Sharp, crisp images in high ambient light.
- No shadows from the presenter.
- No noise from AV equipment.

dnp has developed such a rig system - dnp Image Builder - which is designed to meet almost all of your installation requirements. dnp Image Builder is a complete range of professional rear projection modules, with aligning mirrors and projectors.

All dnp screens have a built-in resolution much higher than any projector or image source on the market today can provide. This ensures that every individual pixel projected by the projector can be clearly perceived on a dnp screen.

dnp - Front projection in high brightness environments

Goodbye darkness. Goodbye window blinds. Say hello to the dnp Optical Front Screen - Supernova™!

With the new dnp Supernova Screen, for the first time ever, you can now successfully use front projection without reducing room light levels. This revolutionary optical screen delivers up to ten times higher contrast and two times brighter images than standard front projection screens.

The dnp Supernova Screen combines the best of both worlds. The superior image quality of optical rear projection with front screens' minimal space requirements and ease of installation. This opens up vast new opportunities for display solutions in brightly-lit environments. Not only in conference rooms, but also for eye-catching point of sale displays and home theatre applications.

- Optical front projection.
- 10 times higher contrast.
- 2 times brighter image.
- Prevents eyestrain.
- Screen sizes up to 120" in 16:9.
- Compatible with all LCD, DLP, and LCOS projectors.

The dnp Supernova Screen is an advanced optical front projection screen. The screen features a revolutionary high-contrast filter, which is based on patent pending technology. Covering 60% of the screen surface, this filter allows the projected image to be reflected from the screen and effectively absorbs incident light from other angles such as windows and room lighting. As a result, the screen is virtually unaffected by ambient light.

Proscreen (Manual Wall)

Easy mounting on wall or ceiling.
Smooth tensioning arm for fast trouble free retracting of projection screen.
Screen fabric is taut because of large slat bar and strong spring mechanism.
Simple pull out system locks at every 20cm.
Black border on all four sides.
Supplied with pull out cord.

138 x 180cm 4;3 aspect ratio
153 x 200cm 4;3 aspect ratio
183 x 240cm 4;3 aspect ratio
213 x 280cm 4;3 aspect ratio

CineFix

Screen fabric is taut thanks to a unique tension spring mechanism.
Plastic sloping matt black cover frame prevents distracting reflection and reduces the amount of shadow on the image.
Permanent mounting on the wall with integrated brackets.

139 x 179cm 4;3 aspect ratio
154 x 199cm 4;3 aspect ratio
169 x 219cm 4;3 aspect ratio

Screens are also available in 1;1 and 16;9 aspect ratio please phone for details.

Compact Electro (Electric)

Easy wall or ceiling mounting.
Compact case with motor.
Automatic stop for extending and retracting guarantees a long life span of the projection fabric black border increases perceived clarity of projected image.

123 x 160cm 4;3 aspect ratio
138 x 180cm 4;3 aspect ratio
153 x 200cm 4;3 aspect ratio
183 x 240cm 4;3 aspect ratio
213 x 280cm 4;3 aspect ratio
228 x 300cm 4;3 aspect ratio

Screens are also available in 1;1 and 16;9 aspect ratio please phone for details.

Stewart
Filmscreen Corporation®

Luxus Model A ElectriScreen

This design is ideal for video production and for multi purpose use including film and graphic presentations. Stewarts motorized roller system provides a quiet reliable screen operation which can be activated by a switch, infrared or remote control. Optimize your screen with a Academy award winning screen material, securely attached using our exclusive Tab -Guy tensioning system designed to ensure a smooth flat image and prevent edge curl. The screens motorized housing may be placed above the ceiling with the screen descending through a small slot.

This screen is available in various formats up to a 180" screen

Luxus 'Model A' ElectriScreen

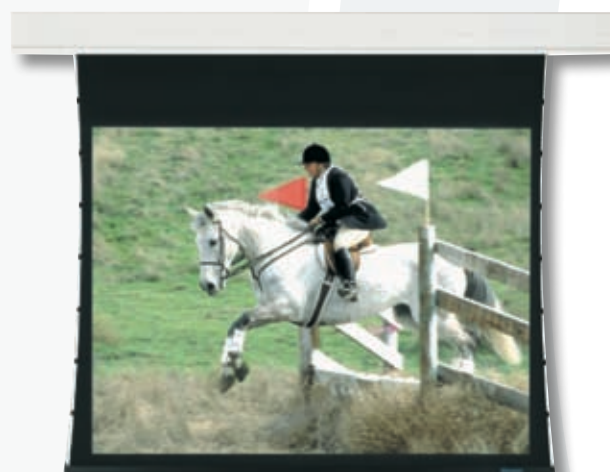

Stealth Trap Door Electriscreen

Stealth Trap Door ElectriScreen

This screen utilizes a technologically advanced electric roll up screen. The screen retracts into a trap door that mount flush with the ceiling surface and can be painted to blend perfectly. The screen incorporates a exclusive Tab-Guy tensioning system designed to ensure a smooth flat image. Stewarts motorized roller system can be activated by a switch infrared or remote control.

This screen is available in various formats up to a 120" screen diagonal.

Visionary Electriscreen

Visionary ElectriScreen

This projection screen is the most innovative and installation friendly screen available. Designed for new construction the case is available to be shipped in advance to speed up the construction process. The Visionary features a self finishing, seamless bottom plate. An ideal choice where the screen needs to disappear when not in use. This screen encompasses Tab - Guy tensioning and can be activated by a switch, Infrared or remote control.

This screen is available in various formats up to 150" screen diagonal.

MovieLux / PortaLite

Mobile floor and table screens. Ideal for professional on-site presentations or home cinema.

MovieLux Portable

Smart, modern alternative to tripod screens with strong aluminium casing and integral carry handle.

Product Code	B103360	B103361	B103362
Size W x H (cm)	90 x 68	120 x 90	160 x 120
Diagonal	45"	60"	72"

MovieLux Mobile

The proven tension technique ensures a comfortable two step folding action, whilst the fitting of wheels and handle facilitates transport.

Product Code	B103370	B103371
Size W x H (cm)	120 x 90	160 x 120
Diagonal	60"	72"

FastFold DL Portable Screens

FastFold projection screens have been renowned in the rental and events industries for years. These indestructible, easy-to-transport projection screens provide years of intensive, trouble-free use. The supply projection screen is attached to the lightweight but extremely stable aluminium frame by means of press studs to guarantee that the screen is always flat and taut. Folds into its own transit case.

Ratio	4:3	4:3	4:3	4:3
Size W x H (cm)	244 x 183	305 x 229	366 x 274	427 x 320
Ratio	1:1	1:1	1:1	1:1
Size W x H (cm)	244 x 244	274 x 274	305 x 305	366 x 366

Picture King Tripod Screen

High quality professional tripod screen able to withstand daily usage, with heavy duty aluminium legs for maximum stability. Also features sturdy keystone bracket, foot controlled tripod unlocking and screen lock to protect the screen surface during transport.

Product Code	B103299	B103300	B103301
Size (cm)	127 x 127	152 x 152	178 x 178
Product Code	B103302	B103303	B103304
Size (cm)	213 x 213	244 x 183	244 x 244

GlassVu™

GlassVu

Crystal clear high resolution screen images in bright daylight conditions.

Designed for use in high ambient light, daytime, outdoor applications and where digital moving images are required to grab attention, convey a message, provide information or simply entertain.

GlassVu applications include; shop windows, in-store POP, Shopping Malls, Pubs and Clubs, Museums, Exhibitions.

The GlassVu range includes MirrorVu, Super Contrast and TransVu a semi Transparent film screen.

Performer Double Sided Easels

Double sided dry wipe surface with fully adjustable A1 flip pad folder. The board tilts and rotates through 360 degrees.

Large 100 x 70cm writing surface clip on pen tray and five locking wheels.

Topline Flipchart

The Topline Flipchart is stable, mobile and functional. It has a white enamelled writing board, magnetic and dry wiped. It offers height adjustment via a gas operated spring, it also offers a removable paper holding device which is adjustable for any hole punch.

Star Performer

As Performer but with gas assisted height adjustment between 170cm and 196cm.

Both drywipe surfaces are steel to accept magnetic material as required.

Compo Range

Available with wood, grey laminate or an enamel drywipe surface. Height adjustable with a universal flipchart clamp.

A+K UK LTD

A+K Commander Lectern

Designed to accommodate all your storage and equipment needs, the A+K Commander Lectern offers a stylish solution in any presentation environment. Manufactured using the highest quality materials in a variety of finishes including Beech, Ash, Oak, Maple, Cherry and Mahogany.

Features:

- Storage compartment
- Lockable doors

A+K Standard Lectern

The A+K Standard Lectern offers a secure and attractive platform for presentations in any environment. Manufactured using the highest quality materials in a variety of finishes including Beech, Ash, Oak, Maple, Cherry and Mahogany.

A+K Viscount Lectern

Combining sufficient work space with minimalist design, the A+K Viscount Lectern offers a stylish alternative to conventionally shaped lecterns. Manufactured using the highest quality materials in a variety of finishes including Beech, Ash, Oak, Maple, Cherry and Mahogany.

Features:

- Pull-out laptop shelf and pedestal base
- PC input panel with audio
- 13 amp socket
- 1m data + data audio+mains cable with IEC in-line plug

Please note: Bespoke Lecterns can be made in a variety of sizes, colours, materials and specifications.

Lightening lecterns

A metallic laminate with a polished stainless steel effect, laminate plinth and top capping. The top feature is a horizontal stand off rail in clear perspex with polished edges. The lectern has a flat top internal shelf for your laptop. The unit is fitted with lockable castors partially concealed by the plinth rail.

Wharton Lectern

Winner of the Platinum Award for Design Excellence this lectern has a rich collaboration of features including electronic height adjustment and a presentation panel to control room lighting and audio visual equipment. The user can also access the internet and LAN direct from the lectern. A built in halogen note light, microphones, pencil rail, two swing out cup holders a keyboard tray with sliding mouse surface and two power outlets.

ILS started to develop out-of-the-box solutions for conducting seminars, lectures, meetings and conferences. We use our many years of experience in servicing the international pro-AV markets, in display technology, in the development of simulation and training software, gaming and Graphical User Interface technology.

We develop and distribute specific digital lecterns with integrated large touch screens and modern PC power: compact floor standing models with marked differences in style and function, offering a choice for any user requirement with pen- and/or finger interaction. Next to the pedestal based models we develop a portable lectern system and a lectern integration module offering the same functionality for mounting in larger wooden lectern and tables as specified by architects.

At ILS you always find a good solution.

We coined the concept of the intelligent lectern and define it as a lectern with integrated PC, a large touch screen and the capability to show more information on its screen to the presenter than on the [projector] output to the audience. An intelligent lectern offers simple switching capability for external notebooks to access the projector, extended and cloned dual display modes and of course includes wiring for 1 or 2 microphones.

We developed the Sho-Q Seminar Planner and Presentation Delivery Support System. This software is specially made for our intelligent lecterns and other large touch screens for quick and easy control. Sho-Q developed a completely new user interface with very advanced intuitive properties:

- The ability to control multiple presentations from and continuity; the presenter views slide, next and previous slide, slide notes and timer.
- Context sensitive media semi-translucent control elements appear only when needed and make view control of embedded media, animations and staged slides intuitive – uncluttered, completely clear and simple.
- The ability to set up an entire seminar of different presenters within a single sho-Q structure for one-touch start of each presentation, the inclusion of automatic intermezzo's between the different speeches to forge a dynamic but consistent continuous information flow and unite the different sessions for the audience.

within the application makes for fast presenter

changes

ILS18P TechPod

This is a solid all-in-one product that has proven itself for several years. Best fit with government training facilities, flight training, medical training, college and university lectures. After closing the access door on the document camera side all systems shut down and are no longer accessible.

ILS17C Lectern Concept: One

Solid and beautiful styles with level integrated 17" touch screen with toughened glass.

Includes pull-out keyboard, trackball, pre-wiring for 2 microphones. VGA input switch for external notebook, generous height electric adjustment.

Power PC1.7GHz, DVD, XP Pro/Vista
Paint colour options. Sho-Q. Touch and go!

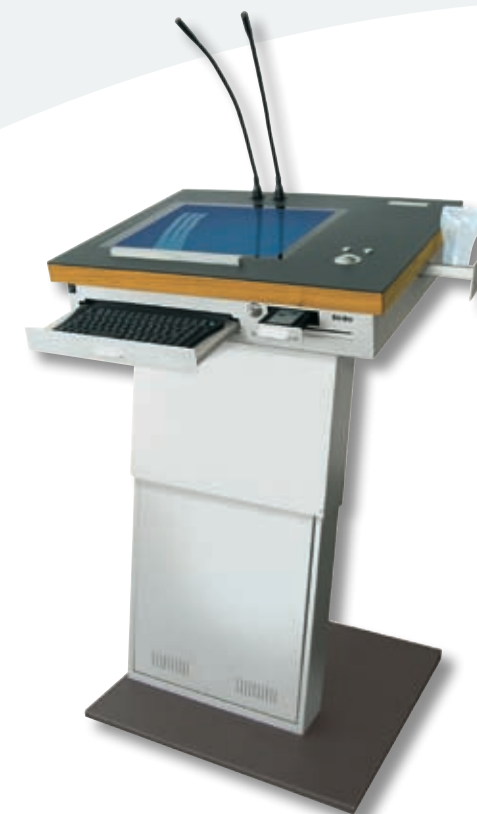

ILS 20S Digilectern Convertible

Unique lectern and kiosk. This product is specially designed for use in conference venues, business centres and hotels. If not in use as a lectern, the ILS20S can double as an interactive kiosk!

Generous electrical height adjustment, switch for external notebook and tray, cup holder and built-in lighting. The big 20.1" touch display uses the "surface acoustic wave" principle for optimal feedback when touching and full display brightness in both positions. The ILS display manager assures that the image is adapted whether lectern or kiosk and maintains touch calibration. Comes with Sho-Q.

Includes 3.4 GHz Pentium PC, Intel m/b, 1GB, 80GB HDD, 4 USB, DVD.

ILS19C Spotlight

The ILS 19C was designed with our Sho-Q software in mind. All functions are integrated in the desktop of the lectern. A big 19" capacitive touch display responds quickly to any touching and feels very comfortable during presentation delivery.

Equipped with the latest Core2Duo Processor, Intel m/b and ATI graphics card. Pre-wired for 2 microphones, card reader, 1GB RAM, 80GB HDD, DVD and 2 x 2 USB front + top.

The desktop can be placed on the standard pillar or other pedestals.

UNICOL®

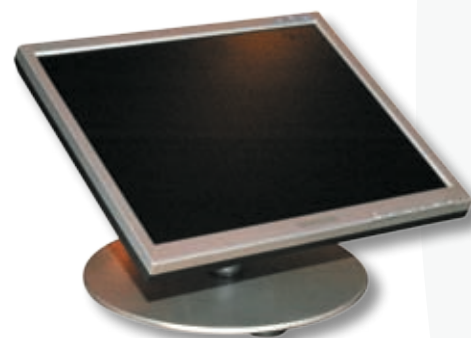

Parabella - High Level

The inspirational stand system for exhibitions and conferences. The slender curving style of these units, give dramatic effect to Plasma or large displays.

Parabella - Low Level

Ideal for Gallery, Museum and Exhibition information or touch screen display.

Desktop LCD Stand

Axia - High Level

Artform in Plasma stand design.

- High quality safety glass
- Neat cable management with mast
- Built-in 4-way power socket
- Video conference options
- Attractive colour finishes
- Available in different heights

VS 1000

- Twin column cantilever design
- Wider range of components available

Axia Plasma Stand

- Graceful and stylish design.
- High quality safety glass shelves.
- Neat cable management within mast.
- Integrated 4-way power socket.
- Video conferencing options.
- Twin screen version available.

LCD Plasma Stands

For Plasma / LCD where the screen needs to be easily moved between low and high positions. These electrically operated mounts allow a Plasma or LCD screen to be raised or lowered using a remote control. For many applications where flexibility in use is required, such as teaching small children utilising interactive screen overlays or working with wheelchair users who need to interact with the screen. Trolley comes with full cable management. Lockable boxes are available for Laptops and DVD's.

For screens with overlays up to 55" Length of powered travel is 600mm.

Avecta

Setting new standards in the design and presentation of professional Plasma and LCD screens to harmonise with the best interiors.

- High quality safety glass
- Neat cable management with mast
- Built-in 4-way power socket
- Video conference options
- Attractive colour finishes
- Available in different heights

LCD TV Stand

- For screens up to 30 inch.
- Mounts available for most makes & models of LCD TV.
- Mains and other cables conceal within column.
- Screen can be tilted for optimum viewing angle.
- Base unit finished in Diamond Silver (Sinterflex Black to order) Column in polished chrome.

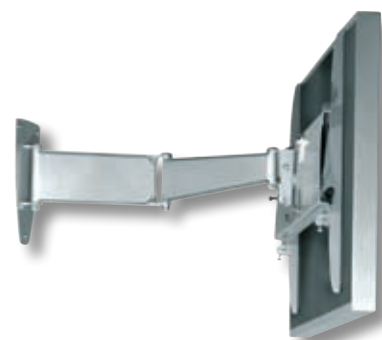

Robust, Versatile and dependable support Equipment.

Slimline Mount

Slimmer than 2.5cm for neat close to the wall appearance. To be used where a tilt is not required.

Double Swing Wall Arm Mount

For LCD TV screens up to 30 inch with VESA or other fixings. This mount allows viewing from any angle.

Single Swing Arm Mount

For screens up to 50 inch. Full swivel adjustment and choice of arm length. Available in black or silver.

PSU Series Mounts for all Single Lens Projectors

This range covers all makes of projectors. Each model is specifically designed for the model listed. A choice of column lengths and ceiling plates and wall brackets are available to suit.

Gyrolock Mount for Projectors up to 12kg

This mount is installation friendly, you can mount any way up, ceiling, wall or base fixable. The Trilok docking system allows you to just twist and lock into position.

Universal Mount with Fingertip Tilt Control

Imagine you could reach out and with a light touch, tilt your screen to the perfect viewing angle. The mounts fit most screens up to 50 inch.

Plasma Screen Lifts

Plasma Lift Inverted

The Future Automation Plasma Lift inverted allows a plasma screen to be stored in a ceiling. Press the remote control and the plasma will drop to view. The kit comes complete with all mounting hardware for the plasma. Suitable for screens between 26" and 50".

Plasma Hinge

The plasma hinge mechanism is ideal for hiding a plasma screen in the ceiling when not in use. It hinges down to a vertical position when viewing. Suitable for screens between 26" and 50" screen size.

abstracta

Plentybord

The versatile presentation system for all office environments. The range include magnetic writing boards, noticeboards and flipcharts. The slim profile is available in natural anodized or white anodized finish as a single rail or combi rail for sliding the projection board over other accessories. The space saving Plentybord system makes your presentation solutions clutter-free.

The base of the Plentybord rail system is the discrete rail with its unique suspension for flipchart papers and posters. All Plentybord products slide in a lateral direction and can easily be moved from one room to another. A wide range of products like flipcharts, whiteboards and projection screens can be used to match the requirements of your meeting. All matching products hang flush to the wall at the same height.

abstracta

Size W x H x D (mm)	1290 x 2000 x 730	1590 x 2000 x 730	2490 x 2000 x 730

NewWave

WorkWall - a mobile divider screen that can be written on wherever and whenever people need to share thoughts and make plans.

It is a simple concept, but the WorkWall has to be light enough to allow easy transfer between locations and yet be rock-steady in its lockdown position to provide a safe and practical focal point for 'hands on' brainstorming sessions.

Each panel is finished in steel and coloured light grey to be used as both a drywipe board and backing for magnetic tiles or clips. Double locking castors provide maximum mobility and flexibility for the work area.

Alternative frame finishes of solid maple or beech are available.

Product Code	B015110	B015111	B015112	B015113
Panel Options	Straight (single)	Straight (double)	Straight (triple)	Straight (hinged) 2 x double
Overall Width	120cm	240cm	360cm	480cm
Product Code	B015120	B015121	B015122	B015123
Panel Options	Radial (single)	Radial (triple)	Radial (four)	Radial (five) 2 x double
Overall Width	120cm	360cm	480cm	600cm

WorkWall

WorkWall may be adapted for use with a variety of size options to meet individual clients' working environments and to integrate the concept into existing work practices and information technologies.

Height of panels 2050 mm + 100 mm castor.

Currently under development is a WorkWall with a 'smart' membrane beneath the surface of the screen that will capture written-on notes for direct transfer to a printer or other down-load application.

Walltalkers

A unique range of wallcoverings to turn your meeting/conference rooms into an “ideas workshop”. No longer be limited by the size and position of your whiteboard.

You can now write on the walls! Brainstorm your ideas on the walls, use magnets to highlight information or even project directly on the wall without getting that glare from traditional wallcoverings. The walltalkers can be installed horizontally, vertically, full wall or in a framed area to give you total flexibility within your room.

The surfaces comes on a roll and can be installed by our skilled craftsmen.

Write on

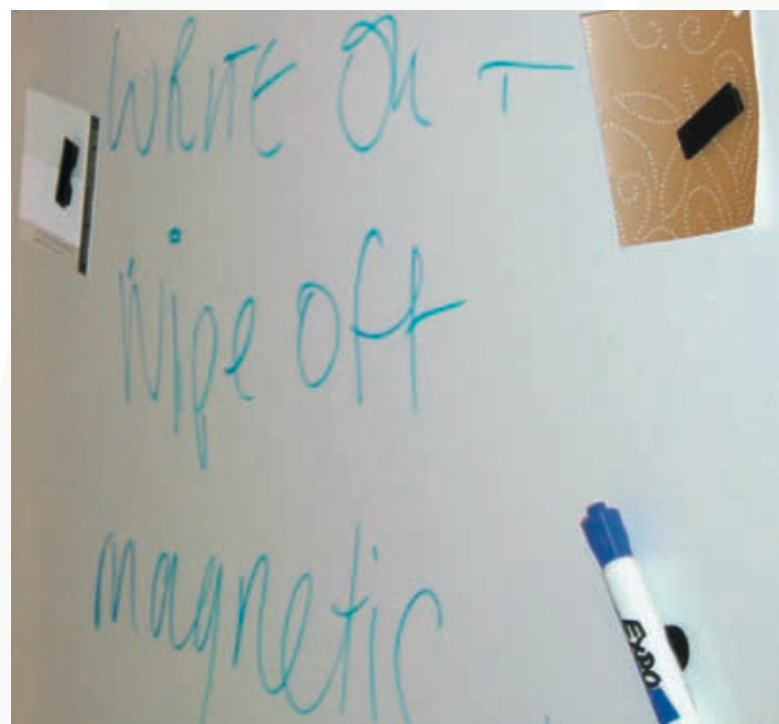

Install Walltalkers like a standard wallcovering, hang horizontally or vertically with Duponts Tedlar coating for maximum cleanability. Economy dry erase optimum write-on only surface. High gloss finish with non woven backing.

Magnetic/Write on

Dry erase write on surface, for use with magnets. The ferrous content is powdered allowing the vinyl to remain flexible.

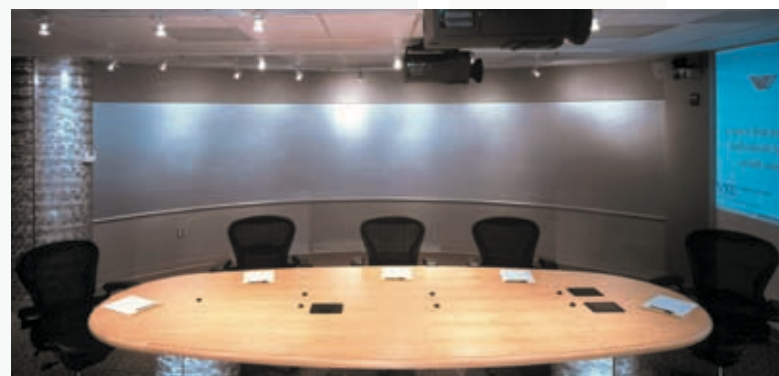

Write on/Project on

Dry erase write on surface which can be used as a projection surface.

Project on

Optimum projection surface. Bidirectional lenticular emboss with approx 8000 reflective surfaces per square cm, allows wide angle viewing with virtually no image fall off.

HoloPro™ Screens

Mount them in frames, windows or for maximum impact suspend the transparent screen in mid-air using thin steel wire and steel balance weights.

Project onto them at an angle of 35° using multi-media projectors mounted either at floor level or in the ceiling to produce clear, sharp, high contrast images that appear ‘out of nowhere’.

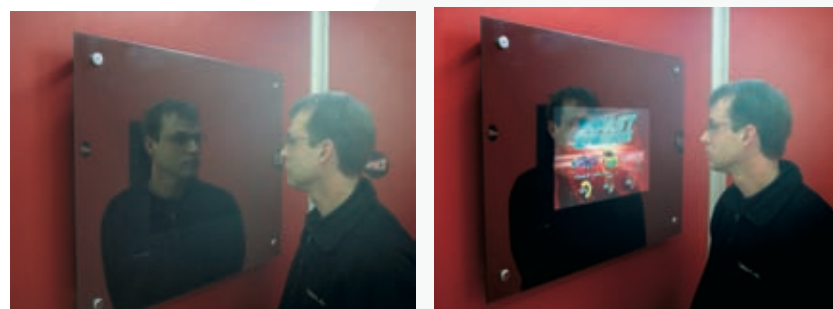

HoloPro™

Dynamic multi-media images from an unseen source for reception, exhibition or retail environments.

PRODISPLAY™ TECHNOLOGIES

Mirror Vision

Pro Display manufactures a exclusive range of wall mounted LCD and Plasma Mirror Vision Screens which gives display technologies a whole new look and feel. The unique technology creates a screen with a difference. When the display is switched on the PC/TV images magically appears through the mirror surface becoming a high resolution screen. When the display device is switched off the screen reverts back to a normal mirror.

Glass Interactive Touch Screens

What makes Pro Displays clear glass interactive touch screens so special that they can be used through glass applications. Imaging turning your store window into a touch screen display. Customers can access information on your products and services 24/7, with the ability to switch the screen clear when you want to see inside your store. For further interaction the use of soundpods on your store windows will turn any glass panel into a loudspeaker.

TRIO Leaflet Dispensers

The striking appearance of this lightweight folding leaflet dispenser will compliment any presentation.

Manufactured from silver anodised aluminium, the three pocket unit weighs only 5.3kg complete with its own zippered transit bag.

Each pocket holds up to 40mm of A4 material. Click frame easy change header panel for personalised greeting or logo.

Leaflet Dispenser

Quick and easy to set up, This lightweight folding leaflet dispenser takes A4 literature. Silver anodised aluminium frame with clear perspex panels. Supplied in padded carry case with shoulder strip.

Busygrip

Multi Information Centre, designed to take A1 posters on both sides as well as dispense relevant literature. Smart silver anodised aluminium frame with chrome corners.

Poster Frame. These quick change poster frames are tamper resistant and protected by a non reflective plastic insert. Simply snap open the 4 edges of the frame to change the content.

Leaflet Dispenser. Displayed literature is accessible from either side, assorted leaflets can be housed up to 6 x A4.

Miniscroll

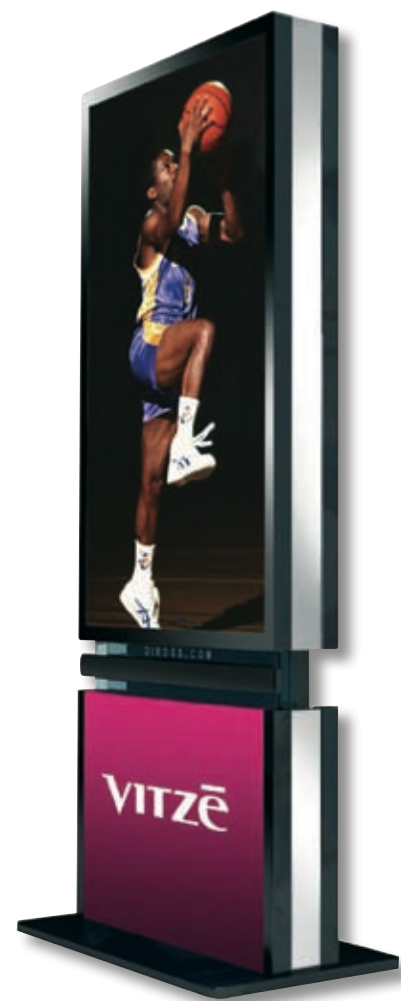

Prestigious covered information, notice, tariff and display boards with polished gold or silver, satin silver and painted finishes. Felt pinboard and PET glazed covers fitted as standard except certificate frames which have card mount fitted.

Options include:

- Grooved board inserts.
- Other sizes, colours.
- Name on case.
- Header plates.
- Lockable lift off covers.
- Letter and number sets.

360 LED Display

This model is designed for retail store advertising, trade shows, exhibitions and reception areas. It features high resolution, high brightness images, with vivid colours and can display up to three different contents arranged vertically or horizontally. The unit has a built in computer system and wireless network and video connections. It comes with wheels and removable handles for better mobility and easy installation. The viewing angle is 360 degrees.

VITZÉ DID Digital Signboard

With its super slim high resolution and high luminance features this display provides distortion free HD images. The screen comes in a variety of sizes from 46" to 82". Content can be inputted and controlled via wireless internet, USB portable hard disk or memory card.

Reception Displays

Vacuum Fluorescent Display technology (VFD) is used as the light source for this stunning range of displays for prestige locations. Ideal for displaying lines of text in page format. Available with blue or green filter.

Digital Point of Sale Display

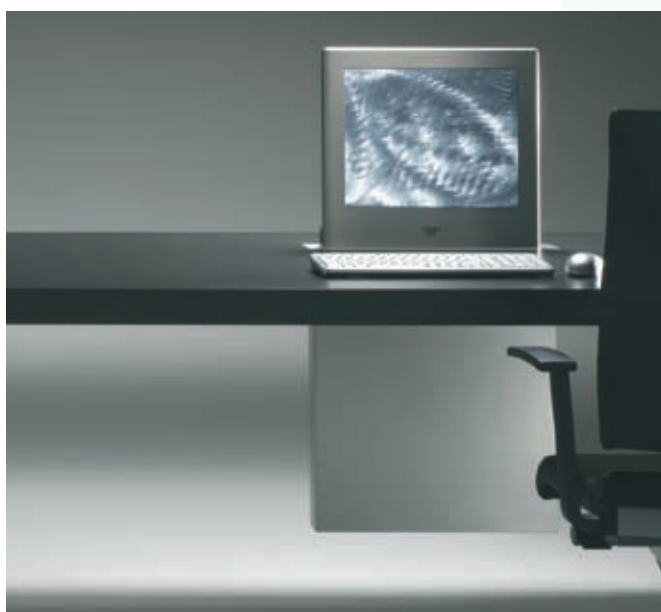

If you are looking to make a real impression on your passing trade, then the answer is here.

You can configure 4, 6, 9 or 12 LCD screens to present data, video or both to your potential customers. This medium can be used to display properties, holiday destinations or the latest cars in your showroom. You can show images independently or on all screens, to give you that cutting edge on the high street.

We are able to supply a range of digital signage products to work on your screens. In order to run information alongside images. You can therefore show special holiday offers, 0% finance deals on your cars or a host of other promotional ideas which you can change at the touch of a button. For more information on the fabulous range of signage options please call the office.

Versis

With the screen facing upwards the monitor is lowered into the desk surface. The keyboard sinks down when the monitor is closed. The monitor is a sleek 17" Samsung 1280 x 1024 monitor.

Convers 170

State of the art integrated monitor systems, impressive and stylish this systems offers the ultimate in sophistication. By pressing the button on the frame the monitor is electrically lowered in/out of the desk surface in a vertical position.

Modis

Both the open and close functions are electrically operated by Modis. The keyboard is raised smoothly when the monitor is opened to reveal a 17" sxga resolution monitor.

Compo

A Swedish range of furniture and mobile presentation equipment designed by Anders Ekegren - architect SIR.

All products are based on a supporting structure of 40mm round vertical tubes with moulded aluminium legs sprayed in aluminium paint RAL 9006. The table tops are available in beech or birch veneers.

The LCD projector platform consists of a stainless steel frame that supports the reversible platform on which the projector is mounted. To use the projector, the reversible platform is flipped 180 degrees and set at the required display angle.

A range of modular tables designed to work alongside the NewWave WorkWall system. Use tables individually or combine three to four in various set-ups depending on your needs. All tables come as flat packs which allows for easy manoeuvring. Choose between Glass, Veneer or Drywipe table tops.

Dictate your brainstorming notes straight to the table with this unique drywipe surface.

- Table top: Maple MFC
- Table legs: Steel RAL9006
- Seating: Rhino Aquarius

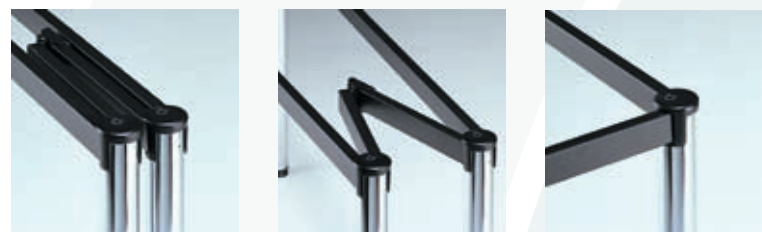

Maximum seating capacity in this conference layout is provided by the use of extended quadrant tables and a rectangular link.

Axis

The Axis table system has a unique patented hinge design. This allows the table frame to fold within its own length for ease of reconfiguration, storage and transportation. The top is easily attached to the under frame by moulded plastic locating lugs. To extend the system, quadrant shaped corner units are added with a fixed under frame and are supported by adjacent tables.

An almost endless choice of room layouts are possible from boardroom to the popular horseshoe layout. No tools are required to assemble or disassemble the Axis system.

- Table tops: Banded and inlaid Oak
- Table legs: Chrome

Available in the following options:

Table tops:

- MFC - Oak, Beech, Maple, Light Grey
- 25mm Veneer - Light Oak, Maple, Dark Cherry, Natural Cherry
- 38mm Veneer - Light Oak, Maple

Table legs:

- Black, Silver, Chrome

Rectangular, trapezoidal and twin top tables form the classic horseshoe layout ideal for presentation purposes.

Tables and Chairs

Since the launch in April 2005, the Evolution Boardroom range has been constantly refined and improved. The latest developments include wider diameter column bases which can now be finished to match wood grain table tops, more robust cable management beams and new, more subtly styled, power docks.

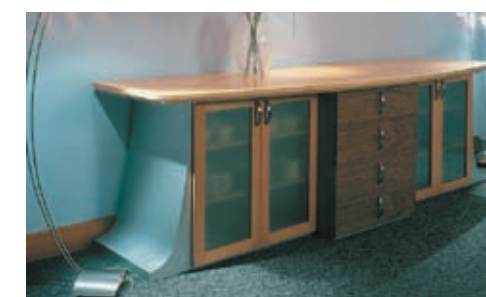

Bespoke Commissions

We are able to manufacture a bespoke range of office tables to complement your environment in a wide range of finishes. Our business partners team of craftsmen are able to design and manufacture your furniture and once made, install it to ensure an expert finish.

Credenza

Credenza's with laminated/veneered door fronts and tops in a range of real wood veneers and wood grain laminates. Also available in 25 different colour laminates. The Credenzas are available in two, four and six door options. As a supplement a fridge pack can be added if required.

Cable Cubby 200

Surface-Mountable Enclosure for Cables and One AC Power Outlet.

- Low profile design with tilt-up lid.
- Architecturally streamlined and economical connectivity solution.
- Flush mountable into a table or flat surface.

Cable Cubby 600

Surface-Mountable Enclosure for Cables, AAPs, and AC Power Outlets.

- Accommodates up to five or six single-space AAP - Architectural Adapter Plates.
- Offers convenient access to cable connections.
- Top surface available in black anodized or brushed aluminum finishes.

Cable Cubby 800

Surface-Mountable Enclosure for Cables, AAPs, and AC Power Outlets.

- Accommodates up to seven or eight single-space AAP - Architectural Adapter Plates.
- Offers convenient access to cable connections.
- Top surface available in black anodized or brushed aluminum finishes.

Altinex CNK200 - Cable-Nook™ Modular Tabletop Interconnect Box

- Installs into tabletop.
- Convenient access to cable ends or fixed connectors.
- Optional retaining bracket adjusts for range of cable types.
- Modular configuration: more room for additional connectors.
- Simple, cost-effective interconnect solution.

Altinex PNP400 - Pop 'N Plug™ Configurable Tabletop Interconnect Box

- Opens / closes by pressing on top cover.
- Pneumatic lift and mechanical latching mechanism.
- Two configurable sides.
- Up to six sectional plates on each side.
- Many optional top cover and bezel finishes available.
- Easy to install.

Altinex TNP122 - Tilt 'N Plug Jr.™ - Twins

- Dual side-by-side input plates.
- Each plate/module operates independently.
- Modules open/close by tilting top panel.
- Multimedia & AC power connectors.
- All signals pass through to the underside of the table.
- Perfect for servicing two users simultaneously.
- Customize your own TNP122.

Altinex TNP121 - Tilt 'N Plug Jr.™ Tabletop Interconnect Box

- Mounts into tabletop, provides single input plate.
- Opens/closes by pressing on top panel.
- Multimedia & AC power connectors.
- All signals pass through to the underside of the table.
- Customize your own TNP121.

For projects where the budget is as tight as the space available, the Evolution Classic Compact provides all the benefits of the rest of the range within a smaller footprint. This is popular where the desk is not permanently staffed.

The crisp, sharp, contemporary aesthetics of the Evolution Elite creates a highly impressive piece of furniture. Brushed finish steelwork, integral led lighting and sand blasted toughened glass combine perfectly to produce the ultimate reception desk.

The rebated central panel lends itself to this simple modification in order to extend the range and cater for the needs of wheelchair users. The Evolution range is available in many single and two person models as standard and in a wide range of finishes.

With its clean minimal design, this is the original Evolution range. There are a host of single and two person models, including options with integrated returns. Available in a variety of wood and colour laminate finishes.

Integrated System

Central AV unit with two flipchart holders and drywipe/projection board. Projector shown provides a 156 cm (diagonal) image at 140 cm distance from the wall.

Features

- Side wall formed by the rear panels of units in adjacent room.
- Pear shaped table with arrowhead base 3000 x 1950mm.
- 'D' end meeting room tables and Credenza are available in the same finishes to match the multimedia / storage wall.
- Special MFC finishes are available and further details can be obtained from our Sales Office.

Internal fittings

A large selection of fittings, including shelving, lateral and pull-out filing frames, special compartments, a sink and fridge can be incorporated within the units. All fittings can be changed or re-positioned.

PaperView

The ultimate large screen display for environments where style and quality really matters. The PaperView rear projection screen offers its users an 80" to 120" quality screen projection which is suitable for any modern boardroom. The PaperView is designed to be stylish with a low-profile screen surround to ensure that the audience is suitably impressed with the presentation.

At the heart of each PaperView system is a high performance SANYO projector within a precision engineered rig comprising high quality mirrors and state of the art DNP optical lens screen. Each PaperView system caters for both digital (DVI) and analogue computer inputs at any resolution right up to 1280 x 1024.

Plus the paperView comes with a simple hand-held remote control including a laser pointer.

Kusch Tables

- Bright chrome-plated round steel legs.
- Powder coated brackets.
- Frame height/vertical clearance: 71,5 cm
- Veneer natural beech.
- Foldable legs for easy storage.

Kusch Series 9100 Profession Table Range

The folding and stowable castor mounted table. A self locking crossmember ensures convenient patent locking of the table top. Available in a range of finishes and lippings.

Kusch Series 9000 Roll 'n' Meet Table Range

The mobile table range with the patented folding mechanism. The 90 degree fold away table top can be compactly stacked horizontally or rolled away for storage.

Product Code	B112610	B112611	B112312
Description	Silver Frame (wood seat and back)	Silver Frame (upholstered inner)	Silver Frame (fully upholstered)

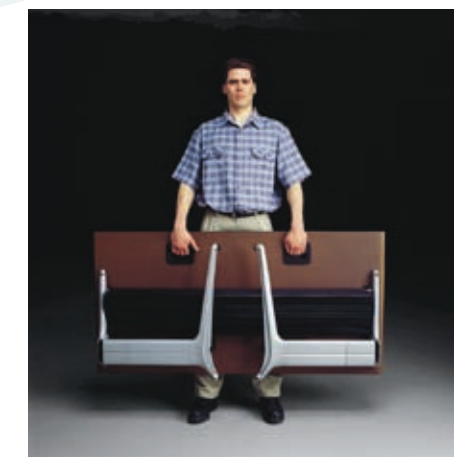

Interspace Range

This range is high fashion, where image is as important as comfort. The mobile chairs range is available in a range of colours, so whether you need a leather, wood or cloth finish we have a chair to match your surroundings.

DataHub Tables

Available in a range of sizes, the DataHub is the most sophisticated integrated training table on the market built with full power/data/PC cabling. The tables are offered with fixed or folding leg options. Legs fold over the integral wire trough and are secured by two leg locks.

Epping

This elegant range of seating combines comfort and support for today's executive. Designed to enhance any office or boardroom they are available with wood or metal frames.

Prices are dependant on the specification of the chair (e.g. fabric, finish, arms, base style) and the quantities required.

Woodham - beech framed meeting chair

Product Code	B112620	B112621
Description	Four Leg	Four Leg with arms

Trek

Trek Tables offer a fresh look at table design. The angled profile of the Trek leg is a significant departure from the traditional. The table comes with folding, fixed or flip tops, and with either glides or castors.

Torsion

Torsion is an innovative, mobile, nesting flex back guest chair, addresses movable seating requirements for team meetings, training and informal conferences. With ingenious flip up seats and castors, chairs can be nested together for compact storage.

Perry

Perry Seating with its stylish, elegant design, lightweight and sheer variety of colours is the perfect choice for the widest range of applications. Up to twenty five chairs can be stacked on a dolly for ease of handling.

K4 & K5

K4, the four legged chair, and the cantilevered sled base K5 chair are both stackable. The arms are not fixed to the shell and this extra movement means greater comfort. This classic chair can be supplied in leather, fabric or in beech with various stain options.
