# An Introduction to Slow Cooking

Slow cooking is one of the best ways of preparing foods to ensure that the flavour and tenderness is retained. Your new slow cooker is easy to use and is extremely versatile. You can cook soups, stews, casseroles, roasts, bake desserts and even steam puddings.

Slow cooking is also economical, as your new slow cooker uses very little power.

Once the slow cooker reaches the selected temperature, the food cooks using the heat retained in the crock insert.

Your slow cooker is ideal for cooking tougher cuts of meat as the slow, moist heat tenderises it and enhances the flavours.

Your slow cooker is also very safe for keeping foods heated, as it operates at temperatures high enough to prevent the growth of harmful bacteria.

---

## Using your Slow Cooker

1. Before using your Sunbeam slow cooker for the first time, remove the crock insert and lid and wash them in warm soapy water. Rinse and dry thoroughly and replace.
2. Place the slow cooker on a flat level surface.
3. Prepare the food to be cooked and place inside the slow cooker. Replace the lid.
4. Insert the plug into a 230-240V power outlet and turn the power ON.
5. Select the desired setting on the temperature control dial: LOW, HIGH, or KEEP WARM. The power on light will illuminate to indicate that the appliance is switched on.

**Note:** Do not place very cold or frozen food in the crock insert if it has been preheated as this may cause the crock insert to crack.

**Note:** Transfer cooked food from the crock insert into an airtight container before storing in fridge or freezer.

**Note:** Do not place the crock insert under cold water if it is still hot.

**Note:** The crock insert is oven safe so you can reheat your precooked dishes in an oven preheated to no more than 160°C.

**Important:** Food should not be cooked on the KEEP WARM setting as this will not get hot enough to cook. This setting should only be used to keep hot, cooked food warm for serving.

# Tips for Slow Cooking

- All of the recipes contained in this book have recommended temperature settings. Most recipes can be cooked on the LOW setting, however when using the HIGH setting cooking times can often be halved.
- Food will be brought to a simmer on all settings. The setting determines the time needed to reach a simmer.
- When cooking with vegetables, place them in the crock insert first, and then place the meat on top.
- Always ensure that food or liquid comes to at least half way up the wall of the crock insert, as the element is located on the sides of the slow cooker.
- When roasting whole pieces of lamb, beef or chicken, it is not necessary to add liquid. Pot roasts and corned meats should be barely covered with liquid.
- Do not use oven bags in your slow cooker.
- When preparing meat for casseroles, lightly coat the pieces in flour and brown before adding to the slow cooker. This helps to seal in the juices and flavours, and keeps the meat tender.
- Frozen casseroles can be placed in the cold slow cooker and heated for 5-8 hours, depending on the quantity. Do not place frozen food into a heated slow cooker.
- If a recipe results in too much liquid, turn the slow cooker to the HIGH setting, remove the lid and cook until sufficient liquid has evaporated.
- To thicken a casserole, set the slow cooker to the HIGH setting and stir through a thickening agent such as cornflour combined with a little water. Allow to simmer until thickened, stirring occasionally.
- Stirring is rarely necessary, as the element wraps around the sides of the slow cooker, preventing the food from sticking to the base.
- Leave the lid on the slow cooker during cooking to maintain heat and moisture.
- Reduce cooking times when the slow cooker is not completely full to achieve a better cooking result as the slow cooker heats up faster when not filled up to the rim.

# Care and Cleaning

Wash the crock insert and lid in hot soapy water. To remove food that is cooked onto the bottom, soak the crock insert in warm water before cleaning and scrub lightly with a plastic or nylon brush. Rinse well and dry. The crock insert is also dishwasher safe for added convenience.

**Note:** Do not place the hot crock insert under cold water.

Wipe the exterior of the slow cooker with a damp cloth and polish dry. **DO NOT** use harsh abrasives, scourers or chemicals to clean any part of your slow cooker as these will damage the surfaces.

**CAUTION:** Do not immerse the base of the slow cooker in water or any other liquid.
