

ADDONICS TECHNOLOGIES

Model: ADIDEU2

Installation Guide

Front View

Back View

Note: It is required to set up the IDE hard drive you are connecting to the converter as a MASTER device.

1. Locate the 40-pin IDE connector of your IDE drive.

2. Connect the converter board to the IDE connector of the hard drive.

3. Using the provided Y-power cable, connect the 4-pin floppy floppy connector to the power connector of the converter. This will provide power to the converter.

4. At the other end of the Y-power cable is the 4-pin Molex power connector that you connect to the hard drive.

5. Now connect the B-type USB cable to the USB port on the converter or use the USB pin header cable.
