General precautions

➢ Do not expose this product to dusty, dirty or sandy areas to reduce the risk of damaging components.

➢ Do not expose the recorder to high temperature. High temperature may shorten the life span of electronic device, damage the battery and wind or melt specific plastic parts.

➢ Do not situate the recorder under cold environment. When the product is preheated to its correct temperature, there will be moisture inside and damage the circuit.

➢ Do not try to disassemble or repair by yourself. Doing so may lead to electric shock from the internal high-pressure components.

➢ Do not drop or punch the recorder. Otherwise the internal components will be damaged.

➢ Do not clean the recorder with chemicals, cleaning solution or high concentration detergent. Please wipe it with slightly damp soft cloth.

➢ Send the recorder or any other accessories to the professional service center for maintenance when they do not work well.

➢ According to the design, the camcorder should be operated within the temperature range from 0 degree to 40 degree (- 20°~ 65° centigrade)

➢ Do not operate or expose the camcorder under following condition:
  —Direct sunlight area
  —High temperature or dusty area
  —Near air conditioner or heaters or any other extreme temperature area
  —In a closure car, especially parking in direct sunlight
  —Violent vibration area

Product Features

➢ 125 degree ultra wide angle lens.
➢ 1920x1080P FULL HD high quality resolution.
➢ 4 mega pixels.
➢ 4X digital zoom, still image 8X zoom.
➢ 1.5 inch high resolution LCD, can watching while recording.
➢ Advanced H.264 video compression technology.
➢ GPS, record the latitude and longitude data automatically.(Optional)
➢ Google map, to review your car tracking, speed and G-sensor info. (Optional)
➢ G-sensor, once device detect collision, the current file would be protected. (Optional)
➢ SOS function, to protect the important file in time.
➢ Seamless continuous recording will not miss any data.
➢ Automatically recording (stop recording) after car power on (off).
➢ Support AV out/ HDMI
➢ 30/60 frames per second for smooth video flow.
➢ Automatic circulating video recording, being able to set the record time for each file.
➢ Improve time & date display, no need reset when re-start.
➢ Screenshots function, can capture the video screen while video recording and reviewing.
➢ Easy operation.
➢ Micro SDHC, up to 32 GB **(Genuine Samsung 16gb class 6 tested & works perfectly)**

1. Brief Introduction of the Car Recorder

The features and functions are introduced in this chapter. In addition, PC system requirement, list of items and description of the hardware components are included.

1.1 PC System Requirements
The PC system needs to meet the following requirements:
- Windows XP/Vista/Win 7 operating system
- Intel Pentium 4 2.8GHz CPU or above (recommended 3GHz)
- At least 512 MB RAM or above (recommended 1GB)
- Standard USB2.0 port or above
- At least 64MB video card or above

1.2 Recorder appearance and feature icons
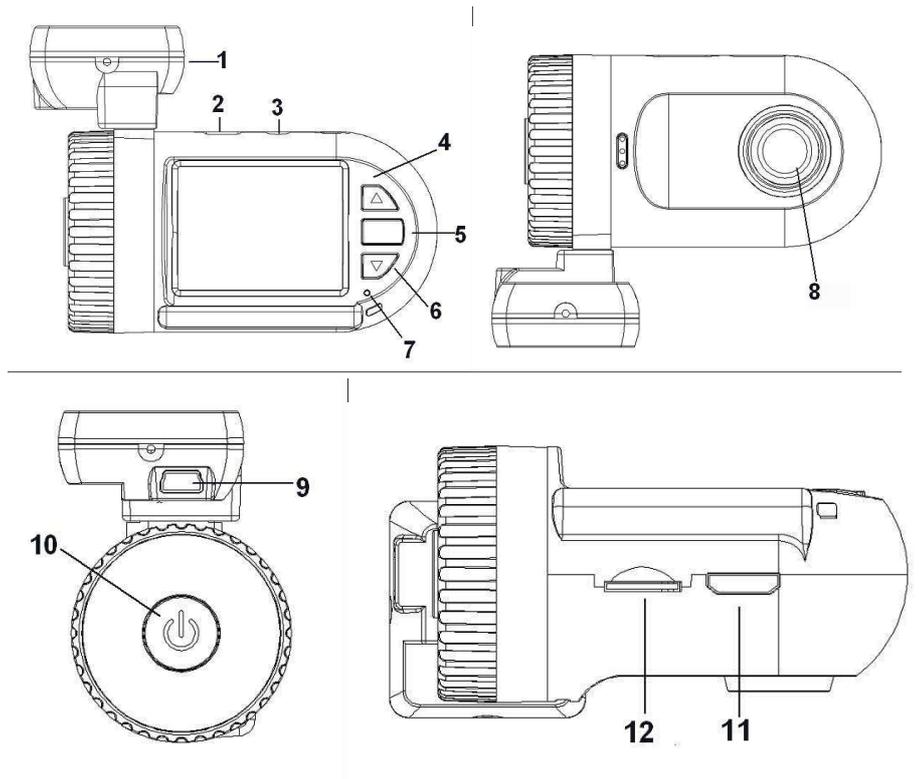

1. GPS tracker box also is a bracket; 3M sticker put here and then sticks to car front window. If no GPS, it is as a bracket only

1. **How to get the video player drive:**

➢ Insert the CD Supplied or if you have no cd Connect the DVR machine (without card) with computer.

➢ Take a look in "My computer" for the CD Disk & Car Player file or in the DVR for Car Player file

➢ Open it, and copy the file ![7z] to a new folder on your desktop (or other place, but please remember the place). Double-click to decompress the file, you will get a folder SPEED_UNIT open this and Go to EN in this folder.

2. **Google Map:**

➢ Find the GPS player ![play] in the folder, open it, you will get a GPS player with Google maps (as picture 1)

➢ After you record the video with GPS, connect your Micro SD or your DVR with computer, Browse to your video files with this button ![menu] at the bottom of your GPS player, then choose your Micro SD card browse to →DCIM→100MEDIA, then choose the video/s you want. (the GPS will automatically load).

2.14 Light indicator: Red light: charging   Blue light: stand by   Blue flashing: recording

Red light: charging+ Blue light: standby can appear purple, this is normal as they are in the same window.

3. Appendix

3.1 Specification

Display	1.5"TFT (480×240 pixels)
GPS Module	GPS LOGGER
Memory	Micro SD card (SDHC up to 32 G)
Lens	Fixed Focus wide angle lens (120°)
ISO	Auto
Still images	Format: JPEG(EXIF2.2), DCF Image resolution: 0.9M, 2M, 3M(software), 4M(software)
Videos	Format: H.264 (MOV) Resolution: 1920×1080 30fps, 1440×1080 30fps, 1280×720 30fps
Zoom	Video: 4X Digital Zooming(1440*1080P) Playback still image: Digital Zoom 8X (Maximum)
Audio	Built-in microphone/ speaker
Exposure compensation	-2.0EV~+2.0EV
Loop Recording	OFF, 1 MIN, 3 MIN, 5 MIN
Auto Power Off	OFF, 1 MIN, 3 MIN, 5 MIN
Auto power off screen	OFF, 1 MIN, 3 MIN, 5 MIN
PC Interface	USB2.0 (High-speed)
Output	HDMI , Audio-Video output
AV Output Format	NTSC/PAL
Battery	Built-in polymer battery 3.7V

3.2 Troubleshooting

Question	Possible reasons	Solutions
The camcorder is suddenly turned off	Auto Off Function is On. Low battery	Turn on again the recorder Charge battery
Captured images are not saved into memory	Power is off before the images are saved.	Charge battery
Memory card cannot be used	Memory card is protected. Memory card contains non-DCF images from other cameras.	Unlock the memory card. Format the memory card. Before formatting, make sure to backup files first.
All the buttons are invalid.	Short-circuit when connecting camcorder with other equipments.	Long press the power button 9-10 seconds to re-boot

3.3 Recorder Package Contents:

Article Name	Quantity (PCS)
Recorder	1
Car Adapter (Output: 5V)	1
USB cable	1
3M sticker	1
Car Fixed Bracket	1
User Manual	1
CD disk	1

NOTE: Alterations reserved.
