POWER SOURCE

Your Energy™ Photo Frame M8 Ultra Slim is powered through the AC/DC 5V adapter provided with the product. Please firstly connect the photo frame with the power adapter then connect the power adapter with electrical outlet.

The remote control is powered by a CR2025 3V lithium battery that you can easily replace when depleted by releasing the battery compartment in the back of the remote control.

IMPORTANT: In case you will not use the digital frame for a few days, we recommend unplugging the power electricity adapter from the socket.

SWITCHING ON / OFF

To power on your Energy™ Photo Frame M8 Ultra Slim just plug in the provided power adapter to a 100-240V AC source.

To turn on or turn off your photo frame, simply press the ON/OFF button located on the front side of the frame, or press the ON/OFF button from remote control.

IMAGE DISPLAY

IMAGE DISPLAY BY MINIATURES.

After switching on your Energy™ Photo Frame M8 Ultra Slim and choosing memory option, the main menu will be displayed by default with the “Photo” option selected. After pressing the PLAY/PAUSE button, the frame will show a mosaic view with the miniatures of pictures loaded from the memory device currently connected to the frame. You can modify this view to see all the pictures stored using the UP, DOWN, PREVIOUS and NEXT buttons.

A mini menu for selection of “Copy file“ or “Delete file” will appear by pressing the MENU button, you can use the UP and DOWN buttons to select and use the PLAY/PAUSE button to confirm the operation. With the option of “Copy file”, you can copy and save the selected picture into the internal memory of photo frame.

IMAGE DISPLAY IN FULL SCREEN

From picture miniatures, you can view the currently selected image in full screen by pressing PLAY/PAUSE button. When in full screen view mode, you can manually move to the next pictures, using the PREVIOUS and NEXT buttons.

From the full screen image, a mini menu with options of “Rotate” and “Zoom” will appear by pressing the MENU button, you can use the UP and DOWN buttons to select and use the PLAY/PAUSE button to confirm the operation.

SLIDESHOW

To start the slideshow from the current picture you just have to press the PLAY/PAUSE button again. You can also start the slideshow pressing the SLIDESHOW button from the remote control. To pause or restart the slideshow mode, you can press the PLAY/PAUSE button again.

Note: Only when slideshow mode is deactivated, it is possible to change the pictures displayed manually by using the PREVIOUS / NEXT buttons. You can access other functions too, such as zoom or rotate image.

Important: Do not leave the same image still for more than one day because you risk damaging the TFT screen. We recommend changing the image at least once or twice a day, or even better use slideshow mode with a high elapse time.

ZOOM

Press the ZOOM button to enlarge the current picture (the slideshow mode should be deactivated). You can also press the MENU button, a mini menu will appear, which you can select and confirm the “Zoom” option with the UP / DOWN buttons and the

PLAY/PAUSE button. The digital photo frame allows up to 5 zoom levels to let you see any detail of the picture. Pressing UP, DOWN, PREVIOUS and NEXT buttons will show different areas of the current picture in order to select the one we are interested in.

ROTATE

Pressing the ROTATE button on the remote control or pressing the UP and DOWN buttons on the frame will rotate the picture 90º, 180º and 270º clockwise (the slideshow mode should be deactivated). You can also press the MENU button, a mini menu will appear, which you can select and confirm the “Rotate” option with the UP / DOWN buttons and the PLAY/PAUSE button. This change will only affect the current picture and the next pictures shown will have the normal orientation.

VIDEO

You can access to this function from the main menu of your Energy™ Photo Frame M8 Ultra Slim, by selecting the “VIDEO” option with the UP / DOWN and PLAY/PAUSE buttons. After that, you will see a list of video files stored in the memory device (e.g. pendrive or memory cards), with the indication of title, resolution, size and order of each file. Pressing the UP and DOWN buttons for selecting file or folder and pressing the PLAY/PAUSE button to play the video.

When playing the reproduction of video, you can visualize the playback indication by pressing the MENU button. You can increase / decrease the volume by pressing the VOL+ / VOL- buttons, and you can use the backward and forward functions to skip to another video.

MUSIC

SELECT AND PLAY MUSIC

You can access to this function from the main menu of your Energy™ Photo Frame M8 Ultra Slim, by selecting the “MUSIC” option with the UP / DOWN and PLAY/PAUSE buttons. After that, you will see a list of audio files stored in the memory device (e.g. pendrive or memory cards), with the indication of title, duration, size and order of each file. Pressing the UP and DOWN buttons for selecting file or folder and pressing the PLAY/PAUSE button to play the music.

SET ALARM WITH MUSIC

From the list of audio files, a mini menu will be shown by pressing the MENU button, and then you can select the “Set as Alarm” option by pressing the UP / DOWN buttons and the PLAY/PAUSE button. With this option, you can set an audio track as the sound of alarm.

EBOOK

You can access to this function from the main menu of your Energy™ Photo Frame M8 Ultra Slim, by selecting the “EBOOK” option with the UP / DOWN and PLAY/PAUSE buttons. After that, you will see a list of files by TXT format stored in the memory device (e.g. pendrive or memory cards), with the indication of title, size, creation date and order of each file. Pressing the UP and DOWN buttons for selecting file or folder and pressing the PLAY/PAUSE button to read the TXT files.

FILE EXPLORER

You can access to this function from the main menu of your Energy™ Photo Frame M8 Ultra Slim, by selecting the “FILE EXPLORER” option with the UP / DOWN and PLAY/PAUSE buttons. You can explore the folders and files stored in the memory device (e.g., pendrive or memory card). Pressing the UP / DOWN buttons for selecting file or folder and pressing the PLAY/PAUSE button to reproduce the selected multimedia files or for entering or exit from the folder.

Note: For the folders, only the name and order will be indicated.

DELETE A FILE (OR A FOLDER)

From the file list inside the option of VIDEO / MUSIC / EBOOK / FILE EXPLORER, a mini menu will be shown by pressing the MENU button, where you can select and confirm the “Delete file” option with the UP / DOWN buttons and the PLAY/PAUSE buttons.

CALENDAR

You can access this function from the main menu of your Energy™ Photo Frame M8 Ultra Slim, selecting the option “CALENDAR” by pressing the UP / DOWN and PLAY/PAUSE buttons.

When entering this function, the current month calendar will be shown on the screen with the current time indication, along with a slideshow using the pictures loaded from the memory.

SETTINGS

To modify the system settings just select the “SETTINGS” option from the main menu, by using the UP / DOWN buttons and the PLAY/PAUSE button.

- **Format build-in memory:** Allows format the build-in memory of digital photo frame.
- **Reset settings:** Allows resetting the digital photo frame to the default values.

USB HOST

Your Energy™ Photo Frame M8 Ultra Slim, as well as showing your favorite pictures stored in SDHC/SD/MMC/MS/XD memory cards, can also load and display pictures from USB devices such as pen drives. Just plug in the pen drive to the USB HOST input located on the back side of the digital photo frame, the system will detect the compatible image files stored.

TROUBLE SHOOTINGS

Why can't the digital photo frame display my .JPG files?

Many digital cameras and image edition software add hidden data to the .JPG files. These data can prevent your digital photo frame from loading the images. Try to eliminate them by saving the file using a different name.

The memory card I am using is not recognized.

Make sure the memory card is fully inserted in the right direction. Also be reminded that the photo frame is compatible with SDHC/SD/MMC/MS/XD memory cards only.

I can´t save or copy a file in the built-in memory of photo frame.

In this case, please firstly format the built-in memory of photo frame and then process with the operation of saving or copying file.

WARRANTY

- Energy Sistem Soyntec SA is liable for any lack of conformity which exists at the time the goods were purchased during a period of 36 months. Batteries are excluded from the 36-month warranty, having a warranty period of 12 months.

  This warranty covers any defects in workmanship or materials. This warranty doesn't cover any failure of the product due to accidents, misuse or alteration made by an unauthorized person.

  The special 36-months warranty is valid for the European Union. For other countries, please refer to your specific legislation or your local distributor.

WARRANTY PROCEDURE

1. Visit the Support section at http://support.energysistem.com and select your product to view the FAQ (Frequently Asked Questions), user manuals, drivers and updates available. The solution to your problem is very likely to have been already published there.
   You can check the availability of the user manual in your language at **http://www.energysistem.com/es-es/support/manuals**
2. If you cannot find an appropriate solution in the Support section, you may send us your enquiry or warranty service request by email: **support@energysistem.com**
3. Alternatively, you may prefer to contact the distributor from which you purchased the product, presenting the purchase receipt or invoice.

Important: This warranty doesn't cover any damage or loss to any data stored in the product memory, therefore Energy Sistem's Technical Service will not assume any loss of the above mentioned information so it is recommended to make a backup of your data and to remove any data or personal info from its internal memory before you send the product, or to send it only with the original factory default values.
