WARNING DECAL PLACEMENT

This drawing shows the location(s) of the warning decal(s). **If a decal is missing or illegible, see the front cover of this manual and request a free replacement decal. Apply the decal in the location shown.** Note: The decal(s) may not be shown at actual size.

IMPORTANT PRECAUTIONS

⚠ WARNING: To reduce the risk of serious injury, read all important precautions and instructions in this manual and all warnings on your exercise bike before using your exercise bike. ICON assumes no responsibility for personal injury or property damage sustained by or through the use of this product.

1. Before beginning any exercise program, consult your physician. This is especially important for persons over age 35 or persons with pre-existing health problems.
2. Use the exercise bike only as described in this manual.
3. It is the responsibility of the owner to ensure that all users of the exercise bike are adequately informed of all precautions.
4. The exercise bike is intended for home use only. Do not use the exercise bike in a commercial, rental, or institutional setting.
5. Keep the exercise bike indoors, away from moisture and dust. Do not put the exercise bike in a garage or covered patio or near water.
6. Place the exercise bike on a level surface with at least 2 ft. (0.6 m) of clearance around the exercise bike. To protect the floor or carpet from damage, place a mat under the exercise bike.
7. Inspect and properly tighten all parts regularly. Replace any worn parts immediately.
8. Keep children under age 12 and pets away from the exercise bike at all times.
9. Wear appropriate clothes while exercising; do not wear loose clothes that could become caught on the exercise bike. Always wear athletic shoes for foot protection.
10. The exercise bike should not be used by persons weighing more than 250 lbs. (113 kg).
11. The heart rate monitor is not a medical device. Various factors, including the user's movement, may affect the accuracy of heart rate readings. The heart rate monitor is intended only as an exercise aid in determining heart rate trends in general.
12. The exercise bike does not have a free wheel; the pedals will continue to move until the flywheel stops. Reduce your pedaling speed in a controlled way.
13. Always keep your back straight while using the exercise bike; do not arch your back.
14. Over exercising may result in serious injury or death. If you feel faint or if you experience pain while exercising, stop immediately and cool down.

BEFORE YOU BEGIN

Thank you for selecting the new WESLO® PURSUIT CT 1.5 exercise bike. Cycling is an effective exercise for increasing cardiovascular fitness, building endurance, and toning the body. The PURSUIT CT 1.5 exercise bike provides a selection of features designed to make your workouts at home more effective and enjoyable.

For your benefit, read this manual carefully before you use the exercise bike. If you have questions

after reading this manual, please see the front cover of this manual. To help us assist you, note the product model number and serial number before contacting us. The model number and the location of the serial number decal are shown on the front cover of this manual.

Before reading further, please review the drawing below and familiarize yourself with the labeled parts.

ASSEMBLY

To hire an authorized service technician to assemble the exercise bike, call 1-800-445-2480.

Assembly requires two persons. Place all parts of the exercise bike in a cleared area and remove the packing materials. Do not dispose of the packing materials until assembly is completed.

In addition to the included tool(s), assembly requires a Phillips screwdriver  , an adjustable wrench  , and pliers  .

See the drawings below to identify the small parts needed for assembly. The number in parentheses below each drawing is the key number of the part, from the PART LIST near the end of this manual. The number following the key number is the quantity needed for assembly. **Note: If a part is not in the hardware kit, check to see if it has been preassembled. To avoid damaging parts, do not use power tools for assembly.**

M10 x 70mm Patch Screw (33)–2

1.

To make assembly easier, read the information on page 5 before you begin.

Insert the Rear Stabilizer (6) into the Frame (1). Attach the Rear Stabilizer with four M8 x 60mm Patch Screws (30).

2. **See the inset drawing.** Remove the screw and the cardboard tube from the Frame (1). Discard the screw and the cardboard tube.

Orient the Front Stabilizer (2) so that the large holes face the Frame (1).

Attach the Front Stabilizer (2) to the Frame (1) with two M10 x 70mm Patch Screws (33).

3. While a second person holds the Upright (13) near the Frame (1), connect the Extension Wire (23) to the Reed Switch Wire (39).

Next, connect the Resistance Cable (19) to the Lower Resistance Cable (29) in the following way:

- **See drawing A.** Pull upward on the metal bracket on the Lower Resistance Cable (29), and insert the tip of the Resistance Cable (19) into the wire clip inside the metal bracket.
- **See drawing B.** Firmly pull the Resistance Cable (19) upward and slide it into the top of the metal bracket.
- **See drawing C.** Using pliers, squeeze the prongs on the upper end of the metal bracket together.

Insert the wires and cables downward into the Frame (1).

Tip: Avoid pinching the wires and cables.
Insert the Upright (13) into the Frame (1).

Attach the Upright (13) with three M8 x 15mm Patch Screws (34) and three M8 Split Washers (50).

4. Attach the Handlebar (42) to the Upright (13) with two M8 x 65mm Bolts (49) and two M8 Locknuts (10).

Attach the Water Bottle Holder (3) to the Upright (13) with two M4 x 15mm Screws (48).

5. The Console (16) requires four AA batteries (not included); alkaline batteries are recommended. **IMPORTANT: If the Console has been exposed to cold temperatures, allow it to warm to room temperature before inserting batteries. Otherwise, you may damage the console displays or other electronic components.** Remove the screw, remove the battery cover, and insert the batteries into the battery compartment. **Make sure to orient the batteries as shown by the diagram inside the battery compartment.** Then, reattach the battery cover.

6. While a second person holds the Console (16) near the Upright (13), connect the wire on the Console to the Extension Wire (23).

Insert the excess wire into the Upright (13) or into the Console (16).

Tip: Avoid pinching the wires. Attach the Console (16) to the Upright (13) with four M4 x 15mm Screws (48).

7. Attach the Seat (12) to the Seat Post (5) with four M8 Locknuts (10). **Note: The Locknuts may be preattached to the underside of the Seat.**

8. Loosen and remove the Seat Post Knob (9) from the Frame (1).

Insert the Seat Post (5) into the Frame (1). Adjust the Seat Post to the desired height, and insert the Seat Post Knob (9) through the indicated hole in the Frame into one of the adjustment holes in the Seat Post.

Tighten the Seat Post Knob (9). **Make sure that the Seat Post Knob is firmly engaged in one of the adjustment holes in the Seat Post (5).**

9. Identify the Left Pedal (24), which is marked with an "L."

Using an adjustable wrench, **firmly tighten** the Left Pedal (24) **counterclockwise** into the left arm of the Crank (21).

Tighten the Right Pedal (not shown) **clockwise** into the right arm of the Crank (not shown).

Adjust the strap on the Left Pedal (24) to the desired position, and press the end of the strap onto the tab on the side of the Left Pedal.

Adjust the strap on the Right Pedal (not shown) in the same way.

10. **Make sure that all parts are properly tightened before you use the exercise bike.** Note: After assembly is completed, some extra parts may be left over. Place a mat beneath the exercise bike to protect the floor.

HOW TO USE THE EXERCISE BIKE

HOW TO ADJUST THE SEAT POST

For effective exercise, the seat should be at the proper height. As you pedal, there should be a slight bend in your knees when the pedals are in the lowest position.

To adjust the height of the seat, first loosen and remove the seat post knob. Next, slide the seat post upward or downward and align one of the adjustment holes in the seat post with the indicated hole in the frame. Insert the seat post knob into the frame and the seat post, and then tighten the seat post knob. **Make sure that the seat post knob is inserted through one of the adjustment holes in the seat post.**

HOW TO ADJUST THE PEDALING RESISTANCE

To increase the resistance of the pedals, turn the resistance knob clockwise; to decrease the resistance, turn the knob counterclockwise.

IMPORTANT: Stop turning the knob when turning becomes difficult, or damage may result.

HOW TO LEVEL THE EXERCISE BIKE

If the exercise bike rocks on your floor during use, turn one or both of the leveling caps until the rocking motion is eliminated.

FEATURES OF THE CONSOLE

The console offers a selection of features designed to make your workouts more effective. While you pedal, the console will provide continuous exercise feedback. You can even measure your heart rate using the built-in thumb heart rate monitor.

The console also offers two pace workouts that prompt you to vary your pedaling pace while guiding you through effective workouts.

To use the manual mode, see the instructions at the right. **To use a pace workout,** see page 14.

Before using the console, make sure that batteries are installed (see assembly step 5 on page 8). If there is a sheet of plastic on the display, remove the plastic.

HOW TO USE THE MANUAL MODE

1. Turn on the console.

To turn on the console, press any of the buttons or begin pedaling. The entire display and the pace guide will turn on for a moment; the console will then be ready for use.

2. Select the manual mode.

When you turn on the console, the manual mode will be selected. If you have selected a pace workout, reselect the manual mode by pressing the Workout Select button repeatedly until zeros appear in the display.

3. Follow your progress with the display.

The display can show the following workout information:

RPM—The RPM meter on the left side of the display indicates your approximate pedaling pace in revolutions per minute (rpm).

Speed—This mode shows your pedaling speed, in miles per hour (mph) or kilometers per hour (km/h).

Time—This mode shows the elapsed time. Note: When a pace workout is selected, the display will show the time remaining in the workout instead of the elapsed time.

Distance—This mode shows the distance you have pedaled, in miles or kilometers.

Calories—This mode shows the approximate number of calories you have burned.

Pulse—This mode shows your heart rate when you use the thumb heart rate monitor.

Scan—This mode shows the speed, time, distance, calories, and pulse modes, for a few seconds each, in a repeating cycle. Note: The pulse mode will appear only while you are using the heart rate monitor.

When you turn on the console, the scan mode will be selected automatically. One indicator will appear below the word Scan to show that the scan mode is selected, and a second indicator will show which information is currently displayed.

Note: If you have selected a different mode, press the Display button repeatedly to reselect the Scan mode.

To select the speed, time, distance, or calories mode for continuous display, press the Display button repeatedly. The indicators will show which mode is selected. Make sure that there is not an indicator below the word Scan.

The console can show speed and distance in either miles or kilometers. The letters "mph" or "km/h" will appear in the display to show which unit of measurement is selected.

To change the unit of measurement, first press and hold down the On/Reset button for a few seconds. An "E" for English miles or an "M" for metric kilometers will appear in the display. Press the Display button repeatedly to change the unit of measurement. Then, press the On/Reset button to save your selection.

Note: When the batteries are replaced, it may be necessary to reselect the desired unit of measurement.

To reset the display, press the On/Reset button.

To pause the console, stop pedaling. The time will flash if it is displayed. To continue your workout, simply resume pedaling.

4. Measure your heart rate if desired.

To measure your heart rate, **stop pedaling** and place your thumb on the heart rate monitor. **Do not press too hard, or the circulation in your thumb will be restricted and your pulse will not be detected.**

After a few seconds, the heart-shaped indicator in the display will begin to flash, two dashes will appear, and then your heart rate will be shown. Hold your thumb on the heart rate monitor for about 15 seconds for the most accurate reading.

If the displayed heart rate appears to be too high or too low, or if your heart rate is not displayed, lift your thumb off the heart rate monitor for a few seconds. Then, place your thumb on the heart rate monitor as described above.

Make sure that you are applying the proper amount of pressure to the heart rate monitor. Try the heart rate monitor several times until you become familiar with it. Remember to stand still while measuring your heart rate.

5. When you are finished exercising, the console will turn off automatically.

If the pedals do not move for a few seconds, the console will pause.

If the pedals do not move for a few minutes, the console will turn off and the display will be reset.

HOW TO USE A PACE WORKOUT

1. Turn on the console.

See step 1 on page 12.

2. Select a pace workout.

To select a pace workout, press the Workout Select button repeatedly until the name of the desired workout appears in the display.

A few seconds after you select a workout, the display will show the duration of the workout.

Note: The diagrams printed on the console show the target pace settings for the workouts.

3. Begin pedaling to start the workout.

Each pace workout consists of one-minute segments. One target pace is programmed for each segment. Any time the target pace is about to change, the display will flash for a few seconds to alert you.

During the workout, the pace guide will prompt you to keep your pedaling speed near the target

pace for the current segment. When the left indicator lights, increase your speed; when the right indicator lights, decrease your speed. When the center indicator lights, maintain your current speed. **IMPORTANT: The pace guide is intended only to provide a goal. Make sure to pedal at a speed that is comfortable for you.**

The display can show the time remaining in the workout. If you stop pedaling for a few seconds, the workout will pause and the time will flash if it is displayed. To resume the workout, simply resume pedaling.

4. Follow your progress with the display.

See step 3 on page 12.

5. Measure your heart rate if desired.

See step 4 on page 13.

6. When you are finished exercising, the console will turn off automatically.

See step 5 on page 13.

MAINTENANCE AND TROUBLESHOOTING

Inspect and tighten all parts of the exercise bike regularly. Replace any worn parts immediately.

To clean the exercise bike, use a damp cloth and a small amount of mild detergent. **IMPORTANT: To avoid damage to the console, keep liquids away from the console and keep the console out of direct sunlight.**

CONSOLE TROUBLESHOOTING

If the console display becomes dim, replace all the batteries at the same time; most console problems are the result of low batteries. To replace the batteries, see assembly step 5 on page 8.

If the thumb heart rate monitor does not function properly, see step 4 on page 13.

HOW TO ADJUST THE REED SWITCH

If the console does not display correct feedback, the reed switch should be adjusted. To adjust the reed switch, the left pedal and the left shield must be removed.

Using an adjustable wrench, turn the left pedal clockwise and remove it. Next, remove all of the screws from both shields; **there are two sizes of screws in the shields—note which size of screw you remove from each hole.** Then, carefully remove the left shield.

Turn the resistance knob to the lowest setting. Then, locate the Reed Switch (39). Turn the Crank (21) until a Magnet (38) is aligned with the Reed Switch. Loosen, but do not remove, the M5 x 15mm Screw (47).

Slide the Reed Switch (39) slightly closer to or away from the Magnet (38), and then retighten the M5 x 15mm Screw (47). Turn the Crank (21) for a moment. Repeat these actions until the console displays correct feedback.

When the reed switch is correctly adjusted, reattach the shields and the left pedal.

HOW TO ADJUST THE DRIVE BELT

If you can feel the pedals slip while you are pedaling, even when the resistance is at the highest level, the drive belt may need to be adjusted. To adjust the drive belt, the pedals and the shields must be removed.

Use an adjustable wrench to remove the pedals. To remove the left pedal, turn the left pedal clockwise; to remove the right pedal, turn the right pedal counter-clockwise.

Next, remove all of the screws from both shields; **there are two sizes of screws in the shields—note which size of screw you remove from each hole.** Then, carefully remove the shields.

Loosen the 3/8" Nut (27) and the Flywheel Nut (43), which are located on each side of the Flywheel (37). Then, tighten the M6 Locknuts (32), one on each side of the Flywheel, until the Drive Belt (35) is properly tightened.

Finally, tighten the 3/8" Nut (27) and the Flywheel Nut (43) and reattach the shields and the pedals.

FCC INFORMATION

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from the circuit to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC CAUTION: To assure continued compliance, use only shielded interface cables when connecting to computer or peripheral devices. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

EXERCISE GUIDELINES

⚠ WARNING: Before beginning this or any exercise program, consult your physician. This is especially important for persons over the age of 35 or persons with pre-existing health problems.

The heart rate monitor is not a medical device. Various factors may affect the accuracy of heart rate readings. The heart rate monitor is intended only as an exercise aid in determining heart rate trends in general.

These guidelines will help you to plan your exercise program. For detailed exercise information, obtain a reputable book or consult your physician. Remember, proper nutrition and adequate rest are essential for successful results.

EXERCISE INTENSITY

Whether your goal is to burn fat or to strengthen your cardiovascular system, exercising at the proper intensity is the key to achieving results. You can use your heart rate as a guide to find the proper intensity level. The chart below shows recommended heart rates for fat burning and aerobic exercise.

165	155	145	140	130	125	115	♥
145	138	130	125	118	110	103	♥
125	120	115	110	105	95	90	♥
20	30	40	50	60	70	80	

To find the proper intensity level, find your age at the bottom of the chart (ages are rounded off to the nearest ten years). The three numbers listed above your age define your “training zone.” The lowest number is the heart rate for fat burning, the middle number is the heart rate for maximum fat burning, and the highest number is the heart rate for aerobic exercise.

Burning Fat—To burn fat effectively, you must exercise at a low intensity level for a sustained period of time. During the first few minutes of exercise, your body uses *carbohydrate calories* for energy. Only after the first few minutes of exercise does your body begin to use stored *fat calories* for energy. If your goal is to burn fat, adjust the intensity of your exercise until your heart rate is near the lowest number in your training zone. For maximum fat burning, exercise with your heart rate near the middle number in your training zone.

Aerobic Exercise—If your goal is to strengthen your cardiovascular system, you must perform aerobic exercise, which is activity that requires large amounts of oxygen for prolonged periods of time. For aerobic exercise, adjust the intensity of your exercise until your heart rate is near the highest number in your training zone.

WORKOUT GUIDELINES

Warming Up—Start with 5 to 10 minutes of stretching and light exercise. A warm-up increases your body temperature, heart rate, and circulation in preparation for exercise.

Training Zone Exercise—Exercise for 20 to 30 minutes with your heart rate in your training zone. (During the first few weeks of your exercise program, do not keep your heart rate in your training zone for longer than 20 minutes.) Breathe regularly and deeply as you exercise—never hold your breath.

Cooling Down—Finish with 5 to 10 minutes of stretching. Stretching increases the flexibility of your muscles and helps to prevent post-exercise problems.

EXERCISE FREQUENCY

To maintain or improve your condition, complete three workouts each week, with at least one day of rest between workouts. After a few months of regular exercise, you may complete up to five workouts each week, if desired. Remember, the key to success is to make exercise a regular and enjoyable part of your everyday life.

This exploded view diagram illustrates the assembly of a stationary bike. The components are numbered 1 through 50, and dashed lines indicate the assembly sequence and alignment. Key parts include:

- Frame and Main Components:** The main frame (1), seat (12), and pedals (26) are central elements. The crank arms (5) connect the pedals to the flywheel.
- Resistance and Flywheel Assembly:** The flywheel (14) is mounted on the crank arm (5) and is connected to the resistance mechanism (18). The resistance mechanism includes a magnetic brake (19) and a tensioning lever (3).
- Adjustability and Ergonomics:** The seat (12) is mounted on a seat post (13) which can be adjusted using a seat clamp (4) and a seat post cap (2). The handlebars (2) are also adjustable using a handlebar clamp (4) and a handlebar post cap (2).
- Wheels and Transport:** The bike features two wheels (21) with spokes and tires (29). The wheels are mounted on axles (38) and are secured with nuts (39) and washers (40). The wheels are also equipped with transport wheels (37) for easy movement.
- Accessories and Details:** The bike includes a water bottle holder (16) mounted on the frame, a heart rate monitor strap (24), and a heart rate monitor receiver (25). The frame is also equipped with a front fender (35) and a rear fender (36).

The diagram shows the bike in a disassembled state, allowing for a clear view of each component and its intended position in the final assembly.

ORDERING REPLACEMENT PARTS

To order replacement parts, please see the front cover of this manual. To help us assist you, be prepared to provide the following information when contacting us:

- the model number and serial number of the product (see the front cover of this manual)
- the name of the product (see the front cover of this manual)
- the key number and description of the replacement part(s) (see the PART LIST and the EXPLODED DRAWING near the end of this manual)

LIMITED WARRANTY

IMPORTANT: You must register this product within 30 days of the purchase date to avoid added fees for service needed under warranty. Go to www.wesloservice.com/registration.

ICON Health & Fitness, Inc. (ICON) warrants this product to be free from defects in workmanship and material, under normal use and service conditions. Parts and labor are warranted for ninety (90) days from the date of purchase.

This warranty extends only to the original purchaser (customer). ICON's obligation under this warranty is limited to repairing or replacing, at ICON's option, the product through one of its authorized service centers. All repairs for which warranty claims are made must be preauthorized by ICON. If the product is shipped to a service center, freight charges to and from the service center will be the customer's responsibility. If replacement parts are shipped while the product is under warranty, the customer will be responsible for a minimal handling charge. For in-home service, the customer will be responsible for a minimal trip charge. This warranty does not extend to freight damage to the product. This warranty will automatically be voided if the product is used as a store display model, if the product is purchased or transported outside the USA, if all instructions in this manual are not followed, if the product is abused or improperly or abnormally used, or if the product is used for commercial or rental purposes. No other warranty beyond that specifically set forth above is authorized by ICON.
