Using the remote control

Keep in mind the following when using the remote control:

- Make sure that there is no obstacle between the remote and the remote sensor on the unit.
- Use within the operating range and angle, as shown.

Loading the Batteries

1. Open the battery compartment cover.
2. Insert two "AA" (R6P) batteries, with each one oriented correctly.
3. Close the cover.

Cautions On Batteries

- Use "AA" (R6P) batteries in this remote control unit.
- Replace the batteries with new ones approximately once a year, though this depends on the frequency with which the remote control unit is used.
- If the remote control unit does not operate from close to the main unit, replace the batteries with new ones, even if less than a year has passed.
- The included batteries are only for verifying operation. Replace them with new batteries as soon as possible.
- When inserting the batteries, be careful to do so in the proper direction, following the ⊕ and ⊖ marks in the remote control unit's battery compartment.
- To prevent damage or battery fluid leakage:
  - Do not use a new battery with an old one.
  - Do not use two different types of batteries such as alkaline and manganese.
  - Do not short-circuit, disassemble, heat or dispose of batteries in flames.
- Remove the batteries when not planning to use the remote control unit for a long period of time.
- If the batteries should leak, carefully wipe off the fluid from the inside of the battery compartment, then insert new batteries.

Description - rear panel

**1. DIGITAL OUT Jacks**

Use either an optical or coaxial digital cable to connect to an AV amplifier with a built-in decoder (AV control center).

**2. 2CH AUDIO OUT Jacks**

Connect to the Audio input jacks of A/V-compatible TV or wide screen TV, Stereo system.

**3. VIDEO OUT Jack**

Use a video cable to connect one of the jack to Video input on your A/V-compatible TV or wide screen TV, Stereo system.

**4. COMPONENT VIDEO OUT Jacks**

Use these jacks if you have a TV with Component Video in jacks. These jacks provide C<sub>R</sub>/P<sub>R</sub>, C<sub>B</sub>/P<sub>B</sub> and Y video. Along with S-Video, Component Video provides the best picture quality.

**5. S-VIDEO OUT Jack**

Use the S-Video cable to connect this jack to the S-Video jack on your A/V-compatible TV or wide screen TV for a higher quality picture.

**6. A/V EURO CONNECTOR**

Connect to the 21-pin scart jack of a TV.  
(The sound of Super Audio CD discs is not output.)

**7. REMOTE CONTROL IN/OUT Jacks**

By connecting this DVD player to another Marantz audio component using a supplied Remote Control bus cable, you can remotely operate the components as a signal system.

**8. REMOTE CONTROL EXTERNAL / INTERNAL Switch**

Set this switch to "INTERNAL" when using this DVD player independently. If you use this DVD player in a system with a Marantz receiver equipped with a remote sensor, set the switch to "EXTERNAL".

**9. 5.1CH AUDIO OUT Jacks**

Use the speaker cables to connect these jacks to the 5.1CH AUDIO IN jacks on your AV amplifier with 5.1-channel input terminals.

**NOTES:**

- Be sure not to use both the A/V EURO CONNECTOR jack and component Video jacks for video output at the same time.
- When changing the VIDEO OUT setting (SCART, COMPONENT INTERLACE or COMPONENT PROGRESSIVE), connect to a VIDEO jack or an S-VIDEO jack on the TV. If the setting is changed, for example, to COMPONENT INTERLACE or COMPONENT PROGRESSIVE while the Euro A/V(SCART) jack is connected to the TV, a distorted video signal may be output.
- When connecting to component which with a remote sensor, be sure to connect the component to the "REMOTE CONTROL IN" jack of this DVD player to the "REMOTE CONTROL OUT" jack of the component with the remote sensor.
- When connecting to component which is not equipped with a remote sensor, be sure to connect the component to the "REMOTE CONTROL OUT" jack of this DVD player.

**Selecting Progressive Scan (625p <576p> or Interlaced 625i <576i>) Playback**

- If your TV is compatible with progressive scanning (625p <576p>), connect the TV to the Component Video jacks of the DVD player and set "VIDEO OUT" to "COMPONENT PROGRESSIVE" in the display setting. Next, set your TV to the progressive scan mode. Refer to page 25 for instructions on changing the display setting.
- If your TV is not compatible with progressive scan, set "VIDEO OUT" to "COMPONENT INTERLACE".
- Use a commercially available adaptor if the video input jacks of your TVs or monitors are the BNC type.

**What is Progressive Scanning?**

- Unlike conventional interlace scanning, the progressive scan system provides less flickering and images in higher resolution than that of traditional (625i/576i) television signals.

## CONNECTIONS

The following show examples of connections commonly used to connect the DVD player to TV and other components.

If using this DVD player to playback a DVD in a Dolby Digital 5.1 channel surround or DTS surround format, the DVD player outputs a Dolby Digital or DTS data stream from its OPTICAL or COAXIAL DIGITAL AUDIO OUT jacks. Dolby Digital 5.1 channel surround sound and DTS sound can also be output from the 5.1 CH OUTPUT jacks. By hooking the player up to a Dolby Digital or DTS decoder, you can enjoy more convincing, realistic ambience with powerful and high-quality surround sound of a professional standard which can be heard in movie theaters. Use an audio coaxial or optical digital cable (not included) for the audio connections.

### NOTES:

- Be sure to turn off the power to all components in the system before connecting another component.
- Refer to the Instruction Manuals for your TV, stereo system and any other components to be connected to the DVD player.

- **Method 1** DVD Player + Stereo system
- **Method 2** DVD Player + Dolby Digital decoder, DTS decoder or MPEG decoder

### NOTES:

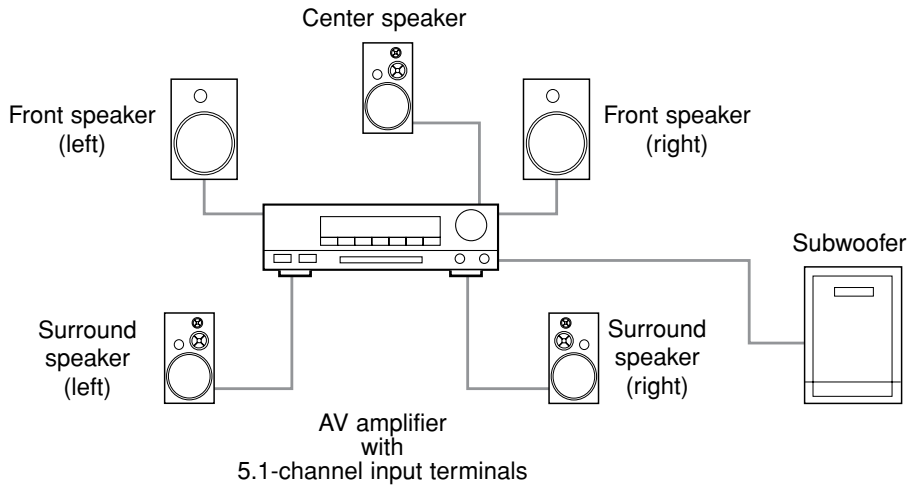

- When using Dolby Digital, DTS, or MPEG decoder, set "DOLBY DIGITAL" to "ON", "DTS" to "DTS" or "MPEG" to "MPEG" accordingly for audio output in the setup mode (Refer to page 26). Set "DOLBY DIGITAL" to "OFF", or "DTS" or "MPEG" to "PCM" for the decoder that is not used currently. Playing a DVD using incorrect settings may generate noise distortion, and may also damage the speakers.
- The audio source on a disc in Dolby Digital 5.1 channel surround format cannot be recorded as digital sound by an MD or DAT deck.
- Set "DOLBY DIGITAL" to "OFF" or "DTS" to "PCM" for audio output in the setup mode for method 1 only. Playing a DVD using incorrect settings may generate noise distortion, and may also damage the speakers. (Refer to page 26.)
- Super Audio CD sound is not output as digital sound.

### Optical cable (not supplied)

- Optical cable (not supplied) may be damaged when bent at sharp angles. Ensure cables are coiled in loops with a diameter of 15 cm or more when storing them.
- Use a cable which is 3m or shorter.
- Insert cable plugs firmly into the connectors when making connections.
- If a plug has minor scratches or is dirty, clean it with a soft cloth before inserting it into a connector.

Connection to 5.1-channel Surround Sound system

Analog 5.1-channel audio signals can be output from the DVD player. The multichannel audio signals recorded in packed PCM can be played when an AV amplifier equipped with analog 5.1-channel audio inputs is connected.

Connection to a TV (for video)

- **Method 1** DVD Player + TV with Video Input Jack
- **Method 2** DVD Player + TV with S-Video Input Jack
- **Method 3** DVD Player + TV with AV1 Jack or DVD Player + TV with Component Video Jacks

NOTES:

- Connect the DVD player directly to a TV. If the A/V cables are connected to a VCR, pictures may be distorted due to the copy protection system.
- S-Video output connector  
The video signals are divided into color (C) and brightness (Y) signals, achieving a clearer picture.  
If the TV is equipped with a S-Video input connector, we recommend connecting it to the this product's S-Video output connector using a commercially available S-Video connection cord.

HOW TO CONNECT TO A TV WITHOUT AUDIO/VIDEO INPUT JACKS

If your TV does not have RCA type audio and video input jacks it is still possible to connect this DVD player to your TV's 75-ohm coaxial antenna terminal using an optional Stereo Audio/Video RF Modulator, not included. Connect the audio and video outputs of the DVD player to the audio and video inputs on the RF Modulator, and then connect the coaxial output of the RF Modulator (usually marked "TO TV") to the 75 ohm coaxial antenna terminal on your TV. Follow the instruction supplied with the RF Modulator for more details.

If your TV's 75 ohm coaxial antenna terminal is already occupied by an antenna or cable box connection, remove that cable from your TV's antenna terminal and reconnect it to the coaxial antenna input terminal of the RF Modulator (usually marked "ANT IN"), then connect the RF modulator to your TV's antenna terminal as described above.

NOTE:

- The picture quality from DVD discs will not be as good if the DVD player is connected to the TV's antenna terminal through an RF Modulator.
