## ICE MAKER SAFETY

### YOUR SAFETY AND THE SAFETY OF OTHERS ARE VERY IMPORTANT.

We have provided many important safety messages in this manual for your appliance. Always read and obey all safety messages.

This is the safety alert symbol. This symbol alerts you to Potential hazards that can kill or injure you and others. All safety messages will follow the safety alert symbol And either the words "DANGER", "WARNING" or "CAUTION".

Danger means that failure to heed this safety statement may result in severe personal injury or death.

Warning means that failure to heed this safety statement may result in extensive product damage, serious personal injury, or death.

Caution means that failure to heed this safety statement may result in minor or moderate personal injury, property or equipment damage.

All safety messages will alert you to know what potential hazard is, tell you how to reduce the chance of injury, and let you know what can happen if the instructions are not followed.

## IMPORTANT SAFEGUIDES

Before the appliance is used, it must be properly positioned and installed as described in this manual, so read the manual carefully. To reduce the risk of fire, electrical shock or injury when using the appliance, follow basic precaution, including the following:

### **DANGER**

- Plug into a grounded 3-prong outlet, do not remove grounding prong, do not use an adapter, and do not use an extension cord.
- It is recommended that a separate circuit, serving only your appliance be provided. Use receptacles that cannot be turned off by a switch or pull chain.
- Never clean appliance parts with flammable fluids. These fumes can create a fire hazard or explosion. And do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance. The fumes can create a fire hazard or explosion.
- Before proceeding with cleaning and maintenance operations, make sure the power line of the unit is disconnected.
- Do not connect or disconnect the electric plug when your hands are wet.
- Unplug the appliance or disconnect power before cleaning or servicing. Failure to do so can result in electrical shock or death.
- Do not attempt to repair or replace any part of your appliance unless it is specifically recommended in this manual. All other servicing should be referred to a qualified technician.

### **WARNING**

**FOLLOW WARNING CALL OUTS BELOW ONLY WHEN APPLICABLE TO YOUR MODEL**

- Use two or more people to move and install appliance. Failure to do so can result in back or other injury.
- To ensure proper ventilation for your appliance, the front of the unit must be completely unobstructed. Choose a well-ventilated area with temperatures above 60°F (16°C) and below 90°F (32°C). This unit must be installed in an area protected from the element, such as wind, rain, water spray or drips.
- The appliance should not be located next to ovens, grills or other sources of high heat.
- The appliance must be installed with all electrical, water and drain connections in accordance with state and local codes. A standard electrical supply (115 v ac only, 60 hz), properly grounded in accordance with the national electrical code and local codes and ordinances is required.
- Do not kink or pinch the power supply cord of appliance.
- The fuse (or circuit breaker) size should be 15 amperes.
- It is important for the appliance to be leveled in order to work properly. You may need to make several adjustments to level it.
- All installation must be in accordance with local plumbing code requirements.
- Make certain that the pipes are not pinched or kinked or damaged during installations.
- Check for leaks after connection.
- Never allow children to operate, play with or crawl inside the appliance.
- If you use the drainage container, you must set the drain select switch to off or the water can overflow from the drainage container
- Although the unit has been tested at the factory, due to long-term transit and storage, the first batch of cubes must be discarded.
- Do not use solvent-based cleaning agents or abrasives on the interior. These cleaners may damage or discolor the interior.
- Do not use this apparatus for other than its intended purpose.

---

## Help us help you...

### Read this guide carefully.

It is intended to help you operate and maintain your new ice maker properly.

Keep it handy to answer your questions. If you don't understand something or you need more help, please call:

**Avanti customer service  
800-220-5570**

Keep proof of original purchase date (such as your sales slip) with this guide to establish the warranty period.

### Write down the model and serial numbers.

You'll find them on a plate located on the rear wall of the ice maker.

Please write these numbers here:

\_\_\_\_\_  
Date of purchase

\_\_\_\_\_  
Model number

\_\_\_\_\_  
Serial number

Use these numbers in any correspondence or service calls concerning your ice maker.

If you received a damaged ice maker, immediately contact the dealer (or builder) that sold you the ice maker.

Save time and money. Before you call for service, check the troubleshooting guide. It lists causes of minor operating problems that you can correct yourself.

---

### If you need service

We're proud of our service and want you to be pleased. If for some reason you are not happy with the service you receive, here are some steps to follow for further assistance.

First, contact the people who serviced your ice maker. Explain why you are not pleased. In most cases, this will solve the problem.

Next, if you are still not pleased, write all the

details, including your telephone number, and send it to:

**Customer Service  
Avanti Products  
10880 NW 30<sup>th</sup> Street  
Miami, FL 33172 USA**

## PARTS AND FEATURES

1	Water tank
2	Ice-bin
3	Water tray
4	Evaporator
5	Insulated cabinet
6	Fan motor
7	Compressor
8	Power socket
9	Water pump
10	Drain
11	Carry handles
12	Ice-bin with integrated handle
13	Control panel
14	Stainless steel cabinet

## IMPORTANT SAFETY INSTRUCTIONS

<b>⚡WARNING⚡</b>	To reduce the risk of fire, electrical shock, or injury when using your ice maker, follow these basic precautions:
<ul style="list-style-type: none"><li>• Read all instructions before using the ice maker.</li><li>• <b>Danger or Warning:</b> risk of child entrapment.</li><li>• Child entrapment and suffocation are not problems of the past. Junked or abandoned appliances are still dangerous. . . Even if they will “just sit in the garage a few days.”</li><li>• <b>Before you throw away your ice maker:</b> Remove the ice-bin.</li><li>• Never allow children to operate, play with, or crawl inside the appliance.</li><li>• Never clean ice maker parts with flammable fluids. The fumes can create a fire hazard or explosion.</li><li>• Do not store or use gasoline or any other flammable vapors and liquids in the vicinity of this or any other ice maker. The fumes can create a fire hazard or explosion.</li></ul>	
-save these instructions-	

## INSTALLATION INSTRUCTIONS

### ➤ Before Using Your Ice Maker

- Remove the exterior and interior packing.
- Check to be sure you have all of the following parts:
  - 1 Water-fill Cup
  - 1 Instruction Manual

- Before connecting the ice maker to the power source, let it stand upright for approximately 2 hours. This will reduce the possibility of a malfunction in the cooling system from handling during transportation.
- Clean the interior surface with lukewarm water using a soft cloth.

### ➤ Installation Of Your Ice Maker

- Locate the ice maker away from direct sunlight and sources of heat (stove, heater, radiator, etc.). Direct sunlight may affect the acrylic coating and heat sources may increase electrical consumption. Extreme cold ambient temperatures may also cause the ice maker not to perform properly.
- Plug the ice maker into an exclusive properly installed-grounded wall outlet. Do not under any circumstances cut or remove the third (ground) prong from the power cord. Any questions concerning power and or grounding should be directed toward a certified electrician or an authorized Avanti products service center.

**IMPORTANT: Do not install the Ice maker near an oven, radiator, or other heat source.**

➤ **Electrical connection**

**⚡WARNING⚡**

IMPROPER USE OF THE GROUNDED PLUG CAN RESULT IN THE RISK OF ELECTRICAL SHOCK. IF THE POWER CORD IS DAMAGED, HAVE IT REPLACED BY AN AUTHORIZED AVANTI PRODUCTS SERVICE CENTER.

- This ice maker should be properly grounded for your safety. The power cord of this ice maker is equipped with a three-prong plug which mates with standard three prong wall outlets to minimize the possibility of electrical shock.
- Do not under any circumstances cut or remove the third ground prong from the power cord supplied.
- Never use an extension cord to connect power to the unit.
- Never use a two-prong grounding adapter.
- Where a two-prong wall receptacle is encountered, contact a qualified electrician to have it replaced with a 3-prong receptacle in accordance with applicable electrical codes.
- This ice maker requires a standard 115/120 volts a.c.~60hz electrical outlet with three-prong ground.
- The cord should be secured behind the ice maker and not left exposed or dangling to prevent accidental injury.

➤ **Extension cord**

Because of potential safety hazards under certain conditions, it is strongly recommended that you do not use an extension cord with this appliance. However, if you must use an extension cord it is absolutely necessary that it be a UL/CUL-listed, 3-wire grounding type appliance extension cord having a grounding type plug and outlet and that the electrical rating of the cord be 115 volts and at least 10 amperes.

## OPERATING YOUR ICE MAKER

### ➤ Control Panel Description

#### **Start**

Press to start the ice making cycle.

#### **Stop**

Press to stop the ice making cycle.

#### **Ice Size**

**ICE SIZE SELECTION** of **(S)** small, **(M)** medium or **(L)** large.

The default cube size from the factory is set at SMALL.

Each time you press this button the cube size selection will change 1 size (Small, Medium, Large) in sequence.

The chosen mode shall stay as selected unless changed or there is a power failure.

For the most efficient operation when ambient temperature is below 15° C (59°F) use the small cube size setting.

#### **LED INDICATORS**

**ICE SIZE INDICATOR (GREEN)** **(S)** small, **(M)** medium or **(L)** large.  
The indicator below the selected cube size will be illuminated green.

#### **ADD WATER INDICATOR (RED).**

The ice maker automatically checks the water level in the tank. If the water level is too low the indicator will illuminate in RED and will stop working automatically. Once you add water to the unit the indicator will turn off and will resume normal operation.

#### **ICE FULL INDICATOR (RED).**

When the ice-bin is full, the indicator will illuminate in RED. The indicator will remain lit until the ice in the bin either melts away slowly or has been removed. The unit will stay in a "Standby" mode until the ice has been removed / melted at which time the unit will automatically start operation as normal.

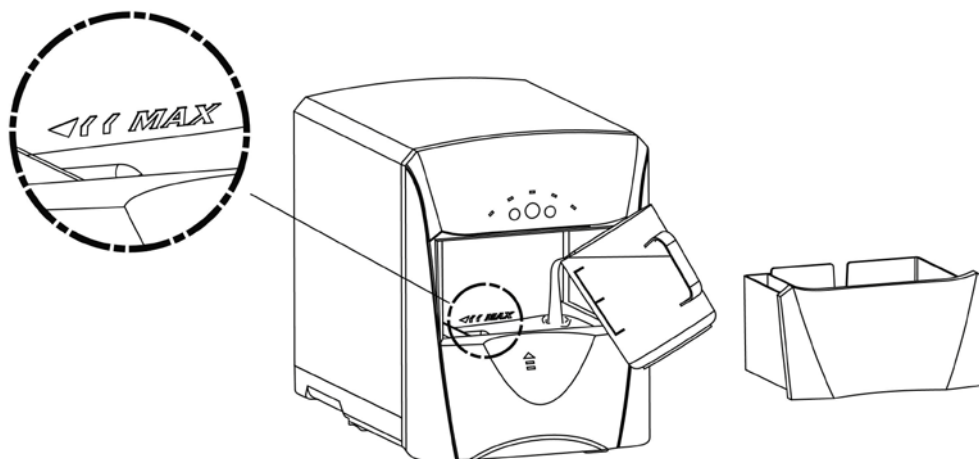

## Operating Instructions

### **Starting your Ice maker**

- Pull the ice bin forward and remove.
- Remove any dust or objects that may be in the water tank

- Using the water fill cup included with your unit, fill the water tank up to the area marked “MAX”:

- Select desired ice cube size by pressing the “ice size” selector (**S**, **M** and **L**).
- The ice-maker will automatically check the water level in the reservoir periodically. The ice maker will detect any shortage of water and will stop the ice-making cycle, the ADD WATER indicator will be lit. Press the STOP button and fill the reservoir with water. Press the START button to restart the ice-making cycle or wait 3 minutes after the ADD WATER indicator goes out as the ice-maker will begin its normal operation cycle automatically.
- When the ice cubes are collected and reach the bin sensor, the ice maker will stop operating and the ICE FULL indicator will be lit.
- There are three sizes of ice cubes available, therefore the larger the ice cube selected, the longer the time it will take to complete the cycle. When the ambient temperature is lower than 15° C (59°F), the small or medium ice cubes sizes are recommended to avoid ice cubes clumping together.
- For best performance, water temperature should be between 7° C (45°F) and 35° C (95°F) and ambient between 15° C (59°F) and 25° C (77°F).

### Getting Ice from the Ice-bin

- Pull the ice bin forward and remove.
- Remove the amount of ice as desired and close by inserting the ice-bin back into the unit.

## CARE AND MAINTENANCE

### Caution

**Failure to unplug the ice maker could result in electrical shock or personal injury.**

#### ➤ Cleaning Your Ice Maker

- To ensure the cleanliness of the ice cubes, water in the reservoir should be replaced every 24 hours.
- Remove the drain plug to drain remaining water from the water reservoir when the ice maker will not be used for long period of time. Screw the drain plug back in place after the water has been drained.
- Always change with fresh water before starting ice production at initial installation or after long shut-off periods.
- Please clean your Ice maker regularly. When cleaning, unplug the unit and remove the ice cubes. Use a diluted solution of water and vinegar to clean the inside and the outside surface of the Ice maker. Do not spray Ice maker with chemicals or diluted agents such as acids, gasoline or oil. Rinse thoroughly before starting.

#### ➤ Space Requirements

- During transportation, the incline angle of the cabinet should not be over 45°
- Do not turn the Ice maker upside down. Problems could occur in the compressor and sealed system.
- The Ice maker should be placed horizontally on a properly leveled surface.
- To ensure proper ventilation for your Ice maker allow 6" of space at the top, the back and on each side.
- Before using the Ice maker for the first time, please wait 2 hours after positioning it.
- Clean the inner liner, ice-bin, water box, water cup frequently.

**IMPORTANT: Do not install the Ice maker near an oven, radiator, or other heat source.**

#### ➤ Power Failure

Most power failures are corrected within a few hours and should not affect the temperature of your ice maker if you minimize the number of times the ice-bin is opened. If the power is going to be OFF for a long period of time, you need to take the proper steps to disconnect your appliance.

## PROBLEMS WITH YOUR ICE MAKER?

You can solve many common ice maker problems easily, saving you the cost of a possible service call. Try the suggestions below to see if you can solve the problem before calling the servicer.

### TROUBLESHOOTING GUIDE

<b>Problem</b>	<b>Possible Cause</b>	<b>Suggested Solutions</b>
The compressor works abnormally with a buzzing Noise.	The voltage is lower than recommended.	Stop the ice maker and do not restart until the voltage is normal.
Water shortage indicator Light is on.	There is not enough water in the reservoir.	Press the stop button, fill with water, wait 3 minutes and press the start button to restart.
Ice full indicator light is on.	Ice storage cabinet is full to the top.	Remove some of the ice.
Indicator lights are off.	Blown fuse/ no power/blown breaker	Replace fuse / turn power on.
The ice made is too large and with pieces sticking together.	The water temperature in the storage tray or ambient is too low.	Stop the machine and reset the ice making cycle. Restart the machine after turning it off.
Conditions for ice making cycle are right but no ice is made.	Refrigerant leaks/ sealed system is blocked.	Replace unit.
Both alert and ice full indicators are on.	The water tray does not turn.	Check for blocked ice cubes.

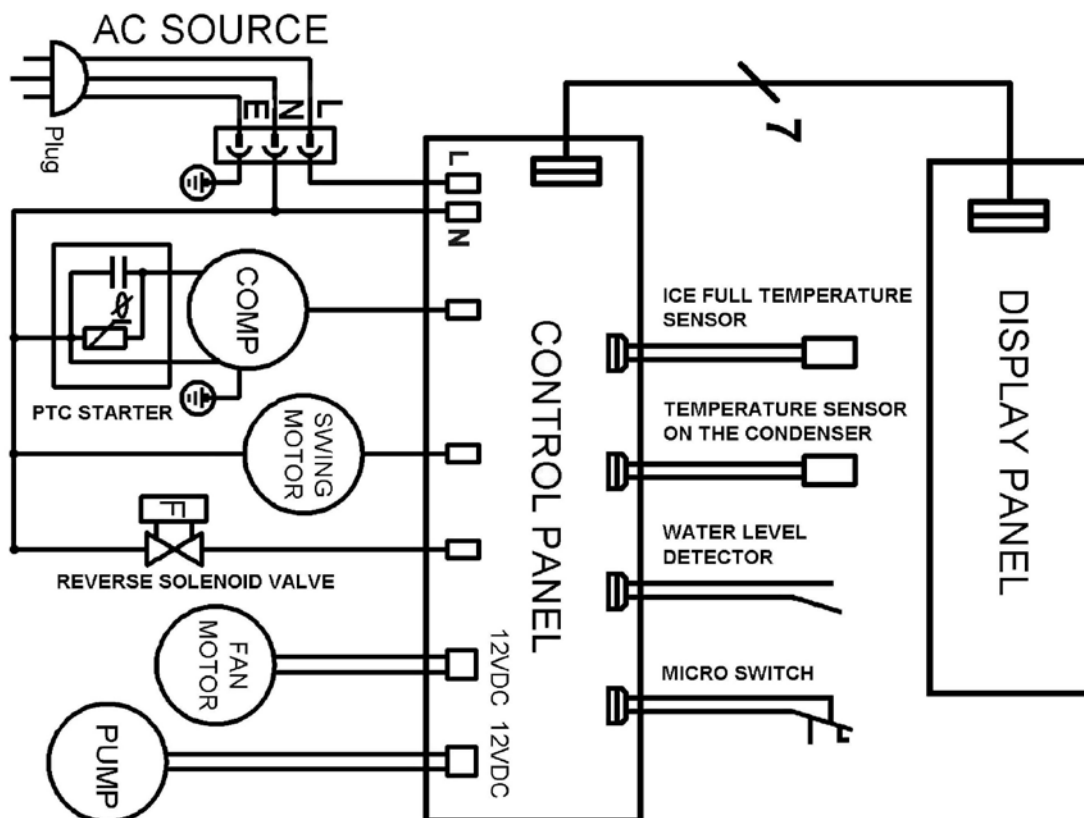

## Service For Your Ice Maker

We are proud of our customer service organization and the network of professional service technicians that provide service on your Avanti ice maker. With the purchase of your Avanti ice maker, you can be confident that if you ever need additional information or assistance, the Avanti Products Customer Service team will be here for you. Just call us toll-free.

### Avanti Products Customer Services

Product information 800-323-5029	Whatever your questions are about our products, help is available.
Part orders 800-220-5570	You may order parts and accessories that will be delivered directly to your home, by personal check, money order, master card, or visa.
In-home repair service 800-220-5570	An Avanti Products authorized service center will provide expert repair service, scheduled at a time that is convenient for you. Our trained servicers know your ice maker inside and out.

## WIRING DIAGRAM

<b>YOUR AVANTI PRODUCTS WARRANTY</b>	<b>Staple your sales receipt here. Proof of original purchase date is needed to obtain service under warranty.</b>
--	--

**WHAT IS COVERED**  
**LIMITED ONE-YEAR WARRANTY**

For one year from the date of purchase by the original owner, Avanti Products will, at its option, repair or replace any part of the unit, which proves to be defective in material or workmanship under normal use. During this period Avanti Products will provide all parts and labor necessary to correct such defects free of charge, so long as the unit has been installed and operated in accordance with the written instructions in this manual. Avanti Products will provide you with a reasonably similar replacement product that is either new or factory refurbished. In rental or commercial use, the warranty period is 90 days. All Avanti Appliances of 3.5 cubic feet capacity or less must be brought/sent to the appliance service shop for repair.

**LIMITED SECOND THROUGH  
FIFTH YEAR WARRANTY**

For the second through the fifth year from date of original purchase, Avanti Products will provide a replacement compressor free of charge due to a failure. You are responsible for the service labor and freight charges. In rental or commercial use, the limited compressor warranty is one year and nine months. Cost to move the unit to the servicers' shop and back to the user's home, as may be required, are the user's responsibility.

---

**WHAT IS NOT COVERED**

- Content losses of food due to spoilage.
- Incidental or consequential damages.
- Parts and labor costs for the following will not be considered as warranty:
  - Door springs, and/or frames.
  - Inner door panels, door rails and/or door supports.
  - Light bulbs and/or plastic housing.
  - Plastic cabinet liners.
  - Punctured evaporator that voids the warranty on the complete sealed system.
  - Shipping and handling costs associated with the replacement of the unit.
- Repairs performed by unauthorized servicers.
- Service calls that do not involve defects in material or workmanship such as customer education, door reversal, or proper installation.
- Surcharges including, but not limited to, any after hour, weekend, or holiday service calls, tolls, ferry trip charges, or mileage expenses for service calls to remote areas, including the state of Alaska.
- Service calls that are related to external problems, such as abuse, misuse, inadequate electrical power, accidents, fire, floods, or acts of God.
- Replacement of house fuses or resetting circuit breakers.
- Failure of the product if it is used for other than its intended purpose.
- This warranty does not apply outside the Continental USA.

## MEDIDAS DE PRECAUCION IMPORTANTES

<b>⚡ ADVERTENCIA ⚡</b>	Para reducir el riesgo de un incendio, choque eléctrico o daños personales cuando use la máquina de hacer hielo, siga estas precauciones básicas.
<ul style="list-style-type: none"><li>• Lea todas las instrucciones antes de usar la máquina de hacer hielo.</li><li>• <b>Peligro o Advertencia:</b> riesgo de niños atrapados.</li><li>• Los niños atrapados o sofocados no son un problema del pasado. Electrodomésticos abandonados aun son peligrosos...aun cuando "solo estarán en el garaje un par de días".</li><li>• <b>Antes de botar su máquina de hacer hielo:</b> Retire la bandeja de hielo.</li><li>• Nunca permita que los niños operen, jueguen con o se introduzcan en la máquina.</li><li>• Nunca limpie la máquina de hacer hielo o las piezas con líquidos inflamables. Los vapores pueden causar peligro de fuego o explosión.</li><li>• No guarde ni use gasolina u otros vapores o líquidos inflamables cerca a este u otra máquina de hacer hielo. Los vapores pueden causar peligro de fuego o explosión.</li><li>•</li></ul> <p style="text-align: center;">-guarde estas instrucciones -</p>	

## INSTRUCCIONES DE INSTALACION

### ➤ Antes de usar su Máquina de Hacer Hielo

- Retire el empaque interno y externo.
- Verifique que haya recibido las siguientes piezas:
  - 1 Recipiente para llenar el tanque de agua
  - 1 Manual de Instrucciones

- Antes de conectar la máquina de hacer hielo a la corriente eléctrica, colóquela parada en posición vertical por 2 horas aproximadamente. Esto reducirá la posibilidad de mal funcionamiento en el sistema de enfriado, causado por el manejo y manipuleo durante el transporte.
- Limpie la superficie interior con agua tibia, usando un trapito suave.

### ➤ Instalación de su máquina de hacer hielo

- Coloque la máquina de hacer hielo fuera de la luz solar directa y de Fuentes de calor (cocina, calentador, radiador, etc.). La luz solar directa puede afectar la capa acrílica y las fuentes de calor puede incrementar el consumo eléctrico. Las temperaturas de ambiente extremadamente altas también podrían ocasionar que su máquina de hacer hielo no funcione correctamente.
- Conecte la máquina de hacer hielo a un receptáculo/enchufe de pared correctamente instalado, de uso exclusivo para esta. Bajo ninguna circunstancia corte o retire la tercera punta (cable a tierra) del cordón. Cualquier consulta que tenga referente a la electricidad y/o cable a tierra, debe ser dirigida a un electricista certificado o a un centro de servicios autorizado por Avanti Products.

**IMPORTANTE: No instale la Máquina de hacer hielo cerca a un horno, radiador u otras fuentes de calor.**

➤ [Conexión Eléctrica](#)

**⚡ ADVERTENCIA ⚡**

EL USO INAPROPIADO DEL ENCHUFE A TIERRA PUEDE OCASIONAR RIESGO DE UN CHOQUE ELECTRICO. SI EL CORDON SE DAÑASE, LLEVELO A UN CENTRO DE SERVICIO AUTORIZADO POR AVANTI PRODUCTS PARA QUE SE REEMPLACE.

- Para su seguridad, esta máquina de hacer hielo debe estar apropiadamente conectada a tierra. El cordón eléctrico de esta máquina de hacer hielo esta equipado con un enchufe de tres puntas, el cual encaja perfectamente en los receptáculos/enchufes de pared de tres puntas estándar, para minimizar la posibilidad de un choque eléctrico.
- Bajo ninguna circunstancia corte o retire la tercera punta (cable a tierra) del enchufe del cordón eléctrico.
- Nunca use un cable de extensión para conectar la unidad a la electricidad.
- Nunca use un adaptado con enchufe de solo 2 puntas.
- Si solo puede conectar la máquina de hacer hielo a un receptáculo/enchufe de pared de 2 puntas, comuníquese con un electricista calificado para que reemplace ese receptáculo/enchufe de pared por uno de 3 puntas, de acuerdo con los códigos de electricidad aplicables.
- Esta máquina de hacer hielo requiere un receptáculo/enchufe de pared de tres puntas estándar de 115/120 voltios a.c.-/60hz.
- Para prevenir cualquier daño físico o lesión, el cordón debe ser asegurado detrás de la máquina de hacer hielo y no estar expuesto o colgando.

➤ [Cable de Extensión](#)

Debido al posible riesgo de seguridad causado bajo ciertas circunstancias, se recomienda firmemente que no use un cable de extensión para este electrodoméstico. Sin embargo, si no tiene otra opción mas que usar un cable de extensión, asegúrese que este sea un cable de extensión para electrodomésticos que este listado bajo UL/CUL, que tenga enchufe y receptáculo para enchufe de tres puntas (cable a tierra) y que la capacidad del cordón eléctrico sea de 115 voltios y no menos de 10 amperios.

## OPERANDO SU MÁQUINA DE HACER HIELO

### ➤ Descripción del Panel de Control

#### **Start / Inicio**

Presione para iniciar el ciclo para hacer hielo.

#### **Stop / Parar**

Presione para detener el ciclo para hacer hielo.

#### **Ice Size / Tamaño del hielo**

**SELECCIÓN DE TAMAÑO DEL HIELO** hay tres tamaños: **(S)** pequeño, **(M)** mediano o **(L)** grande.

El tamaño pre-programado en la fabrica es S (pequeño).

Cada vez que presione el botón de selección de tamaño del hielo, el tamaño aumentara en progresión (Small, Médium, Large).

El tamaño elegido se mantendrá programado hasta que ud. lo cambie o se desconecte la electricidad.

#### **INDICADORES DE PANTALLA**

**INDICADOR DE TAMAÑO DEL HIELO (VERDE)** **(S)** pequeño, **(M)** mediano o **(L)** grande.

El indicador debajo del tamaño del hielo seleccionado se iluminará en verde.

**INDICADOR PARA AÑADIR AGUA (ROJO).**

La máquina de hacer hielo automáticamente verifica el nivel de agua en el tanque. Si el nivel de agua en el tanque fuera muy bajo, el indicador para añadir agua se iluminará en ROJO y detendrá el funcionamiento. Una vez que haya añadido el agua, el indicador se apagará y empezará a funcionar normalmente.

**INDICADOR DEL CONTENEDOR DE HIELO LLENO (ROJO).**

Cuando el contenedor de hielo esta lleno, el indicador se iluminara ROJO. El indicador se mantendrá iluminado hasta que el hielo en el contenedor se derrita lentamente o se retire del contenedor. La unidad se mantendrá en modo de espera (Standby) hasta que el hielo haya sido removido / derretido, entonces la unidad empezara a funcionar normalmente.

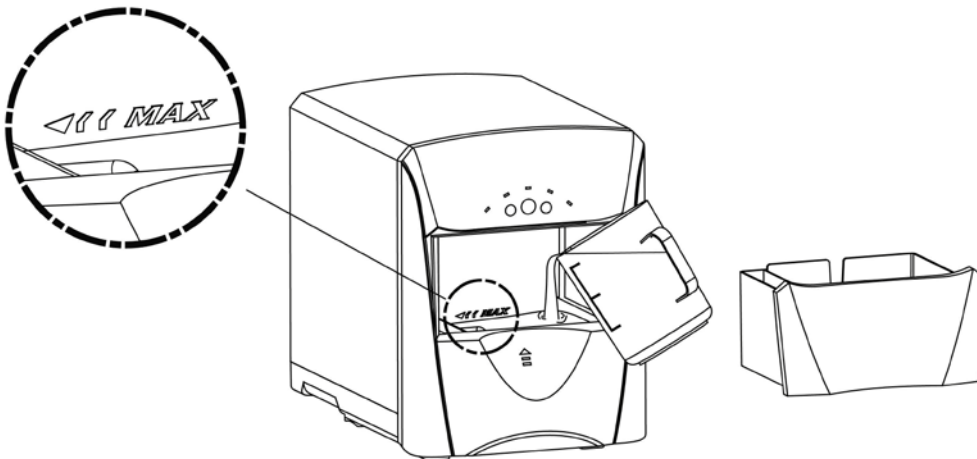

## Instrucciones de Operación

### *Iniciando el proceso con su máquina de hacer hielo*

- Hale el contenedor de hielo hacia ud. y retírelo.
- Remueva el polvo o cualquier objeto que esté en el tanque de agua.

- Utilice el recipiente que incluimos con la unidad para llenar el tanque de agua hasta el área marcada "MAX".

- Seleccione el tamaño del hielo deseado y presione el botón **(S)** pequeño, **(M)** mediano o **(L)** grande.
- La máquina de hacer hielo automáticamente verifica el nivel de agua en el tanque. Si el nivel de agua en el tanque fuera muy bajo, el indicador para añadir agua (ADD WATER) se iluminará en ROJO y detendrá el funcionamiento.
- Presione el botón STOP y llene el tanque de agua. Espere 3 minutos después que el indicador para añadir agua (ADD WATER) se apague.
- Una vez que haya añadido el agua, el indicador se apagará y empezará a funcionar normalmente.
- Cuando los cubos de hielo se van almacenando y llegan al tope del sensor, la máquina de

hacer hielo detendrá el funcionamiento y el indicador de ICE FULL (CICLO COMPLETO) se encenderá.

- Hay tres tamaños de cubos de hielo para su elección, por lo tanto, mientras más grande sea el tamaño deseado mas tiempo tomará el ciclo completo. Cuando la temperatura ambiente sea mas baja que 15°C (59°F), se recomienda elegir cubos de hielo de tamaño S pequeño o M mediano ya que esto evitará que los cubos de hielo se peguen unos a otros.
- Para mejor funcionamiento, la temperatura del agua debe estar entre 7°C (45°F) y 35°C (95°F) y la del ambiente entre 15°C (59°F) y 25°C (77°F).

### **Sacando hielo del contenedor de hielo**

- Hale el contenedor del hielo hacia delante y retírelo.
- Retire la cantidad de hielo deseada, inserte el contenedor de hielo en su sitio original y cierre.

## **CUIDADO Y MANTENIMIENTO**

### **Precaución**

**Asegúrese de desconectar la máquina de hacer hielo de la electricidad antes de limpiarla, de lo contrario puede ocasionar un choque eléctrico o daño personal.**

#### **➤ Limpiando su máquina de hacer hielo**

- Para asegurar la higiene en los cubos de hielo, el agua del tanque debe ser reemplazada cada 24 horas.
- Cuando la máquina de hacer hielo no sea usada por un periodo de tiempo largo, retire el tapón del drenaje para que el agua remanente del tanque sea descartada. Coloque el tapón del drenaje nuevamente en su sitio después que toda el agua haya sido drenada.
- Siempre use agua fresca antes de empezar la producción de hielo durante la instalación inicial o después de largos periodos de inactividad.
- Por favor limpie su máquina de hacer hielo regularmente. Cuando la limpie, desconecte la unidad de la electricidad y retire los cubos de hielo. Use una solución diluida de agua y vinagre para limpiar el interior y el exterior de la superficie de la máquina de hacer hielo. No rocíe la máquina de hacer hielo con sustancias químicas o agentes diluidos, tales como ácidos, gasolina o aceite. Enjuague bien antes de empezar el funcionamiento.

➤ **Requerimientos de espacio**

- El ángulo de inclinación de la unidad durante el transporte no debe exceder los 45°
- No ponga la máquina de hacer hielo de cabeza ya que esto puede producir problemas en el compresor y el sistema sellado.
- La máquina de hacer hielo debe ser colocada sobre una superficie correctamente nivelada.
- Para asegurar ventilación apropiada para su máquina de hacer hielo, deje 6" de espacio encima de la superficie, la parte posterior y los lados.
- Antes de usar la máquina de hacer hielo por primera vez, por favor espere 2 horas después de colocarla en su posición final.
- Limpie la superficie interna, el contenedor del hielo, el tanque de agua y el reservorio para rellenar el tanque de agua con mucha frecuencia.

**IMPORTANTE: No instale la máquina de hacer hielo cerca a un horno, radiador ni otra fuente de calor.**

➤ **Falta de electricidad**

Cuando la electricidad se va, la mayoría de las veces esta regresa en unas pocas horas y no debe afectar la temperatura de su máquina de hacer hielo siempre y cuando ud. minimice las veces que se abra la puerta del contenedor del hielo. Si la electricidad va a estar desconectada por un largo periodo de tiempo, entonces debe tomar los pasos apropiados y desconectar la unidad.

## PROBLEMAS CON SU MÁQUINA DE HACER HIELO?

Ud. puede resolver muchos problemas simples de máquina de hacer hielo fácilmente, ahorrándose el costo de una visita del servicio técnico. Pruebe las sugerencias a continuación para ver si con ellas puede resolver el problema antes de llamar al técnico.

### GUIA PARA RESOLVER PROBLEMAS

Problema	Causa Posible	Sugerencias
El compresor no funciona normalmente, tiene un sonido.	El voltaje es menor que el recomendado.	Apague la máquina de hacer hielo y no la encienda hasta que el voltaje vuelva a la normalidad.
El indicador para añadir mas agua está encendido.	El tanque de agua no tiene suficiente agua.	Presione el botón STOP, llene de agua, espere 3 minutos y luego encienda la unidad presionando el botón START.
El indicador de Contenedor de Hielo Lleno esta encendido.	El contenedor de hielo esta lleno hasta el tope.	Retire un poco de hielo.
Las luces indicadoras están apagadas.	Se voló un fusible / la máquina no esta conectada o no hay electricidad / voló el interruptor.	Reemplace el fusible / verifique que la máquina esta enchufada / encienda la máquina.
Los cubos de hielo son muy grandes y se están pegando unos a otros.	La temperatura del agua en el contenedor de hielo o del ambiente es muy baja.	Apague la máquina y re programe el ciclo de hacer hielo. Luego de apagar la máquina enciéndala otra vez.
Todas la condiciones para el ciclo de hacer hielo están correctas pero no hay hielo.	Fuga o goteo de refrigerante / el sistema sellado esta bloqueado.	Reemplace la unidad.
Los indicadores de Alerta y de Contenedor de Hielo Lleno están encendidos.	El tanque de agua no gira.	Verifique si hay cubos de hielo bloqueados.

## REGISTRATION INFORMATION

Thank you for purchasing this fine Avanti product. Please fill out this form and return it within 100 days of purchase to receive these important benefits to the following address:

**Avanti Products, A Division of The Mackle Co., Inc.  
P.O. Box 520604 - Miami, Florida 33152 USA**

➤ **PROTECT YOUR PRODUCT:**

We will keep the model number and date of purchase of your new Avanti product on file to help you refer to this information in the event of an insurance claim such as fire or theft.

➤ **PROMOTE BETTER PRODUCTS:**

We value your input. Your responses will help us develop products designed to best meet your future needs.
