Problem	Solution
If your HDPiX doesn't turn on after being plugged in try the following:	a. Turn of all Programs that are running (i.e. Internet Explorer, Microsoft Word) and re-connect the HDPiX b. If you have an Antivirus running, disable it and reconnect the HDPix. Once the HDPiX connects turn the Antivirus program back on. c. Leave the HDPiX plugged in and restart the computer.
If the screen on the TV/Monitor connected through the HDPiX keeps flashing:	a. If you are using a notebook, make sure the power plug is connected to the laptop. b. Adjust the power setting on your notebook to maximum performance. c. Make sure the HDPiX is connected directly to your computer and not through a USB hub.
If your screen freezes during viewing video or other programs this might be due to hardware over-lays. In order to turn hard-ware overlays do the fol-lowing:	a. First, you can set your media player to disable overlays. In Windows Media Player, you do this by following Tools => Options => Performance => Advanced. There are two checkboxes here to turn overlays on or off. One is for DVDs and the other is for every-thing else. b. You can also set Windows to disable hardware overlays. For Windows XP, right click on your desktop and click Properties => Settings => Advanced => Troubleshoot and move the slider all the way to the left. This will stop all overlays, system-wide.
If the screen on your TV/Monitor is cutoff on the edges follow these steps:	**a. Mirrored Mode:** 1. Windows XP: Click Start => Control Panel => Display => Settings Adjust the resolution to 1024 by 768 and click Apply. If the screen is still cropped, change to a different resolu-tion until one support by your TV/Monitor is found. 2. Windows Vista: Click Start => Control Panel => Personalization=> Display Settings. Adjust the resolution to 1024 by 768 and click Apply. If the screen is still cropped, change to a different resolution until one support by your TV/Monitor is found. 3. Mac. Click on the Apple Icon on the top left corner => System Preferences => Dis-plays. Adjust the resolution to 1024 by 768 and click Apply. If the screen is still cropped, change to a different resolution until one support by your TV/Monitor is found.
	b. Extended Mode: 1. Windows: Click on the HDPiX Icon on the bottom right corner of the screen => Screen Resolution. Adjust the resolution to 1024 by 768 and click Apply. If the screen is still cropped, change to a different resolution until one support by your TV/Monitor is found. 2. Mac: Click on the Apple Icon on the top left corner => System Preferences => Dis-plays. Select the TV/Monitor that's connected through the HDPiX. Adjust the resolution to 1024 by 768 and click Apply. If the screen is still cropped, change to a different resolu-tion until one support by your TV/Monitor is found. For advanced Users only: The EDID Switch on the HDPiX when left ON, allows your HDTV/Monitor to communicate supported resolutions to your computer. This switch should be left ON unless a desired resolution is not listed when attempting to adjust the resolution of the screen. Turning the EDID switch to OFF allows the HDPiX to render any resolution up to 1600 by 1200.

Problem	Solution
Displaylink icon does not appear in the task bar manager	Restart the computer and reconnect the usb cable
Screens flash after install, wont stop.	If continues flashing, update graphic driver and check the manufacture website for latest version. Update display link software. Check website for latest version.
HDMI cable got disconnected and reconnected no image on display	Keep HDMI cable connected, unplug and plug in the usb cable from the unit.
No image on display after screen saver/hybernation	Turn screen saver and hybernation off for best result. To get image reconnect the usb cable.
No image on display	Check HDMI cable if needed replace.
No audio	Check HDMI cable, if needed replace. Check 3.5mm if needed replace. Check computer settings, make sure there is sound prior to connecting the 3.5mm.

SAFETY INFORMATION

* Avoid excessive humidity, sudden temperature changes or temperature extremes. Keep this product away from wet locations such as bathtubs, sinks, laundries, wet basements and swimming pools.	* Never open or remove unit panels or make any adjustments not described in this manual. Attempting to do so could expose you to dangerous electrical shock or other hazards. It may also cause damage to your AT-HDPIX.
* Use only accessories recommended by ATLONA to avoid fire, shock or other hazards.	* Opening the product will void the warranty. Do not attempt to service the unit. Instead disconnect it and contact your Authorized ATLONA reseller or contact ATLONA directly.
* Use a damp cloth for cleaning. Do not use cleaning fluid or aerosols, which could enter the unit and cause damage, fire or electrical shock. Some substances may also mar the finish of the product.	ATLONA® www.atlona.com
