

Congratulations and thank you for purchasing this latest innovation from Belkin, the USB leader. The Travel USB Hub combines sleek design with outstanding performance, through four downstream USB ports. It lets you easily connect all your USB 1.1 and 2.0 devices to your computer, such as your iPod, digital camera, printer, MP3 player, and more. Its compact size and design seamlessly fit and complement any desktop area. Please carefully review the instructions below to be sure you get the most from your Belkin Hub.

Installation Instructions:

Step 1: Plug the flat end (USB-A connector) of the Hub's integrated device cable into an open USB port on your computer. If your computer is on, the Hub will automatically be detected and configured. If your computer is off, turn it on for the Hub to be detected and configured.

Step 2: Attach your USB devices to the Hub to begin use. In some cases, you may be prompted to reinstall drivers for your devices. Complete the install wizard with default options, or use the installation CD for your USB devices.
