Before you install the device in your computer, you will need to install the necessary driver for proper operation. Please follow the procedure below.

For Windows XP, Vista, Windows 7

Note: *The following setup is an example shown using a Windows XP operating system. Some screenshots may vary slightly depending on your operating system. The setup wizard is designed to step you through each part of the driver installation process successfully.*

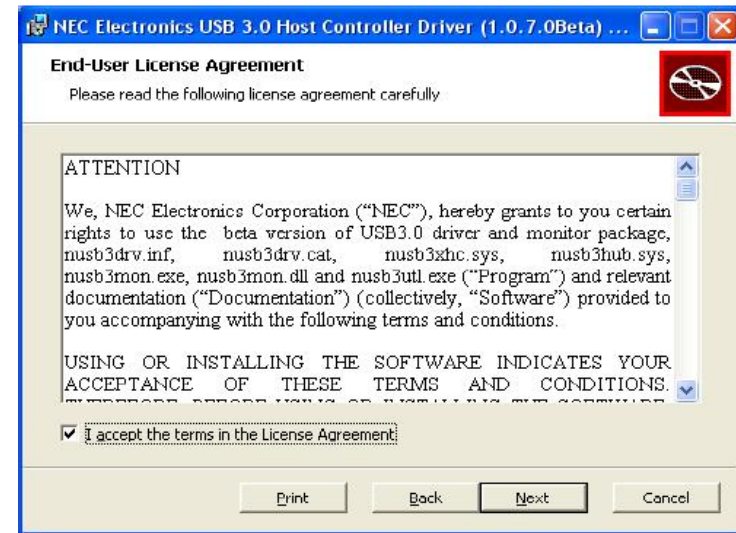

Step 1

Insert the CD provided with this product and click **Install Driver**. The following screen will appear. Click **Next**.

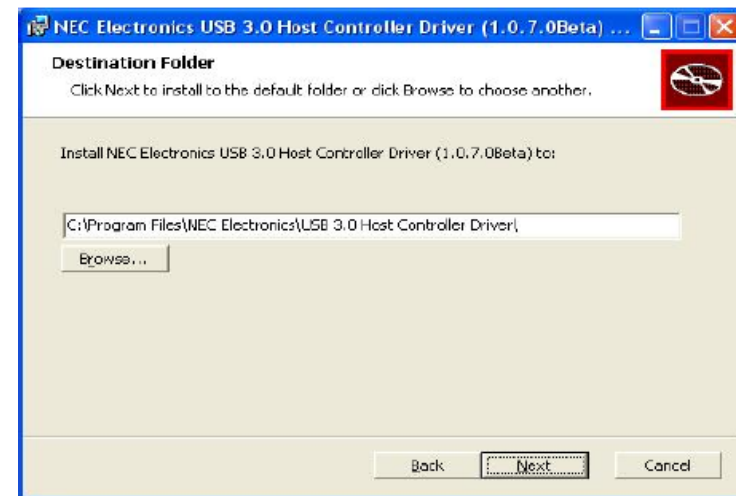

Step 2

After reading the End-User License Agreement, please select **“I accept the terms in the License Agreement”** and click **Next**.

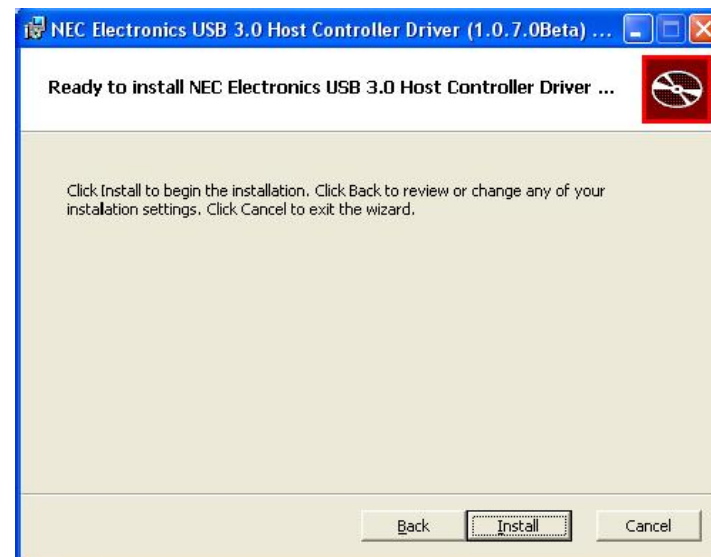

Step 3

Please click **Browse** to choose the destination folder, and then click **Next**.

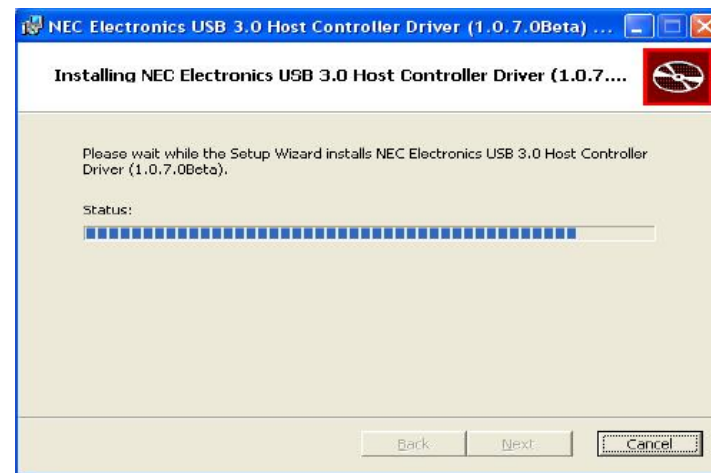

Step 4

Click **Install** to begin driver installation.

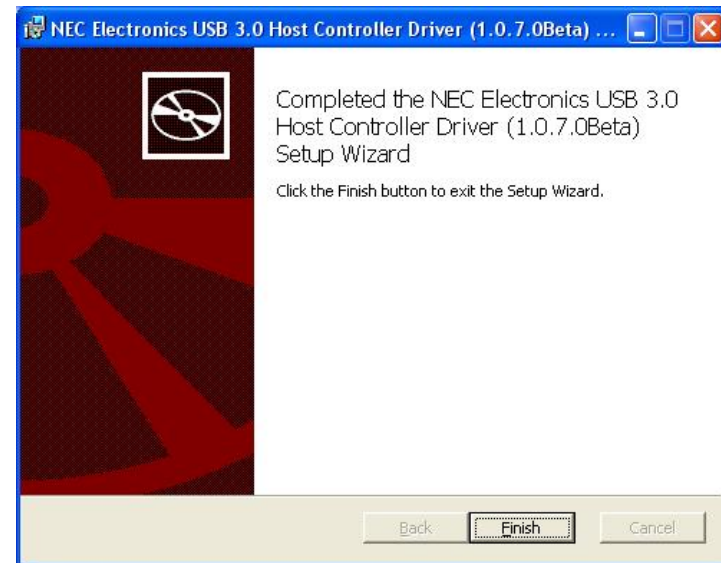

The driver installation may take a few minutes. You may also get a software installation Windows security pop-up during this time. Click Continue Anyway when it appears to complete the installation.

Step 5

When the installation has completed, click **Finish** to exit the setup wizard.

Step 1

Turn off your computer and remove the cover/panel to expose the PCI slot.

Step 2

Plug the 2-Port USB 3.0 Card into the PCI slot on the computer.

Step 3

Replace the cover/panel and turn on your computer.

When your computer starts up, a **Found New Hardware Wizard** will appear.

Note: *The following setup is an example shown using a Windows XP operating system. Some screenshots may vary slightly depending on your operating system. The setup wizard is designed to step you through each part of the driver installation process successfully.*

The process outlined below will have to be completed two times because there are two USB 3.0 ports that need to be installed and recognized.

Step 4

When the Found New Hardware Wizard appears, select **Yes, this time only**, and click **Next**.

Step 5

Choose **Install the software automatically** and click **Next**. The Windows security pop-up may appear during this process. Click **Continue Anyway** to continue with the installation.

Step 6

Click **Finish** to complete the installation and exit the wizard.

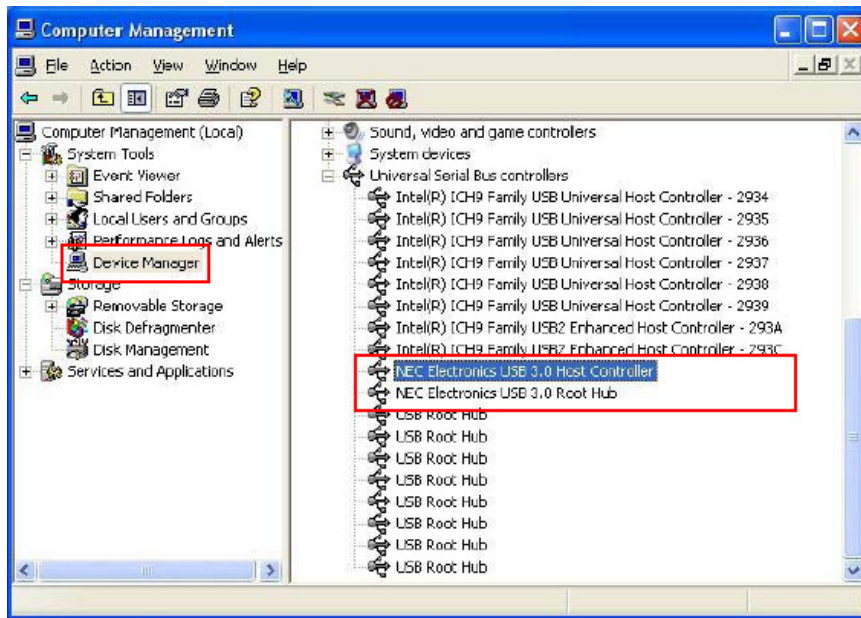

Step 7

The Found New Hardware Wizard will appear again. Repeat steps 4-6 for second USB 3.0 port installation.
