

Air care - improve the air quality in your home.

It incorporates Active Air Cleaning technology that is currently used in office and commercial systems which will remove particles and pollutants such as bacteria, pollen, odour and dust. The Electrolux air conditioning unit is portable thus allowing easy manoeuvrability from room to room keeping your home as comfortable as possible, regardless of the weather.

How Active Air Cleaning works

Active Air Cleaning means that an ion generator distributes, with the airflow, negative and positive ions in the house. This will then drastically reduce the amount of dangerous airborne particles in your home.

EXP09CS1WI
High-end Electrolux portable air conditioning unit

Features:

- Portable - 4 easy roll casters allow the air conditioning unit to be moved easily from room to room
- Fully functional remote control with LCD display - controls the functions from anywhere in the room
- Plasmacluster™ Ion Technology - activate the Plasmacluster ion generator to release positive and negative ions into the air for healthy atmosphere
- Dehumidification function - the dehumidification function will remove up to 60 pints of moisture from the air every 24 hours
- Automatic oscillating louvres - allows the movement of air across the entire room for more effective distribution and comfort
- Cooling capacity 7233 BTU/h
- 4-way air direction - lets you direct the cool air where you need it most
- Library Quiet™ - just 36dBA at low cool setting
- Colour: White (EXP09CS1WI)
- Energy rating:
