

iConverter[®] Wall-Mounting Kit User Instructions

Description and Inventory

The 8249-0 *iConverter* Wall-Mounting kit was designed to attach one *iConverter* 1-Module or 2-Module chassis to a wall, backboard or other flat surface. The 8249-0 kit should include the following hardware:

- (2) "L" shaped brackets
- (4) Flat head screws, 4-40, 1/4 inch
- (4) Wall mounting screws

Warning:

Before installing an *iConverter* chassis, make sure to remove it from its power adapter. Make sure to disconnect the power adapter from the AC line power.

Mounting:

1. Align the screw threads of the *iConverter* chassis with the holes in the bracket.
2. Attach one "L" bracket on each side of the unit using the 4-40 flat head screws enclosed with the kit.

3. The *iConverter* with the tab brackets should look like the picture below (Fig. 1).
4. Attach unit to the desired surface using the appropriate screws.
5. Follow any installation instructions in the *iConverter* User Manual.
