# The HD Master VTR with IEEE 1394 Interface for Producing and Transmitting Over 2 Hours of Content

The AJ-HD1800 is the first broadcast and studio VTR with XL DVCPRO HD cassette capability to feature an IEEE 1394 digital interface. It easily teams up with a DVCPRO HD nonlinear editor to produce a full two hours of HD content. It also excels over previous models with its 720/50p image capability, built-in input up-converter, standard-equipped UMID/VANC metadata function, and superior cost-performance. The AJ-HD1800 HD studio VTR provides universal support for HD production and transmission.

# 126 MINUTES OF RECORDING, PLUS HD/SD MULTI-FORMAT FUNCTIONS

## Multi-Format HD Recording and Playback

With the addition of 720/50p, the AJ-HD1800 records in all of the world's HD broadcast formats in both 1080i and 720p video. It also plays back all DVCPRO HD sources, including the 1080/23.98p over 59.94i recorded by the AJ-HDX900 DVCPRO HD camera-recorder and the 720/24p (and 25p) over 60p recorded by VariCam. The built-in HD cross-converter makes it easy to convert between 1080i and 720p HD formats. These features combine to make the AJ-HD1800 a flexible solution for both broadcast and cinema applications.

\*Neither converted output or converted recording is possible for 59.94 Hz to 50 Hz.

## SD Source Playback and Up/Down Conversion

The AJ-HD1800 can play DVCPRO50, DVCPRO, DV\* and DVCAM\* SD sources. The built-in up-converter and down-converter make it possible to output HD data from SD sources, or SD data from HD sources. HD and SD can be output simultaneously. There's also an aspect ratio conversion function for added flexibility.

\*You need an optional AJ-CS455P Mini-DV Playback Adapter to play Mini-DV and DVCAM S cassettes on the AJ-HD1800. The AJ-HD1800 can play DV tapes in SP mode only.

## 1080/24p (25p) Output for AJ-HDC27H

### VariCam Source Production

The AJ-HD1800 can play 720/23.98p over 59.94p sources and convert them for output as 1080/23.98psf, and it can play 720/25p over 60p sources and convert them for output as 1080/25psf. Used in this way, the AJ-HD1800 provides the AJ-HDC27H VariCam user with an easy integration path to native 1080/24psf or 1080/25psf based program production.

## 126 Minutes of Recording on an XL DVCPRO HD Cassette

Designed to broadcast specifications, the DVCPRO HD codec combines a video bit rate of 100 Mbps with 4:2:2 image sampling and intra-frame compression. This reliable recording system also minimizes quality degradation with fast-moving subjects and is highly resistant to drop-out. The AJ-HD1800 accepts the M, L, and XL cassettes. It can record up to 126 minutes on a single XL cassette.

## Eight Channels of 16-bit Digital Audio

DVCPRO HD format also offers superb 16-bit linear PCM sound quality, with eight embedded channels for recording in 5.1-channel surround sound. The AJ-HD1800 uses HD-SDI for independent input/output and editing of all eight channels.

## UMID\* Data Recording and Playback

The AJ-HD1800 records and plays data that conforms to the UMID standard and contains a variety of supplementary information. This allows it to read GPS data (latitude, longitude and altitude) recorded by the AJ-HDX900/AJ-SDX900 camera-recorders. The AJ-HD1800 can handle VANC for a variety of user data including Closed Captioning, Dolby Dial Norm, and network signaling.

\*UMID stands for Unique Material Identifiers, which are defined for AV material use in the SMPTE 330M international standard.

# A WIDE VARIETY OF INTERFACES AND EDITING FUNCTIONS

## IEEE 1394 Digital Interface

Equipped with an IEEE 1394 interface, the AJ-HD1800 can transfer HD or SD DVCPRO compression data without quality loss to a PC-based nonlinear editing system. Using an XL cassette, this enables nonlinear editing of a full two-hour program. You can also use the AJ-HD1800 for convenient dubbing from a P2HD memory card recorder.

### HD Non-Linear Editors IEEE 1394 Digital Interface compatible

\* Please refer "IEEE1394 Compatibility Table" at [https://eww.pavc.panasonic.co.jp/pro-av/sales\\_o/ieee1394/index.html](https://eww.pavc.panasonic.co.jp/pro-av/sales_o/ieee1394/index.html)

## Down-Converted IEEE 1394 Output for Offline Use

In addition to the down-converted playback feature on previous models, the IEEE 1394 interface on the AJ-HD1800 allows it to down-convert HD-SDI input for the first time. While line recording in DVCPRO HD, the AJ-HD1800 can output down-converted SD (DVCPRO50 or DV) data for recording by an external DV device, such as a laptop PC, Focus FS-100 or other hard disk recorder, or onto a P2 card. Use it for offline editing or to create source data for SD transmission without the need for dubbing.

## HD-SDI Input/Output

The AJ-HD1800's HD-SDI interface allows easy HD-SDI input/output and SD-SDI output, making the AJ-HD1800 ideal for use in an HD broadcasting system. Use the AJ-HD1800 for line recording, in-studio production, data transmission and more. A switch is provided on the front panel for selecting the HD-SDI or IEEE 1394 interface for the input signal.

## SD Analog Composite Output

The AJ-HD1800 is equipped with three composite video outputs (BNC). VIDEO OUT3 can be used for titles (ON/OFF selectable).

## Digital/Analog Audio In/Out

In HD mode, up to eight channels of AES/EBU digital audio (BNC) can be input and output,\* or up to four channels of analog audio (XLR).\* The AJ-HD1800 also has audio monitor output (XLR) and cue in/out (XLR) terminals.

\*In SD mode, up to four channels can be output in DVCPRO 50, and two channels in DV and DVCPAM.

## Versatile Remote Systems

The AJ-HD1800 is equipped with a host of terminals, including RS-422A remote in/out (selectable, D-Sub 9-pin), RS-422A remote out (D-Sub 9-pin), parallel remote (D-Sub 50-pin), RS-232C remote (D-Sub 25-pin), and encoder remote (D-Sub 15-pin).

## High-Precision Editing

Editing with to-the-frame (+/-0) precision is possible either manually or by external remote control. Editing operations include assemble, insert (V/A/CUE/TC), and audio split (audio in/out points).

- Unit-to-unit editing: Edit between two units without a separate editing controller, by connecting the AJ-HD1800 to an external player via RS-422A and using the controls on the AJ-HD1800's front panel.
- External remote editing: Edit using a separate editing controller connected to the AJ-HD1800 via RS-422A.

## Built-in Time Code Generator/Reader

The AJ-HD1800 can record and reproduce two of the same or two different time codes (pseudo LTC/VITC) on the tape's special sub-code track and video AUX area. Eight-digit hexadecimal (0-9, A-F) text data can also be recorded for use as a user's bit (UB). The time code mode allows to-the-frame (+/-0) editing precision.

## Encoder Adjustment

The HD-SDI, SD-SDI, and composite video output signals can be adjusted using the Setup menu on the on-screen display or an external remote controller.

# CONVENIENT USEFUL PLAYBACK FUNCTION FOR BROADCASTING

## Enhanced Front Panel with LCD Monitor

The front panel has been enhanced to include an LCD monitor and numerical key pad. Use the LCD to display the on-screen menu for easy function setting or to monitor input or output images\*. Up to four user files with settings can be saved to and loaded from SD Memory cards.

\*When recording or playing in the HD format, the down-converted (letterbox) image is displayed.

## 32x Shuttle and Jog

The AJ-HD1800 provides fast shuttle searching at up to 32x normal speed (with HD-LP tape) in both forward and reverse, plus fast forward and rewind (+/-100x). In jog mode, you can also monitor the audio, for better accuracy and response.

## Noiseless Slow Playback

The playback speed varies (+/-4.9x) according to the dial angle. You get noiseless slow playback from -1x to 2x normal speed (with HD-LP tape).\* PCM/CUE audio can be monitored. The Variable Memory function lets you store and recall dial operations.

\*Noiseless slow extends from -1x to 1.1x normal speed when playing DVCPRO HD, DVCPRO50, DVCPRO, or DV/DVCAM tapes.

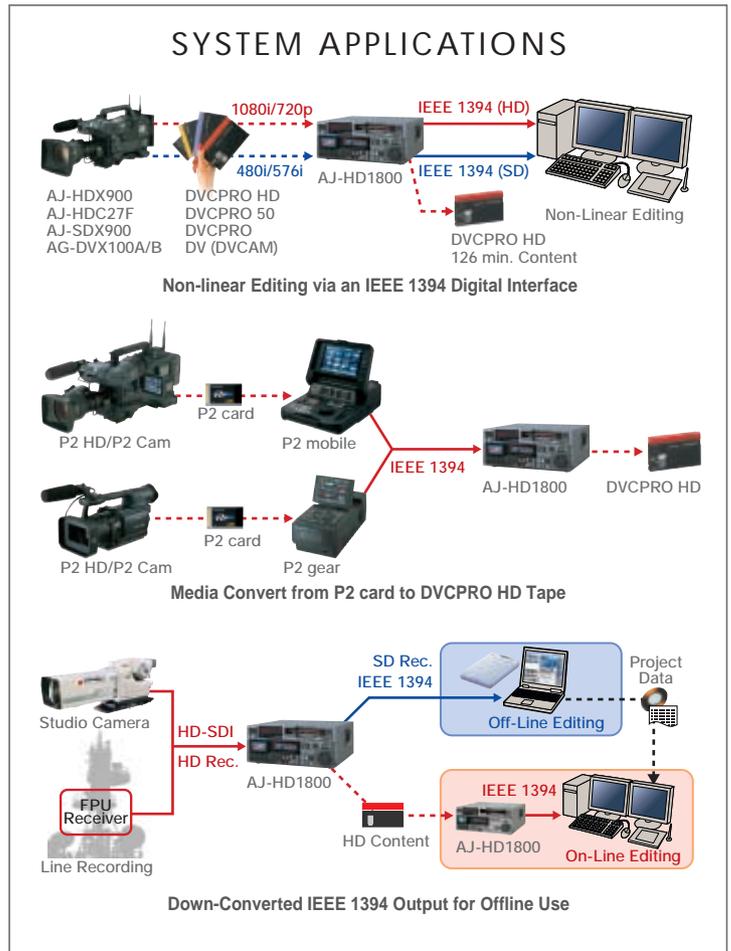

## Multi-Cue Functions

Multi-Cue: You can register up to 60 cue (index) points. Cueing is then possible at any of those points.

## Compact, Easy to Install

The 4RU-size AJ-HD1800 fits into a 19-inch rack. Use the optional AJ-MA75P\* Rack Mount Adapter for easy installation in the studio or in an OB van. With its depth reduced by about 30 mm compared with previous models, the AJ-HD1800 is both smaller and lighter.

\*Slide rail is required separately (not included).
