## Product highlights

### Support DVB-T

Expand your entertainment experience and enjoy digital channel programs - for free. With DVB-T (Digital Video Broadcasting - Terrestrial), you can receive free digital TV and radio programs in Europe. The signal is kept digital without any analog steps in between, to preserve the highest quality.

### Zero Bright Dot™ screen

Enjoy highest-quality images that are free from annoying blank spots on the LCD screen. LCD displays commonly have imperfections, termed as 'bright dots' by the LCD industry. A limited number of bright dots were once considered an inevitable side effect of LCD mass production. With Philips' strict quality control procedures used in our Portable DVD Players, our LCD displays are produced with zero tolerance for bright dots. Select Portable DVD Players come with Philips Zero Bright Dot™ Policy to guarantee optimal screen quality.

### Play DivX® and MPEG4 movies

With DivX support, you are able to enjoy DivX-encoded videos in the comfort of your living room. The DivX media format is an MPEG4-based video compression technology that enables you to save large files like movies, trailers and music videos on media like CD-R/RW, memory cards and DVD-video. DivX CDs can be played back on selected DVD players, DVD recorders and home theater systems.

### USB 2.0 and SD card slot

Enjoy the high-speed and convenience of accessing more capacity to transfer photos, videos and MP3 music files by using USB 2.0. You can also access more capacity to store photos, videos and MP3 music files on your portable DVD player by inserting an SD card into the built-in SD card slot.
