

Cyber 2S1P PCI

Quick Installation Guide

Introducing the *Cyber 2S1P PCI*

The *Cyber 2S1P PCI* high-speed serial I/O card provides two 9-pin serial ports and one parallel port.

Features and Benefits

- Conforms to PCI v2.2 Plug and Play
- Full support for Windows-based software
- Reduces CPU load and improves system performance dramatically
- IRQ sharing feature reduces IRQ conflicts
- High-speed serial port (9-pin) works with 56K V.90 external modems, ISDN terminal adapters, PDAs, digital cameras, label printers and other serial port devices
- Built-in FIFO buffers dramatically increase data transmit/receive speed, especially under Windows' multitasking environment
- Each serial port can be configured for either 5v or 12v output, for serial devices that require power
- IEEE 1284 compliant SPP/EPP/ECP parallel port

System Requirements

- Pentium or equivalent computer with an available PCI slot
- Windows 95/98/98SE/ME/NT 4.0/2000/XP/Server 2003

Package Contents

- *Cyber 2S1P PCI board*
- Connector bracket w /9-pin serial port
- Driver CD
- Quick Installation Guide

Layout

Figure 1. Layout

Jumper Settings (JP1, JP2)

Open = 0 volts (default)

Short 1-2 = 5V

Short 2-3 = 12V

Note: Most serial devices do not require additional power through the serial port. Refer to your serial device's manual for more information. The jumper can be removed if the ports do not require power.

Serial Port 2 Connection

Hardware Installation

General instructions for installing the card are provided below, since the design of computer cases and motherboards vary. Refer to your computer's reference manual for further information, if needed.

Static Electricity Discharge may permanently damage your system. Discharge any static electricity build up in your body by touching your computer's case for a few seconds. Avoid any contact with internal parts and handle cards only by their external edges.

1. Turn OFF the power to your computer and any other connected peripheral devices.
2. Unplug the power cord from the back of the computer.
3. Remove your computer's cover.
4. Remove the slot bracket from an available PCI slot.

5. Change **JP1-JP2** jumper settings to the desired voltage only if your serial device(s) needs additional power from the serial port. However, most serial devices do not require additional power. For more information, see **Figure 1** on page **2**. Skip this step if power is not required.
6. If you need the second serial port, connect the 9-pin ribbon cable connector now. See **Figure 2** on page **3** for more details. Skip this step if you only need one serial port.
7. To install the card, carefully align the card's bus connector with the selected PCI slot on the motherboard. Push the board down firmly, but gently, until it is well seated.
8. Replace the slot bracket's holding screw to secure the card.
9. Replace the computer cover and reconnect the power cord.

Driver Installation

This section provides information on how to install the *Cyber 2S1P PCI* drivers.

Windows 95

1. At the **Update Device Driver Wizard**, click **Next**.
2. Insert the driver CD, and click **Other Locations**. Type in **D:\9x**, click **OK**, then **Finish**. (Change **D:** to match your CD-ROM drive letter)
3. From the **Insert Disk** window, click **OK**. When the **Copying Files** dialog box appears, type in **D:\9x**, then click **OK**.
4. Repeat steps **1-3**.
5. Restart Windows to complete the installation.

Windows 98/98SE

1. At the **Add New Hardware Wizard**, click **Next**.
2. Select **Search for the best driver for your device (Recommended)**, then click **Next**.
3. Insert the driver CD, check **Specify a location**, uncheck the other boxes, type in **D:\9x**, click **Next**. (Change **D:** to match your CD-ROM drive letter)
4. Click **Next**, then **Finish**.
5. Repeat steps **1-4**.
6. Restart Windows to complete the installation.

Windows ME

1. At the **Add New Hardware Wizard**, select **Specify the location of the driver (Advanced)**, click **Next**.
2. Insert the driver CD, check **Specify a location**, uncheck the other box, type in **D:\Me**, then click **Next**. (Change **D:** to match your CD-ROM drive letter)
3. Click **Next** and **Finish**.
4. Repeat steps **1-3**.
5. Restart Windows to complete the installation.

To Verify Windows 95/98/98SE/ME Installation

1. From the main desktop, right click **My Computer**, click **Properties**, then click **Device Manager**.
2. Double click **Ports (COM & LPT)**, **Printer Port...** and **CyberParallel PCI** should be displayed one time and **CyberSerial PCI 16Cxxx...** should be displayed two times.
3. Double click **Multi-function adapters**, **SIIG CyberPro 2S1P PCI board** should be displayed.

Windows NT 4.0

1. From the desktop click **Start**, then **Run**.
2. Insert the driver CD, type in **D:\NT4\Install_Serial.exe**, then click **OK**. (Change **D:** to match your CD-ROM drive letter)
3. Click **Next** when the **Welcome** window appears.
4. Choose **Install**, then click **Next**.
5. Click **Yes**, then click **Exit**.
6. From the desktop click **Start**, then **Run**.
7. Type in **D:\NT4\Install_Parallel.exe**, then click **OK**. (Change **D:** to match your CD-ROM drive letter)
8. Repeat steps 3-5.
9. Click **Yes** to restart Windows to complete the installation.

To Verify Windows NT 4.0 Installation

1. Click **Start, Settings, Control Panel**, double click **Ports** device icon.
2. Two new **COM** ports will be assigned when successfully installed.
3. Click **Start, Programs, Administrative Tools, Windows NT Diagnostics**. Click **Resources** tab, **SIIGpar** and **SIIGser** should be displayed.

Windows 2000

1. At the **Found New Hardware Wizard**, click **Next**.
2. Select **Search for a suitable driver for my device (recommended)**, and click **Next**.
3. Select **Specify a location**, uncheck the other boxes, and click **Next**.

4. Insert the driver CD, type in **D:\2000**, then click **OK**. (Change **D:** to match your CD-ROM drive letter)
5. Click **Next** and **Finish**.
6. Repeat steps **1-5** two more times.
7. Restart Windows to complete the installation.

Windows XP

1. At the **Found New Hardware Wizard**, choose **Install from a list or specific location (Advanced)**, then click **Next**.
2. Insert the driver CD, check **Include this location in the search**, uncheck the other check box, type in **D:\XP**, and click **Next**. (Change **D:** to match your CD-ROM drive letter)
3. If the **Hardware Installation** window pops up, click **Continue Anyway**, then **Finish**. *Our driver has been tested for stability and compatibility.*
4. Repeat steps **1-3** three more times.
5. Restart Windows to complete the installation.

Windows Server 2003

1. At the **Found New Hardware Wizard**, choose **Install from a list or specific location (Advanced)**, then click **Next**.
2. Insert the driver CD, check **Include this location in the search**, uncheck the other check box, type in **D:\2003**, and click **Next**. (Change **D:** to match your CD-ROM drive letter)
3. If the **Hardware Installation** window pops up, click **Continue Anyway**, then **Finish**. *Our driver has been tested for stability and compatibility.*

4. Repeat steps **1-3** three more times.
5. Restart Windows to complete the installation.

To Verify Windows 2000/XP/Server 2003 Installation

1. Right click **My Computer**, click **Manage**, then select **Device Manager**.
2. Double click **Ports (COM & LPT)**, two **CyberSerial PCI 16Cxxx...** and one **CyberParallel PCI...** should be displayed.
3. Double click **Multifunction adapters, SIIG CyberPro 2S1P PCI board** should be displayed.

Changing COM Port Address

Some serial devices need a specific COM port in order to work. If your serial device works properly, do not change this setting.

Windows 95/98/98SE/ME

1. From the **Device Manager** window double click **Ports (COM & LPT)**, then double click the **CyberSerial PCI** serial port you want to change.
2. Click **Settings** tab, at the **Port Name** box click the down arrow and select a COM address that is not currently in use.
3. Click **OK**, then click **OK** again to close **Device Manager** to save the changes. *Follow steps 1-3 again to change the second serial port if needed.*

Windows 2000/XP/Server 2003

1. From the **Device Manager** window double click **Ports (COM & LPT)**, then double click the **CyberSerial PCI...** serial port you want to change.

2. Click **Settings** tab and click **Advanced**.
3. Click the down arrow that is next to the **COM Port number** box and select a COM port that is not in use. Click **OK**.
4. Click **OK**, then close **Device Manager** to save the changes. *Follow steps 1-4 again to change the second serial port if needed.*

Changing Parallel Port Address (LPT)

Some parallel devices need a specific parallel port in order to work. If your parallel device works properly, do not change this setting.

Windows 95/98/98SE/ME

1. From the **Device Manager** window double click **Ports (COM & LPT)**, then double click **CyberParallel PCI**.
2. Click **Settings** tab, check **Enable use of I/O location 278h**.
3. Click **OK**, click **OK** again to close **Device Manager** and click **Yes** to restart Windows to save the changes.

Windows 2000/XP/Server 2003

1. From the **Device Manager** window double click **Ports (COM & LPT)**, then double click **CyberParallel PCI....**
2. Click **Port Settings** tab.
3. At the **LPT Port Number** box, click the down arrow and select an LPT port that is not in use.
4. Click **OK**, then close **Device Manager** to save the changes.

Technical Support and Warranty

QUESTIONS? SIIG's **Online Support** has answers! Simply visit our website at **www.siig.com** and click on **Support**. Our online support database is updated daily with new drivers and solutions. Answers to your questions could be just a few clicks away. You can also submit questions online and one of our technical support analysts will promptly respond.

A lifetime manufacturer warranty supplied with this product is offered by SIIG, Inc. Please see SIIG website for more warranty details. If you should happen to encounter any problems with this product, please follow the procedures below.

If it is within the store's return policy period, please return the product to the store where you purchased from.

If your purchase has passed the store's return policy period, please follow these steps to have the product repaired or replaced.

Step 1: Submit your RMA request.

Go to **www.siig.com**, click **Support**, then **RMA** to submit a request to SIIG RMA. If the product is determined to be defective, an RMA number will be issued. SIIG RMA department can also be reached at (510)413-5333.

Step 2: After obtaining an RMA number, ship the product.

- Properly pack the product for shipping. All software, cable(s) and any other accessories that came with the original package must be included.
- Clearly write your RMA number on the top of the returned package. SIIG will refuse to accept any shipping package, and will not be responsible for a product returned without an RMA number posted on the outside of the shipping carton.
- You are responsible for the cost of shipping the product to SIIG at the following address:

SIIG, Inc.

6078 Stewart Avenue

Fremont, CA 94538

RMA #:

- SIIG will ship the repaired or replaced product via Ground in the U.S and International Economy outside of the U.S at no cost to the customer.

About SIIG, Inc.

Founded in 1985, SIIG, Inc. is a leading computer upgrade manufacturer of I/O connectivity products, including PCI & ISA serial and parallel ports, USB, Serial ATA & UltraATA controllers, FireWire(1394a/b), Networking, Sound Cards, and other accessories. SIIG is the premier one-stop source of upgrades.

SIIG products offer comprehensive user manuals, many user-friendly features, and are backed by an extensive manufacturer warranty. High-quality control standards are evident by the overall ease of installation and compatibility of our products, as well as one of the lowest defective return rates in the industry. SIIG products can be found in computer retail stores, mail order catalogs, and e-commerce sites in the Americas and the UK, as well as through major distributors, system integrators, and VARs.
