Technical Guide

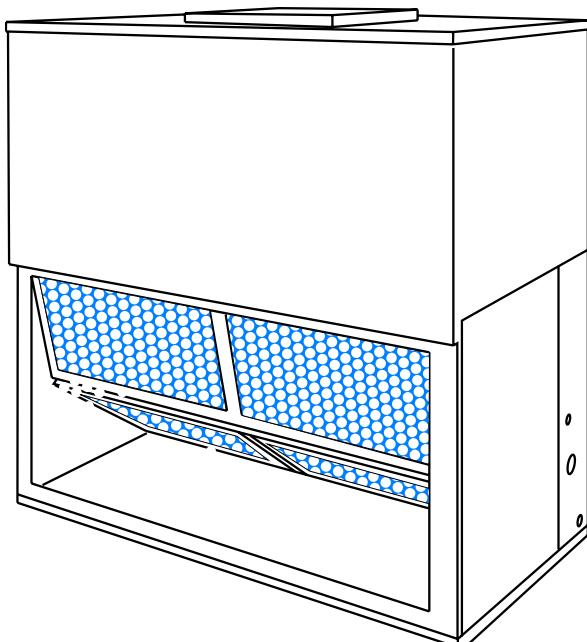

SPLIT-SYSTEM

EVAPORATOR BLOWERS

K2EU060, K4EU090, K3EU120 &

K3EU180

5 THRU 15 NOMINAL TONS

DESCRIPTION

These completely assembled units include a well-insulated cabinet, a DX cooling coil with copper tubes and aluminum fins, expansion valve(s), distributor(s), throwaway filters, a centrifugal blower, a blower motor, an adjustable belt drive, a blower motor contactor and a small holding charge of refrigerant-22.

The units are shipped in the vertical position ready for field installation. They can be installed for horizontal operation by reversing the position of the solid bottom panel with the return air duct flange on the front of the unit.

ACCESSORIES—FIELD INSTALLED

SUPPLY AIR PLENUMS

These fully insulated plenums are available for free standing units located within the conditioned space, are shipped knocked-down for easy field assembly, are finished to match the exterior of the basic unit, and have double deflection grills that can be adjusted to vary the throw, spread and drop of the supply air.

RETURN AIR GRILLS

These expanded metal grills are available for free standing units located within the conditioned space, are finished to match the exterior of the basic unit and are shipped in one piece for easy installation.

BASES

Bases are available to raise vertical units above the floor. Outdoor air may be introduced through these bases by cutting an access opening to accommodate the outdoor air duct connection. These bases are finished to match the exterior of the basic unit. They may have to be insulated in the field for certain applications.

THREE-PHASE ELECTRIC HEATERS

Electric heaters are available in several capacities to provide maximum flexibility. Both the air conditioning unit and the heater can be selected to precisely match the cooling and heating requirements of the conditioned space. These heaters are designed for easy field installation over the supply air opening of the unit. They have been tested by and will be shipped with a CSA label. Every heater will be fully protected against excessive current and temperature by fuses and two high limit thermostats.

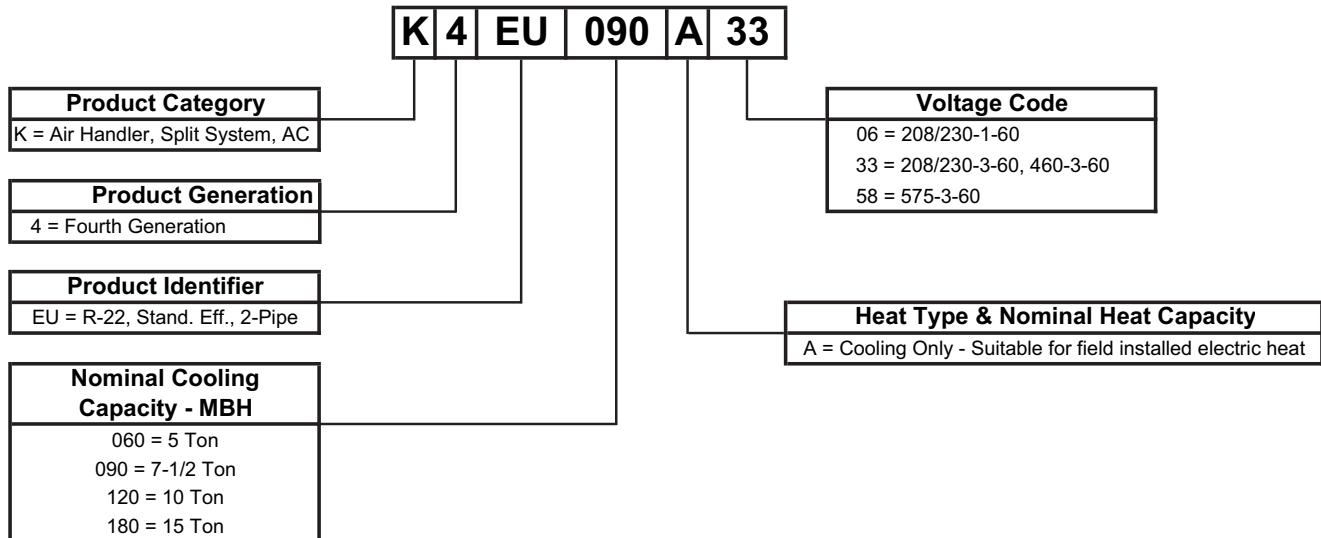

Units with electric heat will require only one power supply for both the heating elements and the supply air blower motor, and the power wiring can be protected by either dual element/time delay fuses or an inverse time circuit breaker.

NOMENCLATURE

York Indoor Split System Product Nomenclature

ACCESSORIES-FIELD INSTALLED (CONT.)

HOT WATER COILS

These drainable coils have 2 rows of 1/2" copper tubes, 12 aluminum fins per inch, a casing that is finished to match the exterior of the basic unit, but no water control valve. The coils slide out of their casings for easy field installation. They should be mounted over the return air opening on 5, 7-1/2 and 10-ton units—between the unit coil and blower sections on 15-ton units.

STEAM COILS

These non-freeze coils have 1 row of 1" copper tubes, a 5/8" copper tube inside each 1" tube to distribute the steam evenly across the entire length of the coil, 8 aluminum fins per inch, a casing that is finished to match the exterior of the basic unit, but no steam control valve. The coils slide out of their casings for easy field installation and are pitched in their casings to facilitate condensate drainage. They should be mounted over the return air opening on 5, 7-1/2 and 10-ton units—between the unit coil and blower sections on 15-ton units.

SUSPENSION KIT

Suspension kit 1HH0451 is available for 15-ton units installed horizontally. The accessory includes two channel iron supports and the hardware to secure them to the top of the unit. The hanger rods must be supplied by the field.

THERMOSTATS

Wall-mounted thermostats and subbases (24-volt) with system and fan switches are available to control the operation of these split system air conditioners.

APPLICATION FLEXIBILITY

MODELS 5, 7-1/2 & 10 TON

These units are built in a single cabinet with two condensate drain pans. This allows the units to be installed in either the vertical or horizontal position for maximum flexibility.

On vertical applications, the air velocity across the cooling coil keeps the condensate from dripping off the finned surface onto the filters.

On horizontal applications, the unit must be installed with the condensate drain pan under the entire cooling coil.

- The Supply Air Plenum and the Return Air Grill accessories can be used on either arrangement.
- The Base accessory can only be used on the vertical arrangement.

Units installed horizontally are designed for ceiling suspension. Four 3/8"-16 weld nuts are provided in the angle supports on the front of the unit (the side with the logo). Knockouts are provided in the exterior panels for access to these weld nuts. The hanger rods must be supplied in the field.

1. At a distance of 10 feet from the blower.

NOTE: These values have been accessed using a model of sound propagation from a point source into the hemispheric free field. The dBA values provided are for reference only. Calculation of dBA values cover matters of system design and the fan manufacturer has no way of knowing the details of each system. This constitutes an exception to any specification or guarantee requiring a dBA value or sound data in any other form than sound power level ratings.

1. Capacity Ratings do not include the heat generated by the air blower motor.

2. For 208 volts, multiply the MBH and KW by $(208/240)^2$ or 0.751.

For 230 volts, multiply the MBH and KW by $(230/240)^2$ or 0.918.

3. For 460 volts, multiply the MBH and KW by $(460/480)^2$ or 0.918.

4. For 575 volts, multiply the MBH and KW by $(575/600)^2$ or 0.918.

TABLE 5: STEAM COIL CAPACITY¹, MBH@2 PSIG²

		7200	356.4	321.8	287.9	254.0	

1. These capacities do not include any blower motor heat.

2. Multiply these capacities by the following factors to correct for higher steam pressures.

Steam Pressure, psig	5	10	15	20	25
Capacity correction factor	1.05	1.12	1.19	1.25	1.30

NOTE: Steam rate (lb./hr.) = 1.025 x MBH

CAUTION: Do NOT operate a motor above its nominal HP rating when a unit is equipped with a steam coil accessory.

TABLE 6: HOT WATER CAPACITY¹, MBH

1. Adjusting the vertical louvers will vary the throw, the spread and the drop.
2. Adjusting the horizontal louvers will only vary the drop.
3. The velocity of the air will be 125 ft./min. at the minimum distance and 80 ft./min. at the maximum distance.
4. The velocity of the conditioned air at the bottom of the drop will be 50 ft./min. Drafts will occur if the drop extends into the occupied level of the conditioned space.

AIR FILTERS	Quantity Per Unit (16" X 25" X 1")	2	4	4	0
	Quantity Per Unit (20" X 20" X 1")	0	0	0	6
	Total Face Area (ft. ²)	5.6	11.1	11.1	16.7
HOLDING CHARGE	Refrigerant 22 (lbs./oz.)	0/7	0/7	0/10	0/0

1. Refer to Blower Motor and Drive Data table for additional blower and drive information.

All of these 1750 RPM motors are solid base, 56 frame with 1.15 service factor, inherent protection and permanently lubricated ball bearings.

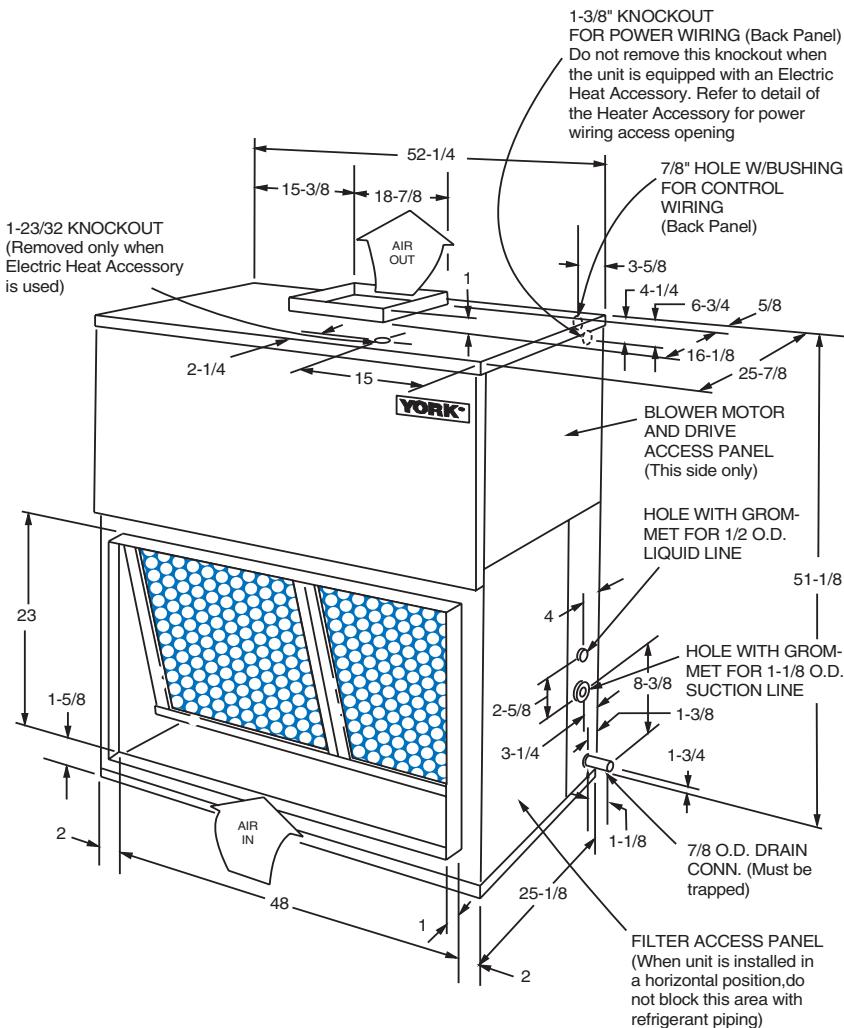

**FIGURE 1 - UNIT DIMENSIONS KEU060****ACCESSORIES**

- ELECTRIC HEATER - Add 13" to unit height when used.
- SUPPLY AIR PLENUM - Add 24-1/4" to unit height when used.
- BASE - Add 20" to unit height when used.

TABLE 18: UNIT CLEARANCES KEU060

MINIMUM CLEARANCES	060
Side with RETURN AIR opening	24"
Side with SUPPLY AIR opening ¹	24"
Side with PIPING CONNECTIONS ²	36"
Side opposite with PIPING CONNECTIONS	12"
Side with access for both POWER & CONTROL WIRING ³ ,	-
Bottom ⁴	-

- Overall dimensions of the unit will vary if an electric heater, a supply air plenum or a base is used.
- This dimension is required for removal of the coil. Only 26" is required for normal service.
- Although no clearance is required for service and operation, some clearance may be required for routing the power and control wiring.
- Allow enough clearance to trap the condensate drain line.

All dimensions are in inches. They are subject to change without notice. Certified dimensions will be provided upon request.

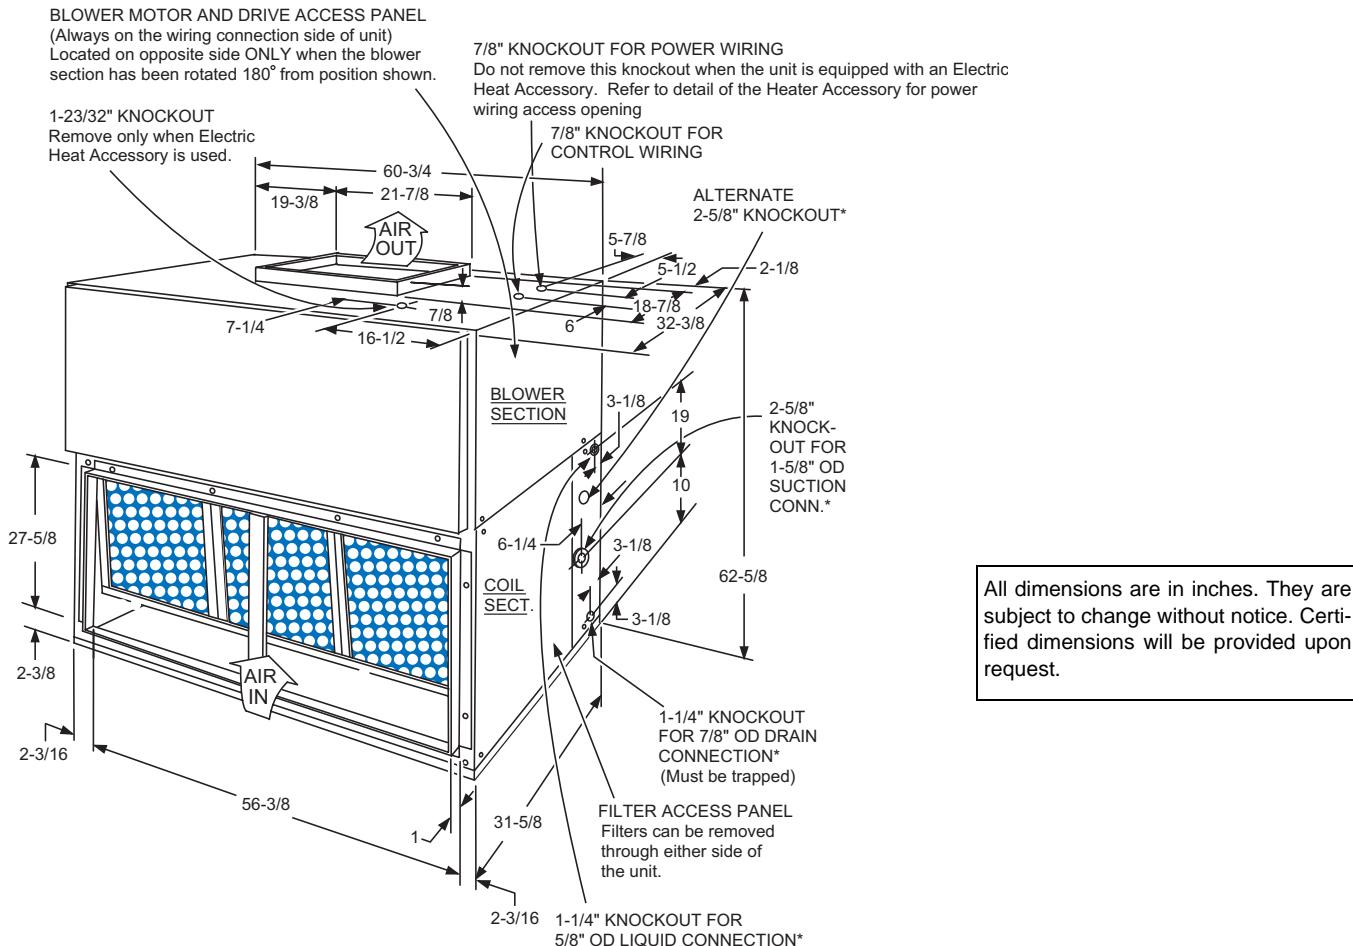

FIGURE 2 - UNIT DIMENSIONS KEU090 & 120**ACCESSORIES**

- ELECTRIC HEATER - Add 14-1/4" to unit height when used.
- SUPPLY AIR PLENUM - Add 27-1/2" to unit height when used.
- BASE - Add 20" to unit height when used.

TABLE 19: UNIT CLEARANCES KEU090 & 120

MINIMUM CLEARANCES	090-120
Side with RETURN AIR opening	24"
Side with SUPPLY AIR opening ¹	24"
Side with PIPING CONNECTIONS ²	36"
Side opposite with PIPING CONNECTIONS	12"
Side with access for both POWER & CONTROL WIRING ³ ,	-
Bottom ⁴	-

- Overall dimensions of the unit will vary if an electric heater, a supply air plenum or a base is used.
- This dimension is required for removal of the coil. Only 26" is required for normal service.
- Although no clearance is required for service and operation, some clearance may be required for routing the power and control wiring.
- Allow enough clearance to trap the condensate drain line.

*Refer to INSTALLING REFRIGERANT MAINS in installation instruction when piping through the opposite side of the unit.

FIGURE 3 - UNIT DIMENSIONS KEU180

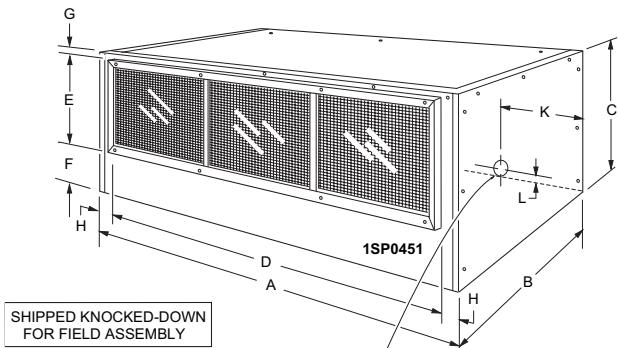

ACCESSORIES

- ELECTRIC HEATER - Add 14-1/4" to unit height when using 10, 16, 26, or 36 KW heater
- SUPPLY AIR PLENUM - Add 27" to unit height when used.
- BASE - Add 24" to unit height when used.
- HOT WATER OR STEAM COIL - Add 6" to unit depth when used.

TABLE 20: UNIT CLEARANCES KEU180

MINIMUM CLEARANCES	180
Side Air with RETURN AIR opening	24"
Side with SUPPLY AIR opening ¹	24"
Side with PIPING CONNECTIONS ²	61"
Side opposite PIPING CONNECTIONS ³	26"
Bottom ⁴	-

- Overall dimension of the unit will vary if an electric heater, a supply air plenum or a base is used.
- This dimension is required for removal of the DX coil. Only 26" is required for normal servicing.
- If the coil has to be removed, this dimension is required to loosen screws that secure the coil to the unit frame. This dimension will also be required for blower motor access if the piping connections are made on the opposite side of the unit.
- Allow enough clearance to trap the condensate drain lines.

SUPPLY AIR PLENUM

060, 090, 120 - KNOCKOUT FOR POWER WIRING

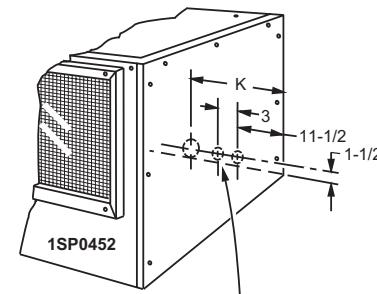

WITH ELECTRIC HEAT - Remove this 2-1/2" knockout from the rear panel of the plenum. Route the power wiring conduit through this opening and connect it to the field-supplied fitting on the electric heat accessory. Connect the power wiring to the fuse block in the heater control box.

Install the control wiring per basic unit Installation Manual.
DO NOT route any field control wiring through the plenum.

Electric Heaters are NOT CSA approved for installation
within a supply air plenum.

WITHOUT ELECTRIC HEAT - Install the power and the control wiring per basic unit Installation Manual. DO NOT route any wiring through the plenum and DO NOT remove this knockout.

Plenum Model	Unit Model	Plenum Dimensions (inches)									
		A	B	C	D	E	F	G	H	K	L
1SP0450	060	36	25-1/2	34-2/8	31-3/4	15-3/4	7-5/8	7/8	2-1/8	11-1/4	2
1SP0451	090	52-1/8	28-1/4	27-1/2	49-3/8	17-7/8	8-3/4	7/8	1-1/8	15-1/4	1-3/4
1SP0452	120	60-3/4	31	27	55-3/4	19-7/8	6-1/8	1-	2-1/2	19-1/2	1-3/4
1SP0452	180	60-3/4	31	27	55-3/4	19-7/8	6-1/8	1-	2-1/2	19-1/2	1-3/4

180 - KNOCKOUTS FOR POWER & CONTROL WIRING

WITH ELECTRIC HEAT - Remove this 2-1/2" knockout and one of the 7/8" knockouts from the rear panel of the plenum. Remove the 1-23/32" knockout and one of the 7/8" knockouts from the top panel of the basic unit. Install a 1/2" squeeze connector in both of the 7/8" openings.

Route the power wiring conduit through the 2-1/2" opening and connect it to the field-supplied fitting on the electric heat accessory. Connect the power wiring to the fuse block in the heater control box.

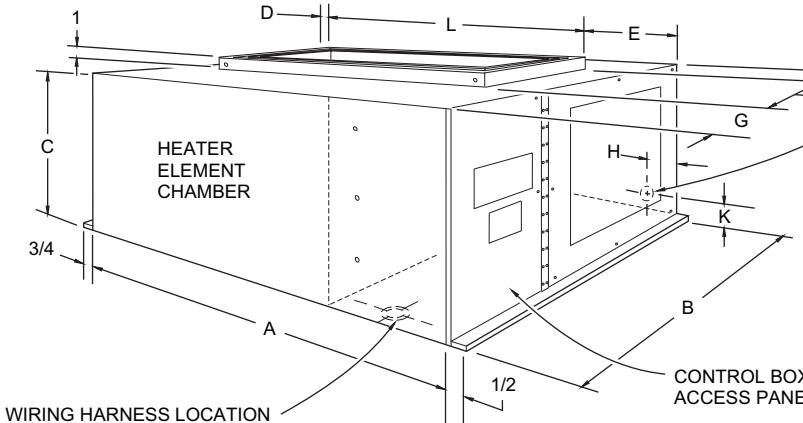

Route the control wires through the 7/8" openings and connect them to the terminals on block TB1. Secure them with the 1/2" squeeze connectors.

Electric Heaters are NOT CSA approved for installation
within a supply air plenum.

WITHOUT ELECTRIC HEAT - Remove both 7/8" knockouts from the rear panel of the plenum and both 7/8" knockouts from the top panel of the basic unit. Install a 1/2" squeeze connector in one of the plenum openings and both of the unit openings. Install a 1/2" conduit fitting in the other opening of the plenum.

Connect the power wiring conduit to the fitting on the plenum. Route the power wiring through the conduit, one of the squeeze connectors on the unit, and the field-supplied squeeze connector on the blower motor contactor box. Connect the power wiring to the blower motor contactor.

Route the control wires through the remaining plenum and unit openings and connect them to the terminals on block TB1. Secure them with the 1/2" squeeze connectors.

WIRING HARNESS LOCATION
This opening in the bottom of the heater control box is used for the wiring harness that connects the heater accessory to the basic unit. It is provided with a squeeze connector for securing the wiring harness, and its location corresponds to the location of the 1-23/32" knockout in the top panel of the basic unit.

ACCESS OPENING FOR POWER SUPPLY WIRING
10KW THRU 36KW - Add a 1-1/4" conduit fitting to the 1-23/32" hole for wire sizes up through #1 AWG. Remove the knockout ring and add a 1-1/2" conduit fitting to the 1-31/32" hole for wire sizes up through #0 AWG.

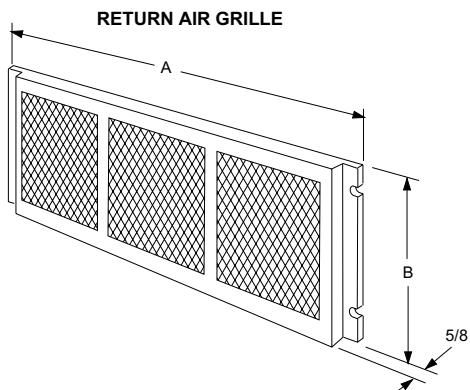

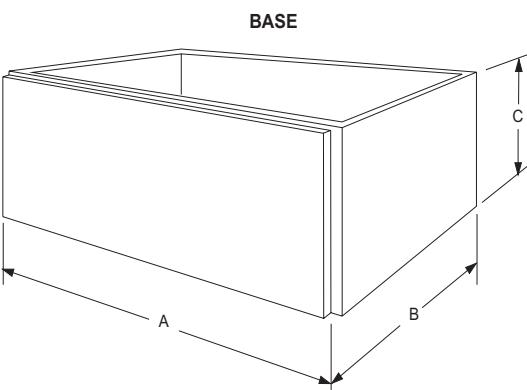

72KW THRU 36KW - Add a 1-1/4" conduit fitting to the 1-23/32" hole for wire sizes up through #1 AWG. Remove the knockout ring and add a 2" conduit fitting to the 2-1/2" hole for wire sizes up through #0000 AWG.

1. Dual element time delay.

2. HACR type per NEC.

3. The K*EU060 indoor motor is single phase. The electrical heaters MUST be supplied with 3-phase voltage only.

**FIGURE 10 - FIELD WIRING FOR POWER SUPPLY****FIGURE 11 - COOLING ONLY UNIT****FIGURE 12 - UNIT WITH STEAM OR HOT WATER COIL ACCESSORY**

UNITS WITH ELECTRIC HEAT ACCESSORY

The field wiring connected to these dummy terminals on 4TB can be routed directly from the condensing unit to the thermostat if desired.
 NOTE: Terminal R on 4TB is not a dummy terminal on KEU060 units because these units include a transformer that powers the control circuit. On larger systems, this transformer is supplied with the condensing unit.

*Wire R on 4TB terminal block is not required on 5 ton unit.
 **Only applies to HCA180/KEU180 systems when the HCA180 is equipped with the capacity reduction accessory. Two 115-volt wires will also be required for the liquid line solenoid valve that will be furnished with the capacity reduction accessory. Refer to Form 550.13N1.5 for additional information on this accessory.
