- Logitech advanced 2.4 GHz wireless provides a powerful, robust connection.
- An unrivalled 3-year battery life virtually eliminates the hassle of replacing batteries
- The pre-connected devices gets business users up and running faster
- No software to install means less time and resources to get up and running
- Time-saving hot keys and extra number-pad keys launch your favorite applications, and help increase your efficiency.
- 3-Year limited hardware warranty

The Logitech® Pro 2000 Cordless Keyboard offers a powerful connection, secure, 128-bit AES encryption, and plug-and-play installation, at an affordable price. Advanced 2.4 GHz wireless technology means virtually no delays or dropouts.* Three-year battery life virtually eliminates the hassle of replacing batteries.** Busy professionals are up and running faster because receiver and keyboard connect automatically, right out of the box. Easy installation eliminates software installation, saving time and resources. With time-saving hot keys and extra number-pad keys, you can instantly launch your favourite applications – including calculator, e-mail, and Internet browser – and increase your efficiency. No software required.

System requirements:
- PC with Windows® XP, or Windows Vista®
- USB port
- Internet connection for optional software download

* Compared to conventional 27 MHZ wireless technologies.
** Battery life calculation based on an estimated 2,000,000 keystrokes/year in an office environment. User experience may vary.
