MANHATTAN

MAN-176460-QSG-0507-02

Thank you for purchasing the MANHATTAN® Wireless Slim Multi-Media Keyboard with Optical Trackball, Model 176460.

Using 2.4GHz RF wireless technology, this keyboard has a working range of up to 15 meters (approx. 50 feet) from the USB receiver, providing secure, reliable performance for home, office, conference room and entertainment applications. Additional features include:

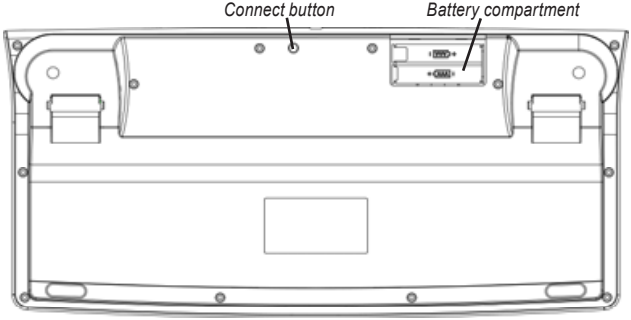
- Ergonomic key arrangement with built-in optical trackball, two-button mouse and Wake key
- 18 hotkeys offering quick, one-touch access to frequent multi-media, browsers and Windows functions
- Automatic power save management and error detection ability
- Lifetime Warranty

FCC Statement

This device complies with the part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

BATTERY INSTALLATION

1. Slide open the cover of the battery compartment.
2. Insert two AAA alkaline batteries, ensuring the polarities are correct.



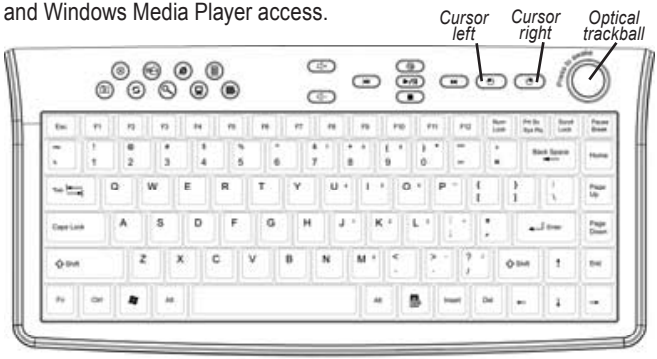
NOTE/CAUTION: The keyboard can also operate with rechargeable batteries, but mixing the two types — that is, using one standard battery and one rechargeable battery at the same time — can result in a battery explosion.

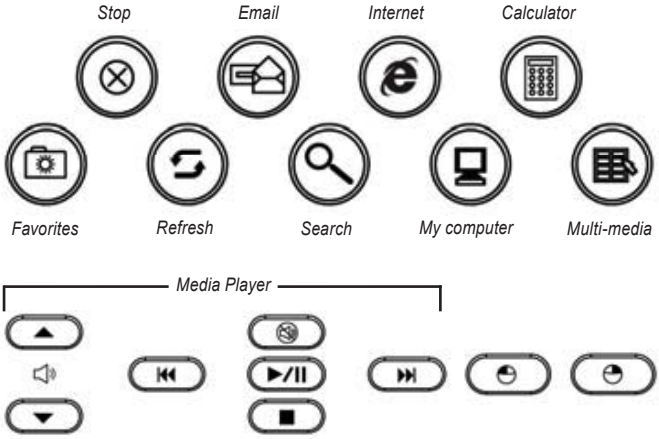
ESTABLISHING THE COMMUNICATION LINK

1. Connect the USB receiver (below) to a USB port on the computer. The LED on the receiver will light automatically.
2. Press and release the Setup button on the receiver to turn off the LED.
3. Press the Connect button on the underside of the keyboard (shown on Page 3). The LED on the receiver illuminates, indicating that the setup process has been completed.

OPERATING THE KEYBOARD & TRACKBALL

This keyboard has a built-in optical trackball that works as a mouse for moving the screen cursor. It also features cursor left and right keys (as shown below), plus 18 hotkeys (shown on Page 5) for direct Internet and Windows Media Player access.





Numeric keypad

Click the Num Lock key to activate the numerical keypad function. Press the key again to return to letter input.

Sleep mode

To reduce power consumption, this keyboard will enter into Sleep mode automatically after two minutes of non-use. The trackball LED will go off and the cursor will temporarily remain stationary. Sleep mode of the optical trackball does not affect the input functions of other standard keys. Press and release the trackball to wake up from the sleep mode and to recover the trackball function.

SPECIFICATIONS
