Sunbeam's Safety Precautions

SAFETY PRECAUTIONS FOR YOUR WATER FILTER & CHILLER

Please read this instruction booklet carefully before using your Water Filter & Chiller. It will enable you to get the most out of your new product and to safely enjoy its many benefits. Please retain this booklet for future reference.

- This water filter must only be used with municipally treated water. Do not attempt to filter untreated, raw water or water of unknown quality.
- Filter replacement is essential for the product to perform as represented. The filter must be replaced every eight weeks.
- To protect against electric shock do not place the cord, plug or appliance in water or any other liquid.
- Always place the appliance on a flat, even surface.
- Always unplug the appliance before changing the filter.
- This appliance has been designed to be used continuously.
- Do not operate without a filter in place.

If you have any concerns regarding the performance and use of your appliance, please visit www.sunbeam.com.au or contact the Sunbeam Consumer Service Line.

Ensure the above safety precautions are understood.

Sunbeam's Safety Precautions

SAFETY PRECAUTIONS FOR ALL ELECTRICAL APPLIANCES

Sunbeam are very safety conscious when designing and manufacturing consumer products, but it is essential that the product user also exercises care when using an electrical appliance. Listed below are precautions which are essential for the safe use of an electrical appliance:

- **Read carefully and save all the instructions provided with an appliance.**
- Always turn the power off at the power outlet before you insert or remove a plug. Remove by grasping the plug - do not pull on the cord.
- Turn the power off and remove the plug when the appliance is not in use and before cleaning.
- Do not use your appliance with an extension cord unless this cord has been checked and tested by a qualified technician or service person.
- Always use your appliance from a power outlet of the voltage (A.C. only) marked on the appliance.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- The temperature of accessible surfaces may be high when the appliance is operating.
- Never leave an appliance unattended while in use.
- Do not use an appliance for any purpose other than its intended use.
- Do not place an appliance on or near a hot gas flame, electric element or on a heated oven.
- Do not place on top of any other appliance.
- Do not let the power cord of an appliance hang over the edge of a table or bench top or touch any hot surface.
- Do not operate any electrical appliance with a damaged cord or after the appliance has been damaged in any manner. If damage is suspected, return the appliance to the nearest Sunbeam Appointed Service Centre for examination, repair or adjustment.
- For additional protection, Sunbeam recommend the use of a residual current device (RCD) with a tripping current not exceeding 30mA in the electrical circuit supplying power to your appliances.
- Do not immerse the appliance in water or any other liquid unless recommended.
- Appliances are not intended to be operated by means of an external timer or separate remote control system.
- This appliance is intended to be used in household and similar applications such as: staff kitchen areas in shops, offices and other working environments; farm houses; by clients in hotels, motels and other residential type environments; bed and breakfast type environments.

Features of your Water Filter & Chiller

Memo display

2 litre filtering tank

Power on and chilled indicator light

Water dispensing lever

Using your Water Filter & Chiller

Before using your Water Filter & Chiller

- Carefully unpack the appliance and check that all the components are included.
- Remove the filter cartridge and keep in a safe place.
- Remove the lid and filtering tank and wash in warm soapy water, rinse and wipe dry. Do not re-insert until (a) flushing process and (b) preparation of filter cartridge procedures, as explained below, have been completed.
- Wipe out the filtered water tank with a damp cloth which has been soaked in water.
- Position the appliance on a dry, level and secure bench top. Allow a good airflow around the appliance so do not place directly against a wall.
- It is important that you flush and rinse out the dispensing system before using the appliance for the first time.
- Fill the water tank to the brim with hot tap water.
- Place a large container or jug under the spout.
- Press the dispenser lever until all the water is dispensed and the water tank is empty.
- Repeat this flushing process twice with cold tap water and discard.
- Please note that when flushing for the first time, while pressing the dispensing lever, no water will be dispensed until the tank is almost empty as it will be filling the chilling tank.
- Do not fill above the maximum level indicated.
- Please note that you should carry out these steps without the Maxtra cartridge in place.
- Plug the appliance into an appropriate electrical outlet and switch on.
- A white power on light will be illuminated to show that the appliance is switched on and working.

Using your Water Filter & Chiller (continued)

Preparing the BRITA® MAXTRA filter cartridge for use

- Remove the cartridge from its wrapping (it is normal for the cartridge to appear moist).
- Immerse the cartridge in cold water and agitate gently to remove any air bubbles (see figure 1).

Figure 1

- Insert the cartridge into the 2 litre filtering tank and push it firmly into place until it 'clicks'.
- Place the filtering tank into the sink. Fill the filtering tank from the tap with cold water, and allow the water to pass through the filter in to the sink until empty. This is to flush through any dry carbon dust.
- Then insert the filtering tank into the water tank. Now refill with cold tap water, and the system is ready for use.

Note: Repeat the cartridge preparation process each time you insert a new cartridge.

- Once the water has been filtered, you can refill this section.
- This will then filter through as water is dispensed.
- After approximately 4 hours, the power light will change from white to blue to indicate that the water has been chilled.
- The light may flicker from blue to white as water is dispensed and if the ambient temperature increases. The fan may be activated in these conditions and will remain so until the required temperature has been reached.

Using your Water Filter & Chiller (continued)

Filtering time

Please note that on average it will take 5½ minutes to filter 1 litre of water through the BRITA® MAXTRA cartridge.

Using the Memo function

It is important to change your filter cartridge regularly to enjoy the benefits of filtered water.

The BRITA® Memo system automatically reminds you when your filter cartridge needs to be changed. It is automatically calibrated according to average use of one litre of water per day and will remind you to change your filter every 8 weeks. If you are a heavier user than one litre per day you will need to change your filter more often according to your usage rate. A filter will effectively filter 150 litres of water before needing replacement.

Once you have fitted and prepared your filter cartridge, start the Memo system as follows:

- Press and hold the Start button until 4 bars appear on the display and flash twice. The Memo is now set. The flashing dot in the corner of the display indicates that the Memo is working. (See figure 2).

Figure 2

- At the end of every two weeks, one bar will disappear to indicate the remaining cartridge life. When only one bar is showing, ensure that you have a replacement BRITA® MAXTRA water filter cartridge available. (See figure 3).

Figure 3

- After 8 weeks, all four bars will disappear and a flashing arrow will appear to indicate that the cartridge should be replaced. (See figure 4).

Figure 4

Wash and dry the filter funnel, insert a new cartridge (see 'Preparing the filter cartridge for use') and restart the BRITA Memo as described above.

Note: The Memo system is only intended to be used with BRITA® filter cartridges.

Using your Water Filter & Chiller (continued)

Removing the filter cartridge

- When it is time to replace the cartridge after 8 weeks use, simply lift the ring pull handle on top of the cartridge to remove. (See figure 5).

Figure 5

- The cartridge may be disposed of in household waste or contact the BRITA® consumer service for advice on recycling schemes.
- Always ensure that you have spare BRITA® MAXTRA cartridges available.

Care and Cleaning

- Do not use harsh detergents or abrasive cleaners.
- Do not place any part of this appliance in a dishwasher.
- Wipe the base with a clean cloth or paper towel.
- Wash the filtering tank in warm, soapy water using a mild detergent.
- Wipe the inside of the filtered water tank with a damp cloth which has been soaked in water.
- Do not immerse the base in water or any other liquid.
- If the unit is to be moved or stored for a prolonged period of time without being used, we recommend that you drain the internal tank of any water. Flush the unit as described before using again.

Emptying the internal tank

- Switch off the appliance and unplug from the mains.
- Remove the lid and the filtering tank and any water in the filtered water tank.
- Turn the appliance upside down to reveal a drain plug located in the centre of the base.
- Using a \$2 coin or a suitable screw driver, turn the plug anti clockwise until it is fully loosened. Please note that it cannot be completely removed.
- Drain the tank.
- Insert the plug after draining and using a \$2 coin or suitable screwdriver, turn it clockwise until it stops.
- Do not over tighten as this may damage the plug.

Help Line

If you have any additional questions about using the Water Filter & Chiller, please call the Sunbeam help line in Australia on 1300 881 861. In New Zealand, please call 0800 786 232.

For BRITA® filter cartridge and Memo enquiries, contact BRITA® Customer Care. In Australia please call 1300 557 762. In New Zealand, please call 0800 427 482.

Notes

Notes

12 Month Replacement Guarantee

In the unlikely event that this appliance develops any malfunction within 12 months of purchase (3 months commercial use) due to faulty materials or manufacture, we will replace it for you free of charge.

Should you experience any difficulties with your appliance, please phone our customer service line for advice on 1300 881 861 in Australia, or 0800 786 232 in New Zealand. Alternatively, you can send a written claim to Sunbeam at the address listed below. On receipt of your claim, Sunbeam will seek to resolve your difficulties or, if the appliance is defective, advise you on how to obtain a replacement or refund.

Your Sunbeam 12 Month Replacement Guarantee naturally does not cover misuse or negligent handling and normal wear and tear.

Similarly your 12 Month Replacement Guarantee does not cover freight or any other costs incurred in making a claim. Please retain your receipt as proof of purchase.

The benefits given to you by this guarantee are in addition to your other rights and remedies under any laws which relate to the appliance.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law and under the New Zealand Consumer Guarantees Act.

In Australia you are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Should your appliance require repair or service after the guarantee period, contact your nearest Sunbeam service centre.
