TV VIEWING BASICS

Important Features of Your Receiver

SAT Mode Button:

You will need to stay in SAT mode to use the remote control, even when operating your TV's volume, power and mute functions.

The "mode" you are in will light each time you touch a remote control button.

Turns the satellite receiver on or off.

Turns the TV set on and off.

Remote must be programmed to control TV. See User's Guide for details.

To watch TV or if you lose video:

- » Make sure TV is set to channel **3** or _____ (channel/input)
(Use the stickers in your user's manual to help remind you which channel/input.)
- » Make sure receiver is ON. Blue light will be visible on the receiver.

On-Screen Program Guide

Press the GUIDE button to view the On-screen programming guide. DISH Network has several guides to select from - continue pressing GUIDE to display the one you like the most.

- **ALL Chan:** All DISH Network channels
- **ALL Sub:** All channels you subscribe to
- **FAVORITES:** Only your Favorite channels – For Favorites Lists set-up, press the Menu button , then select FAVORITES.

Parental Locks

You can password-protect programming based on rating or on a channel-by-channel basis.

1. Press the MENU button , select LOCKS.
2. Select the LOCKS option you prefer (such as "Lock PPV").
3. Select LOCK SYSTEM and choose a password.

Get Connected

Connecting a **phone line** into the receiver unlocks many great features.

Phone Line Benefits:

- » Caller ID* – See who's calling right on the screen.
- » Change your programming packages on DishHOME Channel 100.
- » Order Pay-Per-View with your remote control.
- » Play exclusive interactive games on DishHOME Channel 100.

*With subscription to Caller ID through your local phone company.

TROUBLESHOOTING

Quick Fixes for Most Common Problems

DISH Network prides itself on its top-of-the-line receivers. In the event you experience any problems watching or controlling your TV, try these quick fixes:

Blue, Black or Frozen Screen:

- » **Reset Your Receiver:** If you see a blue, black or frozen screen, press and hold the POWER button on the front panel of your receiver for about 5 seconds. The receiver will restart and should return to programming in just a few minutes. Resetting your receiver is like re-booting your computer.

- » **Your TV May Be On The Wrong Channel / Input:** See the "TV Viewing Basics" panel to make sure your TV is set to the correct channel number or input.

Remote Won't Work:

Try replacing the batteries in your remote control. You may see a message on your screen regarding low battery strength.

Satellite Signal Message:

If you get an "acquiring satellite signal" message, your signal will be restored within minutes, not days or weeks like with cable. This is rare, and almost always temporary.

If you have had inclement weather and continue to have signal issues after the weather clears, make sure your dish antenna is not covered by snow, ice or a fallen object. If it can be accessed safely and easily, gently clear your dish.
