

TURBO/COMBI

TURBO 47 S ETHANOL
COMBI

Stiga Turbo 47 S Ethanol Combi

A self propelled lawnmower with collector. The versatile lawnmower is working as three machines in one.

The lawnmower is excellent when a very effective collection is important. The model can also supply other needs. When you need to work through really high grass you just drive without the collector. Easily insert a plug and the lawnmower can also be driven in Multiclip mode. Then you don't have to rake or empty grass. Mowing is quieter and you fertilise the grass at the same time.

Driven with fuel E-85, which contains 85 per cent ethyl alcohol and 15 per cent petrol. Exhaust from ethyl alcohol does not contribute to the greenhouse effect.

The cutting deck is galvanized which gives a better protection against rust. Cutting width is 46 cm.

The standard is very high regarding performance and environment friendly features.
