WB700

18x Wide Angle High Zoom Compact Camera

Bring everything closer. Whenever, wherever, you can take a great shot!

The 14 Megapixel WB700 sets a new standard for compact cameras, hosting a 24mm ultra-wide, 18x Super-Zoom Schneider-KREUZNACH lens, capturing wider and deeper perspective with crystal clear details. It offers a host of features including Smart Filter 2.0 for special colour and lens effects, and add in 720p HD movie recording and you have a high performance Smart Camera.

FEATURES

SAMSUNG

FEATURES

24mm Ultra-Wide, 18x Optical Zoom Schneider-KREUZNACH Lens
The WB700 includes the option of a 24mm wide angle setting allowing you to get deeper shots at close range with incredible detail. It also boasts a long 18x Optical Zoom Schneider-KREUZNACH Lens set in a slim-line 24mm body, to make capturing distant subjects in perfect detail easier than ever.

Smart Filter
Samsung's Smart Filter lens and colour effects deliver an artistic edge to your still shots and videos. The Tilt & Shift Lens Effect gives your subjects a miniaturized look, the Vignetting Camera Effect delivers a strikingly strong compositional contrast, and our Fish-eye Effect gives your video that cool distorted feel. And its colour effects—Sketch and Defog —can add an expressive layer or an ultra-vivid vibe—to your shots.

High Definition Movie Recording
The WB700 has the ability to record your movies in HD 720p resolution at 30fps. The latest H.264 compression format enables more than 3x the recording time compared to the previous format, surpassing the capabilities of many camcorders.

Smart Auto
Innovative Smart Auto means your photos turn out perfectly every time, regardless of conditions. Our scene recognition technology automatically chooses from various settings like Portrait, Night, Backlight, Landscape and White, finding the right setting for your specific conditions.

Optical Image Stabilization
Stabilizes the recorded image by varying the optical path to the sensor. This mechanism delivers crystal clear images.
