Safety and Troubleshooting Information

Safety precautions and maintenance

WARNING: Use of controls, adjustments or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards and/or mechanical hazards.

Read and follow these instructions when connecting and using your computer monitor:

- Unplug the monitor if you are not going to use it for an extensive period of time.
- Unplug the monitor if you need to clean it with a slightly damp cloth. The screen many be wiped with a dry cloth when the power is off. However, never use alcohol, solvents or ammonia-based liquids.
- Consult a service technician if the monitor does not operate normally when you have followed the instructions in this manual.
- The casing cover should be opened only by qualified service personnel.
- Keep the monitor out of direct sunlight and away from stoves or any other heat source.
- Remove any object that could fall into the vents or prevent proper cooling of the monitor's electronics.
- Do not block the ventilation holes on the cabinet.
- Keep the monitor dry. To avoid electric shock, do not expose it to rain or excessive moisture.
- If turning off the monitor by detaching power cable or DC power cord, wait for 6 seconds before attach the power cable or DC power cord for normal operation.
- To avoid the risk of shock or permanent damage to the set do not expose the monitor to rain or excessive moisture.
- When positioning the monitor, make sure the power plug and outlet are easily accessible.
- IMPORTANT: Always activate a screen saver program during your application. If a still image in high contrast remains on the screen for an extended period of time, it may leave an 'after-image' or 'ghost image' on the front of the screen. This is a well-known phenomenon that is caused by the shortcomings inherent in the LCD technology. In most cases the after-image will disappear gradually over a period of time after the power has been switched off. Be aware that the after-image symptom cannot be repaired and is not covered under warranty.

Consult a service technician if the monitor does not operate normally when the operating instructions given in this manual have been followed.

Installation Locations

- Avoid exposure to heat and extreme cold
- Do not store or use the product in locations exposed to heat, direct sunlight or extreme cold.
- Avoid moving the product between locations with large temperature differences. Choose a site that falls within the following temperature and humidity ranges.
  - Temperature: 0-35°C 32-95°F
  - Humidity: 20-80% RH
- Do not subject the product to severe vibration or high impact conditions. Do not place the product inside a car boot.
- Take care not to mishandle this product by either knocking or dropping during operation or transportation.
- Do not store or use the product in locations where there is a high level of humidity or in dusty environments. Do not allow water or other liquids to spill on or into the product.

About This Manual

About This Guide

This electronic user's guide is intended for anyone who uses the Philips LCD Monitor TV. It describes the features, setup, operation and other important information.

It includes the following sections:

- Safety and Troubleshooting Information provides tips and solutions for common problems as well as other related information you may need.
- About This Electronic User's Manual gives an overview of information included, along with notation icon descriptions and other documentation for your reference.
- Product Information gives an overview of the monitor's features as well as the technical specifications for this monitor.
- Installing Your Monitor describes the initial setup process and gives an overview of how to use the monitor.
- On-Screen Display provides information on adjusting the settings on your monitor.
- Remote Control provides information on adjusting the settings for your TV function.
- Customer Care and Warranty contains a list of worldwide Philips Consumer Information Centres along with help desk phone numbers and information on the warranty applicable to your product.
- Download and Print Option transfers this entire manual to your hard drive for easy reference.

Notational Descriptions

The following subsections describe notational conventions used in this document.

Notes, Cautions and Warnings

Throughout this guide blocks of text may be accompanied by an icon and printed in bold or italic type. These blocks contain notes, cautions or warnings. They are used as follows:

NOTE: This icon indicates important information and tips that help you make better use of your computer system.

CAUTION: This icon indicates information that tells you how to avoid either potential damage to hardware or loss of data.

WARNING: This icon indicates the potential for bodily harm and tells you how to avoid the problem.

Some warnings may appear in alternate formats and may not be accompanied by an icon. In such cases, the specific presentation of the warning is mandated by the relevant regulatory authority.

Product Information

Product Features

BDL3221V

- **Less management effort for maximum productivity**
  - Multiple displays form a daisy chain to show uniform
  - Monitor is network controllable for remote management
  - Input connectors: CVBS, S-video, SCART, YPbPr, and RF (TV input)
- **Better front of screen experience**
  - Motion adaptive deinterlacing for razor sharp images
  - 3D comb filter separates color for a razor-sharp image
  - WXGA, wide format 1366 x 768 resolution for sharper display
  - Adaptive brightness intensifier technology
  - Ready to display SDTV, EDTV, and HDTV formats
- **Great convenience**
  - Zoom function to enable tiled matrix application
  - Support hight-bandwidth digital content protection decryption
  - Split screen for dual video/PC display
  - Picture in picture for public display

** RF(TV input) is only available for 320WN6QS*

Lead-free Product

Philips eliminated toxic substances like lead from its displays. Lead-free display helps protect your health and promotes environmentally sound recovery and disposal of waste from electrical and electronic equipment.Philips complies with the European Community stringent RoHS Directive mandating restrictions on hazardous substances in electrical and electronic equipment. With Philips, you can be confident that your display device does not harm the environment.

Technical Specifications*

LCD PANEL	
• Type	TFT LCD
• Screen size	31.51inch
• Pixel Pitch	0.17 x 0.511 mm
• LCD Panel type	1366 x 768 pixels R.G.B. vertical stripe Hard coating surface, anti-glare polarizer
• Effective viewing area	697.7 x 392.2 mm
• Display Colors	8 bits interface (16.7M colors)
PC SCANNING	
• Vertical refresh rate	56Hz-75Hz
• Horizontal frequency	30kHz-63kHz
PC VIDEO	
• Video dot rate	< 85 MHz
• Input impedance	
- Video	75 ohm
- Sync	2.2K ohm
• Input signal levels	0.7 Vpp
• Sync input signal	Separate sync
• Sync polarities	Positive and negative

• Input Frequency	WXGA Hsync 48 kHz, Vsync 60 Hz (N.I.) SVGA Hsync 38 kHz, Vsync 60 Hz (N.I.) VGA/DVI-D Hsync 31 kHz, Vsync 60 Hz (N.I.)
• Video interface	D-sub, S-Video, TV-RF, SCART composite, components video, and DVI
AUDIO	
• Input level for PC/SVHS/SCART	500 mV nominal
• Loudspeaker	10W Stereo Audio (10W/channel RMS x2, 200Hz~10kHz, 8 ohm, 10% THD)
OPTICAL CHARACTERISTICS	
• Contrast ratio	1200:1(with DCR on)
• Brightness	500 cd/m^2 (typ.)
• Peak contrast angle	6 o'clock
• White Chromaticity	x: 0.283 y: 0.297 (at 9300°K) x: 0.313 y: 0.329 (at 6500°K) x: 0.328 y: 0.344 (at 5700°K)
• Viewing Angle (C/R >5)	Upper ≥89° (typ.) Lower ≥89° (typ.) Left ≥89° (typ.) Right ≥89° (typ.)
• Response time	(G to G) 8ms(typ.) 12ms(max.)

sRGB

sRGB is a standard for ensuring correct exchange of colors between different devices (e.g. digital cameras, monitors, printers, scanners, etc.)

Using a standard unified color space, sRGB will help represent pictures taken by an sRGB compatible device correctly on your sRGB enabled Philips monitors. In that way, the colors are calibrated and you can rely on the correctness of the colors shown on your screen.

Important with the use of sRGB is that the brightness and contrast of your monitor is fixed to a predefined setting as well as the color gamut. Therefore it is important to select the sRGB setting in the monitor's OSD.

To do so, at PC mode, open the OSD by pressing the MENU button of your monitor. Use the down button to go to COLOR SETTINGS and press MENU again. Then move the down button

to go to NORMAL COLOR and press MENU again.

** This data is subject to change without notice.*

Automatic Power Saving

If you have VESA DPMS compliance display card or software installed in your PC, the monitor can automatically reduce its power consumption when not in use. If an input from a keyboard, mouse or other input device is detected, the monitor will then 'wake up' automatically. The following table shows the power consumption and signaling of this automatic power saving feature:

Power Management Definition					
VESA Mode	Video	H-sync	V-sync	Power Used	LED color
Active	On	Yes	Yes	100 W (typ.)	Blue
Sleep	Off	No	No	< 5 W	Amber
Switch Off	Off	-	-	< 3 W	Off

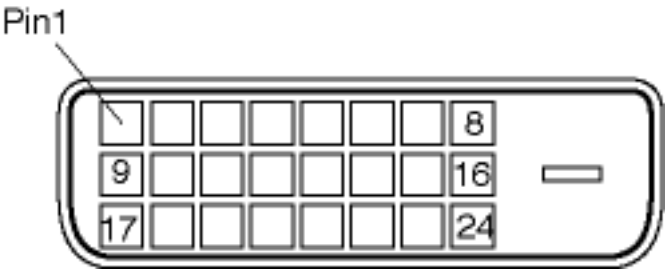
Pin Assignment

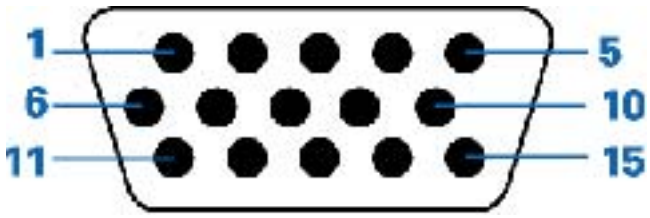
1. The digital only connector (DVI-D) contains 24 signal contacts organized in three rows of eight contacts. Signal pin assignments are listed in the following table:



Pin No.	Signal Assignment	Pin No.	Signal Assignment	Pin No.	Signal Assignment
1	T.M.D.S. Data2-	9	T.M.D.S. Data1-	17	T.M.D.S. Data0-
2	T.M.D.S. Data2+	10	T.M.D.S. Data1+	18	T.M.D.S. Data0+

3	T.M.D.S. Data2/4 Shield		11	T.M.D.S. Data1/3 Shield		19	T.M.D.S. Data0/5 Shield
4	No connect		12	No connect		20	No connect
5	No connect		13	No connect		21	No connect
6	DDC Clock		14	+5V Power		22	T.M.D.S. Clock Shield
7	DDC Data		15	Hot Plug Detect		23	T.M.D.S. Clock+
8	No connect		16	Ground (for +5V)		24	T.M.D.S. Clock-

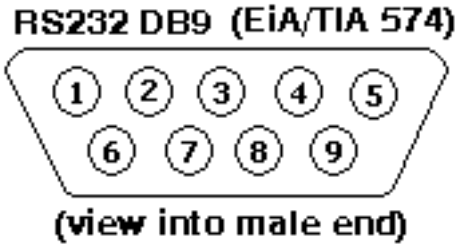
2. The 15-pin D-sub connector (male) of the signal cable:



Pin No.	Assignment	Pin No.	Assignment
1	Red video input	9	DDC +5V
2	Green video input	10	Cable detect
3	Blue video input	11	Identical output, connected to pin 10
4	Ground	12	Serial data line (SDA)
5	NC	13	H. Sync / H+V
6	Red video ground	14	V. Sync
7	Green video ground	15	Data clock line (SCL)
8	Blue video ground		

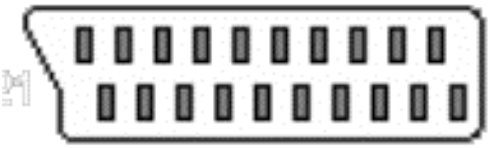
3. RS232 Connector

D-sub 9-pin male connector for communication with plasma engine or PC.



Pin No.	RS-232 (EIA-232-A) Function
3	Transmit Data (TD) from DTE to DCE
2	Receive Data (RD) from DCE to DTE
7	Request to Send (RTS)
8	Clear to Send (CTS)
6	DCE Ready (DSR)
5	Signal Ground (SG)
1	Received Line Signal Detector (DCD)
4	DTE Ready (DTR)
9	Ring Indicator

4. SCART Connector



Pin No.	Signal	Pin No.
1	Audio right channel output (0.5 Vrms, < 1K ohms)	2
2	Audio right channel input (0.5 Vrms, > 10K ohms)	1
3	Audio left channel output (0.5 Vrms, < 1K ohms)	6

4	Audio ground	4
5	Blue signal ground	5
6	Audio left channel input (0.5 Vrms, > 10K ohms)	3
7	Blue signal I/O (0.7 Vp-p, 75 ohms)	7
8	Function switching I/O (L: < 2V, H: > 10V, 10K ohms)	8
9	Green signal ground	9
10	Intercommunication data line No. 1	10
11	Green signal I/O (0.7 Vp-p, 75 ohms)	11
12	Intercommunication data line No. 2	12
13	Red signal ground	13
14	Blanking signal ground	14
15	Red signal I/O (0.7 Vp-p, 75 ohms)	15
16	Blanking signal I/O (L: < 0.4V, H: >1.0V, 75 ohms)	16
17	Composite video signal ground	18
18	Blanking signal ground	17
19	Composite video signal output (1 Vp-p, 75 ohms, sync: negative)	20
20	Composite video signal input (1 Vp-p, 75 ohms, sync: negative)	19
21	Plug shield (common ground)	21

3	D-Sub output	PC analog D-Sub output
4	DVI-D input	PC digital input
5	D-Sub input	PC analog D-Sub input
6	RS232 input	RS232 network connection Input
7	RS232 output	RS232 network connection output for the use of loop through function
8	PC audio	PC stereo audio input

9	Audio input for component signal	Audio (left and right) input for component signal input
10	Component input	Component (YP_bP_r) signal input
11	Composite output	Composite (CVBS) output for the use of loop through function
12	Audio output for composite output	Audio (left and right) out put for compo site signal out put.
13	External / EURO-AV	SCART connection (for the use of European model only)
14	Kensington lock	Kensington lock

Optimising Performance

- For best performance, ensure that your display settings are set at 1360x768, 60Hz.

Note: *You can check the current display settings by pressing the 'MENU' button once.*

- You can also install the Flat Panel Adjust (FP Adjust) program, a program for getting the best performance out of your monitor. This is included on this CD. Step-by-step instructions are provided to guide you through the installation process. Click on the link to find out more about this program.

On Screen Display Control • Using Your Remote Control

On Screen Display Controls

An overall view of the On-Screen Display (OSD) structure is shown below. You can use it as a reference for further adjusting your Monitor/TV.

There are two different modes of OSD available for different models:

- PC Mode
- TV Mode

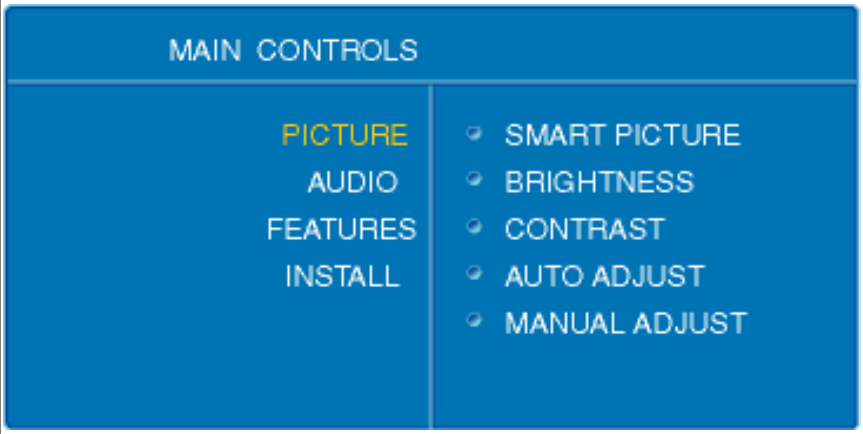
Main menu

There is a slight difference between PC mode and TV mode: Setup selection is available in TV mode only.

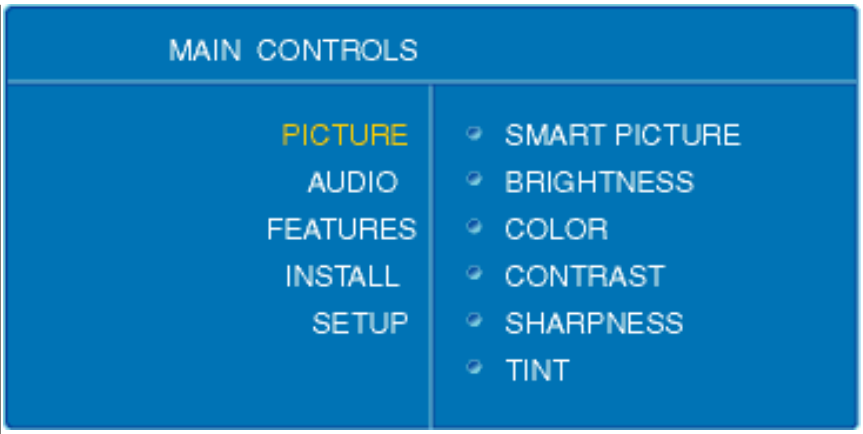
Sub-menus

Picture: press to enter sub-menu selections.

PC Mode



TV Mode



PC mode

Selection	How to use

Smart Picture	In PC mode
	• Users can press or to toggle between
	  ○ Normal
	  ○ Warm
	  ○ Cool
	• Press to next sub-menu selection or to return to main menu.

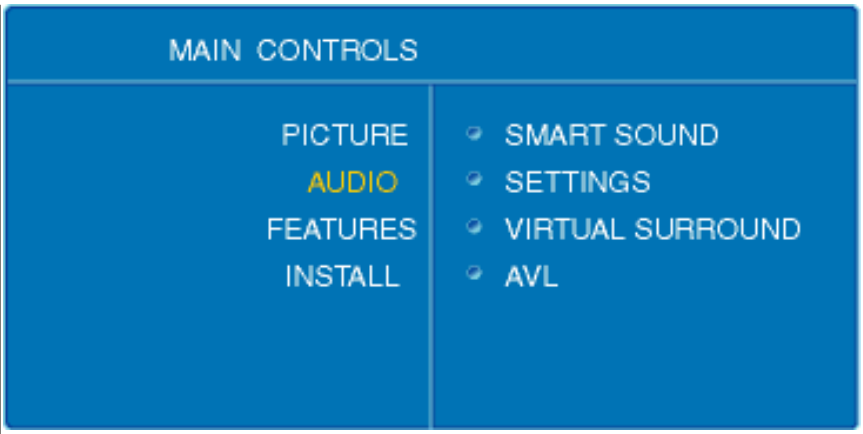
Brightness	Adjust image brightness. • Press or to adjust, • Press or to adjacent sub menu selections, • Press to return to main menu.
Contrast	Adjust image sharpness. • Press or to adjust, • Press to adjacent sub-menu selections, • Press to return to main menu.

Auto Adjust	Automatic fine tuning display geometry and time frequency parameter. • Press  to start, • A selection of Store? Yes/No will appear. • Press  or  to toggle between Yes and No. • Press  to confirm and return to sub-menu.
Manual Adjust	Adjust display geometry and time frequency parameters. • Phase: Press  or  to adjust,  to confirm and return to sub-menu. • Clock: Phase: Press  or  to adjust,  to confirm and return to sub-menu. • Horizontal: Phase: Press  or  to adjust,  to confirm and return to sub-menu. • Vertical: Phase: Press  or  to adjust,  to confirm and return to sub-menu.
TV mode	
Smart Picture	In TV mode • Users can press  or  to toggle between ○ Personal ○ Movies ○ Sports ○ Weak Signal ○ Multimedia ○ Night • Press  to next sub-menu selection,  or  to return to main menu.
Brightness	Adjust image brightness. It is adjustable only when Smart Picture is in personal mode. • Press  or  to adjust, • Press  or  to adjacent sub-menu selections, • Press  to return to main menu.

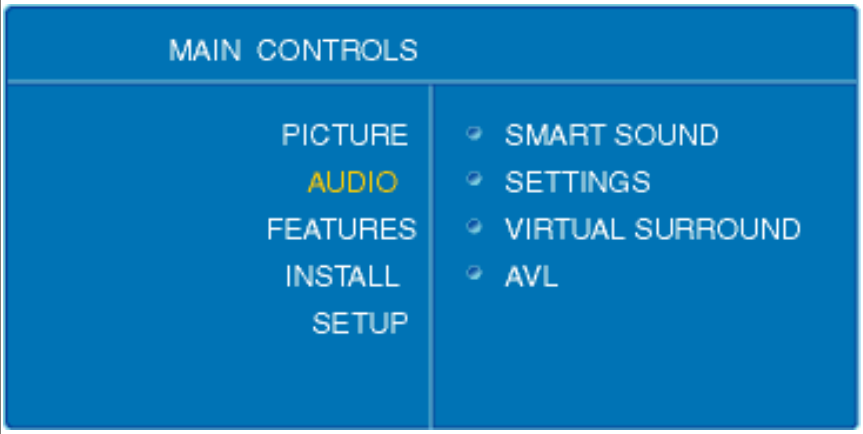
Contrast	Adjust image sharpness. It is adjustable only when Smart Picture is in personal mode. • Press  or  to adjust, • Press  or  to adjacent sub-menu selections, • Press  to return to main menu.
Color	Adjust image color saturation. It is adjustable only when Smart Picture is in personal mode. • Press  or  to adjust, • Press  or  to adjacent sub-menu selections, • Press  to return to main menu.
Sharpness	Adjust image sharpness. It is adjustable only when Smart Picture is in personal mode. • Press  or  to adjust, • Press  or  to adjacent sub-menu selections, • Press  to return to main menu.
Tint	Adjust image hue level. • Press  or  to adjust, • Press  or  to adjacent sub-menu selections, • Press  to return to main menu.

Audio: press  to enter sub-menu selections

PC Mode



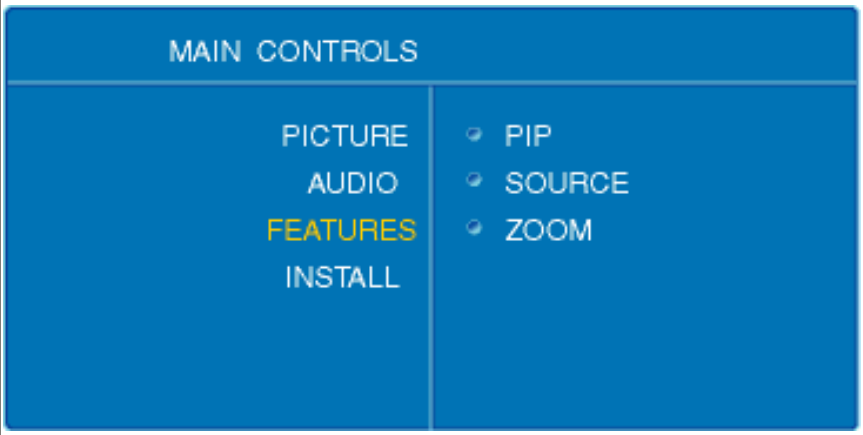
TV Mode



Smart Sound	Preset audio modes. • Users can press or to toggle between ○ Personal ○ News ○ Music ○ Theater • Press to next sub-menu selections • or to return to main menu.
Settings	Adjust audio setting parameters. • Users can press or to toggle between ○ Treble ○ Bass ○ Balance • Press or to adjacent sub-menu selections • or to return to main menu.

Virtual Surround Sound	Switch virtual surround effect on or off. • Users can press or to toggle between ○ On ○ Off • Press or to adjacent sub-menu selections, OK to return to main menu.
AVL	Auto Volume Limit, adjust volume level automatically to prevent sudden peak load exceeds design limit. • Users can press or to toggle between ○ Yes ○ No • Press or to adjacent sub-menu selections, OK to return to main menu.

Features: press to enter sub-menu selections.



PC mode

PIP	Picture in Picture size choices. • Press to enter PIP sub-menu, and press or to selection between ○ Size ○ Video ○ Audio ○ Display • Press to return from PIP sub-menu to sub-menu, or press or OK to return to main menu.

PIP Sub-menu	
Size	PIP window size adjustment. • Users can use  or  to toggle between ○ Small ○ Medium ○ Large ○ PBP ○ Off • Press  or  to return to upper level sub-menu,  to next selection.
Video	Video source of the PIP window. • Users can use  or  to toggle between ○ TV ○ AV (CVBS) ○ S-video ○ EXT (Scart) • Press  or  to adjacent sub-menu selections,  to return to upper level sub-menu.
Audio	Audio source of the PIP window. • Users can use  or  to toggle between ○ PC ○ PIP • Press  or  to adjacent sub-menu selections,  to return to upper level sub-menu.
Display	PIP window location selection. • Users can use  or  to toggle between ○ Icon1 (upper right corner of the screen) ○ Icon2 (lower right corner of the screen) ○ Icon3 (lower left corner of the screen) ○ Icon4 (upper left corner of the screen) • Press  or  to adjacent sub-menu selections,  to return to upper level sub-menu.

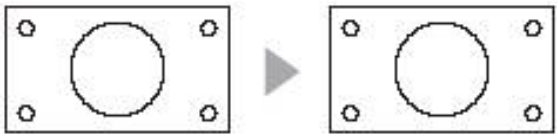
- Super wide



- Press  or  to adjacent sub-menu selections  to return to upper level sub-menu.

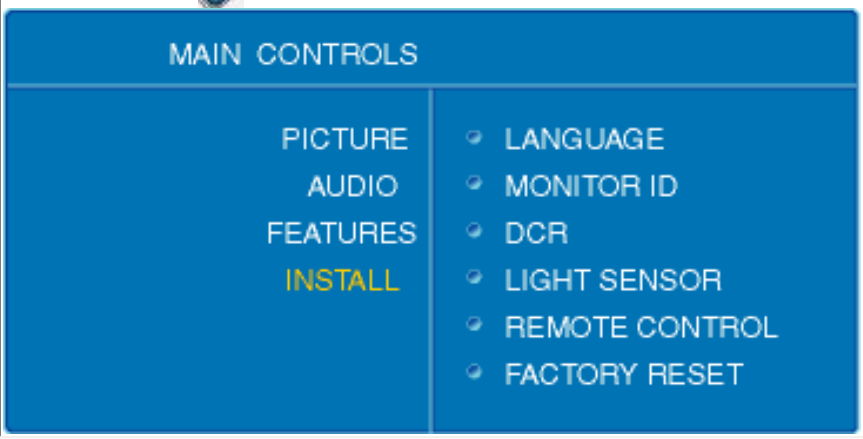
Auto Lock	Lock up specific channels to prevent underage viewers to watch improper TV content. • Users can use  to enter next level sub-menu. • When you select this function for the first time, a sub-menu will appear and ask you to input access code.You can use number buttons to input a four-digit access code.Then a confirming sub-menu will appear and ask you to input the same access code once more to confirm. • After the first time, each time you try to access this function, a sub-menu will appear to request for a access code.If the code is correct, you can start the setting process of this function.  Note: Please remember that 0711 is a default access code.If you forget the access code you set or someone else has changed your access code.You can always use 0711 to unlock.
Auto Lock sub-menu	
Lock Program	Lock selected channel from underage viewers. • Press  to enter. • Use  to block the current channel,  to unlock this channel. • Use number buttons to select the channel you wish to block of unlock. • Then, use  to confirm and return to upper level sub-menu.

Change code	Change program lock access code. Users need to set a four digits access code to enable the Auto Lock function. • Use  to enter code input mode • Use number buttons to a new four-digit code • Press  to confirm and return to upper level sub menu.
Clear all	Clear all of the locked channels. • Press  or  to toggle between ○ On ○ Off • Press  to confirm and clear up all locked channel settings. Use  to adjacent upper level sub-menu selections.
Zoom	Choices for Zoom function. • User can use  to enter next level sub-menu, and Zoom sub-menu.
Zoom sub-menu	
Zoom Type	• Users can use  or  to toggle between ○ Off ○ 4x4 ○ 3x3 ○ 2x2 ○ 1x5 • Press  to confirm and  to return to upper level sub-menu.
Zoom ID	This selection is only available when one of zoom types is chosen.When zoom type is off, this selection is unavailable. • Users can use  or  to toggle between IDs.For example, when 4x4 is chosen, the ID selections are

A1	A2	A3	A3
B1	B2	B3	B4
C1	C2	C3	C4
D1	D2	D3	D4

	• Press OK to confirm and ▲ to return to Zoom Type and exit to upper level sub-menu.

Install: press ▶ to enter sub-menu selections.



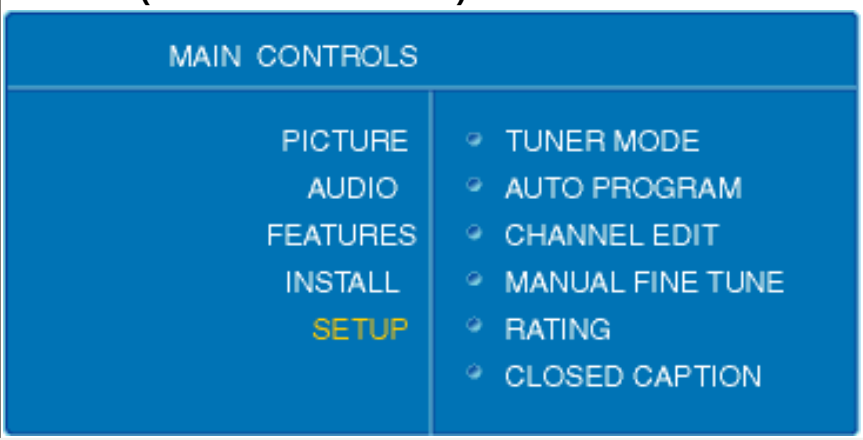
Language	Choices of languages in user interfaces. • Users can use ◀ or ▶ to toggle between ○ ENGLISH ○ ESPAÑOL ○ FRANÇAIS ○ DEUTSCH ○ ITALIANO ○ 中文 • Press ▼ to adjacent sub-menu selections ▲ or OK to return to main menu.
Monitor ID	Assigning a three digits monitor ID to the unit, so it can be identified when using RS232 to control from remote. • Use ▶ to enter, and ▼ or ▲ to select 1~9 numbers, OK to confirm.
DCR	Dynamic Contrast Ratio, technology to boost display contrast ratio. • Users can use ◀ or ▶ to toggle between ○ On ○ Off • Press ▼ or ▲ to adjacent sub-menu selections.

Light Sensor	Turns on or off the light sensor for automatic brightness control.
	• Users can use or to toggle between
	  ○ On
	  ○ Off
	• Press or to adjacent sub-menu selections.

Remote Control	Users need to turn off remote control function when they want to use RS232 protocol to control this unit from afar, so it will remote control commands not to conflict with RS232 commands.
	• Users can use or to toggle between
	  ○ On
	  ○ Off
	• Press or to adjacent sub-menu selections.

Factory Reset	To reset monitor TV's settings back to factory default.
	• Users can use or to toggle between
	  ○ No
	  ○ Yes
	• Press to confirm.

Setup:Setup sub-menu is available in TV modes only. Press to enter the sub-menu selections.
TV mode (North America model)



Tuner Mode	Choose of tuner signal inputs. • Users can press  or  to toggle between ❍ Antenna ❍ Cable ❍ Auto • Then, press  to adjacent sub-menu selections  or  to return to main menu.
Auto Program	Scan all existing channels from your tuner input. • Press  to start. • Press  or  to adjacent sub-menu selections,  to return to main menu.
Channel Edit	Choices to add or delete channels from available channels. • Press  to enter Channel Edit sub-menu. • In Channel selection, use  or  to choose the channel that you wish to add or delete. • Then, press  to next selection, use  or  to toggle between ❍ Activate (add) ❍ Skip (delete) • Repeat the above two steps to add or delete other channels,or, press  to confirm and return to upper level sub-menu. • Press  or  to adjacent sub-menu selections.
Manual Fine Tune	In case of weak signal situations, manually fine-tune channel signals to get the best display quality. • Users can use  or  to fine tune • Press  or  to adjacent sub-menu selections,  to return to main menu.

Rating	Movie or TV broadcasters add rating signal in the TV or movie broadcasted.Users can use this function to set up an automatic program rating and blocking mechanism to prevent underage viewers to watch improper movie or TV contents. • Press to enter Rating sub-menu. • Press or to adjacent sub-menu selections.
Rating sub-menu	
Block Option	To enable or disable the TV or Movie block function. • Users can use or to toggle between ○ On ○ Off • Press or to return to upper level sub- menu , to adjacent sub-menu selections.
Moving Rating	There are seven movie ratings. • Users can use to enter movie rating sub-menu, and use or to choose between ○ G: all ages admitted ○ PG: Parental guidance suggested ○ PG13: Parents strongly cautioned ○ R: Restricted ○ NC: No children under the age of 17 will be admitted ○ X: Adults only (More information will be seen at the end of this section) • In each rating selection, users can use or to toggle between ○ On ○ Off Note: If a lower level rating is blocked, then all the upper level rating will be also blocked automatically.For example, if PG is blocked, then all the rest ratings except G will be blocked. • Then, press to return to upper level sub- menu, or

	 to adjacent sub-menu selections.
TV Rating	There are six TV ratings. • Users can use  to enter movie rating sub-menu, and use  or  to choose between 1) Y: all children • Users can use  or  to toggle between ❍ On ❍ Off 2) Y7: Directed to older children • Users can use  or  to toggle between ❍ Block ❍ FV: fantasy violence or comic violence 3) G: General audience • Users can use  or  to toggle between ❍ On ❍ Off 4) PG: Parental guidance suggested • Users can use  or  to toggle between ❍ Block ❍ V: violence ❍ S: sexual situation ❍ L: strong language ❍ D: suggestive dialogue to block all programs in this rating or part of the programs with specific contents. 5) 14: Parents strongly cautioned. • Users can use  or  to toggle between ❍ Block ❍ V: violence

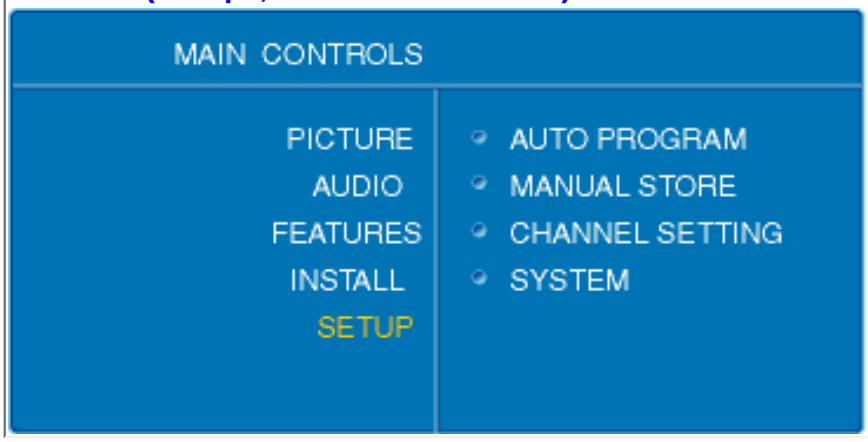
	❍ S: sexual situation ❍ L: strong language ❍ D: suggestive dialogue to block all programs in this rating or part of the programs with specific contents. 6) MA: Matured audience only. • Users can use  or  to toggle between ❍ Block ❍ V: violence ❍ S: sexual situation ❍ L: strong language ❍ D: suggestive dialogue to block all programs in this rating or part of the programs with specific contents. (More information will be seen at the end of this section)  Note: If a lower level rating is blocked, then all the upper level rating will be also blocked automatically. For example, if Y7 is blocked, then all the rest ratings except Y will be blocked. • Then, press  to return to upper level sub- menu,  or  to adjacent sub-menu selections.
Closed Caption	Closed caption are captions that are hidden in the video signal, invisible without a special decoder. It allows hearing impaired TV viewers to read ongoing program dialogues or audio effects. • Users can use  to enter Closed Caption sub-menu. Then use  or  to choose between ❍ Caption Mode ❍ CC Display • Press  to return to main menu.
Closed Caption sub-menu	

Caption Mode	There are nine caption modes to be selected. • Users can use  or  to toggle between ○ CC1 ○ CC2 ○ CC3 ○ CC4 ○ TXT1 ○ TXT2 ○ TXT3 ○ TXT4 ○ CC Mute • Then, press  to confirm and return to upper level sub-menu.  Note: The difference between CC and TXT mode is, CC shows a few lines of dialogues only while TXT (text) use half or entire page to display scrolling text information. CC1 ~CC4 are usually showing same contents in different languages. Text mode likewise.
CC Display	Users can use CC display to turn on/off closed caption which was set earlier. • Users can use  or  to toggle between ○ On ○ Off • Then, press  to confirm and return to upper level sub-menu.

 About Movie Ratings

The movie rating system is set up by Motion Picture Association of America.The main reason is to prevent underage viewers to watch improper movie contents.There are six rating levels, namely G, PG, PG-13, R, NC-17, and X.

TV mode (Europe, Asia Pacific models)



Auto Program	Scan all existing channels from your tuner input. • Press to start. • Press or to adjacent sub-menu selections, to return to main menu.
Manual Store	Select a frequency with specific channel. • Use to enter Manual Store sub-menu, and or to select between selections. • Then, to confirm.
Channel Setting	Choose channel setting to channel edit, channel swap, neme edit, and channel sort. • Use to enter Channel Setting sub-menu, and or to select between selections. • Then, to confirm.
System	Select different programs in TV mode. • Use to enter System sub-menu, and or to select between selections. • Then, to confirm.

Manual Store sub-menu

System	• Users can use  or  to toggle between ❍ France: scans pan Europe and French TV systems ❍ Western Europe: scans pan Europe TV systems only. • Press  or  to adjacent sub-menu selections,  to confirm and return to upper level sub-menu.
Manual Store	Select a frequency with specific channel. • Use  to enter, and use  or  to adjust frequency. • Then, press  or  to adjacent sub-menu selections,  to confirm.
Program Number	Give a channel number to the frequency chose in the above function. • Use  to enter, and use  or  to select a number. • Press  or  to adjacent sub-menu selections,  to confirm.
Fine Tune	Fine tune the channel frequency to get a better display quality. • Use  to enter, and use  or  to adjust frequency. • Then, press  or  to adjacent sub-menu selections,  to confirm.
Store	• Use  to enter storing process. • A selection of Store? Yes/No will appear. • Press  or  to toggle between ❍ Yes ❍ No • Press  to confirm and return to sub-menu.

Channel Edit	Choices to add or delete channels from available channels. • Press  enter Channel Edit sub-menu • In Channel selection, use  or  to choose the channel that you wish to add or delete. • Then, press  to next selection, use  or  to toggle between ❍ Activate (add) ❍ Skip (delete) • Repeat the above two steps to add or delete other channels, or, • Press  to confirm and return to upper level sub-menu • Press  or  to adjacent sub-menu selections.
Channel Swap	To swap channel numbers between two channels.So users can put preferred channels at front. • Users can use  to enter Manual Store sub-menu, •  or  to select between selections. • Then,  to confirm.
Channel Swap sub-menu	
From	Choose a channel number to be swapped from. • Use  or  to select channel. •  to confirm and return to upper level sub-menu.
To	Choose a target channel number to be swapped to. • Use  or  to select channel. •  to confirm and return to upper level sub-menu.
Exchange	Execute channel swap. • Users can use  to execute the swapping move.

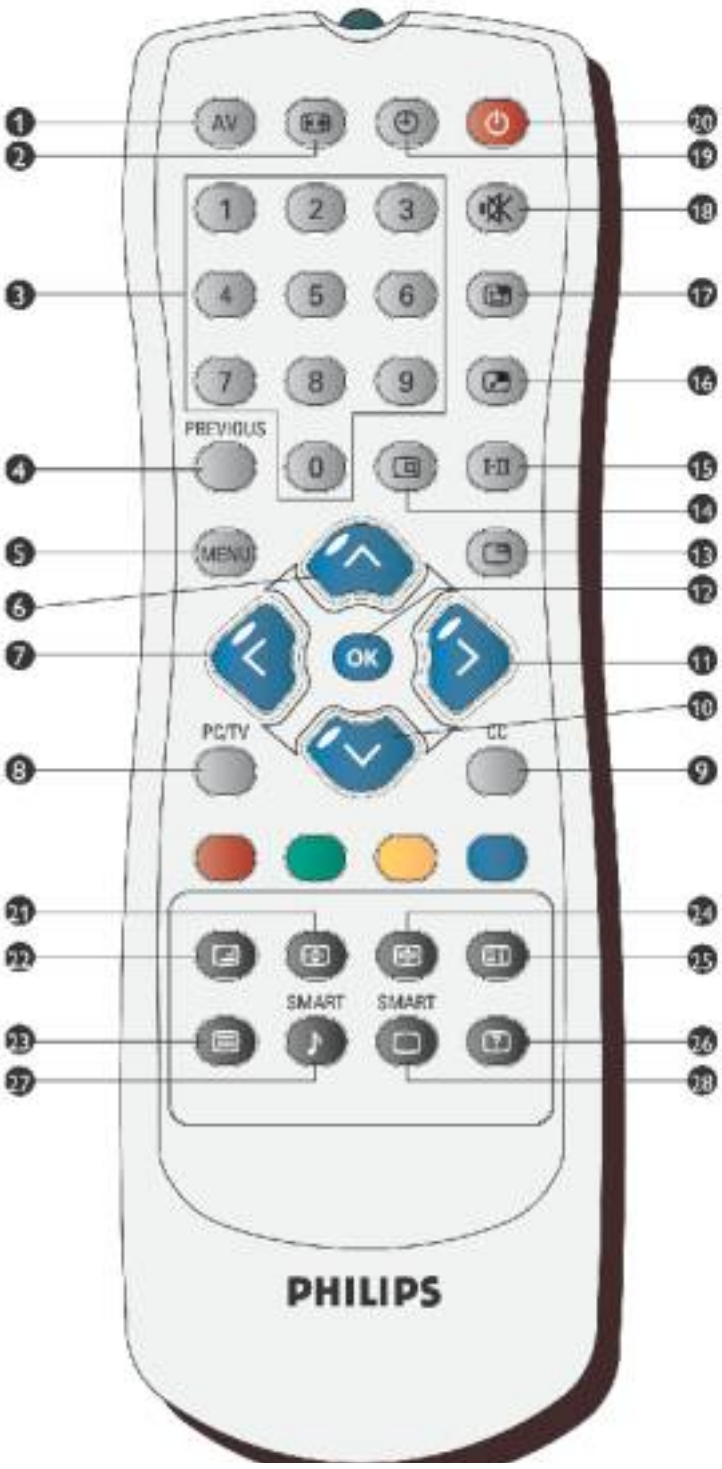
Name Edit	Modify the channel name from a broadcaster give one to a user preferred one. • Users can use  to enter • Use  or  to select channel. • Press  to name input line. • Use  or  to select from A to Z,  or  to adjacent alphabet. • Press  to confirm and return to upper level sub-menu.
Channel Sort	Sort channel name sequence in alphabetical order, from A to Z. Those channels without a name will be placed at the end of the sequence according to their frequencies, from small to large. • Users can use  to enter. • Press  to start sorting.

RETURN TO TOP OF THE PAGE

Remote Control

On Screen Display • Using Your Remote Control

Using Your Remote Control



1		**AV source:** • To select TV/video source in TV and also PIP window. • If TV is in Standby mode, press this button to switch to ON.
2		**Mode:** Screen aspect ratio, switching between 4:3, 16: 9, wide screen, and super wide.
3		**Numerical keys:** • For direct access to programs. • If TV is in Standby mode, press any number will switch the TV to ON mode.
4		**Previous program:** Jump to previous TV channel you are viewing.
5		**Menu:** To turn on or off the On-screen-display (OSD) menu
6		• Move the cursor up in OS • Channel up
7		• Move the cursor left in OSD • Adjust volume down
8		Switching between PC and TV mode.
9		**Closed Caption:** Functions in North America and Asia Pacific models only.
10		• Move the cursor down in OSD • Channel down

11		• Move the cursor right in OSD • Adjust volume up
12		Confirm the chosen OSD function
13		**Freeze:** Freeze the screen in video mode or PIP.
14		**Status:** Display channel number, video/PC mode, and sound mode information.
15		**Sound select:** • To switch between mono and stereo, or to choose between Dual I and Dual II for bilingual transmissions. • For TV sets fitted with NICAM, depends on transmission, you can switch between NICAM stereo and Mono, or between NICAM Dual I, NICAM Dual II, and Mono.
16		**PIP Size:** Adjusts Picture-in-Picture (PIP) window size between small, medium, large, picture-by-picture (PBP or split screen), and off.
17		**PIP position:** Changing PIP window's location on the screen between upper right, lower right, lower left, and upper left.
18		**Mute:** Disables audio: To enable audio, press the button again.
19		**Sleep Timer:** Selects a period of time and the unit will switch off automatically.
20		**Standby:** Sets the TV to standby mode temporary.
27		**Smart Sound:** Chooses audio effects between Music, Theater, News, and Personal.
28		**Smart Picture:** Choose picture settings between Sports, Movie, Weak signal, Night, Multimedia, and Personal.
The following buttons are using in Teletext mode only, which are available in Europe and some of the Asia Pacific TV systems.		
21		**Teletext Enlarge:** Enlarge teletext context to two times larger.

22		**Teletext Mix:** Teletext background become transparent, content mixes with images.
23		**Teletext On/Off:** Teletext ON or OFF.
24		**Teletext Hold:** Freezes the teletext page.
25		**Main Index:** Press the button to return to the main index.
26		**Teletext Reveal/Conceal:** To view the concealed text information (e.g. question/answer, quiz, etc.) send by the teletext provider. Press the button can toggle between conceal and reveal mode.
		These four color buttons allow you to access the item or the page indicated by corresponding color in teletext.

Warning:

If you are going to control the monitor TV via RS232 interface, to avoid conflict, you need to disable the remote control first. You can enter the OSD menu, select Install, remote control to achieve so. After remote control is disabled, you can use buttons on the unit to enter OSD and enable it, or enable remote control via RS232 command.

Download and Print

Installing your LCD monitor driver • Download and Printing Instructions • Installing FPadjust Program

---

Installing Your LCD monitor driver

System requirements:

- PC running Windows® 95, Windows® 98, Windows® 2000 , Windows® Me, Windows® XP or later
- Find your driver ".inf/.icm/.cat" at : /PC/drivers/

Read the "Readme.txt" file before installing.

This page provides an option to read the manual in .pdf format. PDF files can be downloaded into your hard disk, then viewed and printed with Acrobat Reader or through your browser.

If you do not have Adobe¨ Acrobat Reader installed, click on the link to install the application. Adobe® Acrobat Reader for PC / Adobe® Acrobat Reader for Mac.

Download instructions:

To download the file:

1. Click-and-hold your mouse over the icon below. (Win95/98/2000/Me/XP users right-click)

Download  BDL3221V.pdf

2. From the menu that appears, choose 'Save Link As...', 'Save Target As...' or 'Download Link to Disk'.

3. Choose where you would like to save the file; click 'Save' (if prompted to save as either 'text' or 'source', choose 'source').

Printing instructions:

To print the manual:

1. With the manual file open, follow your printer's instructions and print the pages you need.

RETURN TO TOP OF THE PAGE

Installing FPadjust Program

The FP Adjust program generates alignment patterns which will help you adjust monitor settings such as CONTRAST, BRIGHTNESS, HORIZONTAL & VERTICAL POSITION, PHASE and CLOCK.

System requirements:

- PC running Windows® 95, Windows® 98, Windows® 2000, Windows® Me, Windows® XP or later

To install FPadjust Program:

- Click on the link or icon to install FPadjustment Program.
  or
- Click-and-hold your mouse over the icon. (Win95/98/2000/Me/XP users right-click)

Download  FP_setup04.exe

- From the menu that appears, choose 'Save Link As...', 'Save Target As...' or 'Download Link to Disk'.
- Choose where you would like to save the file; click 'Save' (if prompted to save as either 'text' or 'source', choose 'source').
- Exit your browser and install the FPadjust Program.

Read the "FP_Readme04.txt" file before installing.

FAQs (Frequently Asked Questions)

General FAQs

Q: When I install my monitor what should I do if the screen shows 'Cannot display this video mode'?

A: Recommended video mode for Philips 32": 1360x768 @60Hz.

1. Unplug all cables, then connect your PC to the monitor that you used previously.
2. In the Windows Start Menu, select Settings/Control Panel. In the Control Panel Window, select the Display icon. Inside the Display Control Panel, select the 'Settings' tab. Under the setting tab, in box labeled 'desktop area', move the slidebar to 1360x768 pixels (32").
3. Open 'Advanced Properties' and set the Refresh Rate to 60Hz, then click OK.
4. Restart your computer and repeat step 2 and 3 to verify that your PC is set at 1360x768@60Hz (32").
5. Shut down your computer, disconnect your old monitor and reconnect your Philips LCD monitor.
6. Turn on your monitor and then turn on your PC.

Q: What should I do when screen shows: THIS IS 85HZ OVERSCAN, CHANGE COMPUTER DISPLAY INPUT TO 1360 x 768 @60HZ?

A: It means the signal input from your PC is 85Hz -- outside the range that the monitor can display. New Generation LCD intelligent monitor capabilities temporarily override the overscan, providing you with 10 minutes to reset timing to recommended settings.

Here's how:

Go to your Windows Start menu. Select *Settings*, then *Control Panel*. Select *Display*. Move to *Settings* and click on the *Advanced* button. Under *Adaptor*, change the refresh rate to 56~75.

You have 10 minutes to complete the operation; if you do not complete within 10 minutes, power off and re-power on monitor to enter changes.

Q: What does 'refresh rate' mean in connection with an LCD monitor?

A: The refresh rate is of much less relevance for LCD monitors. LCD monitors display a stable, flicker-free image at 60Hz. There is no visible difference between 85Hz and 60Hz.

Q: What are the .inf and .icm files on the CD-ROM? How do I install the drivers (.inf and . icm)?

A: These are the driver files for your monitor. Follow the instructions in your user manual to install the drivers. Your computer may ask you for monitor drivers (.inf and . icm files) or a driver disk when you first install your monitor. Follow the instructions to insert the (companion CD-ROM) included in this package. Monitor drivers (.inf and . icm files) will be installed automatically.

Q: How do I adjust the resolution?

A: Your video card/graphic driver and monitor together determine the available resolutions. You can select the desired resolution under Windows® Control Panel with the "Display properties".

Q: What if I get lost when I am making monitor adjustments?

A: Simply press the OK button, then select 'Reset' to recall all of the original factory settings.

Q: What is the Auto function?

A: The *AUTO adjustment* key restores the optimal screen position, phase and clock settings at the press of a single button – without the need to navigate through OSD menus and control keys.

Note: Auto function is available in selected models only.

Q: My Monitor has no power (Power LED does not light up). What should I do?

A: Make sure the AC power cord is connected to the Monitor.

Q: Will the LCD monitor accept an interlaced signal under PC models?

A: No. If an Interlace signal is used, the screen displays both odd and even horizontal scanning lines at the same time, thus distorting the picture.

Q: What does the Refresh Rate mean for LCD?

A: Unlike CRT display technology, in which the speed of the electron beam is swept from the top to the bottom of the screen determines flicker, an active matrix display uses an active element (TFT) to control each individual pixel and the refresh rate is therefore not really applicable to LCD technology.

Q: Will the LCD screen be resistant to scratches?

A: A protective coating is applied to the surface of the LCD, which is durable to a certain extent (approximately up to the hardness of a 2H pencil). In general, it is recommended that the panel surface is not subject to any excessive shocks or scratches. An optional protective cover with greater scratch resistance is also available.

Q: How should I clean the LCD surface?

A: For normal cleaning, use a clean, soft cloth. For extensive cleaning, please use isopropyl alcohol. Do not use other solvents such as ethyl alcohol, ethanol, acetone, hexane, etc.

Q: Can the Philips LCD Monitor be mounted on the wall or used as a touch panel?

A: Yes. Philips LCD monitors have this optional feature. The standard VESA mount holes on the back cover allows the user to mount the Philips monitor on any VESA standard ARM or accessories. Touch panels are being developed for future applications. Check with your Philips sales representative for more information.

RETURN TO TOP OF THE PAGE

Screen Adjustments

Q: What is the FPadjust program on the CD-ROM?

A: The FPadjust program generates alignment patterns that help you adjust monitor settings such as Contrast, Brightness, Horizontal Position, Vertical Position, Phase and Clock for optimal performance.

Q: When I install my monitor, how do I get the best performance from the monitor?

A:

1. For best performance, make sure your display settings are set at 1360x768@60Hz for 32". Note: You can check the current display settings by pressing the OSD OK button once. The current display mode is shown in product information in OSD main controls.
2. To install the Flat Panel Adjust (FPadjust) program located on the monitor setup CD-ROM, open the CD-ROM and double-click the FP_setup04.exe icon. This will install FP Adjust automatically and place a shortcut on your desktop.
3. Run FPadjust by double clicking the shortcut. Follow the instructions step by step to optimize image performance with your system's video controller.

Q: How do LCDs compare to CRTs in terms of radiation?

A: Because LCDs do not use an electron gun, they do not generate the same amount of radiation at the screen surface.

RETURN TO TOP OF THE PAGE

Compatibility with other Peripherals

Q: Can I connect my LCD monitor to any PC, workstation or Mac?

A: Yes. All Philips LCD monitors are fully compatible with standard PCs, Macs and workstations. You may need a cable adapter to connect the monitor to your Mac system. Please contact your dealer/retailer for more information.

Q: Are Philips LCD monitors Plug-and-Play?

A: Yes, the monitors are Plug-and-Play compatible with Windows® 95, 98, 2000 and XP.

Q: What is USB (Universal Serial Bus)?

A: Think of USB as a smart plug for PC peripherals. USB automatically determines resources (like driver software and bus bandwidth) required by peripherals. USB makes necessary resources available without user intervention. There are three main benefits of USB. USB eliminates "case anxiety," the fear of removing the computer case to install circuit board cards -- that often requires adjustment of complicated IRQ settings -- for add-on peripherals. USB does away with "port gridlock." Without USB, PCs are normally limited to one printer, two Com port devices (usually a mouse and modem), one Enhanced Parallel Port add-on (scanner or video camera, for example), and a joystick. More and more peripherals for multimedia computers come on the market every day. With USB, up to 127 devices can run simultaneously on one computer. USB permits "hot plug-in." No need to shut down, plug in, reboot and run

set up to install peripherals. No need to go through the reverse process to unplug a device. Bottom line: USB transforms today's "Plug-and-Pray" into true Plug-and-Play!

Please refer to glossary for more information about USB.

Q: What is a USB hub ?

A: A USB hub provides additional connections to the Universal Serial Bus. A hub's upstream port connects a hub to the host, usually a PC. Multiple downstream ports in a hub allows connection to another hub or device, such as a USB keyboard, camera or printer.

RETURN TO TOP OF THE PAGE

LCD Panel Technology

Q: What is a Liquid Crystal Display?

A: A Liquid Crystal Display (LCD) is an optical device that is commonly used to display ASCII characters and images on digital items such as watches, calculators, portable game consoles, etc. LCD is the technology used for displays in notebooks and other small computers. Like light-emitting diode and gas-plasma technologies, LCD allows displays to be much thinner than cathode ray tube (CRT) technology. LCD consumes much less power than LED and gas-displays because it works on the principle of blocking light rather than emitting it.

Q: How are LCDs made?

A: LCDs are created from two glass plates separated from each other at a distance of a few microns. The plates are filled with liquid crystal and then sealed together. The top plate is colored with an RGB pattern to make the color filter. Polarizers are then glued to both plates. This combination is sometimes called 'glass' or 'cell.' The LCD cell is assembled into a 'module' by adding the backlight, driver electronics and frame.

Q: What is polarization ?

A: Polarization is basically directing light to shine in one direction. Light is electromagnetic waves. Electric and magnetic fields oscillate in a direction perpendicular to the propagation of the light beam. The direction of these fields is called the 'polarization direction'. Normal or non-polarized light has fields in several directions; polarized light has a field in only one direction.

Q: What differentiates passive matrix LCDs from active matrix LCDs?

A: An LCD is made with either a passive matrix or an active matrix display grid. An active matrix has a transistor located at each pixel intersection, requiring less current to control the luminance of a pixel. For this reason, the current in an active matrix display can be switched on and off more frequently, improving the screen refresh time (your mouse pointer will appear to move more smoothly across the screen, for example). The passive matrix LCD has a grid of conductors with pixels located at each intersection in the grid.

Q: How does a TFT LCD Panel work?

A: On each column and row of the TFT LCD panel, a data source drive and a gate drive are attached, respectively. The TFT drain of each cell is connected to the electrode. The molecular arrangement of liquid crystal elements differ according to whether it is impressed with voltage or not. It varies the direction of polarized light and the amount of light by letting it through different arrays of liquid crystal elements. When two polarized filters are arranged vertically on a polarized light pole, the light that passes through the upper polarized panel is turned 90 degrees along with the spiral structure of the liquid crystal molecules and goes through the polarized filter at the bottom. When impressed with voltage, liquid crystal molecules are arranged vertically from the original spiral structure and the direction of the light is not turned through 90 degrees. In this case, light that comes through the top polarized panel may not go through the polarized panel at the bottom.

Q: What are the advantages of TFT LCD compared with CRT?

A: In a CRT monitor, a gun shoots electrons and general light by colliding polarized electrons on fluorescent glass. Therefore, CRT monitors basically operate with an analog RGB signal. A TFT LCD monitor is a device that displays an input image by operating a liquid crystal panel. The TFT has a fundamentally different structure than a CRT: Each cell has an active matrix structure and independent active elements. A TFT LCD has two glass panels and the space between them is filled with liquid

crystal. When each cell is connected with electrodes and impressed with voltage, the molecular structure of the liquid crystal is altered and controls the amount of inlet lighting to display images. A TFT LCD has several advantages over a CRT, since it can be very thin and no flickering occurs because it does not use the scanning method.

Q: Why is vertical frequency of 60Hz optimal for an LCD monitor?

A: Unlike a CDT monitor, the TFT LCD panel has a fixed resolution. For example, an XGA monitor has 1024x3 (R, G, B) x 768 pixels and a higher resolution may not be available without additional software processing. The panel is designed to optimize the display for a 65MHz dot clock, one of the standards for XGA displays. Since the vertical/horizontal frequency for this dot clock is 60Hz/48kHz, the optimum frequency for this monitor is 60Hz.

Q: What kind of wide-angle technology is available? How does it work?

A: The TFT LCD panel is an element that controls/displays the inlet of a backlight using the dual-refraction of a liquid crystal. Using the property that the projection of inlet light refracts toward the major axis of the liquid element, it controls the direction of inlet light and displays it. Since the refraction ratio of inlet light on liquid crystal varies with the inlet angle of the light, the viewing angle of a TFT is much narrower than that of a CDT. Usually, the viewing angle refers to the point where the contrast ration is 10. Many ways to widen the viewing angle are currently being developed and the most common approach is to use a wide viewing angle film, which widens the viewing angle by varying the refraction ratio. IPS (In Plane Switching) or MVA (Multi Vertical Aligned) is also used to give a wider viewing angle.

Q: Why is there no flicker on an LCD Monitor?

A: Technically speaking, LCDs do flicker, but the cause of the phenomenon is different from that of a CRT monitor -- and it has no impact of the ease of viewing. Flickering in an LCD monitor relates to usually undetectable luminance caused by the difference between positive and negative voltage. On the other hand, CRT flickering that can irritate the human eye occurs when the on/off action of the fluorescent object becomes visible. Since the reaction speed of liquid crystal in an LCD panel is much slower, this troublesome form of flickering is not present in an LCD display.

Q: Why is an LCD monitor virtually free of Electro Magnetic Interference?

A: Unlike a CRT, an LCD monitor does not have key parts that generate Electro Magnetic Interference, especially magnetic fields. Also, since an LCD display utilizes relatively low power, its power supply is extremely quiet.

RETURN TO TOP OF THE PAGE

Ergonomics, Ecology and Safety Standards

Q: What is the CE mark?

A: The CE (Conformité Européenne) mark is required to be displayed on all regulated products offered for sale on the European market. This 'CE' mark means that a product complies with the relevant European Directive. A European Directive is a European 'Law' that relates to health, safety, environment and consumer protection, much the same as the U.S. National Electrical Code and UL Standards.

Q: Does the LCD monitor conform to general safety standards?

A: Yes. Philips LCD monitors conform to the guidelines of MPR-II and TCO 99/03 standards for the control of radiation, electromagnetic waves, energy reduction, electrical safety in the work environment and recyclability. The specification page provides detailed data on safety standards.

More information is provided in the Regulatory Information section.

RETURN TO TOP OF THE PAGE

Troubleshooting

This page deals with problems that can be corrected by the user. If the problem still persists after you have tried these solutions, contact your nearest Philips dealer.

Common Problems

Symptoms	Having this problem?	Check these items
No Video/ Power LED off	No picture, the LCD Monitor TV is not working	• Check connection integrity at both ends of the video cable and/or power cord. • Electric outlet verification • Ensure AC power at the rear of the monitor TV is switched on.
No Video/ Power LED on	No picture or no brightness	• Increase brightness and contrast controls. • Perform the LCD Monitor TV self-test feature check. • Check for bent or broken pins in video cable connector.
Poor Focus	Picture is fuzzy, blurry or ghosting	• Auto adjust image through Menu -> Image Setting -> Auto Adjust. • Adjust Phase and Clock controls via OSD. • Eliminate video extension cables. • Perform the LCD Monitor TV factory reset (via Menu -> Factory Reset -> All Settings). • Lower video resolution or increase font size.

Shaky/Jittery Video	Wavy picture or fine movement	• Auto adjust image through Menu -> Image Setting -> Auto Adjust • Adjust Phase and Clock controls via OSD • Perform the LCD Monitor TV factory reset (via Menu -> Factory Reset -> All Settings) • Check environmental factors • Relocate and test in other room
Missing Pixels	LCD screen has spots	• Cycle power on-off • These are pixels that are permanently off and is a natural defect that occurs in LCD technology
Stuck-on Pixels	LCD screen has bright spots	• Cycle power on-off • These are pixels that are permanently on and is a natural defect that occurs in LCD technology
Brightness Problems	Picture too dim or too bright	• Perform the LCD Monitor TV factory reset (via Menu -> Factory Reset -> All Settings) • Auto adjust image through Menu -> Image Setting -> Auto Adjust • Adjust brightness & contrast controls  **Note: When operating in DVI mode, the contrast adjustment is not available.**
Geometric Distortion	Screen not centered correctly	• Perform the LCD Monitor TV reset on "Position Settings Only" • Auto adjust image through Menu -> Image Setting -> Auto Adjust • Adjust the centering controls • Ensure the LCD Monitor TV is in proper video mode  **Note: When operating in DVI mode, the positioning adjustments are not available.**

Horizontal/Vertical Lines	Screen has one or more lines	• Perform the LCD Monitor TV reset • Auto adjust image through Menu -> Image Setting -> Auto Adjust • Adjust Phase and Clock controls via OSD • Check for bent or broken pins in the video cable connector  **Note: When operating in DVI mode, the Pixel Clock and Phase adjustments are not available.**
Sync Problems	Screen is scrambled or appears torn	• Perform the LCD Monitor TV reset • Push Auto Adjust button • Adjust Phase and Clock controls via OSD • Check for bent or broken pins • Boot up in the "safe mode"
LCD Scratched	Screen has scratches or smudges	• Turn the LCD Monitor TV off and clean the screen
Safety Related Issues	Visible signs of smoke or sparks	• Do not perform any troubleshooting steps • The LCD Monitor TV needs to be replaced
Intermittent Problems	The LCD Monitor TV malfunctions on & off	• Ensure the LCD Monitor TV is in proper video mode • Ensure video cable connection between computer and the LCD monitor TV is secured • Perform the LCD Monitor TV factory reset (via Menu -> Factory Reset -> All Settings) • Perform the LCD Monitor TV self-test feature check to determine if the intermittent problem occurs in self-test mode

TV and Audio Problems

Poor TV signal reception	Abnormal picture seen from the screen	• The proximity of mountains or high buildings may be responsible for ghost pictures, echoing or shadows. In this case, try manually adjusting your pictures: see 'fine tuning' or adjust the direction of the outside aerial.
No TV picture	No picture when TV input was selected	• Have you connected the aerial socket properly? Have you chosen the right system? Poorly connected SCART cables or aerial sockets are often the cause of picture or sound problems (sometimes the connectors can become half disconnected if the LCD Monitor TV set is moved or turned). Check all connections.
No sound	No sound output when a program with sound was playing	• Ensure that the audio cables are firmly connected to both the audio input connectors on your the LCD Monitor TV and audio output connectors on your PC or Video player. • If on certain TV channels you receive a picture but no sound, this means that you do not have the correct TV system. Modify the SYSTEM setting.
Video Problems		
No Video	No signal indicator is displayed.	• Check Video Input Selection ❍ Composite: Yellow colored RCA jack ❍ S-Video: Typically a round 4 pin jack ❍ Component: Typically 3 RCA jacks of Green, Red and Blue. • Make sure you did not plug the video cable to video output port behind the LCD monitor TV.
Low Quality DVD playback	Picture not crisp and some color distortion	• Check DVD connection ❍ Composite gives good picture ❍ S-Video gives better picture ❍ Component gives best picture

No sound	See video but no audio	• Check if the LCD Monitor TV volume is turn off of muted. • Connect the audio cable securely. • Audio cable is connected incorrectly. • Verify that the audio source is selected correctly in the OSD.

Remote Control Problems

Remote control does not work properly	No response from the LCD Monitor TV when remote is pressed	• Point the remote control directly at the remote sensor on the LCD Monitor TV. • Replace both batteries with new ones. • Make sure the remote control is not disabled (for disable/enable the remote control, please refer to the section of Remote Control).

Product Specific Problems

Screen image is too small	Image is centered on screen, but does not fill entire viewing area	• Perform the LCD Monitor TV factory reset (via Menu -> Factory Reset -> All Settings).
Cannot adjust the LCD Monitor TV with the buttons at the side of the unit	OSD does not appear on the screen	• Turn the LCD Monitor TV off and unplug the power cord and then plug back and power on.

For further assistance, refer to the Consumer Information Centers list and contact your local Philips distributor.

OSD Warning Messages

A warning message may appear on the screen indicating the LCD Monitor TV current status.

	When user sees this warning message, it means that the LCD Monitor TV is in adjustment process.
	A warning message may appear on the screen indicating that the LCD Monitor TV is out of sync range. See Specifications for the Horizontal and Vertical frequency ranges addressable by this the LCD Monitor TV. Recommended mode is 1360 x 768 @ 60Hz.
	This message means that there is no video input signal.
	The LCD Monitor TV is in a power saving mode (in PC mode).
	The main OSD menu is unlocked.
	The main OSD menu is locked.

Regulatory Information

CE Declaration of Conformity

Philips Consumer Electronics declare under our responsibility that the product is in conformity with the following standards

- EN60950-1:2001 (Safety requirement of Information Technology Equipment)
- EN55022:1998 (Radio Disturbance requirement of Information Technology Equipment)
- EN55024:1998 (Immunity requirement of Information Technology Equipment)
- EN61000-3-2:2000 (Limits for Harmonic Current Emission)
- EN61000-3-3:1995 (Limitation of Voltage Fluctuation and Flicker)
- EN55013:1990+A12+A13+A14 (Radio Disturbance requirement of Sound and Television Receivers and associated)
- EN55020:1994+A12 (Immunity requirement of Sound and Television Receivers and associated)
- IEC Guide 112:2000 (Guide on the Safety of Multimedia Equipment) following provisions of directives applicable
- 73/23/EEC (Low Voltage Directive)
- 89/336/EEC (EMC Directive)
- 93/68/EEC (Amendment of EMC and Low Voltage Directive)

and is produced by a manufacturing organization on ISO9000 level.

The product also comply with the following standards
- ISO9241-3, ISO9241-7, ISO9241-8 (Ergonomic requirement for Visual Display)
- ISO13406-2 (Ergonomic requirement for Flat panels)
- GS EK1-2000 (GS specification)
- prEN50279:1998 (Low Frequency Electric and Magnetic fields for Visual Display)
- MPR-II (MPR:1990:8/1990:10 Low Frequency Electric and Magnetic fields)
- TCO99, TCO03 (Requirement for Environment Labelling of Ergonomics, Energy, Ecology and Emission, TCO: Swedish Confederation of Professional Employees) for TCO versions

Display Power Management Signaling

BDL3221V

This monitor is equipped with a function for saving energy which supports the VESA Display Power Management Signaling (DPMS) standard. This means that the monitor must be connected to a computer which supports VESA DPMS to fulfill the requirements in the NUTEK specification 803299/94. Time settings are adjusted from the system unit by software.

NUTEK	VESA State	LED Indicator	Power Consumption
Normal operation	ON	Blue	100 W (typical)
Power Saving Alternative 2 One step	OFF(Sleep)	Amber	< 5 W
	Switch OFF	OFF	< 3 W

We recommend you switch off the monitor when it is not in use for quite a long time.

Federal Communications Commission (FCC) Notice (U.S. Only)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Use only RF shielded cable that was supplied with the monitor when connecting this monitor to a computer device.

To prevent damage which may result in fire or shock hazard, do not expose this appliance to rain or excessive moisture.

THIS CLASS B DIGITAL APPARATUS MEETS ALL REQUIREMENTS OF THE CANADIAN INTERFERENCE-CAUSING EQUIPMENT REGULATIONS.

Commission Federale de la Communication (FCC Declaration)

Cet équipement a été testé et déclaré conforme auxlimites des appareils numériques de class B,aux termes de l'article 15 Des règles de la FCC. Ces limites sont conçues de façon à fourir une protection raisonnable contre les interférences nuisibles dans le cadre d'une installation résidentielle. CET appareil produit, utilise et peut émettre des hyperfréquences qui, si l'appareil n'est pas installé et utilisé selon les consignes données, peuvent causer des interférences nuisibles aux communications radio. Cependant, rien ne peut garantir l'absence d'interférences dans le cadre d'une installation particulière. Si cet appareil est la cause d'interférences nuisibles pour la réception des signaux de radio ou de télévision, ce qui peut être décelé en fermant l'équipement, puis en le remettant en fonction, l'utilisateur pourrait essayer de corriger la situation en prenant les mesures suivantes:

- Réorienter ou déplacer l'antenne de réception.
- Augmenter la distance entre l'équipement et le récepteur.
- Brancher l'équipement sur un autre circuit que celui utilisé par le récepteur.
- Demander l'aide du marchand ou d'un technicien chevronné en radio/télévision.

Toutes modifications n'ayant pas reçu l'approbation des services compétents en matière de conformité est susceptible d'interdire à l'utilisateur l'usage du présent équipement.

N'utiliser que des câbles RF armés pour les connections avec des ordinateurs ou périphériques.

CET APPAREIL NUMERIQUE DE LA CLASSE B RESPECTE TOUTES LES EXIGENCES DU REGLEMENT SUR LE MATERIEL BROUILLEUR DU CANADA.

EN 55022 Compliance (Czech Republic Only)

This device belongs to category B devices as described in EN 55022, unless it is specifically stated that it is a Class A device on the specification label. The following applies to devices in Class A of EN 55022 (radius of protection up to 30 meters). The user of the device is obliged to take all steps necessary to remove sources of interference to telecommunication or other devices.

Pokud není na typovém štítku počítače uvedeno, že spadá do do třídy A podle EN 55022, spadá automaticky do třídy B podle EN 55022. Pro zařízení zařazená do třídy A (chranné pásmo 30m) podle EN 55022 platí následující. Dojde-li k rušení telekomunikačních nebo jiných zařízeni je uživatel povinnen provést taková opatřgní, aby rušení odstranil.

Polish Center for Testing and Certification Notice

The equipment should draw power from a socket with an attached protection circuit (a three-prong socket). All equipment that works together (computer, monitor, printer, and so on) should have the same power supply source.

The phasing conductor of the room's electrical installation should have a reserve short-circuit protection device in the form of a fuse with a nominal value no larger than 16 amperes (A).

To completely switch off the equipment, the power supply cable must be removed from the power supply socket, which should be located near the equipment and easily accessible.

A protection mark "B" confirms that the equipment is in compliance with the protection usage requirements of standards PN-93/T-42107 and PN-89/E-06251.

Wymagania Polskiego Centrum Badań i Certyfikacji

Urządzenie powinno być zasilane z gniazda z przyłączonym obwodem ochronnym (gniazdo z kołkiem). Współpracujące ze sobą urządzenia (komputer, monitor, drukarka) powinny być zasilane z tego samego źródła.

Instalacja elektryczna pomieszczenia powinna zawierać w przewodzie fazowym rezerwową ochronę przed zwarciami, w postaci bezpiecznika o wartości znamionowej nie większej niż 16A (amperów).

W celu całkowitego wyłączenia urządzenia z sieci zasilania, należy wyjąć wtyczkę kabla zasilającego z gniazdka, które powinno znajdować się w pobliżu urządzenia i być łatwo dostępne.

Znak bezpieczeństwa "B" potwierdza zgodność urządzenia z wymaganiami bezpieczeństwa użytkowania zawartymi w PN-93/T-42107 i PN-89/E-06251.

Pozostałe instrukcje bezpieczeństwa

- Nie należy używać wtyczek adapterowych lub usuwać kołka obwodu ochronnego z wtyczki. Jeżeli konieczne jest użycie przedłużacza to należy użyć przedłużacza 3-żyłowego z prawidłowo połączonym przewodem ochronnym.
- System komputerowy należy zabezpieczyć przed nagłymi, chwilowymi wzrostami lub spadkami napięcia, używając eliminatora przepięć, urządzenia dopasowującego lub bezzakłóceniowego źródła zasilania.
- Należy upewnić się, aby nic nie leżało na kablach systemu komputerowego, oraz aby kable nie były umieszczone w miejscu, gdzie można byłoby na nie nadeptywać lub potykać się o nie.
- Nie należy rozlewać napojów ani innych płynów na system komputerowy.
- Nie należy wpychać żadnych przedmiotów do otworów systemu komputerowego, gdyż może to spowodować pożar lub porażenie prądem, poprzez zwarcie elementów wewnętrznych.
- System komputerowy powinien znajdować się z dala od grzejników i źródeł ciepła. Ponadto, nie należy blokować otworów wentylacyjnych. Należy unikać kładzenia luźnych papierów pod komputer oraz umieszczania komputera w ciasnym miejscu bez możliwości cyrkulacji powietrza wokół niego.

Information for UK only

WARNING - THIS APPLIANCE MUST BE EARTHED.

Important:

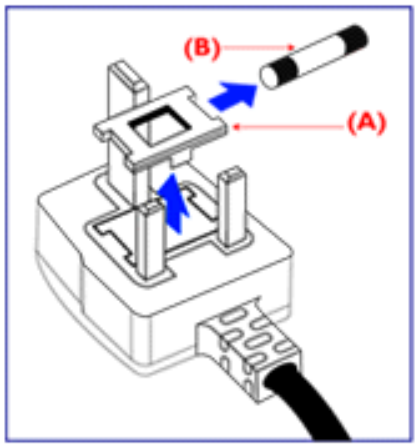
This apparatus is supplied with an approved moulded 13A plug. To change a fuse in this type of plug proceed as follows:

1. Remove fuse cover and fuse.

2. Fit new fuse which should be a BS 1362 5A,A. S.T.A. or BSI approved type.

3. Refit the fuse cover.

If the fitted plug is not suitable for your socket outlets, it should be cut off and an appropriate 3-pin plug fitted in its place.



If the mains plug contains a fuse, this should have a value of 5A. If a plug without a fuse is used, the fuse at the distribution board should not be greater than 5A.

Note: The severed plug must be destroyed to avoid a possible shock hazard should it be inserted into a 13A socket elsewhere.

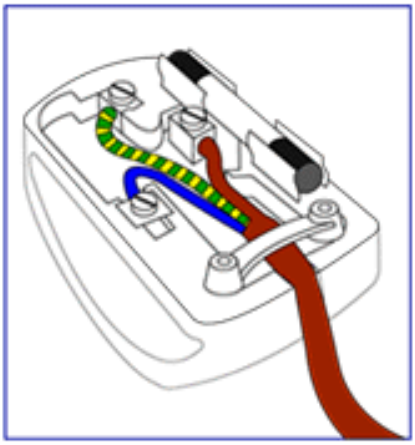
How to connect a plug

The wires in the mains lead are coloured in accordance with the following code:

BLUE - "NEUTRAL" ("N")

BROWN - "LIVE" ("L")

GREEN & YELLOW - "EARTH" ("E")



1. The GREEN AND YELLOW wire must be connected to the terminal in the plug which is marked with the letter "E" or by the Earth symbol ⏚ or coloured GREEN or GREEN AND YELLOW.

2. The BLUE wire must be connected to the terminal which is marked with the letter "N" or coloured BLACK.

3. The BROWN wire must be connected to the terminal which marked with the letter "L" or coloured RED.

Before replacing the plug cover, make certain that the cord grip is clamped over the sheath of the lead - not simply over the three wires.

Philips Pixel Defect Policy

Product Features • Technical Specifications • Resolution and Preset Modes • Automatic Power Saving • Physical Specification • Pin Assignment • Product Views

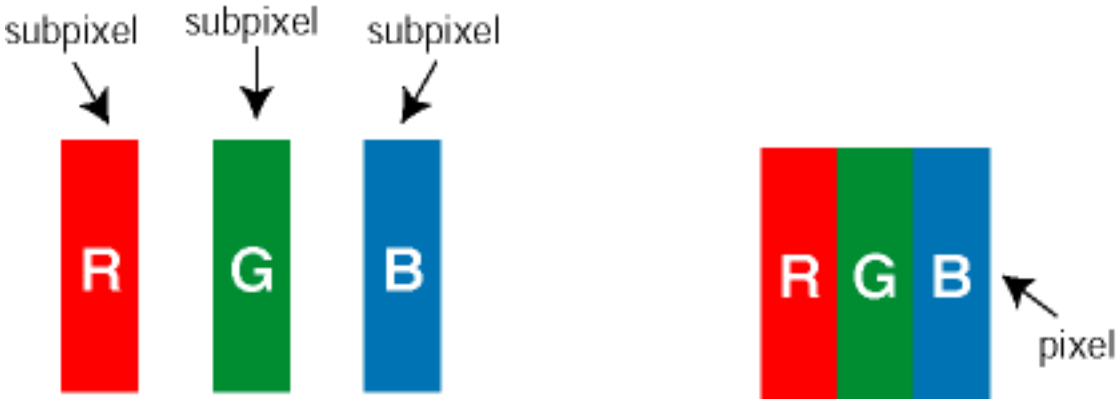
---

Philips' LCD Panel Pixel Defect Policy

Philips strives to deliver the highest quality products. We use some of the industry's most advanced manufacturing processes and practise stringent quality control. However, pixel or sub pixel defects on the TFT LCD panels used in flat panel monitors are sometimes unavoidable. No manufacturer can guarantee that all panels will be free from pixel defects, but Philips guarantees that any monitor with an unacceptable number of defects will be repaired or replaced under warranty. This notice explains the different types of pixel defects and defines acceptable defect levels for each type. In order to qualify for repair or replacement under warranty, the number of pixel defects on a TFT LCD panel must exceed these acceptable levels. For example, no more than 0.0004% of the sub pixels on a 32" XGA monitor may be defective. Furthermore, Philips sets even higher quality standards for certain types or combinations of pixel defects that are more noticeable than others. This policy is valid worldwide.

Pixels and Sub pixels

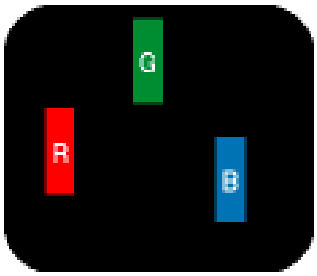
A pixel, or picture element, is composed of three sub pixels in the primary colors of red, green and blue. Many pixels together form an image. When all sub pixels of a pixel are lit, the three colored subpixels together appear as a single white pixel. When all are dark, the three colored sub pixels together appear as a single black pixel. Other combinations of lit and dark sub pixels appear as single pixels of other colors.



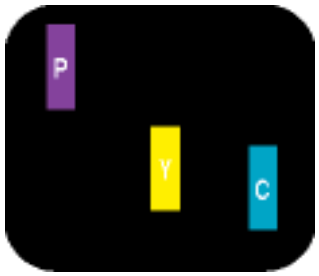
Types of Pixel Defects

Pixel and sub pixel defects appear on the screen in different ways. There are two categories of pixel defects and several types of sub pixel defects within each category.

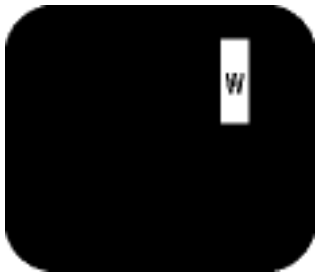
Bright Dot Defects Bright dot defects appear as pixels or sub pixels that are always lit or 'on'. That is, a *bright dot* is a sub-pixel that stands out on the screen when the monitor displays a dark pattern. There are the types of bright dot defects:



One lit red, green or blue sub pixel



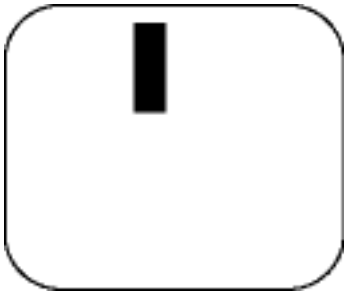
Two adjacent lit sub pixels:
- Red + Blue = Purple
- Red + Green = Yellow
- Green + Blue = Cyan (Light Blue)



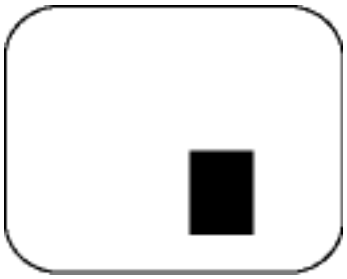
Three adjacent lit sub pixels (one white pixel)

A red or blue *bright dot* must be more than 50 percent brighter than neighboring dots while a green bright dot is 30 percent brighter than neighboring dots.

Black Dot Defects Black dot defects appear as pixels or sub pixels that are always dark or 'off'. That is, a *dark dot* is a sub-pixel that stands out on the screen when the monitor displays a light pattern. These are the types of black dot defects:



One dark sub pixel



Two or three adjacent dark sub pixels

Proximity of Pixel Defects

Because pixel and sub pixels defects of the same type that are near to one another may be more noticeable, Philips also specifies tolerances for the proximity of pixel defects.

Pixel Defect Tolerances

In order to qualify for repair or replacement due to pixel defects during the warranty period, a TFT LCD panel in a Philips flat panel monitor must have pixel or sub pixel defects exceeding the tolerances listed in the following tables.

BRIGHT DOT DEFECTS	ACCEPTABLE LEVEL
MODEL	**BDL3221V**
1 lit sub pixel	0
2 adjacent lit sub pixels	0
3 adjacent lit sub pixels (one white pixel)	0
75% ~ 50% of Dot	0
50% ~ Less Dot (Weak Dot)	Max 7
Distance between two bright dot defects*	N/A
Total bright dot defects of all types	0

Tiny bright dots less then 50% R/B, 30% G	Max 4

* Bright Dot is defined as dots (sub-pixels) which appeared brightly in the screen when the LCM displayed with whole pattern & Bright Dot's brightess is defined over 50% of the brightness against around. (but, Green bright dot is over 30% of brightness against around)

* Here in Tiny Bright Dot is defined as "for Red and Blue" the bright area should be no longer than 1/2 sub-pixel and for green the bright area should be no larger than 1/3 sub-pixel.

BLACK DOT DEFECTS	ACCEPTABLE LEVEL
MODEL	**BDL3221V**
1 dark sub pixel	5 or fewer
2 adjacent dark sub pixels	1 or fewer
3 adjacent dark sub pixels	0
Distance between two black dot defects*	15 mm or more
Total black dot defects of all types	5 or fewer

TOTAL DOT DEFECTS	ACCEPTABLE LEVEL
MODEL	**BDL3221V**
Total bright or black dot defects of all types	5 or fewer

Note:

** 1 or 2 adjacent sub pixel defects = 1 dot defect*

All Philips monitors are ISO13406-2 Compliant

PHILIPS

Contents

PHILIPS

1. Introduction

1.1 Purpose

This document describes how to operate the BDS Monitor Series, using the IR remote control unit (using standard Philips RC5 code) and the RS-232 Serial Communication Interface. This document defines all the command and messages exchanged between the master and the slave monitors for BDS. It also describes the ways to send or read the commands or the messages.

1.2 Scope

This document is the reference for design, implementation and testing the RC and RS232 communication module for Philips BDS project.

1.3 Definitions, Abbreviations and Acronyms

SICP stands for “Serial Interface Communication Protocol”.

1.4 References

2. Enabling The IR Remote Control

2.1 Monitor Address

To allow individual control, a 3-digit address (decimal format) is assigned to each monitor that can be modified by the user.
The default address set in the factory is 000.

2.2 Enabling and disabling the IR remote control(Reserved)

If the remote controller is disabled by the SICP command in section 3.3.2.9, the remote controller doesn't work since the monitor is powered on. It is possible to enable or disable the remote control device on the addressed monitor by sending the following key code:

〈UP〉1〈UP〉 XXX Enable remote control on the addressed (XXX) monitor
〈DN〉0〈DN〉 XXX Disable remote control on the addressed (XXX) monitor

Where <UP> and <DN> stand for the "UP" and "DOWN" cursor buttons on the IR remote controller (see also Fig. 1 ❻). The input of two consecutive buttons cannot exceed 3 seconds, or the input sequence will be reset.

2.3 Changing the monitor address(Reserved)

It is possible to modify the monitor address by means of the following two commands:

〈UP〉9〈UP〉 NNN Set a new address (NNN), also enabling the remote control
〈DN〉9〈DN〉 NNN Set a new address (NNN), also disabling the remote control

The input of two consecutive buttons cannot exceed 3 seconds, or the input sequence will be reset.
When using the above commands, please be sure that only the relevant monitor is switched on, in order to avoid interference with the other ones.

2.4 Notice(Reserved)

If the panel is on stand-by, it wakes up after receiving one of the above commands. If not used for more than 30 seconds (that counts since the last button input is received), the IR interface is automatically disabled.

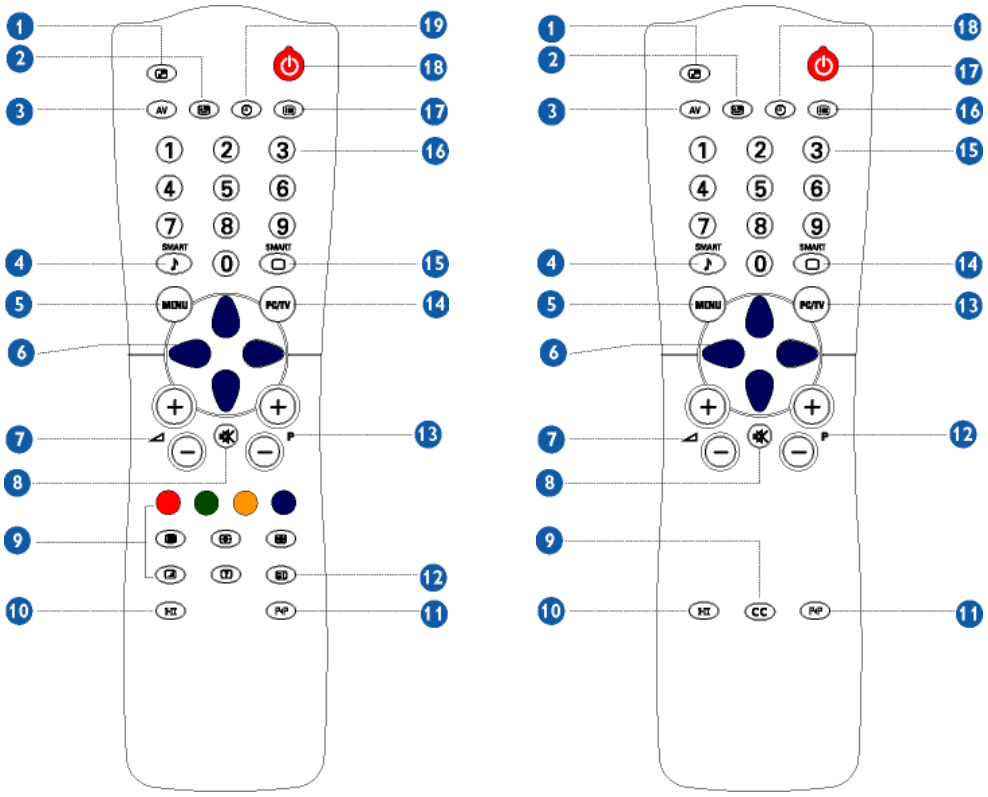

Fig. 1 Remote controllers for BDS PAL and NTSC model on the left and right, respectively.

3. Serial Interface Communication Protocol

3.1 General specifications

3.1.1 Protocol definition

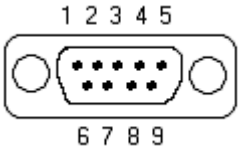
Communication to the main monitor microprocessor is possible through the serial port, which support a communication protocol dedicated to BDS only. The protocol is specifically designed to allow data communication in half duplex multi-point environments, but it can also be used for half duplex point-to-point RS-232 communication.

3.1.2 Communication characteristics

A half duplex communication is implemented starting from the concept of a master-slave structure, where the monitor is supposed to be the slave.
The first action is always taken by the master, which can be either a built-in PC-based video controller in a MASTER monitor or any external device (acting a server) interfaced to the monitor. After sending a command or a request in the appropriate format (see section 3.2), the master receives form the slave an acknowledgement, which tells the transmitter whether the command is not valid (or not executable, anyway) or it is accepted.
In case of a request, the requested information is sent back and it becomes the acknowledgement by itself.
If the poll sequence has been sent, the acknowledgement tells the transmitter the monitor status, i.e. whether it is ready or busy and other information.

3.1.3 RS232 pin assignment

There is a 9-pin male connector on the set for RS232 communication. The pin assignment is as following table.



Pin No.	Function	Description
1	GND	Signal Ground
2	RxD	Receive Data
3	TxD	Transmit Data
4	NC	Not Connected
5	GND	Signal Ground
6	NC	Not Connected
7	NC	Not Connected
8	NC	Not Connected
9	NC	Not Connected

3.1.4 RS232 settings

This section describes the parameters used during the whole communication process.

Baud rate	57600 bps
Data bits	8 bits
Parity	None
Stop bit	1
Flow Control	None

3.2 Data frame

3.2.1 Poll sequence: frame format

The poll sequence must be transmitted before sending any command, to check whether the monitor is ready to accept a command or it is busy.
The poll message in enclosed in a frame that has the following format:

<Start> <Address> <E> <Stop>

where:

<Start> = <Esc> <$>, i.e. ASCII characters [1Bh] and [24h].

<Address> = 3 ASCII characters each of which ranging from [30h] to [39h], which are used as monitor address.

<E> = the ASCII character [45h].

<Stop> = <;>, i.e. the ASCII character [3Bh].

3.2.2 Acknowledge to poll sequence: frame format

Once the monitor has received the poll sequence, it returns the following message:

<Ack Flag> <Address> <Stauts> <Stop>

where:

<Ack Flag> = <Esc> <%>, i.e. ASCII characters [1Bh] and [25h].

<Address> = 3 ASCII characters each of which ranging from [30h] to [39h], which are used as monitor address.

<Status> = 2 ASCII characters (ranging from [30h] to [39h], i.e. digits <0> to <9>, and from [41h] to [46h]), i.e. letters <A> to <F>), representing the most significant nibble (bit 7 to bit 4) and the least significant nibble (bit 3 to bit 0) of the Status byte, respectively.

The meaning of the bits in the status byte is as follows:

Bit [7]:	set to 0	(not used, reserved)
Bit [6]:	set to 0	(not used, reserved)
Bit [5]:	set to 0	(not used, reserved)
Bit [4]:	set to 0	(not used, reserved)
Bit [3]:	set to 0	(not used, reserved)
Bit [2]:	Overheated	0 = Normal 1 = Overheated
Bit [1]:	Standby	0 = Normal 1 = Standby
Bit [0]:	Ready	0 = Not Ready 1 = Ready

<Stop> = <;>, i.e. the ASCII character [3Bh].

Note: While Standby bit is set, the SICP engine accepts only STANDBY command in miscellaneous group is accepted.

3.2.3 General sequence: frame format

A message can be sent to the monitor to execute a command or to ask for any information; each message is enclosed in a frame, which consists of the following:

<Start> <Address> <Group> <Command> <Data1> <Data2> ... <DataN> <Stop>

where:

<Start> = <Esc> <$>, i.e. ASCII characters [1Bh] and [24h].

<Address> = 3 ASCII characters each of which ranging from [30h] to [39h], which are used as monitor address.

<Group> = An ASCII character that identifies the command type selected among the list below:

<G> [47h] = Geometry Group
<M> [4Dh] = Miscellaneous Group
<P> [50h] = Picture Group
<A> [41h] = Audio Group
<D> [44h] = Debug Group(Reserved)

<Command> = Two ASCII characters (ranging from [30h] to [39h], i.e. digits <0> to <9>, and from [41h] to [5Ah]), i.e. letters <A> to <Z>), defining the command.

<Data1> ... = Two ASCII characters (ranging from [30h] to [39h], i.e. digits <0> to <9>, and from [41h] to [46h]), i.e. letters <A> to <F>), representing the hex value of the data, or one ASCII characters when data are text strings.

Write commands may become a request for the current value when only <Data1> = <?> (i.e. [3Fh]) is sent.

<Stop> = <;>, i.e. the ASCII character [3Bh].

3.2.4 Acknowledge to general sequence: frame format

Once the monitor has received a general command sequence, it returns a message that is one of the following when no data are expected as part of the answerback:

<Ack>

<Nack>

In case data are expected, then the message becomes:

<Ack Flag> <Address> <Group> <Command> <Data1> <Data2>...<DataN> <Stop>

where:

<Ack> = The ASCII character [06h], to tell the transmitter that the command has been acknowledged.

<Nack> = The ASCII characters [15h], to tell the transmitter that the command has not been acknowledged, because the command itself is not valid for any reason.

<Ack Flag> = <Esc> <%>, i.e. ASCII characters [1Bh] and [25h].

<Address> = 3 ASCII characters each of which ranging from [30h] to [39h], which are used as monitor address.

<Group> = An ASCII character which identifies the command type, i.e. the same identifier of the general command sequence that is being acknowledged.

<Command> = Two ASCII characters (ranging from [30h] to [39h], i.e. digits <0> to <9>, and from [41h] to [5Ah]), i.e. letters <A> to <Z>), defining the command, i.e. the same identifier of the general command sequence that is being acknowledged.

<Data1>... = Two ASCII characters (ranging from [30h] to [39h], i.e. digits <0> to <9>, and from [41h] to [46h]), i.e. letters <A> to <F>), representing the hex value of the data, or one ASCII characters when data are text strings.

<Stop> = <;>, i.e. the ASCII character [3Bh].

3.3 Available Commands

Note:

1. Write commands may become a request for the current value when only <Data1> = <?> (i.e. [3Fh]) is sent.
2. A character <X> means a “don’t care” value in this section.
3. There is an availability table attached to each command. See the following table.
   (1) Each gray shaded cell in the table means the source is not available for the corresponding model. “TV TUNER” input is not available in BASIC model for example.
   (2) A dot, ‘•‘, means the command is available for the corresponding source and model. For instance, the command is available in EXT input, PAL model.

Driver Installation

Use the information file (.inf) for Windows® 95/98/2000/Me/XP or later

The built-in VESA DDC2B feature in Philips Monitors supports Plug & Play requirements for Windows® 95/98/2000/Me/XP. This information file (.inf) should be installed in order that your Philips monitor can be enabled from the 'Monitor' dialog box in Windows® 95/98/2000/Me/XP and the Plug & Play application can be activated. The installation procedure based on Windows® '95 OEM Release 2 , 98 , Me, XP and 2000 is specified as follows.

For Windows® 95

1. Start Windows® '95
2. Click on the 'Start' button, point to 'Settings', and then click on 'Control Panel'.
3. Double click on the 'Display' Icon.
4. Select the 'Settings' tab then click on 'Advanced...'.
5. Select the 'Monitor' button, point to 'Change...' then click on 'Have Disk...'.
6. Click on the 'Browse...' button, select the appropriate drive F: (CD-ROM Drive) then click on the 'OK' button.
7. Click on the 'OK' button then select your monitor model and click on the 'OK'.
8. Click on the 'Close' button.

For Windows® 98

1. Start Windows® 98
2. Click on the 'Start' button, point to 'Settings', and then click on 'Control Panel'.
3. Double click on the 'Display' Icon.
4. Select the 'Settings' tab then click on 'Advanced...'.
5. Select the 'Monitor' button, point to 'Change...' then click on 'Next'
6. Select 'Display a list of all the drivers in a specific location, so you can choose the driver you want.' then click on 'Next' and then click on 'Have Disk...'.
7. Click on the 'Browse...' button, select the appropriate drive F: (CD-ROM Drive) then click on the 'OK' button.
8. Click on the 'OK' button then select your monitor model and click on the 'Next' button.
9. Click on the 'Finish' button then the 'Close' button.

For Windows® Me

1. Start Windows® Me
2. Click on the 'Start' button, point to 'Settings', and then click on 'Control Panel'.
3. Double click on the 'Display' Icon.
4. Select the 'Settings' tab then click on 'Advanced...'.
5. Select 'Monitor' button, then click on 'Change...' button.
6. Select 'Specify the location of the driver(Advanced)' and click on the 'Next' button.
7. Select 'Display a list of all the drivers in a specific location, so you can choose the driver you want', then click on 'Next' and then click on 'Have Disk...'.
8. Click on 'Browse...' button, select the appropriate drive F: (CD-ROM Drive) then click on the 'OK' button.
9. Click on the 'OK' button, select your monitor model and click on the 'Next' button.
10. Click on 'Finish' button then the 'Close' button.

For Windows® 2000

1. Start Windows® 2000
2. Click on the 'Start' button, point to 'Settings', and then click on 'Control Panel'.
3. Double click on the 'Display' Icon.
4. Select the 'Settings' tab then click on 'Advanced...'.
5. Select 'Monitor'
   - If the 'Properties' button is inactive, it means your monitor is properly configured. Please stop installation.
   - If the 'Properties' button is active. Click on 'Properties' button. Please follow the steps given below.
6. Click on 'Driver' and then click on 'Update Driver...' then click on the 'Next' button.
7. Select 'Display a list of the known drivers for this device so that I can choose a specific driver', then click on 'Next' and then click on 'Have disk...'.
8. Click on 'Browse...' button then select the appropriate drive F: (CD-ROM Drive).
9. Click on the 'Open' button, then click on the 'OK' button.
10. Select your monitor model and click on the 'Next' button.
11. Click on the 'Finish' button then the 'Close' button.
    If you can see the 'Digital Signature Not Found' window, click on the 'Yes' button.

For Windows® XP

1. Start Windows® XP
2. Click on the 'Start' button and then click on 'Control Panel'.
3. Select and click on the category 'Printers and Other Hardware'
4. Click on the 'Display' Icon.
5. Select the 'Settings' tab then click on the 'Advanced' button.
6. Select 'Monitor' tab
   - If the 'Properties' button is inactive, it means your monitor is properly configured. Please stop installation.

- If the 'Properties' button is active, click on 'Properties' button.
Please follow the steps below.

7. Click on the 'Driver' tab and then click on 'Update Driver...' button.
8. Select the 'Install from a list or specific location [advanced]' radio button and then click on the 'Next' button.
9. Select the 'Don't Search. I will choose the driver to install' radio button. Then click on the 'Next' button.
10. Click on the 'Have disk...' button, then click on the 'Browse...' button and then select the appropriate drive F: (CD-ROM Drive).
11. Click on the 'Open' button, then click the 'OK' button.
12. Select your monitor model and click on the 'Next' button.
    - If you can see the 'has not passed Windows® Logo testing to verify its compatibility with Windows® XP' message please click on the 'Continue Anyway' button.
13. Click on the 'Finish' button then the 'Close' button.
14. Click on the 'OK' button and then the 'OK' button again to close the Display_Properties dialog box.

If your Windows® 95/98/2000/Me/XP version is different or you need more detailed installation information, please refer to Windows® 95/98/2000/Me/XP user's manual.

Your Philips F1rst Choice Warranty

Thank you for purchasing this Philips monitor.

All Philips monitors are designed and manufactured to high standards and deliver high-quality performance, ease of use and ease of installation. Should you encounter any difficulties while installing or using this product, please contact the Philips helpdesk directly to benefit from your Philips F1rst Choice Warranty. This three-year service warranty entitles you to a swap model on-site if your monitor turns out to be faulty or defective. Philips aims at a swap within 48 hours of your call being received.

What is covered?

The Philips F1rst Choice Warranty applies within Andorra, Austria, Belgium, Cyprus, Denmark, France, Germany, Greece, Finland, Ireland, Italy, Liechtenstein, Luxembourg, Monaco, the Netherlands, Norway, Portugal, Sweden, Switzerland, Spain and the United Kingdom and only for monitors originally designed, manufactured, approved and/or authorized for usage within these countries.

Warranty coverage begins as from the day you buy your monitor. *For three years thereafter,* your monitor will be swapped by at least an equivalent monitor in case of defects provided for under the warranty coverage.

The swap monitor remains yours and Philips keeps the defective/original monitor. For the swap monitor the warranty period remains equal to that of your original monitor, being 36 months as from the purchase date of your original monitor.

What is excluded?

The Philips F1rst Choice Warranty applies provided the product is handled properly for its intended use, in accordance with its operating instructions and upon presentation of the original invoice or cash receipt, indicating the date of purchase, dealer's name and model and production number of the product.

The Philips F1rst Choice Warranty may not apply if:

- The documents have been altered in any way or made illegible;
- The model or production number on the product has been altered, deleted, removed or made illegible;
- Repairs or product modifications and alterations have been executed by unauthorized service organizations or persons;

- Damage is caused by accidents including but not limited to lightning, water or fire, misuse or neglect;
- Reception problems caused by signal conditions or cable or antenna systems outside the unit;
- Defects caused by abuse or misuse of the monitor;
- Product requires modification or adaptation to enable it to comply with local or national technical standards, which apply in countries for which the product was not originally designed, manufactured, approved and/or authorized. Therefore always check whether a product can be used in a specific country.
- Note that products that are not originally designed, manufactured, approved and/or authorized for usage within the Philips F1rst Choice countries, do not apply to the Philips F1rst Choice Warranty. In these cases the Philips global warranty terms are valid.

Just a click away

In case of any problems, we advise you to read the operating instructions carefully or go to the www.philips.com/support website for additional support.

Just a phone call away

In order to avoid unnecessary inconvenience, we advise you to read the operating instructions carefully or go to the www.philips.com/support website for additional support before contacting the Philips helpdesk.

To solve your problem quickly, please prepare the following details before contacting the Philips helpdesk:

- Philips type number
- Philips serial number
- Purchase date (copy of purchase may be required)
- PC environment Processor:
  - 286/386/486/Pentium Pro/Internal memory
  - Operating system (Windows, DOS, OS/2, MAC)
  - Fax/Modem/Internet program?
- Other cards installed

Having the following information available will also help speed up the process:

- Your proof of purchase indicating: date of purchase, dealer name, model and product serial number.
- The full address to which the faulty monitor has to be collected and the swap model should be delivered.

Your International Guarantee

Dear Customer,

Thank you for purchasing this Philips product which has been designed and manufactured to the highest quality standards.

If, unfortunately, something should go wrong with this product Philips guarantees free of charge labor and replacement parts irrespective of the country where it is repaired during a period of 12 months from date of purchase. This international Philips guarantee complements the existing national guarantee obligations to you of dealers and Philips in the country of purchase and does not affect your statutory rights as a customer.

The Philips guarantee applies provided the product is handled properly for its intended use, in accordance with its operating instructions and upon presentation of the original invoice or cash receipt, indicating the date of purchase, dealer's name and model and production number of the product.

The Philips guarantee may not apply if:

- the documents have been altered in any way or made illegible;
- the model or production number on the product has been altered, deleted, removed or made illegible;
- repairs or product modifications and alterations have been executed by unauthorized service organizations or persons;
- damage is caused by accidents including but not limited to lightning, water or fire, misuse or neglect.

Please note that the product is not defective under this guarantee in the case where modifications become necessary in order for the product to comply with local or national technical standards which apply in countries for which the product was not originally designed and/or manufactured. Therefore always check whether a product can be used in a specific country.

In case your Philips product is not working correctly or is defective, please contact your Philips dealer. In the event you require service whilst in another country a dealer address can be given to you by the Philips Consumer Help Desk in that country, the telephone and fax number of which can be found in the relevant part of this booklet.

In order to avoid unnecessary inconvenience, we advise you to read the operating instructions carefully before contacting your dealer. If you have questions which your dealer cannot answer or any related question please contact the Philips Consumer Information Centers or via:

Website: *http://www.philips.com*

PHILIPS LIMITED WARRANTY
One (1) Year Labor and Parts Repair

PHILIPS CONSUMER ELECTRONICS warrants this product against defect in material or workmanship, subject to any conditions set forth as follows:

PROOF OF PURCHASE:
You must have proof of the date of purchase to receive warranted repair on the product. A sales receipt or other document showing the product and the date that your purchased the products as well as the authorized retailer included, is considered such proof.

COVERAGE:
(If this product is determined to be defective)

LABOR: For a period of one (1) year from the date of purchase, Philips will repair or replace the product, at its option, at no charge, or pay the labor charges to any Philips authorized repair facility. After the period of one (1) year, Philips will no longer be responsible for charges incurred.

PARTS: For a period of one (1) year from the date of purchase, Philips will supply, at no charge, new or rebuilt replacement parts in exchange for defective parts, through a Philips authorized service center.

Note: If Philips is unable to provide service in your area, receipt of the paid service can be submitted for consideration of adjustment or full reimbursement at Philips discretion.

EXCLUDED FROM WARRANTY COVERAGE
Your warranty does not cover:
• Labor charges for installation or setup of the product, adjustment of customer controls on the product, and installation or repair of antenna systems outside of the product.
• Product repair and/or part replacement because of improper installation, connections to improper voltage supply, abuse, neglect, misuse, accident, unauthorized repair or other cause not within the control of Philips.
• A product that requires modification or adaptation to enable it to operate in any country other than the country for which it was designed, manufactured, approved and/or authorized, or repair of products damaged by these modifications.
• Damage occurring to product during shipping when improperly packaged or cost associated with packaging.
• Product lost in shipment and no signature verification of receipt can be provided.
• Products sold AS IS or RENEWED.

CARRY-IN / SHIP-IN WARRANTY
For Carry-In warranty repair, take the product to a Philips authorized service center for repair. When the product has been repaired, you must pick up the unit at the center. For Ship-In warranty repair, ship the product to a Philips authorized service center for repair in its original carton and packing material. If you do not have the original carton or packing material, have your product professionally packed for shipping. Ship product via a traceable carrier. When it is necessary for you to ship the product to Philips for repair, you will pay the shipping cost for shipment to Philips. Philips will pay the shipping costs when returning the product to you.

TO OBTAIN WARRANTY SERVICE IN THE U.S.A., PUERTO RICO, OR U.S. VIRGIN ISLANDS…

REPAIR OR REPLACEMENT AS PROVIDED UNDER THIS WARRANTY IS THE EXCLUSIVE REMEDY FOR THE CONSUMER. PHILIPS SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR BREACH OF ANY EXPRESS OR IMPLIED WARRANTY ON THIS PRODUCT. EXCEPT TO THE EXTENT PROHIBITED BY APPLICABLE LAW, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ON THIS PRODUCT IS LIMITED IN DURATION TO THE DURATION OF THIS WARRANTY.

Some states do not allow the exclusions or limitation of incidental or consequential damages, or allow limitations on how long an implied warranty lasts, so the above limitations or exclusions may not apply to you. In addition, if you enter into a service contract agreement with the PHILIPS partnership within ninety (90) days of the date of sale, the limitation on how long an implied warranty lasts does not apply.

This warranty gives you specific legal rights. You may have other rights which vary from state/province to state/province.
Philips, P.O. Box 671539, Marietta, GA. 30006-0026
