Usage Notice

⚠️ **Warning-** To prevent the risk of fire or shock hazards, do not expose this product to rain or moisture.

⚠️ **Warning-** Please do not open or disassemble the product as this may cause electric shock.

Precautions

Follow all warnings, precautions and maintenance as recommended in this user's manual to maximize the life of your unit.

_Do:_

❑ Turn off the product before cleaning.

❑ Touch screen surface may be cleaned using a soft clean cloth moistened with mild window glass commercial cleaners or 50/50 mixture of water and isopropyl alcohol.

❑ Use a soft cloth moistened with mild detergent to clean the display housing.

❑ Use only high quality and safety approved AC/DC adapter.

❑ Disconnect the power plug from AC outlet if the product is not going to be used for an extended period of time.

Don't:

❑ Do not touch the LCD Display screen surface with sharp or hard objects.

❑ Do not use abrasive cleaners, waxes or solvents for your cleaning.

❑ Do not operate the product under the following conditions:

- Extremely hot, cold or humid environment.

- Areas susceptible to excessive dust and dirt.

- Near any appliance generating a strong magnetic field.

- In direct sunlight.

Introduction

About PT1910MX/PT1915MU

The PT1910MX / PT1915MU is a 19" flat panel screen with an active matrix, thin-film transistor (TFT) liquid crystal display (LCD).

Features include:

❑ Direct Analog signal input

❑ Direct Digital signal input

❑ Active matrix TFT LCD technology

❑ 1280x1024 SXGA resolution

❑ 19" viewable display area

❑ 31.5 ~ 80 kHz horizontal scan

❑ 56 ~ 75 Hz high refresh rate

❑ 0.294mm x 0.294mm Pixel pitch

❑ Auto adjustment function

❑ Multilingual OSD user controls

❑ VESA DPMS power saving

❑ Kensington security slot

❑ 75 mm / 100 mm VESA mount

❑ Removable base for flexible mounting solutions.

❑ PT1910MX - 5-wire resistive touch screen with dual RS-232 Serial/USB controllers

❑ PT1915MU - SAW touch screen with USB controller

❑ Built-in speakers-1W X 2

Touch Screen for PT1910MX

- ❑ Analog 5-wire resistive touch screen for finger and stylus input
- ❑ Surface: Anti-glare treatment
- ❑ Interface: Dual RS-232 Serial/USB controller
- ❑ Durability: 35 million touches at a single point
- ❑ Hardness of surface: 3H Typical
- ❑ Operating force: 40g~200g when using a silicon rubber tipped pen with a 1 mm diameter minimum and a hardness of 60 degree.
- ❑ Transmittance: 80±2%
- ❑ Driver: Windows® VISTA, XP, 2000, ME, 98, CE, XP Embedded, Linux, Apple® Mac OS

# Touch Screen for PT1915MU

- ❑ Surface Acoustic Wave (SAW) touch screen for finger and stylus input
- ❑ Surface: Anti-glare treatment
- ❑ Interface: USB controller
- ❑ Durability: 30 million touches at a single point
- ❑ Hardness of surface: Mohs' Hardness rating of 7
- ❑ Operating force: Less than 100 gram
- ❑ Transmittance: 88% (Min.)
- ❑ Driver: Windows® VISTA, XP, 2000, 98

The monitor can be secured to your desk or any other fixed object with Kensington lock security products.   The Kensington lock is not included.

Kensington Security Slot
VESA Mount your monitor

This monitor conforms to the VESA Flat Panel Mounting Physical Mounting Interface Standard which defines a physical mounting interface for flat panel monitors, and corresponding standards for flat panel monitor mounting devices, such as wall and table arms.   The VESA mounting interface is located on the back of your monitor.

To mount the monitor on a swing arm or other mounting fixture, follow the instructions included with the mounting fixture to be used.
⚠️ <u>*Warning!*</u>

Please select the proper screws!

The distance between the back cover surface and the bottom of the screw hole is 8mm Please use M4 screw diameter with a maximum length of 8 mm.

Start Your Installation

◆ Remove the Back Cover

Please follow these instructions to remove the cover on the back panel of the LCD so that you can hookup the cables to associated connector.
Figure A.

1. To remove the back cover, follow the arrows in Figure A and pull out with your fingers and the cover should be removed from the stand.
2. Follow the instructions on P. 11 (Figure 11.1) to connect the cables to the appropriate connectors.
3. Attach the cover back to the LCD stand by pressing firmly until the tabs snap into place. You may also keep the cables in order by using the cable organizer.

Included Cable
Organizer

⚠ **_Note!_**
You can place the LCD flat horizontally to make it easier to connect the cables. Please make sure that you place it on an even surface lest the LCD should be damaged by scratches or collision.
◆ Connecting the Display (Figure 11.1)

To setup this display, please refer to the following figure and procedures.

1. Be sure all equipment is turned off.

2. Connect the AC power cord to the power connector on the monitor and the other end into an electrical outlet (11.1).

3. Connect the D-SUB or DVI cable from the display's VGA or DVI input connector to the D-SUB or DVI connector of your host computer and tighten the screws (11.1).

4. Connect the Audio-In cable from the audio input port of your display to the Audio-out port of your computer (11.1).

5. Connect the RS-232 or USB cable from the RS-232 or USB port of your display to the RS-232 port (11.1) or USB port (11.1) of your computer.

6. Configure the touch screen. Refer to the "Touch Screen Driver Installation" section on **Page 19.**

7. Once the touch screen is configured, the monitor is ready for use.

⚠ _Notice!_

To ensure the LCD display works well with your computer, please configure the display mode of your graphics card to make it less than or equal to 1280 x1024 resolution and make sure the timing of the display mode is compatible with the LCD display.

We have listed the compatible "Video Modes" of your LCD display in the appendix for your reference.

Figure 11.1
User Controls

Front Panel Controls
No / Icon	Control	Function
❶ **MENU**	Menu button	Display the OSD menus
❷**SELECT/AUTO**	Select/Auto	Select – To select the adjustment items from OSD menus. Auto – To activate the "Auto Adjustment" function to obtain an optimum image.
❸ ◀	Brightness Minus/Minus	1. Decreases the brightness of the display image. 2. Decreases value of the adjustment items.
❹ ▶	Brightness Plus/Plus	1. Increases the brightness of the display image. 2. Increases value of the adjustment items.
❺ ⏻	Power Switch	Switches on/off the power of the LCD display.

How to Use the OSD Menus

1. Press the "MENU" button to pop up the "on-screen menu" and to select among the four Main Menus.

2. Choose the adjustment items by pressing the "Select/Auto" button.

3. Adjust the value of the adjustment items by pressing the "◀"or "▶" button.

1. The OSD menu will automatically close, if you have left it idle for a pre-set time.

2. To disable the OSD menu buttons, please follow the instructions below:

    (**Please note:** the monitor has to be ON with a valid signal preset)

    a. Press and hold the "Power" and "Menu" key simultaneously for 4 seconds.

    b. The wording "OSD Locked" will appear for 4 seconds on the monitor. This indicates that all the front buttons, with the exception of the power button, are now disabled.

3. To enable the OSD menu buttons, please follow the instructions below. (**Please note:** the monitor has to be ON with a valid signal present.)

    a. Press and hold the "Power" and "Menu" key simultaneously for 4 seconds.

    b. The wording "OSD Unlocked" will appear for 4 seconds on the monitor. This indicates that all the front buttons are now enabled.

On-Screen Display Menus

Main OSD Menu:

MAIN MENU	SUB MENU	Function Description
Auto-Adjustment	No/Yes	Choose this function to obtain an optimum image.
Contrast	0-100	Adjust the contrast of the display image.
Brightness	0-100	Adjusts the brightness of the image.
Horizontal Position	0-100	Changes the horizontal position of the image.
Vertical Position	0-100	Changes the vertical position of the image.
Clock	0-100	Changes the display data frequency to match the frequency of your graphic card. When you are experiencing vertical flickering bar, use this function to make an adjustment.
Phase	0-63	Synchronizes the signal timing of the display to that of the graphic card. When you are experiencing vertical flickering image, use this function to make an adjustment.
Display Mode	ADJ	Select this function to view the display resolution, vertical refresh, and horizontal scan of the current mode.
OSD Off-Time	5-60	Adjusts the time period for OSD menu to disappear.
Language	English / Francais Deutsch / Espanol Italiano / Japanese/ Chinese traditional / Chinese simplified	Choose the language you need.
Reset	No/Yes	Returns the display parameters of the current mode to its factory default settings.
Volume	0-100	Controls the sound volume.
Mute	No/Yes	Disables the sound immediately.
Color Setting	9300K/ 7500K / 6500K / 5500K Preset / Custom	Adjusts the color temperature.

Appendix

Troubleshooting

If you are experiencing trouble with the LCD display, refer to the following. If the problem persists, please contact your local dealer or our service center.

Problem: No image appears on screen.
▸ Check that all the I/O and power connectors are correctly and well connected as described in the "Installation" section.
▸ Make sure the pins of the connectors are not crooked or broken.

Problem: Partial Image or incorrectly displayed image.
▸ Check to see if the resolution of your computer is higher than that of the LCD display.
▸ Reconfigure the resolution of your computer to make it less than or equal to 1280 x 1024.

Problem: Image has vertical flickering line bars.
▸ Use "Clock" to make an adjustment.
▸ Check and reconfigure the display mode of the vertical refresh rate of your graphic card to make it compatible with the LCD display.

Problem: Image is unstable and flickering
▸ Use "Phase" to make an adjustment.

Problem: Image is scrolling
▸ Check and make sure the VGA signal cable (or adapter) is securely connected.
▸ Check and reconfigure the display mode of the vertical refresh rate of your graphics card to make it compatible with the LCD Display.

Problem: Vague image (characters and graphics)
▸ Use "Clock" to make an adjustment. If this problem still exists, use "Phase" to make an adjustment.

Warning Signal

If you see warning messages on your LCD screen, this means that the LCD display cannot receive a clean signal from the computer graphics card.

There may be three sources for this problem. Please check the cable connections or contact Planar for more information.

▶ **No Signal**

This message means that the LCD Display has been powered on but it cannot receive any signal from the computer graphics card. Check all the power switches, power cables, and VGA / DVI signal cable.

▶ **Going to sleep**

The LCD is under the power saving mode, in addition, the LCD will go into this sleep mode when experiencing a sudden signal disconnecting problem.

▶ **Out of Range**

This message means that the signal of the computer graphic card is not compatible with the LCD display. When the signal is not included in the "Video Modes" list we have listed in the Appendices of this manual, the LCD display will display this message.

Touch Screen Driver Installation

Driver Installation Process:

1. Before you start to install the touch driver, please be sure the USB or the RS-232 Serial cable is connected from the PC to the LCD display.
2. Uninstall any touch screen driver that may be on your system.
3. Click on the driver link found on the CD-ROM.
4. Follow instructions as found below.
5. After installation is complete, click "Finish" and restart your computer to complete installation.

PT1910MX Driver Install:

Please Note: The PT1910MX is available with both RS232 and USB connections. The touch driver is located on the enclosed CD-ROM for these OS: Windows® VISTA 64/32 bits, XP, 2000, ME, 98, XP Embedded, Linux, WinCE.NET. If you are using RS232 connection, follow the instructions below:

1. Be sure that RS232 cable is connected to the computer.
2. Power on the computer.
3. Load the touch screen driver CD.
4. Follow the step-by-step instructions as shown on pop-up windows.

If you are using USB connection on a PC running Windows® VISTA, follow the instructions below:

1. Be sure that USB cable is connected to the computer.
2. Power on the computer.
3. No need to install USB driver from the CD as it is a HID device. The system will recognize the HID device and load the driver automatically.

Please note: Do not plug in both RS232 and USB cables. Doing so may cause a driver conflict, making your touch screen idle.

If you are using USB connection on a PC using an operating system other than Windows$^{®}$ Vista, follow the instructions below:

1. Be sure that USB cable is connected to the computer.
2. Power on the computer.
3. Load the touch screen driver CD.
4. Follow the step-by-step instructions as shown on pop-up windows.

PT1915MU Driver Install:

The touch driver is located on the enclosed CD-ROM for these OS: Windows® VISTA, XP, 2000, 98.

1. Be sure that USB cable is connected to the computer.
2. Power on the computer.
3. Load the touch screen driver CD.
4. Follow the step-by-step instructions as shown on pop-up windows.
