

INSTALLING FILTER ASSEMBLY- 600 D, DX

The AllerAir 600 models ship with their large carbon filters in a separate box. This is done to safeguard your unit during shipping. To insert the filter, refer to the diagram below.

 <p>Step 1 Turn Power Off and unplug receptacle. Lay unit upside down.</p>	 <p>Step 2 With a #2 Philips screw driver, remove the four screws from the bottom of the unit.</p>	 <p>Step 3 Gently grasp wheels. Remove base by gently pulling on the wheels.</p>
 <p>Step 4 Remove only one of the white, felt, donut-shaped gaskets from the inside of the purifier body.</p>	 <p>Step 5 Insert the carbon filter (either a Model 600 D Carbon or a Model 600 DX Carbon) into the unit.</p>	 <p>Step 6 Replace the gasket that had been removed in STEP 4.</p>
 <p>Step 7 Place lid back to its proper position by aligning the arrow with the rear seam.</p>	 <p>Step 8 Replace the four screws</p>	 <p>Step 9 Turn the unit back onto its wheels. It is now ready for immediate use.</p>

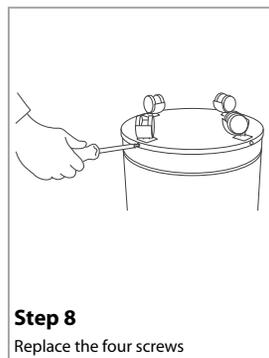

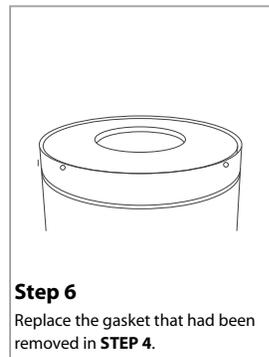

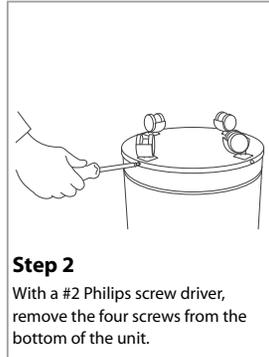

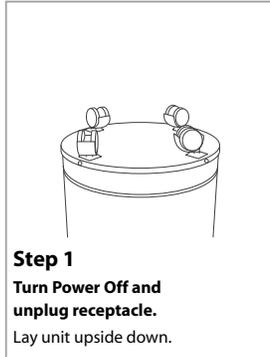

INSTALLING FILTER ASSEMBLY- 600 Models (except D and DX)
