

What is BSR?

The BERNINA® Stitch Regulator

The revolutionary Bernina Stitch Regulator (BSR) allows you to master in minutes what used to require hours of practice. Consistent free-motion stitching is now easier than ever thanks to this patented Bernina innovation.

Versatile Stitching Effects

- *Straight Stitch*—for freemotion quilting, thread painting, bobbinwork, quilting, freehand appliqué, double needle shadow work, raw-edge appliqué, Battenburg lace
- *Zigzag Stitch*—for thread painting, freehand appliqué, raw-edge appliqué, Battenburg lace

Three Interchangeable Soles

- Closed metal sole—similar to Darning Foot #9 with the needle centered and visible
- Open metal sole—similar to Freehand Embroidery Foot #24, with an unobstructed view of the needle
- Large transparent sole—glides easily over fabric, including bulky quilts (where the large diameter of the clear sole compresses the batting, allowing easy foot movement and needle visibility) and provides full visibility of the stitching area.

Two Modes of Operation

- Mode 1—needle stitches continuously; when fabric is at rest, needle keeps moving up and down very slowly. If stitching in place is desired, select Mode 1.
- Mode 2—needle stitches only when the fabric is moved; when fabric is at rest, no stitches are taken and the needle comes to a complete stop.

Available on Several BERNINA Models

- Standard on **aurora** 440 QE (Straight Stitch only)
- Optional on **artista** 630 (Straight Stitch & Zigzag)
- Optional on **artista** 640 (Straight Stitch & Zigzag)
- Standard on **artista** 730 (Straight Stitch & Zigzag)
