

# Dell™ 1401FP Flat Panel Color Monitor Quick Setup Guide

## Safety Instructions

Observe the following safety guidelines when connecting and using your monitor:

- Be sure that your monitor is electrically rated to operate with the AC power available in your location.
- Locate your monitor near an easily accessible electrical outlet.
- Place the monitor on a solid surface and treat it carefully. The screen can be damaged if dropped, sharply hit, or touched with a sharp or abrasive implement.
- Put your monitor in a location with low humidity and a minimum of dust.
- Never use your monitor if the power cable has been damaged. Do not allow anything to rest on the power cable, and keep the cable away from where people could trip over it.
- Never insert anything metallic into the monitor openings. Doing so may create the danger of electric shock.
- To avoid electric shock, never touch the inside of the monitor. Only a qualified technician should open the monitor's case.
- Be sure to hold the plug, not the cable, when disconnecting the monitor from an electrical outlet.
- Openings in the monitor cabinet are provided for ventilation. To prevent overheating, these openings should not be blocked or covered. Also, avoid using the monitor on a bed, sofa, rug, or other soft surface. Doing so may block the ventilation openings in the bottom of the cabinet. If you put the monitor in a bookcase or some other enclosed space, be sure to provide adequate ventilation.
- Do not expose the monitor to rain or use it near water. If the monitor accidentally gets wet, unplug it and contact an authorized dealer immediately. You can clean the exterior of the monitor with a damp cloth when necessary, but be sure to unplug the monitor first.
- If your monitor does not operate normally—in particular, if there are any unusual sounds or smells coming from it—unplug the monitor immediately and contact an authorized dealer or service center.

## Connecting Your Monitor to a Computer

1. Turn off your computer and display, then unplug the power cable.
2. Remove the door.
3. Connect the 24-pin DVI-D connector of signal cable to the DVI-D video port on the back of computer. Tighten screws securely with fingers.  
Connect the speaker cable to the lime colored phone jack on the back of computer.  
Connect the microphone cable to the pink colored microphone jack on the back of computer.

4. Route the USB cable under the DVI-D cable, then connect it to the USB port.
5. Connect the power cable for your monitor to the power port on the base. Connect the power cable for your computer to the power port.
6. Secure all long cables under the cable guide.
7. Attach door into position.
8. Plug the power cable of the display into the outlet.
9. Plug the power cable of the computer into the outlet.  
If your monitor displays an image, installation is complete. If it does not display an image, see Troubleshooting.

## Monitor Controls and Indicators

1. For Brightness use this button to decrease or increase brightness.
2. The Power button turns the monitor on and off. The Power indicator lights steady green, amber, yellow or blinking steady yellow indicates the power management state of the monitor.

## Driver Installation

Use the monitor CD to install the appropriate monitor driver for your operating system.

### Microsoft® Windows® 98 Operating System

Windows 98 automatically detects the new monitor and displays the **Add New Hardware Wizard** dialog box if the monitor driver is not already installed.

1. Insert the monitor CD into the CD-ROM drive, and click **Next>** twice when the **Add New Hardware Wizard** dialog box appears.
2. Click the **CD-ROM drive** box to install the drivers from the CD and then click **Next>**.
3. Confirm that the driver was found on the CD, and click **Next>** twice to install the driver.
4. Click **Finish** to exit the **Add New Hardware Wizard** dialog box.

To manually install or update the driver, perform the following steps:

1. Click **Start -> Settings -> Control Panel** and then double-click **Display**.
2. In the **Display Properties** window, click the **Settings** tab, and then click **Advanced**.
3. Click the **Monitor** tab, and then click **Change**.
4. When the **Update Device Driver Wizard** dialog box appears, follow the steps in the previous paragraph.

### Microsoft Windows 95 Operating System

First determine the Windows 95 version installed on your computer by right-clicking the **My Computer** icon on the desktop and selecting **Properties**. The version number is listed under **System**. Perform the steps for the appropriate version.

*Version 4.00.950A*

1. Click **Start -> Settings -> Control Panel** and then double-click **Display**.
2. In the **Display Properties** window, click the **Settings** tab and then click **Change Display Type**.
3. In the **Change Display Type** window, click **Change** and then click **Have Disk**.
4. Insert the monitor CD into the CD-ROM drive, type d:\ (change the drive letter to match your CD-ROM drive if it is not drive D) in the **Copy manufacturer's files from:** box, and click **OK**.
5. In the **Select Device** window, click the appropriate monitor model and then click **OK**.
6. In the **Change Display Type** window, click **Close**.
7. In the **Display Properties** window, click **OK**.

Version 4.00.950A

1. Click **Start -> Settings -> Control Panel** and then double-click **Display**.
2. In the **Display Properties** window, click the **Settings** tab and then click **Advanced Properties**.
3. In the **Advanced Display Properties** window, click the **Monitor** tab and then click **Change**.
4. In the **Select Device** window, click **Have Disk**.
5. Insert the monitor CD into the CD-ROM drive, type `d:\` (change the drive letter to match your CD-ROM drive if it is not drive D) in the **Copy manufacturer's files from:** box, and click **OK**.
6. In the **Select Device** window, click the appropriate monitor model and then click **OK**.
7. In the **Advanced Display Properties** window, click **Close**.
8. In the **Display Properties** window, click **OK**.

## Accessing the User's Guide Online or via CD

To view the latest monitor *User's Guide*, access the **SUPPORT** section of the Dell Web site (<http://support.dell.com>).

If you do not have Internet access, you can access the guide on the monitor CD:

1. Insert the monitor CD into your CD-ROM drive.  
A start-up document should launch automatically; however, if the start-up document does not launch automatically, click **Start -> Run**, type `D:\monitor.htm`, and click **OK**. (Substitute the correct CD-ROM drive letter if it is not the D drive.)
2. Click the appropriate icon to open the *User's Guide* in the desired language.

*NOTE: All applicable warranty and regulatory information regarding your monitor is contained in the User's Guide on your CD.*

## Troubleshooting Tips

### Monitor Has No Power

If the monitor's power indicator is off and no image appears on the display, perform the following checks:

- Ensure that the power cable is fully inserted in the monitor's power port and the electrical outlet.
- Test the electrical outlet by plugging in a working electrical device such as a lamp.
- Ensure that the power button has been depressed, and wait for the power indicator to light.
- Try another power cable on the monitor. Use the computer's power cable and turn on the monitor with the signal cable disconnected. If the monitor is working correctly, a self-test pattern appears.

### No Image Is Displayed on the Monitor

If the monitor power indicator is on but no image appears on the display, perform the following checks:

- Ensure that the video connector is seated properly. Tighten the connector screws securely with your fingers.
- Ensure that the computer is on.
- Increase brightness and contrast controls.
- Turn off the monitor and unplug the signal cable. Check the cable connector for bent or broken pins.
- With the signal cable still disconnected, turn on the monitor. If the monitor is working correctly, a self-test pattern appears.
- Perform a monitor reset or recall.

### IMPORTANT!

**Before contacting Dell for technical assistance, refer to the Troubleshooting section in the *User's Guide* on your monitor CD. This section contains detailed information for resolving most monitor problems.**
