Jabra SP5050

The Bluetooth® speakerphone that's as mobile as you are!

Slim-line Design - Forget it's There

The Jabra SP5050 is the perfect combination of stylish design and excellent performance. Ideal for use in the car, office or home - the Jabra SP5050 is a lightweight speakerphone that can be as mobile as you are. The ultra thin design and simple visor clip makes the Jabra SP5050 a happy companion to those on the move seeking hands free communication.

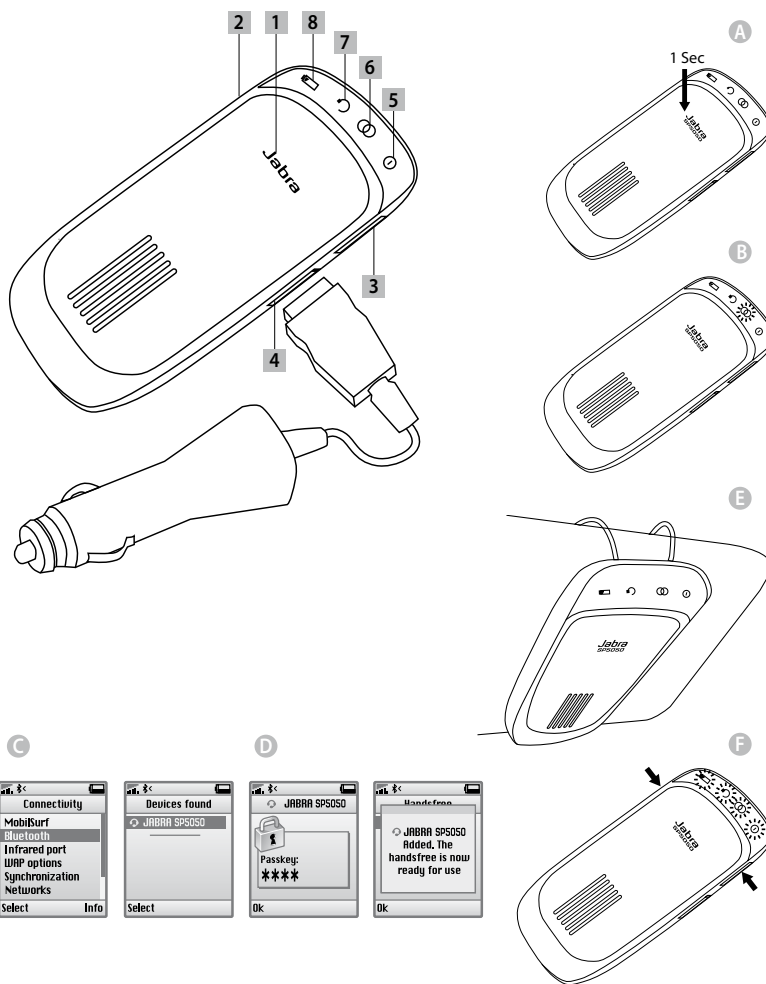

Communicate Freely - And Legally

Many countries have passed laws forbidding direct mobile phone use whilst driving, and many others are passing legislation as we speak. Using the Jabra SP5050 when driving ensures you stay on the right side of the law, but still free to make and receive calls. Thanks to the Bluetooth technology you can keep your hands on the wheel and your thoughts on driving.

Easy to Operate - Drive Safely

The Jabra SP5050 is simple to use - with no installation necessary; simply clip onto to the sun visor. Autopairing makes connection to your mobile phone hassle free and easy to manage. Charging is simple with the supplied in-car charger. For optimum safety, the Jabra SP5050 comes with 'Night Driving Mode', reducing distractions while concentrating on the road.

With intuitive and simple buttons, the Jabra SP5050 is a user friendly and convenient speakerphone for safer mobile communication while driving. What's more, the 'Auto off' function preserves battery life - automatically turning off the speakerphone 15 mins after the Bluetooth connection has been terminated

Quick start guide

1. Fully charge the Jabra SP5050 with your car charger
2. Press the answer / end button to turn the Speakerphone on **A**
3. The Jabra SP5050 will automatically enter pairing mode **B**
4. Set your phone to "discover" the speakerphone **C**
5. Press "Yes" on the phone and confirm with PIN code = 0000 (4 zeros) **D**
6. Place the Jabra SP5050 discreetly and conveniently on the sun visor **E**
7. Tap the answer / end button to answer or end a call
8. Engage Night Driving Mode by pressing volume up and down buttons simultaneously while the speakerphone is in standby mode **F**
In this mode the LEDs will be shut off, thereby reducing distraction during driving in dark conditions
9. Mute the conversation with a tap on both volume up and down at the same time. Touch any of the volume buttons to un-mute.
