

The Combination of Technologies in the SuperSteam™ Oven Makes It Easy to Cook Healthy

Today, more and more people aspire to a healthy lifestyle, a lifestyle that includes healthy eating—and healthy food preparation. Enter the Sharp SuperSteam Oven. This new multi-purpose oven incorporates the healthiest ways to cook: superheated steam, convection, steam and microwave. It is programmed to know which cooking method is best for the food selected, using the menu-driven controls.

Versatile

- The SuperSteam Oven offers a unique combination of the healthiest ways to cook all in one oven: SuperSteam, Convection, Steam and Microwave. It cooks a wide variety of foods without compromising taste or appearance. SuperSteam technology actually browns and crisps foods while retaining moisture and natural flavors. Meats, poultry, fish and seafood are exceptionally moist and tender.
- Microwave option provides speed and convenience.
- LCD display and automatic settings assure excellent results.
- Balanced Meals setting automatically cooks complete meals in 25 minutes.
- It's the perfect second oven or second microwave.

Healthy

- Foods that are good for you will look and taste better than you ever expected.
- It's not just what you cook, it's how you cook it. Now you can get moist, flavorful results without the addition of fats and oils.
- No other oven cooks in so many healthy ways, giving you more control over what you eat and how you cook it. It can help change the way you eat by changing the way you cook.
- SuperSteam Cookbook includes healthy recipes, cooking tips and nutritional information to encourage healthier cooking and eating.

Steam is Hot

- Consumers want foods that are fresh and flavorful. They know that steam is a natural, gentle cooking method, preserving nutrients and taste. Now Sharp offers the benefits of steam cooking along with superheated steam that browns and crisps.
- Steam is being used in many applications: cooking appliances, washers and dryers, dishwashers, microwave frozen foods and steaming bags for microwave cooking.

Flexible Placement

- Build into a 30-inch wall oven cabinet with Sharp's deluxe built-in kit.
- Built-in design coordinates with other Sharp Insight® and Insight Pro® appliances. To create a unique cooking center, build the Sharp SuperSteam Oven above a Sharp Microwave Drawer or Warming Drawer.
- Place on the countertop or cart if built-ins are not an option.

Consumer Trends

- The SuperSteam Oven is ideal for empty nesters, retiring baby boomers and smaller households, some of the fastest growing consumer segments.
- Smaller meals are being cooked at home. Families often eat different foods, even when they dine together, fueling the need for smaller, specialized cooking appliances.
- The "Wellness Consumer" wants to eat healthier, to be more physically active and to take action to lower health risks. What better target for the Sharp SuperSteam Oven?
