Preparing to Connect My Multifunction To My Network

Network Requirements

Before connecting the machine to the network, make sure that configuration of the computer and access point or router is complete, and that the computer is connected to the network.

Notes on Network Connection

- The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to your device's instruction manual or contact its manufacturer.
- The machine cannot be used over a wireless and wired connection at the same time.

Wireless Connection

Connect to your network environment over a wireless connection.

Preparing to Connect My Multifunction To My Network

An "Ad-hoc connection," which establishes a direct connection to the computer over a wireless connection without using an access point, is not supported.

Be sure to prepare an access point.

Important Information You Need Before Adding Your Multifunction

The following information is required to connect to your access point or router.

• Access Point Name/Network Name:

Also referred to as SSID. A name to identify the specific access point.

• Network Key:

Also referred to as encryption key, WEP key or WPA/WPA2 passphrase, Pre-Shared key.

A password required to set to prevent unauthorized access to communication.

Check your access point or router for the following information, and then write it down.

NOTE: For details on how to check the following information, refer to the manual of your access point or router, or contact its manufacturer.

Installing the Drivers & Software

To use the machine by connecting it to a computer, software including the drivers needs to be copied (installed) to the computer's hard disk. The installation process takes about 20 minutes. (The installation time varies depending on the computer environment or the number of applications to be installed.)

Step One

Turn on the computer, then insert the **Setup CDROM** into the CD-ROM drive

Step Two

Double-click the **Setup** icon of the CD-ROM folder to proceed to the following screen.

If the CD-ROM folder does not open automatically, double-click the CD-ROM icon on the desktop.

Step Three

Enter your administrator name and password. Click **OK**.

Step Four

Click Easy Install. Click Install.

The drivers, application software, and on-screen manuals are installed all together.

	Type your password to allow Setup to make changes.
	Name: Student
	Password:
▶ Details	
?	Cancel

If you do not know your administrator name or password, click Help ? , then follow the on-screen instructions.

Step Five

Click Install

*Applications may vary by model

er and On-screen Manual			d space: 915 ME README file: 📺

Registering the Printer & Scanner

This section describes how to register the machine on a Macintosh computer.

Step One

When the **Register Printer and Scanner** screen appears, click **Register Printer.**

Proceed to the section that relates to your operating system for further installation instructions

Mac OS X v. 10.5.x / 10.6.x: Go to Step 2-A

Mac OS X v. 10.4.11: Go to Step 2-B

Step Two

2-A

1. Select Canon MXxxx series in the list of printers, then click Add . *xxx refers to the model number. MX410 series shown in example, below

000		Add Printer	
		Q	
Default Fax II	P Windows	Search	
	ries ries _F2F65E00000 ries _F2F65E00000		Ų
Location:	Canon MX410 se Canon MX410 s	eries _F2F65E000000	
		Add	Ð

Step Two 2-B (OS X v. 10.4.11)

1. When the **Printer List** window appears, click **Add**.

2. Go to Step Three, page 19.

*The alphanumeric characters after Canon xxxx series is the machine's Bonjour service name or MAC address

Step Two

2-B

2. Click More Printers in the Printer Browser window.

Step Two 2-B

3. Select **Canon IJ Network** in the pop-up menu, select **Canon MXxxx series** in the list of printers, then click **Add . *xxx** refers to the model number. **MX410 series** shown in example, below

⊜ ⊖ ⊖		Printer Browser		\bigcirc
4	9	(Q		
Default Browser	IP Printer		Search	
Printer Name		*	Connection
