

CALL CENTER

CONFERENCE SPEAKERPHONE SYSTEM

Crystal clear hands-free calling for the home or office.

If you've ever had the experience of trying to conduct a business meeting using the speakerphone on today's smartphones, poor quality, tiny speakers may have left you wondering just how smart the phone really is. ION's Call Center steps up the quality of your conference calls by providing crystal-clear sound for virtually any smartphone.

Using Call Center is a snap. Simply plug the included cable into the headphone jack of your smartphone, rest your phone in the included cradle and place a call on your phone. You'll be up and running in seconds with conversations everyone in the room, and on the call, can hear. Intelligent muting is included to prevent feedback and background noise from interfering with your conversation.

Call Center is perfect for the offices large and small, home offices or anywhere else that you need to be heard, and hear your conference without technology getting in the

way. It can even save you money from having to purchase expensive phone conferencing equipment, since nearly everyone has a cell phone at the office.

Get your hands on Call Center and be heard!
