PCL® is a registered trademark of the Hewlett-Packard Company. PCL is Hewlett-Packard Company's designation of a set of printer commands (language) and functions included in its printer products. This printer is intended to be compatible with the PCL language. This means the printer recognizes PCL commands used in various application programs, and that the printer emulates the functions corresponding to the commands.

# Introduction

## Overview

This edition of the *Technical Reference* contains information about the following printers or multifunction printers (MFPs):

- T650n/dn/dtn
- T652n/dn/dtn
- T654n/dn/dtn
- X651 MFP
- X652 MFP
- X654 MFP
- X656 MFP
- X658 MFP

## Understanding letters after model numbers

Some Lexmark printers may have one or more letters after the model name to indicate printer features:

Acronym	Meaning
d	duplex <sup>1</sup>
de	duplex and e-Task (electronic task) touch-screen interface
dfe	duplex, finisher/stapler, and e-Task touch-screen interface
dhe	duplex, high-capacity drawer, and e-Task touch-screen interface
dhn	duplex, high-capacity drawer, and network
dme	duplex, mailbox, and e-Task touch-screen interface
dn	duplex and network
dnf	duplex, network, and finisher/stapler
dnw or dw	duplex, network, and wireless
dt	duplex and additional tray <sup>2</sup>
dte	duplex, additional tray, and e-Task touch-screen interface
dtn	duplex, additional tray, and network
dttn	duplex, tandem tray module, and network
dtwe	duplex, additional tray, wireless, and e-Task touch-screen interface
e	e-Task touch-screen interface

<sup>1</sup> Duplex printing (two-sided printing) accomplished by means of an optional duplex unit or an internal duplex unit based on the product.

<sup>2</sup> The additional tray is part of a drawer.

Acronym	Meaning
hdn	hard disk, duplex, and network
n	network
nl	network light model
ni	network and ImageQuick
tn	network and additional tray
<p><sup>1</sup> Duplex printing (two-sided printing) accomplished by means of an optional duplex unit or an internal duplex unit based on the product.</p> <p><sup>2</sup> The additional tray is part of a drawer.</p>	

# Learning about the printer

## Finding information about the printer

### Setup information

Description	Where to find
The <i>Setup</i> information gives you instructions for setting up the printer. Follow the set of instructions for local, network, or wireless, depending on what you need.	You can find the <i>Setup</i> information on the inside of the printer box or on the Lexmark Web site at <b>www.lexmark.com</b> .

### Help

Description	Where to find
The Help gives you instructions for using the software.	While in any Lexmark software program, click <b>Help, Tips → Help</b> , or <b>Help → Help Topics</b> .

### Customer support

# Printer Control Language (PCL) page formatting

For more information on PCL, refer to the *Printer Languages and Interfaces Technical Reference*. It contains a complete listing with descriptions of PCL commands.

To determine which PCL commands your printer supports, see “Appendix A: PCL support” on page 24.

## Printable areas

The printable areas and logical pages for PCL emulation (both portrait and landscape orientation) are illustrated below. See the legend that follows for definitions of areas **A** through **I**.

Legend:	
<b>A</b>	Portrait physical page width and landscape physical page length
<b>B</b>	Portrait physical page length and landscape physical page width
<b>C</b>	Portrait logical page width
<b>D</b>	Landscape logical page width
<b>E</b>	Distance between the side edge of the physical page and the logical page in portrait
<b>F</b>	Distance between the side edge of the physical page and the logical page in landscape
<b>G</b>	Distance between the top and bottom edge of the physical page and logical page
<b>H</b>	Distance between the left and right edge of the physical page and the printable area in portrait, or distance between the top and bottom edge of the physical page and printable area in landscape
<b>I</b>	Distance between the left and right edge of the logical page and the printable area

**Legend:**

<b>I</b>	Distance between the top and bottom edge of the physical page and the printable area in portrait, or distance between the left and right edge of the physical page and the printable area in landscape
----------	--

**Note:** The tables that follow in this chapter list the page sizes and dimensions of each area labeled on the preceding diagram for all paper and envelope sizes your printer supports.

## Supported paper and envelope dimensions

The following table lists the page sizes and print area dimensions for all supported paper and envelope sizes. For more information about the printable areas and logical pages for PCL emulation, see “Printable areas” on page 8.

<sup>1</sup> Pel dimensions are for 600 dpi.

<sup>2</sup> Page Size Parameters are explained in the Page Control table in the PCL chapter in the *Printer Language and Interfaces Technical Reference*.

<sup>3</sup> The width of the logical page for A4 paper can be changed from the printer control panel or your software application.

<sup>4</sup> For the Universal paper size, the area dimensions are listed in pel ranges.

<sup>5</sup> Paper ID 99 will be supported for backward compatibility with other Lexmark printers. Paper ID 99 has the same logical paper size as ID 100 (compatible with HP LaserJet 5Si/5SiMx) but is 8 pels wider than the Lexmark 4039.

**Note:** The explanation of the printable area assumes the Print Area menu item is set to Normal. For more information, see “Print Area Menu Item” in the PCL chapter in the *Printer Language and Interfaces Technical Reference*.

# Printer Job Language (PJL)

## PJL commands information

Your printer supports complete PJL commands, including certain commands that cause the printer to enter PCL emulation, PostScript emulation, and Personal Printer Data Stream (PPDS).

For a complete listing with descriptions of PJL commands, see the *Printer Languages and Interfaces Technical Reference*.

To determine which commands your printer supports, see “Appendix B: PJL support” on page 34.

# PostScript (PS) emulation

Your printer supports complete PostScript emulation supplemental operators. For full descriptions in detail for these operators, refer to the PostScript emulation chapter in the Printer Languages and Interfaces Technical Reference.

To determine which commands your printer supports, see “Appendix C: PostScript support” on page 77.

## PostScript paper tray support

When the printer receives one of the operators listed in “Tray selected with tray operators” on page 14, it performs the actions listed as follows. This paper tray selection process ends as soon as a suitable paper source is chosen and paper is fed from this tray.

- The printer checks the value of **manualfeed** in **statusdict** and the ManualFeed page device parameter. If either one is true, the printer sends a message to load the requested size in the manual feed tray or multipurpose feeder.
- The PageSize Policy is set to 0 by means of **setpagedevice**.
- The printer checks the paper size loaded in the current active source to determine if it matches the requested size. If the sizes match, the paper is fed from the active source.

**Note:** The current active tray is the last source that was selected from the printer control panel or by the printer language.

- If the requested size and the size loaded in the active source do not match, the sources are searched in the order defined by the Priority array in the InputAttributes dictionary in the pagedevice dictionary.
- If the requested media size is not found by the previous search, the following search order is used:
  - Tray 1
  - Tray 2
  - Tray 3
  - Multipurpose Feeder
  - Tray 4
  - Tray 5
- If the requested size cannot be located in any automatic source, a **configurationerror** is issued and the job is flushed.

For printers that support automatic duplexing:

- Automatic duplexing is not supported for custom-size paper or for envelopes in the multipurpose feeder. Automatic duplexing is supported from the multipurpose feeder for all other papers.
- If the paper source is changed before the back side of a duplexed page prints, a blank back page prints, the paper source changes, and the information for the back side of the page is printed on the front side of a page sent from the new paper source.

When these operators are used, it is equivalent to executing the following PostScript emulation sequence:

```
<< /PageSize [x y]/ImagingBBox null /Policies << /PageSize 0>> >>
```

setpagedevice

where *xy* are the PageSize in points.

## PostScript envelope size support

The literal names in “Envelope sizes supported” on page 15 are also supported as operators in **userdict**. These operators change the image size, but do not change the active paper source. Therefore, when these operators are used, part of the image may be clipped.

When these literal names are used as operators, it is equivalent to executing the following PostScript emulation sequence. The following example uses a 3.875 x 7.5 envelope.

```

# PostScript envelope tray support

If **manualfeed** in **statusdict** and the ManualFeed page device parameter are false when the printer receives one of the envelopetray operators listed in “Envelopetray operator selections” on page 16, then the printer:

- Sets the PageSize Policy to 0.
- Checks the active source to see if it matches the requested envelope size. If the sizes match, the envelope is fed from the active source.

**Note:** The active source is the last source selected from the printer control panel or data stream.

- If the requested size and the size loaded in the active source do not match, the sources are searched in the order defined by the Priority array in the InputAttributes dictionary in the pagedevice dictionary.
- If the requested media size is not found by the previous search, the following search order is used:
  - Envelope Feeder
  - Multipurpose Feeder
- If the requested size and type are not available from any automatic source, you are prompted to load the requested envelope size and type in the manual feed source.
- If the size is still not available, a **configurationerror** is issued and the print job is flushed.

If manualfeed or ManualFeed is true, the printer prompts you to load the requested size manually. If no manual feed exists on the printer, a **rangecheck** error message is generated

The envelope tray the printer selects when it receives an **envelopetray** operator is listed in “Envelopetray operator selections” on page 16. These operators are equivalent to executing the following PostScript emulation sequence:

```
<</PageSize [x y] /ImagingBBox null /Policies<</PageSize 0>> >>
setpagedevice
```

where **xy** are the PageSize in points.

# Printer specifications

This chapter lists printer specifications and information about hardware, environmental conditions, and power requirements.

## Airflow requirement

The room should meet ASHRAE 62—1989 standards.

## Noise emission levels

The following measurements were made in accordance with ISO 7779 and reported in conformance with ISO 9296.

Status	1-meter average sound pressure, dBA					
	T650n	T652n/dn	T654n/dn	X651 MFP, X652 MFP	X654 MFP, X656 MFP	X658 MFP

# Electrical specifications

Printer model	Electrical specification
T65x low voltage models*	100–127 V at 47–63 Hz, nominal 90–137 V, extreme
T65x high voltage models	220–240 V at 47–63 Hz, nominal (not available in all countries) 198–254 V, extreme
X65x MFP low voltage models	100–127 V at 50–60 Hz, nominal 90–137 V, extreme
X65x MFP high voltage models	220–240 V at 50–60 Hz, nominal (not available in all countries) 198–259 V, extreme

\* Using a 220–110 power converter with 110 V printer is not recommended.

**Warning—Potential Damage:** Lexmark recommends that you do not use voltage converters with printers.

## Power requirements

The following tables list the nominal average power requirements (including fuser power).

### Lexmark T65x nominal average power requirements

Printing states	T650n	T652n	T654n
<b>Average power while printing continuously</b>			
1-sided (simplex)	640 W	725 W	740 W
