Universal Installation Plate and Trim Ring included

Options

Multiple Input/Output possibilities

Connection of headphones via cable

Connection of headphones via Infrared

DOM 6500

8" Overhead Monitor with integrated DVD Player

Overhead Colour Monitor

Meant to be the perfect entertainment unit for the rear seat passengers, the DOM 6500 is mounted under the roof interior. The 8" display can be flapped down and swiveled both sides to match the best individual viewing angle.

Integrated DVD Player

DVD Video (region code 2), SVCD, but also Audio or MP3 CD as factory made or self recorded media can be played (Due to the huge number of recording media and software, it can not be guaranteed that all possible combinations can work on this set).

Input/output connections

For an optimum of connectivity the DOM 6500 disposes a large quantity of interfaces. Two AV inputs, one of them in the front of the device (e.g. easy access for video camera playback) and another at the central connection (e.g. for MI 2200) enable diverse applications beside the internal DVD Video source. A Stereo AV output provides signals for a 2nd monitor or the Audio system.

Headphones

While on the road the driver may not be distracted by the DOM 6500 playback, so it is important that the passenger's entertainment is discrete. Therefore you may connect headphones to the DOM 6500, both via cable and via IR connection.

16:9 Widescreen Format

Information and entertainment are presented to you on a 16:9 wide-screen format like you know it from the cinema.

Antiglare Coating

Even in an environment making it usually difficult to read out displays, the monitor of our DOM 6500 automotive antiglare screen lets you enjoy clear images.

On Screen Display

Screen settings are done using a simple On Screen Display. All DVD expert configurations can be performed through a multilingual menu.

Technical Data DOM 6500

- Size/Format: 8", 16:9
- Resolution: 480 x 234 pixels
- Max. brightness: 400 cd/m²
- Antiglare coating
- Automatic PAL/NTSC switch
- Automatic 50/60 Hz switch
- Auto power-on after fold-down
- Integrated drive compatible to DVD (region code 2), (S)VCD, JPEG, MP3, CD-A
- Operating voltage: 10.5V – 15.6V, negative ground
- Power consumption: typical 1.5A/(3A max.)
- Video in/output (AV1/2): 1Vpp
- Audio input (AV1/2): 2Vpp/20KOhm
- Video output: 1Vpp
- Audio output: 1.5V/10KOhm
- Req. headphone impedance: min. 32 Ohm
- Dimensions (W x D x H cm): 17 x 35 x 6
- Weight: ca. 2250 g

Package content

- 1 x DOM 6500/00
- 1 x Power cable (5 m)
- 1 x Mounting plate
- 1 x Set of screws
- 1 x Rubber trim ring
- 1 x Installation and operation manual (GB, F, D, NL, I, DK, E)
- 1 x Individual carton box (white with label)

Connections
