CE marking certifies that this appliance conforms to the following EEC directives:-

- Low Voltage Equipment                      72/23/EEC
- Electromagnetic Compatibility              89/336/EEC

## Retention of this Instruction Book

This Instruction Book must be kept handy for reference as it contains important details on the safe and proper use of the appliance.

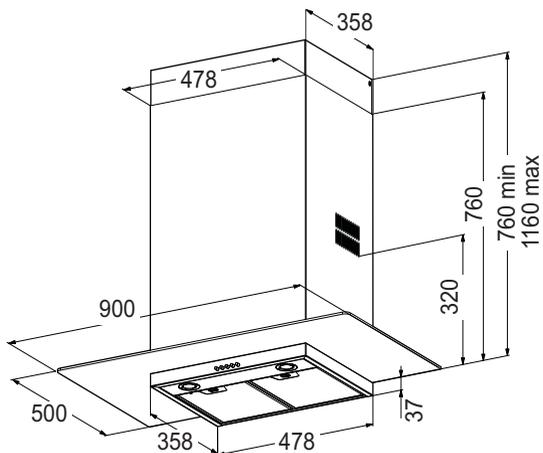

If you sell or pass the appliance to someone else, or move house and leave it behind, make sure this Book is also provided so the new owner can become familiar with the appliance and safety warnings.

If the Book is lost or damaged a copy may be obtained from:  
GDA LTD., Morley Way, Peterborough, PE2 9JB

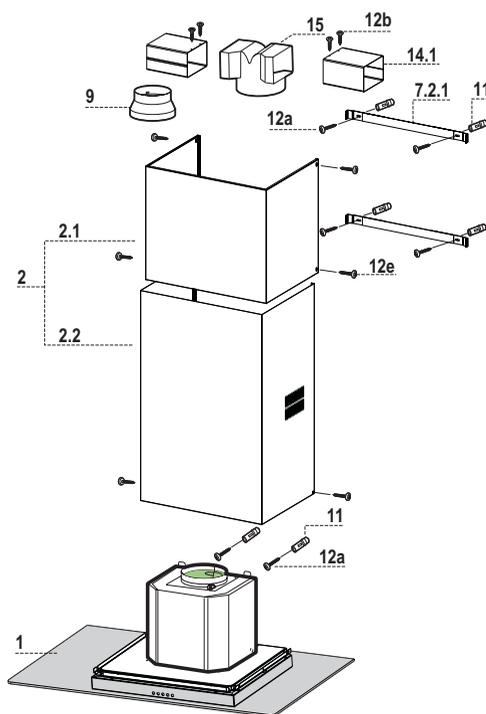

# INSTALLATION

## Dimensions

## Components

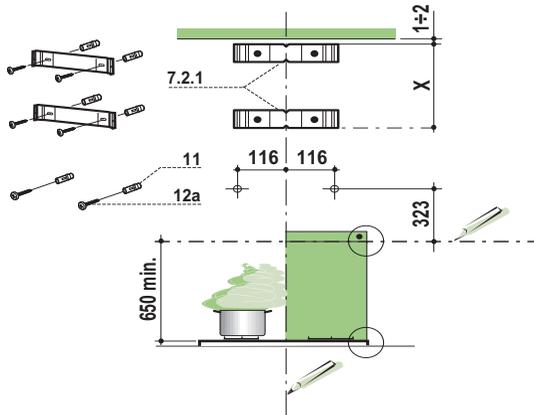

Ref.	Q.ty	Product Components
1	1	Hood Body, complete with: Controls, Light, Blower, Filters
2	1	Telescopic Chimney comprising:
2.1	1	Upper Section
2.2	1	Lower Section
9	1	Reducer Flange $\varnothing$ 150-120 mm
14.1	2	Air Outlet Connection Extension
15	1	Air Outlet Connection

Ref.	Q.ty	Installation Components
7.2.1	2	Upper Chimney Section Fixing Brackets
11	6	Wall Plugs
12a	6	Screws 4,2 x 44,4
12b	4	Screws 3,5
12e	6	Screws 2,9 x 9,5

Q.ty	Documentation
1	Instruction Manual

## Wall drilling and bracket fixing

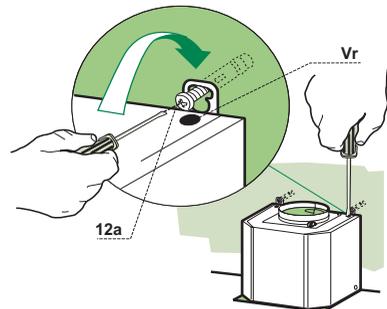

### Wall marking:

- Draw a vertical line on the supporting wall up to the ceiling, or as high as practical, at the centre of the area in which the hood will be installed.
- Draw a horizontal line at 650 mm above the hob.
- Place bracket **7.2.1** on the wall as shown about 1-2 mm from the ceiling or upper limit aligning the centre (notch) with the vertical reference line.
- Mark the wall at the centres of the holes in the bracket.
- Place bracket **7.2.1** on the wall as shown at X mm below the first bracket (X = height of the upper chimney section supplied), aligning the centre (notch) with the vertical line (see diagram above).
- Mark the wall at the centres of the holes in the bracket.
- Mark a reference point as indicated at 116 mm from the vertical reference line and 323 mm above the horizontal reference line.
- Repeat this operation on the other side.
- Drill  $\varnothing$  8 mm holes at all the centre points marked.
- Insert the wall plugs **11** in the holes.
- Fix the brackets using the **12a** screws (4,2 x 44,4) supplied.
- Insert the two screws **12a** (4,2 x 44,4) supplied in the hood body fixing holes, leaving a gap of 5-6 mm between the wall and the head of the screw.

## Mounting the hood body

- Before attaching the hood body, tighten the two screws **Vr** located on the hood body mounting points.
- Hook the hood body onto the screws **12a**
- Fully tighten support screws **12a**
- Adjust screws **Vr** to level the hood body.

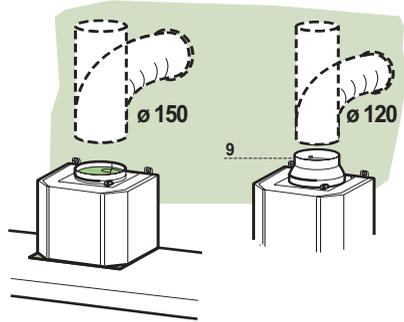

## Connections

### DUCTED VERSION AIR EXHAUST SYSTEM

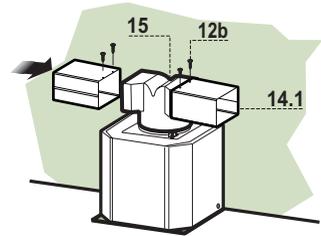

When installing the ducted version, connect the hood to the chimney using either a flexible or rigid pipe  $\varnothing$  150 or 120 mm, the choice of which is left to the installer.

- To install a  $\varnothing$  120 mm air exhaust connection, insert the reducer flange **9** on the hood body outlet.
- Fix the pipe in position using sufficient pipe clamps (not supplied).
- Remove any activated charcoal filters.

### RECIRCULATION VERSION AIR OUTLET

- Push the connection **15** onto the air outlet.
- Insert the connection extension pieces laterally **14.1** in connection **15**.
- Fix the connection extension **14.1** to the connection **15** using the 4 screws **12b** (3,5) supplied.
- Ensure that the activated charcoal filters have been inserted.

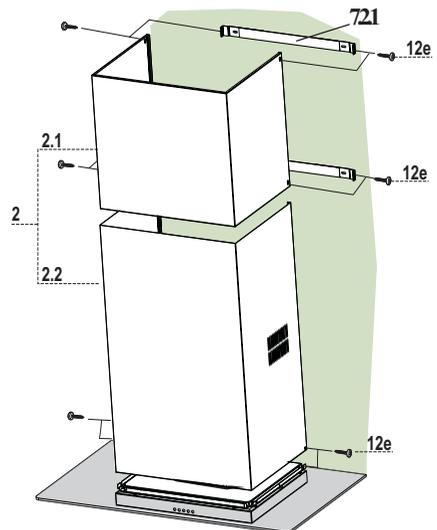

## Flue assembly

### Upper exhaust flue

- Slightly widen the two sides of the upper flue and hook them behind the brackets **7.2.1**, making sure that they are well seated.
- Secure the sides to the brackets using the 4 screws **12e** (2,9 x 9,5) supplied.

### Lower exhaust flue

- Slightly widen the two sides of the flue and hook them between the upper flue and the wall, making sure that they are well seated.
- Fix the lower part laterally to the hood body using the 2 screws **12e** (2,9 x 9,5) supplied.

## Electrical Connection

**WARNING: This appliance MUST be earthed. Connect to a 230 - 240V A.C. Supply only.**

- Connection to the electricity supply should be made via a properly earthed, readily accessible wall socket which is adjacent to and not more than 1.25m away from the appliance and capable of electrical isolation.

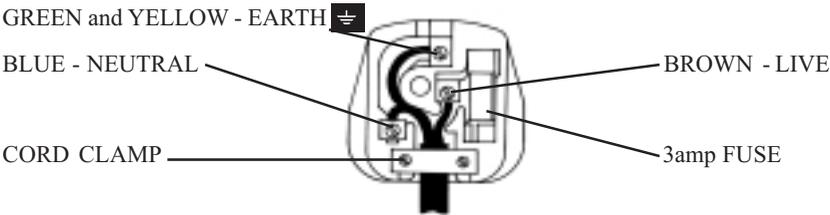

Should this plug not fit the socket outlet in your home it should be cut off and replaced with a suitable plug as outlined below.

**Note:** The removed plug cannot be used for any other appliance and should therefore be properly disposed of and not left where children might find it and plug it into a supply socket - with the obvious consequent danger.

### IF THE FITTED PLUG IS REMOVED

The flexible mains lead must be correctly connected as below, to a three pin plug of not less than 13 amp capacity. If a B.S.1363 fused plug is used, it must be fitted with a 3amp fuse which is approved to B.S.1362.

**IMPORTANT:** The wires in the mains lead fitted to this appliance are coloured in accordance with the following code:

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:- The wire which is green and yellow must be connected to the terminal in the plug which is marked with the letter E or by the earth symbol  or coloured green or green and yellow. The wire which is coloured blue must be connected to the terminal which is marked with the N or coloured black. The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red. When wiring the plug, ensure that all strands of wire are securely retained in each terminal. Do not forget to tighten the mains lead clamp on the plug. As the appliance must be earthed, **DO NOT use 2-pin socket outlets, if you are in doubt, consult a qualified electrician.**

Should the mains lead ever require replacement, it is essential that this operation be carried out by a qualified electrician and should only be replaced with a flexible cord of the same size ie. 0.75mm<sup>2</sup> cross sectional area and temperature rating of 85°C eg. heat resisting PVC.

### IF A MOULDED PLUG IS FITTED

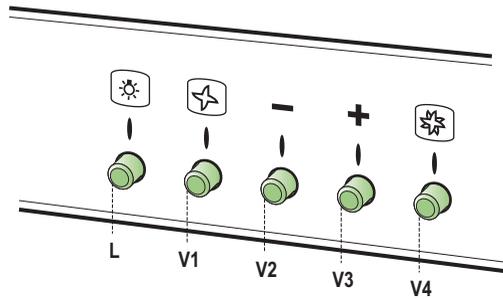

In the event of replacing a fuse in the plug supplied a 3amp ASTA approved fuse to B.S.1362 must be fitted.

**Note:** The fuse cover must be refitted when changing the fuse. In the event of losing the fuse cover the plug must not be used until a replacement fuse cover has been obtained and fitted. A new fuse cover can be obtained from your local Electrical Retailer. The colour of the correct replacement fuse cover is that of the coloured marks or inserts in the base of the plug.

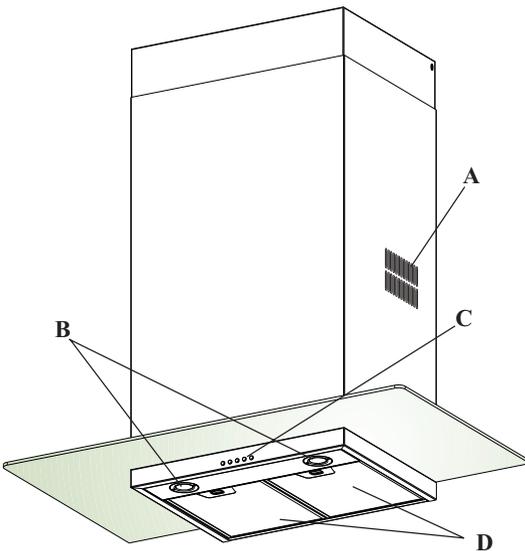

# GETTING TO KNOW YOUR COOKER HOOD

**WARNING:** Children should not be allowed to play with the appliance or tamper with the controls.

## The Controls

<b>L</b>	Light	Switches the lighting system on and off.
<b>V1</b>	Motor	Switches the extractor motor on and off at low speed. Used to provide a continuous and silent air change in the presence of light cooking vapours.
<b>V2</b>	Speed	Reduces the operating speed.
<b>V3</b>	Speed	Increases the operating speed.
<b>V4</b>	Intensive speed	Maximum speed, used for eliminating the highest cooking vapour emission. Switches off automatically after 10 minutes operation. Can also be switched off manually by pressing the button.

- A** Air Outlet
- B** Lights (Halogen)
- C** Controls
- D** Grease Filters

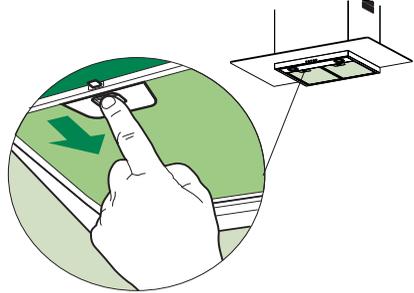

# CARE AND CLEANING

Before cleaning your cooker hood or carry out any maintenance, switch off and remove the plug from the socket to disconnect it from the electricity supply.

## GREASE FILTERS: CLEANING METAL SELF-SUPPORTING GREASE FILTERS

The filters must be cleaned every 2 months of operation, or more frequently with heavy usage, and can be washed in a dishwasher.

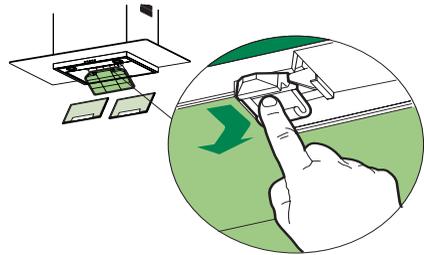

- Remove the filters one at a time by pushing them towards the back and pulling down at the same time.
- Wash the filters, taking care not to bend them. Allow them to dry before refitting.
- When refitting the filters, make sure that the handle is visible on the outside.

## CHARCOAL FILTER: REPLACING THE ACTIVATED CHARCOAL FILTER

This filter is not washable and must be replaced after every 4 months of operation, or more frequently with heavy usage.

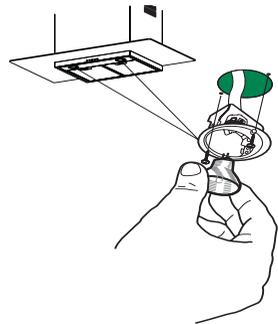

- Remove the metal grease filters.
- Remove the saturated activated carbon filter by releasing the fixing hooks.
- Dispose of the carbon filter.
- Fit the new filter by hooking it into its housing
- Replace the metal grease filters.

## LIGHT REPLACEMENT

### 20W halogen bulb.

- Remove the two screws fixing the lighting support, and pull it out of from the Hood.
- Remove the bulb from the support.
- Replace with another of the same type, making sure that the two pins are properly inserted in the bulb holder socket holes.
- Replace the support, fixing it in place with the two screws removed as above.

## CLEANING

- Clean with a sponge soaked in warm water and a sodium bicarbonate solution, which is among other things a good disinfectant. If you do not have any, you can use a neutral soap.
- DO NOT use abrasive detergents, bleach or detergents using ammonia. NEVER use solvent based products.

Failure to carry out the basic standards of cleaning and replacement of the filters could cause a fire risk. Therefore you must observe these instructions.

## After Sales Service

**"No company is better positioned to offer an after sales service on a Hotpoint appliance than us - the manufacturer"**

As part of our commitment to you, all Hotpoint appliances have the added benefit of a fully inclusive parts and labour guarantee for the first 12 months. In addition to this you also have the advantage of **free replacement parts for the first 5 years** when fitted by a Hotpoint engineer. When the 12 months parts and labour guarantee expires we offer the following after sales service options:

### Repair Service and Information Help Desk

UK: 08709 066066

[www.theservicecentre.co.uk](http://www.theservicecentre.co.uk)

Republic of Ireland: 1850 302 200

Note: Our operators will require the Model number and the Serial number of your appliance

Available 364 days a year with a fast, effective and value for money service. We have the largest white goods repair service in the UK with over 1200 of our own fully trained engineers. All repairs include a parts and labour guarantee for 12 months from the date of the repair. If you require any information or have any questions about your appliance, our operators are on hand with help and advice.

All this ensures that you will receive the best available after sales service possible.

### Extended Warranties

UK: 08709 088 088

[www.theservicecentre.co.uk](http://www.theservicecentre.co.uk)

Republic of Ireland: 1850 502 200

Whether you have just one or a number of Hotpoint appliances in your kitchen, we offer two service cover plans to give you total peace of mind.

- 1 Repair Protection Plan - FREE service repairs for a single Hotpoint appliance during the period of cover.
- 1 Kitchen Cover - FREE service repairs for all your Hotpoint appliances less than 8 years old.

### Genuine Parts and Accessories

UK: 08709 077 077

[www.theservicecentre.co.uk](http://www.theservicecentre.co.uk)

Republic of Ireland: (01) 842 6836

A wide range of genuine parts and accessories are available from our hotline or through our website.

**Genuine parts and accessories, extended warranties and service repairs are all available on our web-site at:**

[www.theservicecentre.co.uk](http://www.theservicecentre.co.uk)

## Guarantee

### "Satisfaction guaranteed or your money back"

We give you a unique 'satisfaction guaranteed' promise - **valid for 90 days** - after you have purchased your Hotpoint appliance. If there is a technical problem simply call Hotpoint Repair service or visit our web-site at [www.theservicecentre.co.uk](http://www.theservicecentre.co.uk) and where necessary, we will arrange for an engineer to call. If the technical problem is not resolved under this guarantee, **we will replace your machine or, if you prefer, give you your money back.**

All Hotpoint appliances carry a fully inclusive 12 month parts and labour guarantee as well as free replacement parts for the first 5 years (except microwaves, selected integrated appliances and cooker hoods, which have a one year guarantee) provided that they are fitted by a Hotpoint engineer.

#### Guarantee terms and conditions

Your guarantee is only applicable in the United Kingdom or Republic of Ireland and is subject to the following provisions that your appliance:

- 1 Has been installed and used correctly in accordance with this instruction booklet.
- 1 Has been used solely for domestic purposes and is located on domestic premises (ie. not for commercial or trade use).
- 1 Has been properly connected to a suitable electrical supply voltage as stated on the appliance rating plate.
- 1 Has not been subject to misuse, accident, modified or repaired by anyone other than one of our own service engineers.

For pre purchase information on any other Hotpoint product call: 08701 50 60 70  
or visit: [www.hotpoint.co.uk](http://www.hotpoint.co.uk)

#### Recycling & Disposal Information

As part of Hotpoint's continued commitment to helping the environment, Hotpoint reserves the right to use quality recycled components to keep down customer costs and minimise material wastage.

Please dispose of packaging and old appliances carefully.

To minimise risk of injury to children, remove the plug and cut mains cable off flush with the appliance. Dispose of these parts separately to ensure that the appliance can no longer be plugged into a mains socket.

## Key Contacts

### After Sales Service

Over 1200 trained specialists, directly employed by us, ensure that you can have complete confidence in both the appliances and services we offer.
