The HyperDrive is a USB flash drive designed to take the hassle out of data access and transfer.   A plug & play device that simply plugs into any USB port – PC, laptop, projector - if it has a USB port the machine will automatically detect the HyperDrive as a removable drive. Now you can read, write, copy and move data from your hard disk to the HyperDrive or from the HyperDrive to your hard disk.

All Hyperdrives also come with free sanitisation software - when you choose to delete data, this software ensures all traces of it are removed from the drive instead of leaving a restorable residue.

Features

- Supplied in retail packaging with USB extension cable, neck strap, and driver CD.
- Available with customer branding if required, please ask for further information
- Password protection and encryption functionality
- LED indicator - shows when the HyperDrive is in use
- Hot Plug & Play - enables you to install/uninstall the HyperDrive at any time.
- Cross platform compatibility – move data between different operating systems
- USB2.0 (USB 1.1 backwards compatible)
- Available in storage capacities of 512MB up to 32GB
- OS support for Windows 2000/XP/Vista
- 3 year warranty
