Warranty Information

This product is backed by a two-year warranty. In addition StarTech.com warrants its products against defects in materials and workmanship for the periods noted below, following the initial date of purchase. During this period, the products may be returned for repair, or replacement with equivalent products at our discretion. The warranty covers parts and labor costs only. StarTech.com does not warrant its products from defects or damages arising from misuse, abuse, alteration, or normal wear and tear.

Limitation of Liability

In no event shall the liability to StarTech.com Ltd. (or its officers, directors, employees or agents) for any damages (whether direct or indirect, special, punitive incidental, consequential, or otherwise), loss of profits, loss of business, or any pecuniary loss, arising out of related to the use of the product exceed the actual price paid for the product.

Some states do not allow the exclusion or limitation of incidental or consequential damages. If such laws apply, the limitations or exclusions contained in this statement may not apply to you.

Product Specifications

Dimensions	5.9 x 3.35 x 5.87 in. (150 x 85 x 149mm)
Output Power	400W
Hold-Up Type	< 16 ms @ full load
Fan Type	Sleeve bearing
Connectors	6 x 4-pin-LP4-female 2 x small-internal-power 1 x 20-pin-ATX-motherboard-adapter 1 x 4-pin extended ATX power 12V plug and Aux plug for Pentium 4
MTBF	100,000 Hours @ 25°C
Safety Approvals	TUV, UL, CSA, CE, FCC, CB
AC INPUT	Voltage 115V~ Current 8A Voltage 230V~ Current 4A Frequency 50~60Hz
DC OUTPUT	+3.3V(30A) +5V(40A) +12V(18A) -5V(1A) -12V(1A) +5V Standby (2.5A)

Introduction

Thank you for buying a StarTech.com 400-Watt replacement power supply. The ATXPOWER400 is guaranteed compatible with Intel and AMD processors and designed for an extra long-life in personal and industrial computers. This power supply ensures stable system performance and uses an automatic temperature control fan to maintain an optimal operating environment for heat-sensitive components.

Features

- Automatically detects temperature and adjusts fan speed to maintain optimal performance
- Provides extra power capacity for PC servers with several hard drives
- Provides the extra current required by 1 GHz and faster CPUs
- Provides extra power required by leading edge 3D video accelerator cards
- Provides extra current and power capacity for overclocking CPUs
- Uses superior EMI/RFI power filtration system to ensure system components receive clean, stable power
- Backed by StarTech.com's two-year warranty

WARNING! Computer parts can be severely damaged by static electricity. Be sure that you are properly grounded before opening your computer case. StarTech.com recommends that you wear an anti-static strap when installing any computer component. If an anti-static strap is unavailable, discharge yourself of any static electricity build-up by touching a large grounded metal surface (such as the computer case) for several seconds. Also make sure that your computer is turned off and unplugged before attempting to open your computer case.

Contents

This package should contain:

- 1 x ATXPOWER400 power supply
- 1 x power cord

Installation

Check the red power supply voltage switch before installation. It should be the same as your local power voltage (115V for North America and 230V for most of the European countries). Change the voltage setting if necessary.

1. Make sure that your system is turned off and unplugged. Disconnect the power cord from your old power supply.
2. Open the case (consult your computer's user guide for details, if necessary).

NOTE: Before completing the next step, you may want to take note of what devices are attached to your current power supply so you know which devices need to be connected to the new power supply and where their connectors are located.

3. Disconnect all power connectors from the motherboard and the peripheral devices such as hard drives, floppy disks, etc. Make sure that there are no devices connected to your existing power supply.
4. Remove the existing power supply from your computer case and replace it with the new StarTech.com power supply.
5. Connect the power connectors to your motherboard and peripheral devices.
6. Close your computer case.
7. Connect the power cord to the StarTech.com power supply.
