- **Number of safety goggles:** 2

HB585

Product highlights

24 Cleo Performance S tubes

Cleo Performance S tubes ensure an optimal and even tanning result in a short amount of time.

PowerTan face tanner

The PowerTan face tanner comes with a 400W HPA lamp for great facial tanning.

Optimised side tanning

Optimised side tanning is achieved thanks to the Sunbeds' curved design. This means the UV rays are able to reach your entire body, including the sides.

Stereo Active sound module

With the Stereo Active speakers you can connect any CD or MP3 player, via an universal connection cable. Enjoying your own favourite music while tanning makes your tanning session even more enjoyable and relaxing.

Ambient Scent

Ambient Scent to create a natural experience. The 3 fragrances 'Green Oasis', 'Summer Blue' and 'Orange Valley' enrich your tanning session.

Integrated body cooling with power control

Integrated body cooling, with 2 adjustable fans integrated in the side panel, keeps your body cool during the tanning session. The body-cooling unit can be switched on and off according to your own personal preference.

Automatic shut-off with double safety function

The Sunbed automatically shuts off after 30 minutes to prevent you from tanning too long (e.g. when you fall asleep while tanning). The double safety function ensures that the Sunbed also shuts down if the timer fails.

2 pairs of eye-protecting goggles

Two pairs of goggles are included, to protect your eyes from the UV light.

Digital User Interface

The Digital User Interface enables you to easily control the settings of the timer, bodycooler and facial unit. You can adjust the settings to your personal preference before and during your tanning session.
