- Photo-quality output; up to 20 ppm black/13 ppm color
- Fax in color with Super G3 speeds
- Print photos directly from Digital Camera Memory Cards
- Borderless Printing and Copying

Be Organized, Productive and Creative

Canon's MultiPASS F80 multifunction peripheral (MFP) is a full-featured printer, copier, fax and scanner in one compact machine. Each feature, whether operating in color or black and white, provides the versatility to make an impressive visual impact – no matter what your company's imaging requirements are today or in the future. The MultiPASS F80 features the exclusive Canon Think Tank System™. This intelligent ink-management system features four separate ink tanks – one for each color. When one color runs out, you replace just one tank rather than the entire cartridge, reducing your supply costs. Also, a unique low-ink sensor alerts you so you can drop in a new tank before running out of ink in the middle of a print job. This machine provides the solutions to enable your small business to be more organized, productive and creative.

High-quality, high-performance for the small office

The MulitPASS F80 does it all. It delivers high-quality legal and letter-size copies at speeds of up to 20 copies per minute (cpm) in black and white and 13 cpm in color. It also scans documents and photos at 9600 dpi in brilliant 36-bit color. But it's more than a copier and scanner; it also offers exceptional quality printing. Also included is a built-in color fax with Canon's Super G3 high-speed facsimile technology and 30-page Automatic Document Feeder.

Photo-quality printing

The MultiPASS F80 utilizes advanced technology Exif Print compatibility built in for smart processing of digital camera images and comes with Easy-PhotoPrint software to make it easy to print digital photos with a level of accuracy never before possible. It allows you to print directly from digital camera memory cards and produce photo quality borderless 4" x 6" or 8.5" x 11" output without a PC. In addition, Canon's advanced MicroFine Droplet Technology™ helps put truly remarkable photo-quality color printing to work for you with up to 2400 x 1200 dpi resolution. With its ultra-fine, 5-picoliter droplets, it refines color, precision and detail for magnificent photo printing even on plain paper. Whether you're printing 4" x 6" borderless photos or making color presentations, you can count on quality output every time.
