\*PPM print speeds are based on the highest speed printer driver mode using black and white and color text patterns. Photo print speeds are based on the default driver setting using photo test pattern(s) and Canon Photo Paper Plus Glossy paper. Print speed measured as soon as first page begins to feed into printer and will vary depending on system configuration, interface, software, document complexity, print mode, types of paper used and page coverage. See [www.usa.canon.com/printspeed](http://www.usa.canon.com/printspeed). CPM copy speeds are based on fast mode setting using plain paper. Copy speeds may vary based on document complexity, copy mode, page coverage and number of copies.

\*\*Resolution may vary based on printer driver settings. Color ink droplets can be placed with a horizontal pitch of 1/4800 inch at a minimum.
