

# Jeep® WRANGLER

**SUPER 6 VOLT**

Product features may vary from the picture above.

**Please read this manual and save it with your original sales receipt.**

Tools needed for assembly: Phillips Screwdriver, Slotted Screwdriver, and Hammer.

Use only with a Power Wheels® 6 Volt Rechargeable Battery with A-Style Connector and Built-in Thermal Fuse and a Power Wheels® Super 6 Volt Charger (both included).

Jeep and the Jeep grille design are registered trademarks of DaimlerChrysler Corporation and are used under license.

## A

## Important Information

- Your new vehicle requires adult assembly. Please set aside at least 60 minutes for assembly.
- You must charge your battery for 18 - 30 hours **before you use your vehicle for the first time**. We recommend that you start charging your battery before beginning assembly. Please see Battery Charging beginning on page 8 for detailed instructions.
- Read this manual carefully for important safety information and operating instructions before using your vehicle. Keep this manual for future reference as it contains important information.
- This vehicle is designed for use on: grass, asphalt and other hard surfaces; on generally level terrain; and by children 2-6 years of age.
- Make sure children know and follow these rules for safe driving and riding:
  - always sit on the seat.
  - always wear shoes.
  - only 1 (one) rider at a time.
- Use this vehicle **ONLY** outdoors. Most interior flooring can be damaged by riding this vehicle indoors. Fisher-Price® will not be responsible for damage to the floor if the vehicle is used indoors.
- To prevent damaging the motors and gears, teach your child to stop the vehicle before switching direction. Do not tow anything behind the vehicle or overload it. Do not exceed the maximum weight capacity of 65 lbs (29.5 kg).
- If you have any questions about your Power Wheels® vehicle, please call our toll-free service lines at **1-800-348-0751** from 8 AM to 6 PM (EST) Monday through Friday. Trained customer service representatives are available to take your call in English or French. Habla Español? Si usted tiene alguna pregunta ó necesita asistencia llame gratis **1-800-348-0755** para los Estados Unidos. Tenemos representantes que hablan español para atender su llamada.
- For your convenience, Power Wheels® maintains an **independently owned and operated** Authorized Service Center Network with more than 400 authorized service centers nationwide. The authorized service centers will repair or replace parts under warranty at no extra charge, and can perform non-warranty repairs for a minimal charge. Please see the Authorized Service Center list beginning on page 27 to find the authorized service center nearest you, or call **1-800-348-0751**.
- Please complete and return the enclosed Registration Card today, or call **1-800-348-0751** to register your vehicle by phone, or register on-line at [www.powerwheels.com](http://www.powerwheels.com).

# B

## Warnings and Cautions

### ELECTRICAL HAZARD

#### **WARNING**

- Battery can fall out and injure a child if vehicle tips over. Always use battery clamp.
- **PREVENT FIRE**
  - Never modify the electrical system. Alterations could cause a fire resulting in serious injury and could also ruin the electrical system.
  - Use of the wrong type battery or charger could cause a fire or explosion resulting in serious injury.
  - Use of Power Wheels® components in products other than Power Wheels® vehicles could cause overheating, fire or explosion.
- The battery must be handled by adults only. The battery is heavy and contains sulfuric acid (electrolyte). Dropping the battery could result in serious injury.
- Never allow children to charge the battery. Battery charging must be done by adults only. A child could be injured by the electricity involved in charging the battery.
- Never lift or carry the battery by the wires or connector. This can damage the battery and possibly cause a fire resulting in serious injury. Lift and carry the battery by the case only.
- Read the safety instructions on the battery.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage or excessive wear is detected, do not use the charger or the battery until you have replaced the worn or damaged part.
- **HOT** motors. Handle carefully.

### RIDING HAZARD

#### **WARNING**

- **Prevent Injuries and Deaths**
  - Direct Adult Supervision Required
  - Keep Children Within Safe Riding Areas.  
These areas must be:
    - away from swimming pools and other bodies of water to prevent drownings
    - generally level to prevent tipovers
    - away from steps, driveways, cars, roads and alleys.

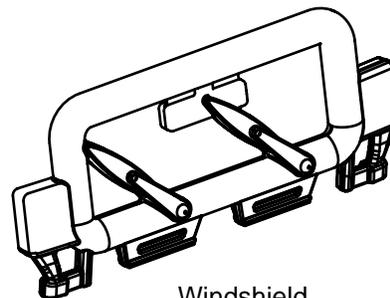

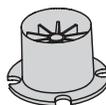

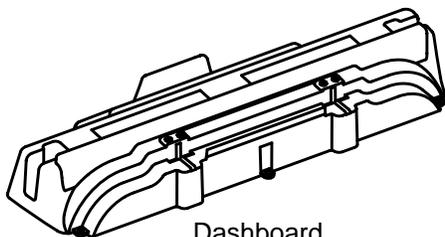

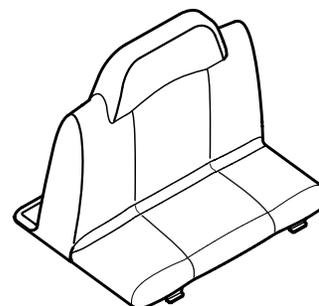

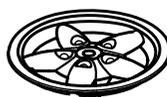

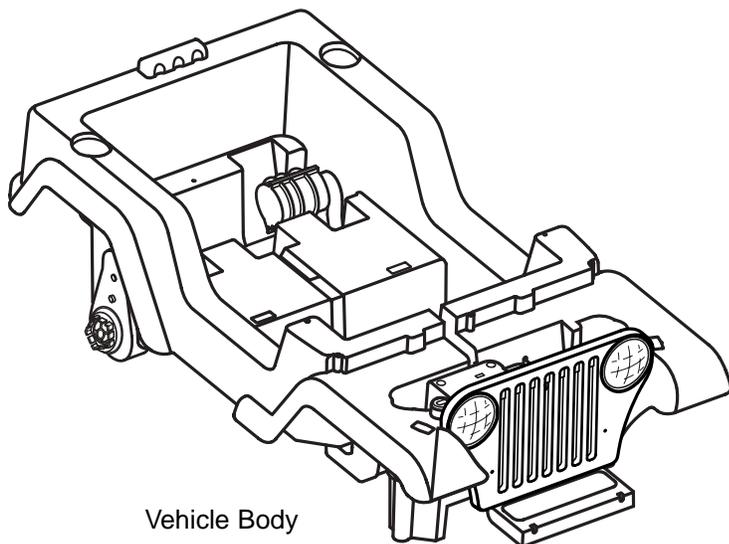

#### **CAUTION**

- In the unassembled state, this package contains small parts. Adult assembly is required.
- Use the charger in dry locations only.

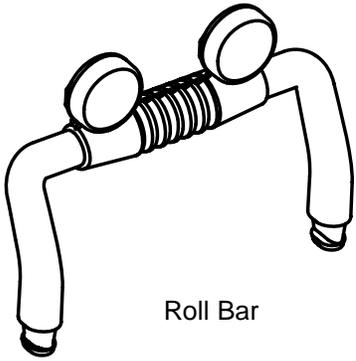

# C

## Parts

- If you experience a problem with this product, or are missing a part, please call us at **1-800-348-0751**, rather than return this product to the store.
- Please identify all parts before assembly and save all packaging material until assembly is complete to ensure that no parts are discarded.
- Metal parts have been coated with a lubricant to protect them during shipment. Wipe all metal parts with a paper towel to remove any excess lubricant.

## ELECTRICAL HAZARD

 **WARNING**

- Battery can fall out and injure a child if vehicle tips over. Always use battery clamp.
- **PREVENT FIRE**
  - Never modify the electrical system. Alterations could cause a fire resulting in serious injury and could also ruin the electrical system.
  - Use of the wrong type battery or charger could cause a fire or explosion resulting in serious injury.
  - Use of Power Wheels® components in products other than Power Wheels® vehicles could cause overheating, fire or explosion.
- The battery must be handled by adults only. The battery is heavy and contains sulfuric acid (electrolyte). Dropping the battery could result in serious injury.
- Never allow children to charge the battery. Battery charging must be done by adults only. A child could be injured by the electricity involved in charging the battery.
- Never lift or carry the battery by the wires or connector. This can damage the battery and possibly cause a fire resulting in serious injury. Lift and carry the battery by the case only.
- Read the safety instructions on the battery.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage or excessive wear is detected, do not use the charger or the battery until you have replaced the worn or damaged part.

**CAUTION**

Use the charger in dry locations only.

**About Thermal Fuses**

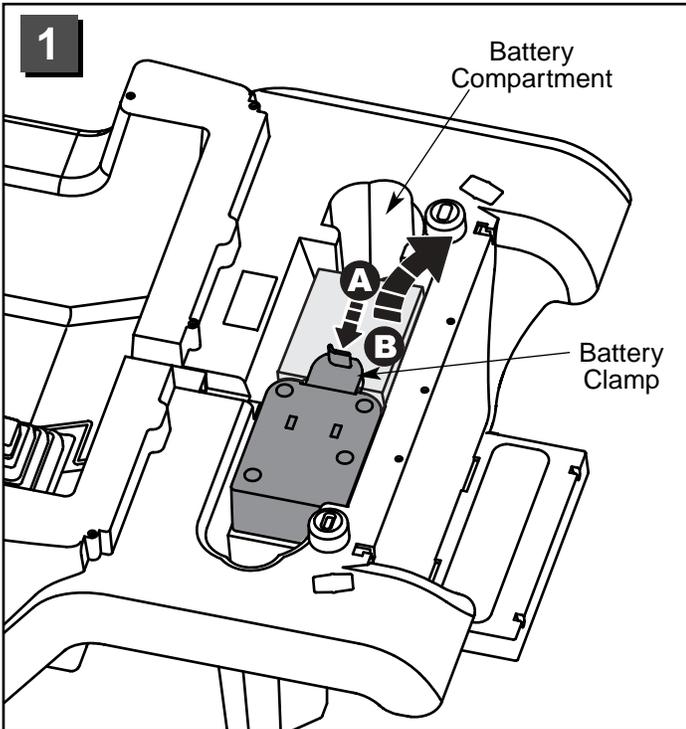

Your Power Wheels® 6 volt battery with A-style connector is equipped with a built-in thermal fuse. The thermal fuse is a self-resetting safety device which automatically “trips” and shuts down operation of the vehicle if the vehicle is overloaded or the driving conditions too severe. Once a fuse has “tripped”, it will automatically reset itself after approximately 25 seconds and allow the vehicle to resume normal operations. To avoid repeated automatic shut-downs, do not overload the vehicle by exceeding the 65 lbs (29.5 kg.) maximum weight capacity or by towing anything behind the vehicle. Avoid severe driving conditions, such as driving up slopes or running into fixed objects, which can cause the wheels to stop spinning while power is still being supplied to the motors. Make sure your child stops the vehicle before switching speeds or direction.

If a thermal fuse in a battery continually trips under normal driving conditions, please contact your local Power Wheels® Authorized Service Center. For the location of the Authorized Service Center nearest to you, see page 27, or register on-line at [www.powerwheels.com](http://www.powerwheels.com).

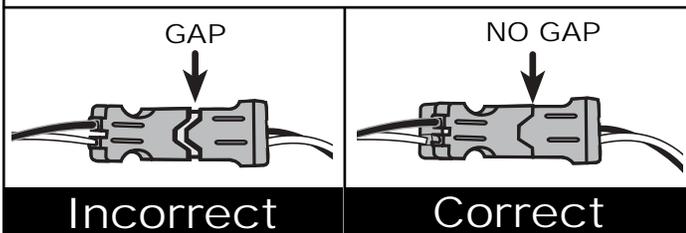

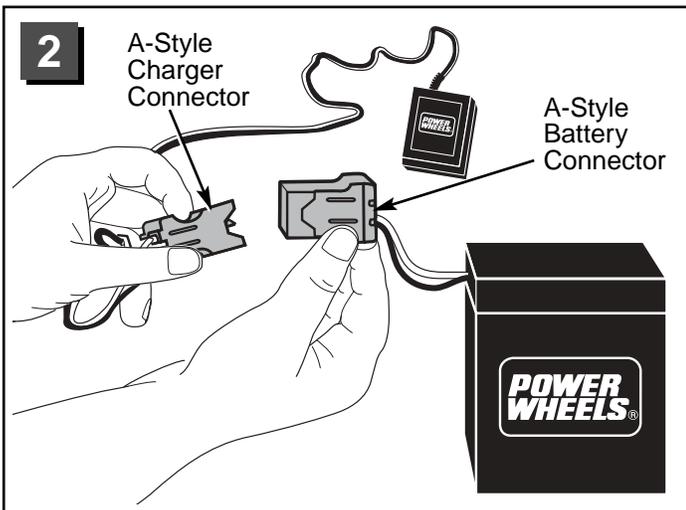

**Important Notes**

- **Your new battery must be charged for at least 18 hours before you use it in your vehicle for the first time.**
- We recommend that you start charging your battery before beginning assembly of your new vehicle.
- The battery must be upright while charging.
- The charger is not a toy.
- Do not short circuit the battery.
- You do not need to remove the battery from your vehicle to recharge it.
- Before charging the battery, examine the battery case for cracks and other damage which may cause sulfuric acid (electrolyte) to leak during the charging process. If damage is detected, do not charge the battery or use it in your vehicle. Battery acid is very corrosive and can cause severe damage to surfaces it contacts.
- Do not charge the battery on a surface (such as kitchen counter tops) which could be damaged by the acid contained inside the battery. Take precautions to protect the surface on which you charge your battery.
- Use only a Power Wheels® Super 6™ volt charger with an A-style connector (120 VAC, 60 Hz, 15W with an output of 6 VDC, 7.2W) to charge your Power Wheels® 6 volt battery.
- If your battery is old and will not accept a charge, do not leave it in the vehicle. Always remove a dead battery from the vehicle.

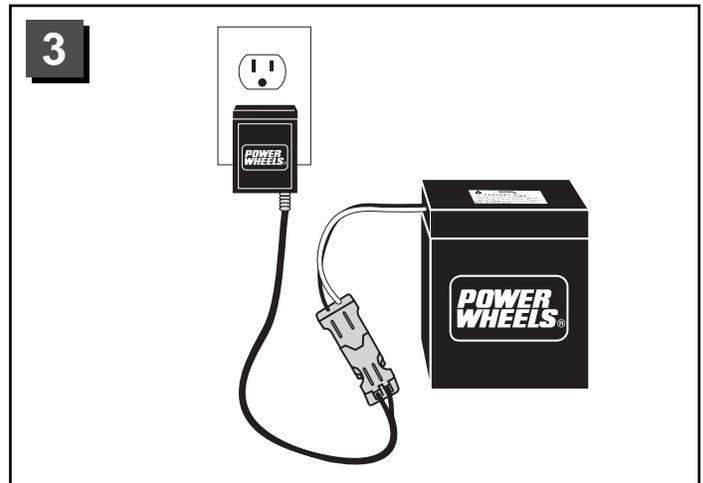

# Battery Charging

- Locate the battery compartment in the front end of the vehicle body.
- Slide the battery clamp open **A**.
- While holding the battery clamp open, remove the battery from the battery compartment **B**.
- Release the battery clamp.

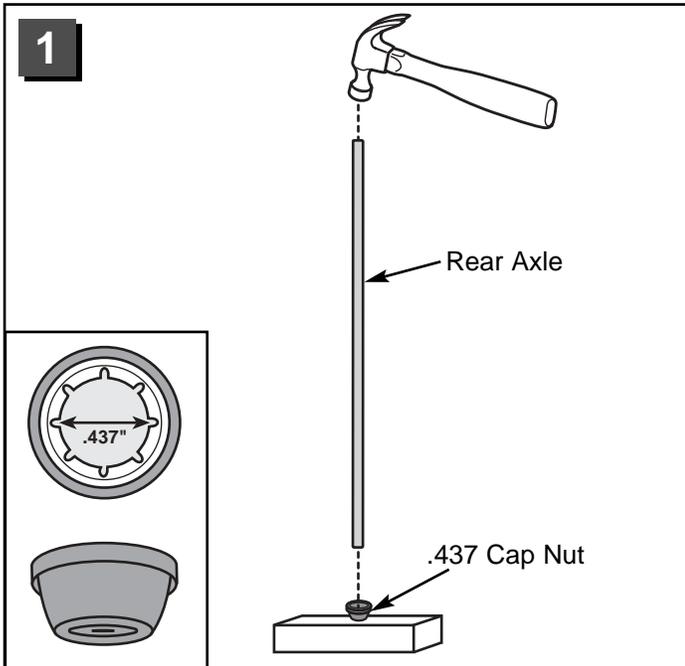

- Plug the battery connector and charger connector together. Push firmly to make sure the two connectors are completely joined.

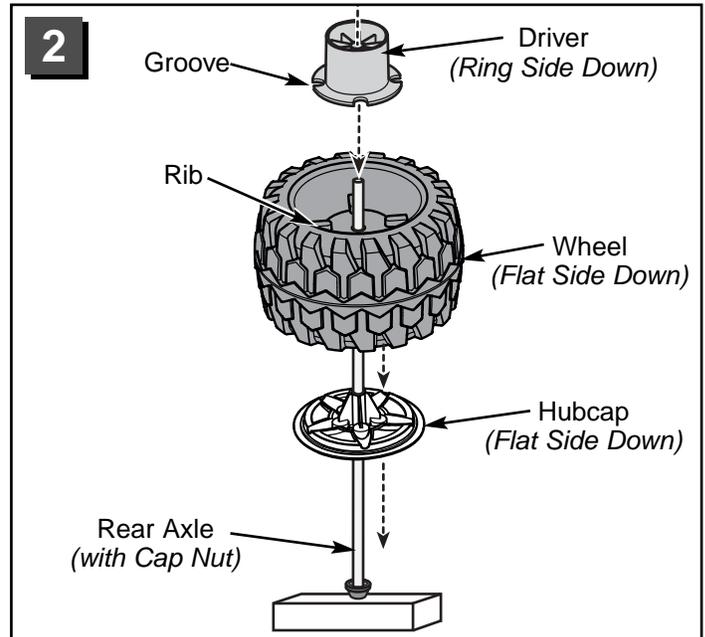

- Plug the charger into a standard 120 volt wall outlet.
- Note:** If power flow to the wall outlet is controlled by a switch, make sure the switch is "ON".
- **Before first time use, charge the battery for at least 18 hours.** Never charge the batteries longer than 30 hours.
- **Recharge the battery for at least 14 hours** after each use of your vehicle. Do not charge a battery longer than 30 hours.
- Once the battery is charged, disconnect the charger connector from the battery connector. Unplug the charger from the wall outlet. The battery is now charged and is ready to be installed in your vehicle.

### ! WARNING

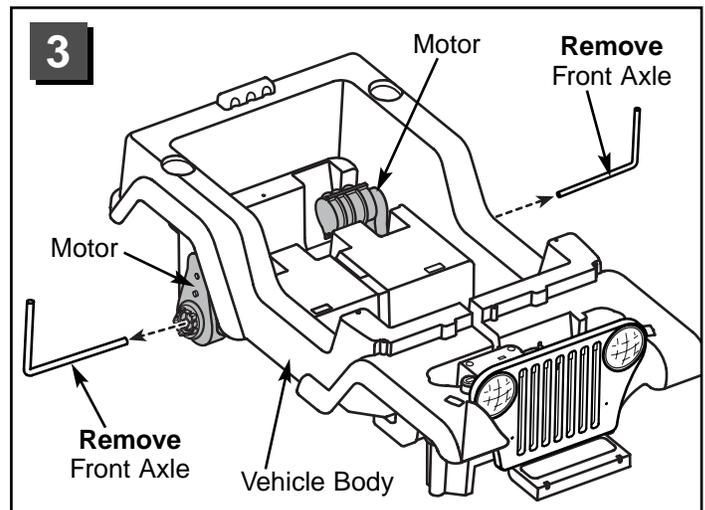

Children can be harmed by small parts, sharp edges and sharp points in the vehicle's unassembled state, or by electrical items. Care should be taken in unpacking and assembly of the vehicle. Children should not handle parts, including the battery, or help in assembly of the vehicle.

- Place a .437 cap nut on a flat surface, inside up, as shown.
- Hint:** You may want to place a scrap block of wood underneath the cap nut to protect the assembly surface.
- Fit the rear axle into the cap nut.
- Tap the opposite end of the rear axle with a hammer to secure the cap nut in the rear axle. Pull on the cap nut to be sure it is secure.

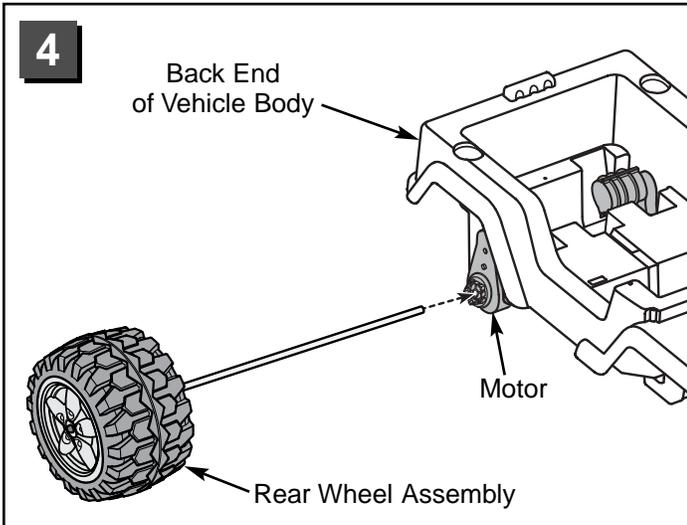

- Slide a hubcap (flat side down), a wheel (flat side down) and a driver (ring side down) on the rear axle.
- Make sure the ribs on the wheel fit into the grooves in the driver.

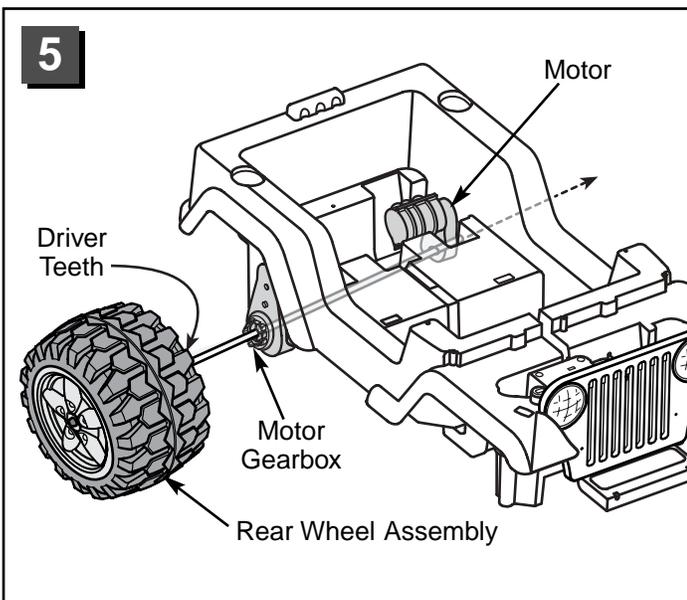

- **Carefully remove** the front axles from the motors in the vehicle body.
- Hint:** Keep the motors in place in the vehicle body for the next assembly step.

# Assembly

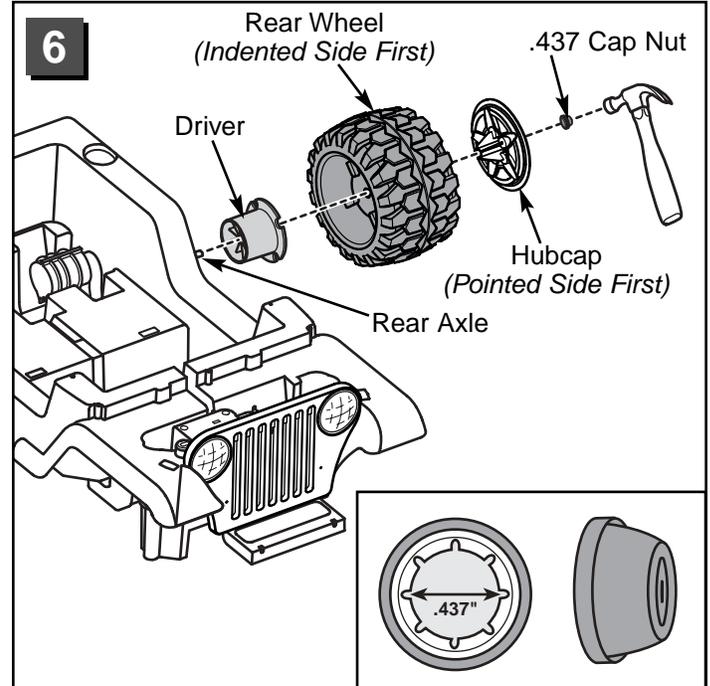

- Slide the rear wheel assembly through a motor and the back end of the vehicle body.

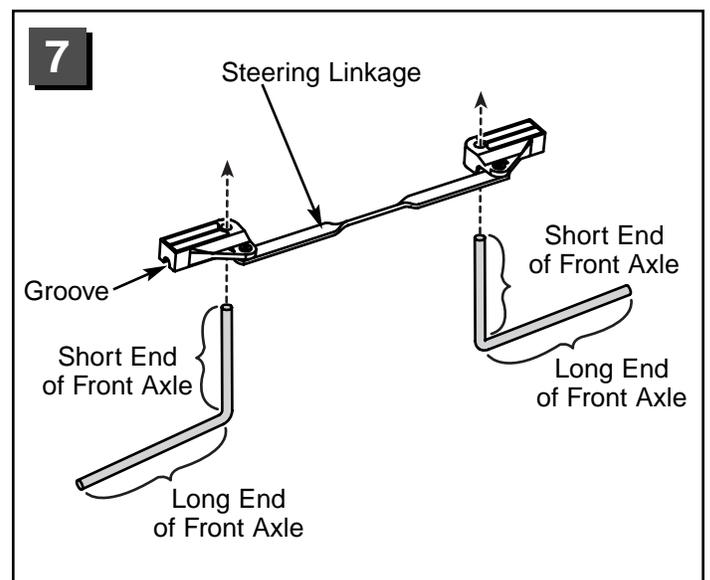

- Continue to slide the rear wheel assembly through the back end of the vehicle body, and out through the other motor.

**Note:** Make sure the teeth in the driver fit into the motor gearbox.

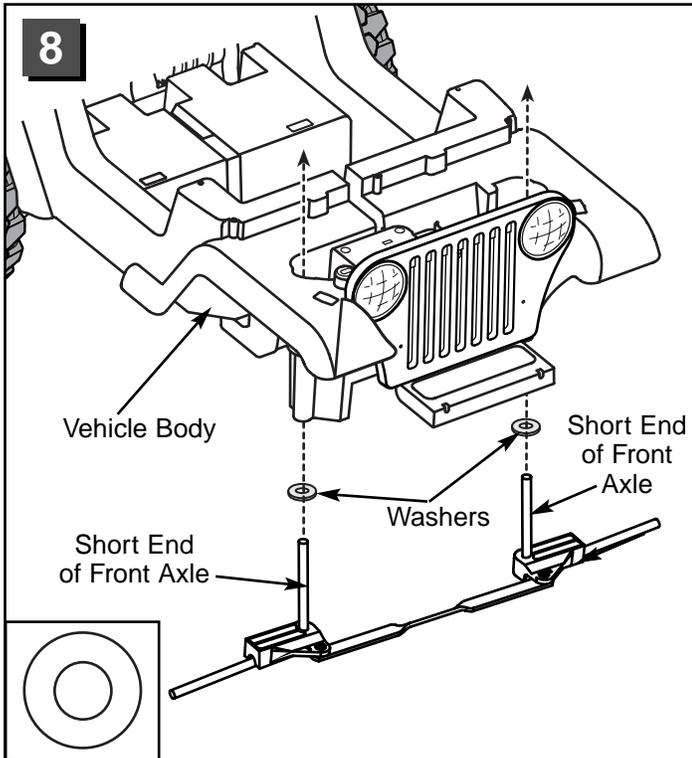

- Fit the other driver onto the end of the rear axle. Make sure the teeth in the driver fit into the motor gearbox.
- Slide a wheel (*indented side first*) and hubcap (*pointed side first*) onto the end of the rear axle. Make sure the ribs on the wheel fit into the grooves in the driver.
- Fit a .437 cap nut on the end of the rear axle.
- Tap the cap nut with a hammer to secure the cap nut on the rear axle. Pull on the cap nut to be sure it is secure.

**Hint:** You may need the help of another adult to support the other end of the rear axle assembly while you tap the cap nut.

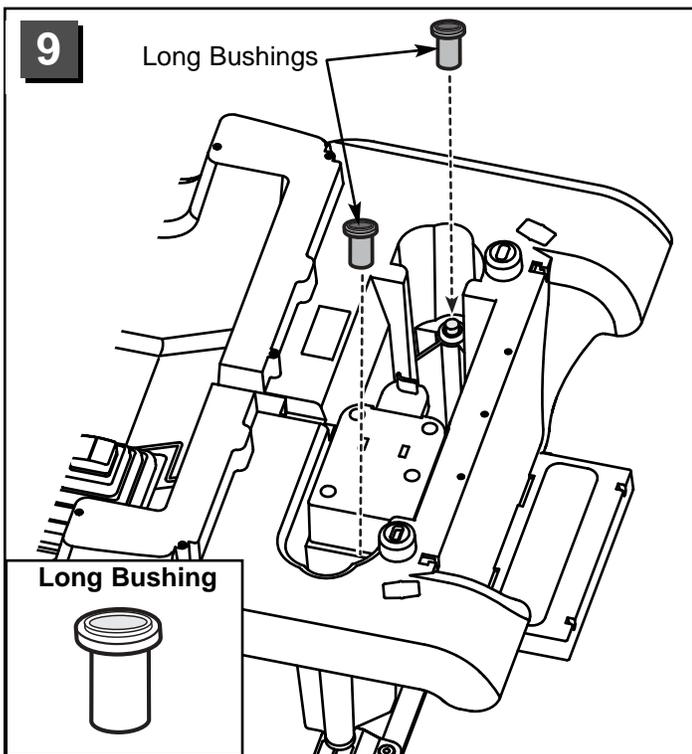

- Fit short end of the front axles up through the holes in the underside of the steering linkage. Make sure the long end of each front axle fits into the groove on each end of the steering linkage.

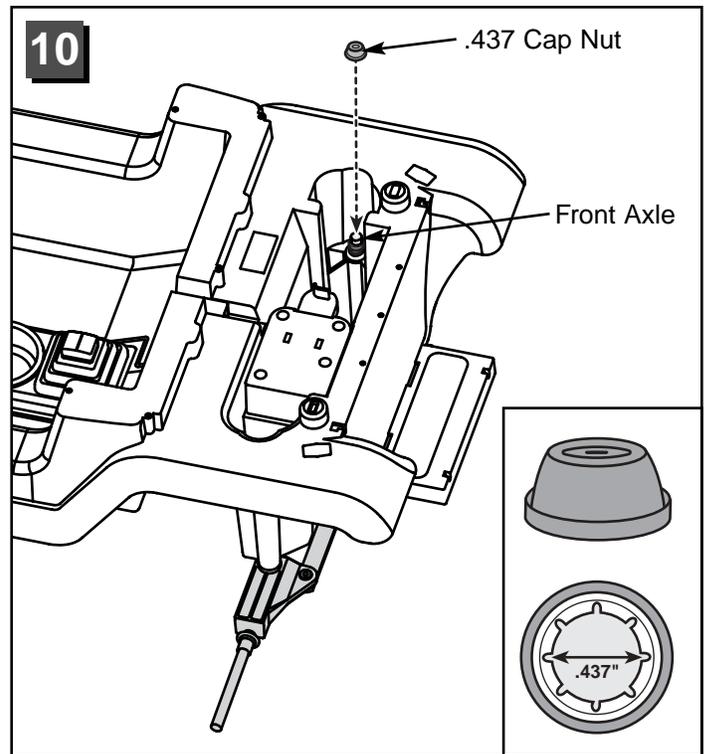

# Assembly

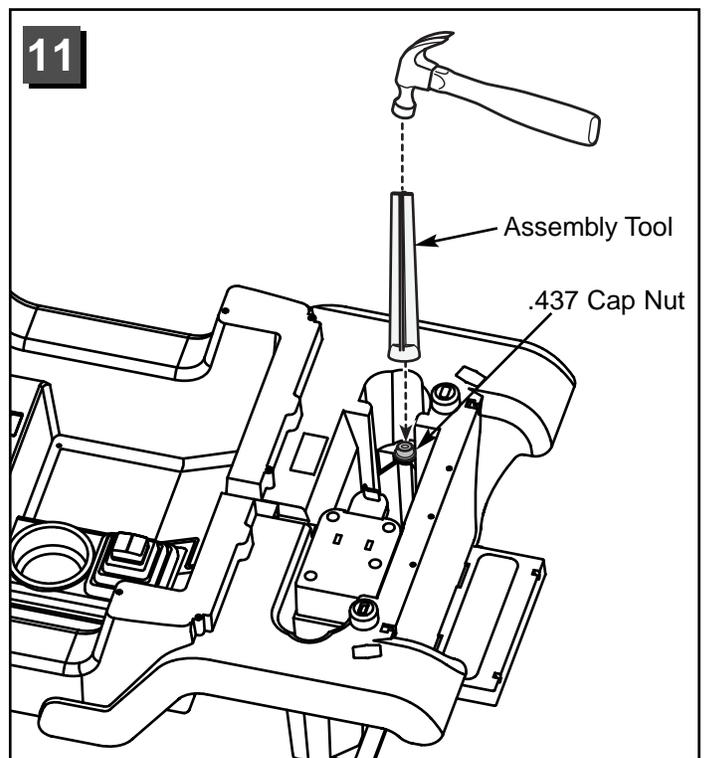

- Slide a washer onto the short end of each front axle.
- Fit the front axles up through the holes in the underside of the vehicle body.

- While holding the front axle/steering linkage assembly in place, fit a long bushing onto the end of each front axle.
- Push each long bushing so that it fits completely into the vehicle body.

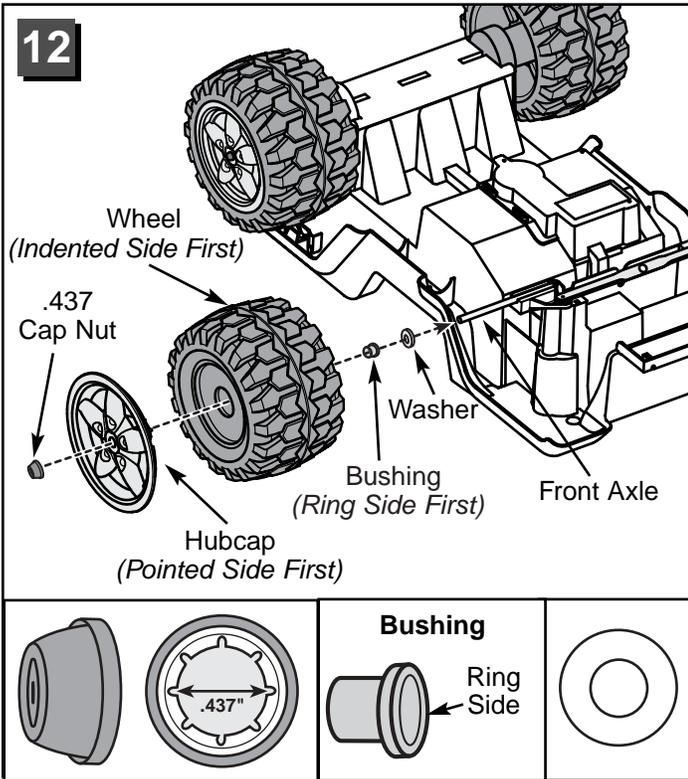

- Fit a .437 cap nut onto the end of each front axle.

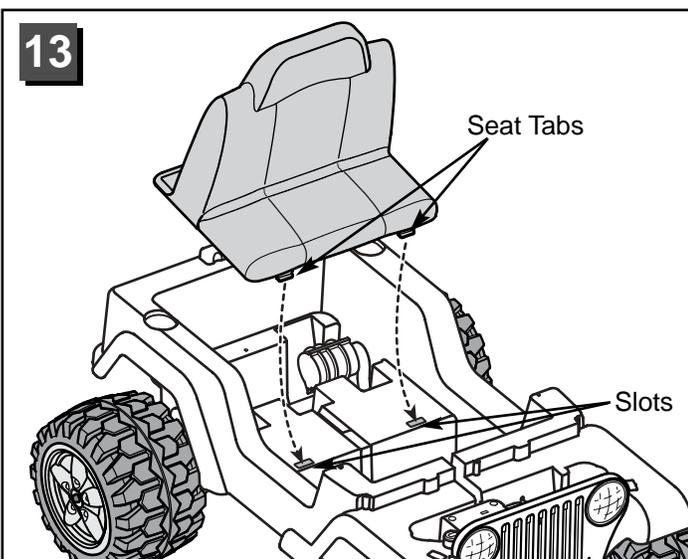

- Fit the assembly tool onto the cap nut.
- While supporting the front axle/steering linkage assembly, tap the assembly tool with a hammer to secure the cap nut on the end of the front axle. Pull on the cap nut to be sure it is secure.
- Repeat this procedure to fasten a cap nut to the other front axle. Throw the assembly tool away.

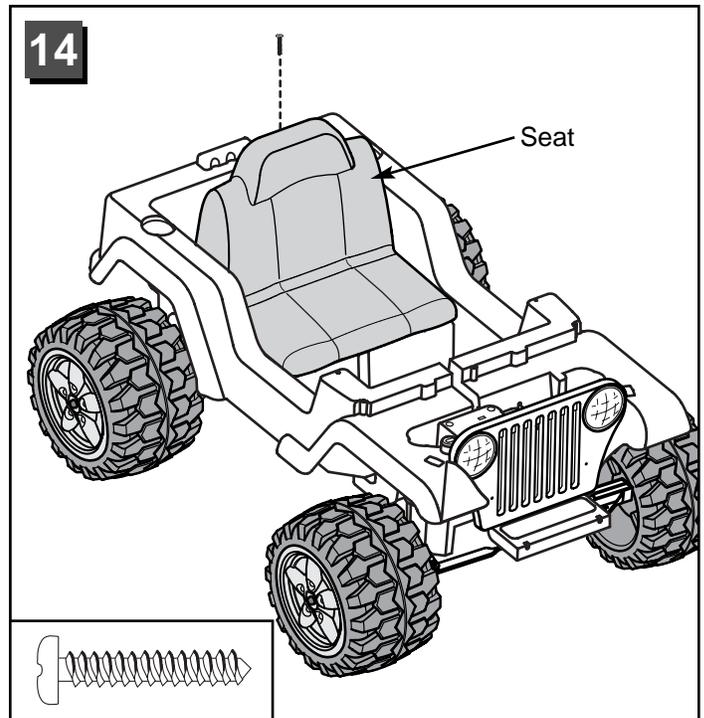

# Assembly

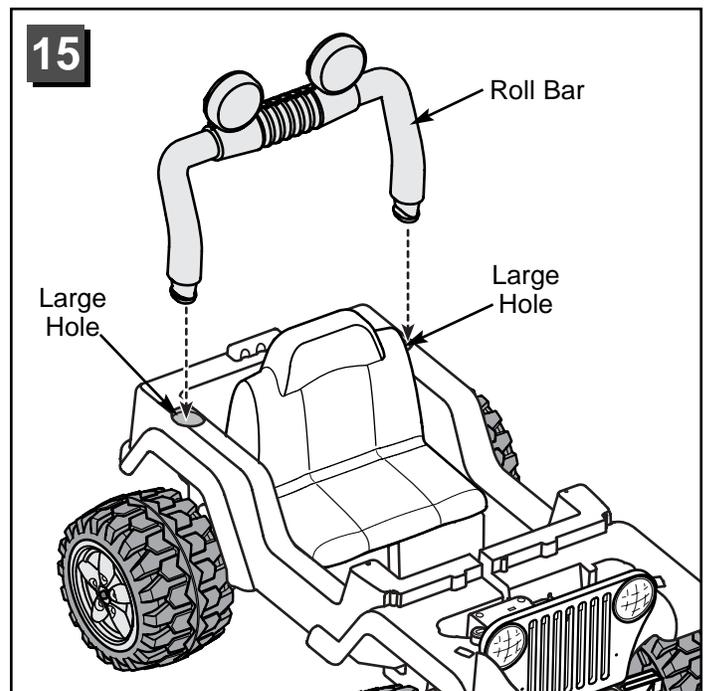

- Turn the vehicle assembly upside down on a flat surface.
- Fit a washer, bushing (*ring side first*), wheel (*indented side first*) and hubcap (*pointed side first*) onto one of the front axles.
- Fit a .437 cap nut onto the end of the front axle.
- Tap the cap nut with a hammer to secure the cap nut on the front axle. Pull on the cap nut to be sure it is secure.
- Repeat this procedure to assemble the other washer, bushing, wheel, hubcap and cap nut to the other front axle.

- Turn the vehicle assembly upright.
- Fit the two tabs on the front of the seat into the two slots in the vehicle body.

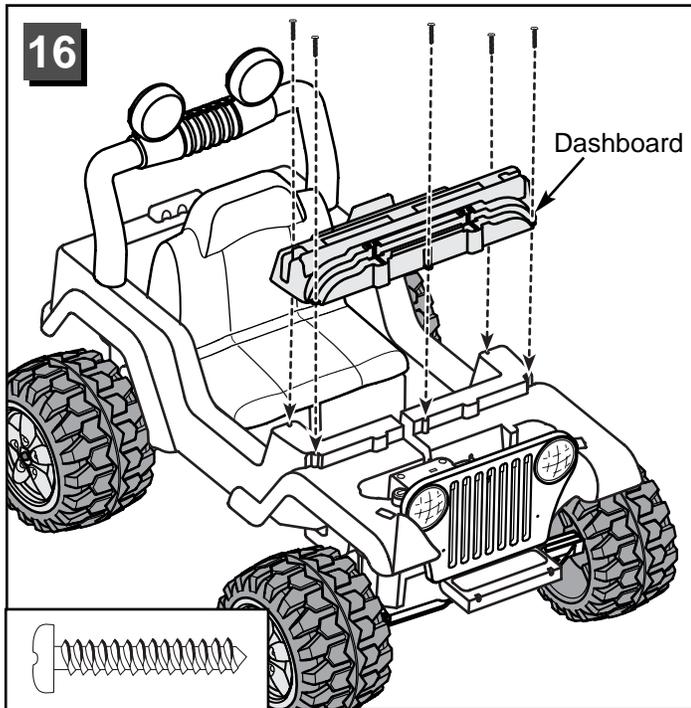

- Insert a #10 x 1" screw through the back of the seat and into the vehicle body.
- Tighten the screw with a Phillips screwdriver. Do not over-tighten.

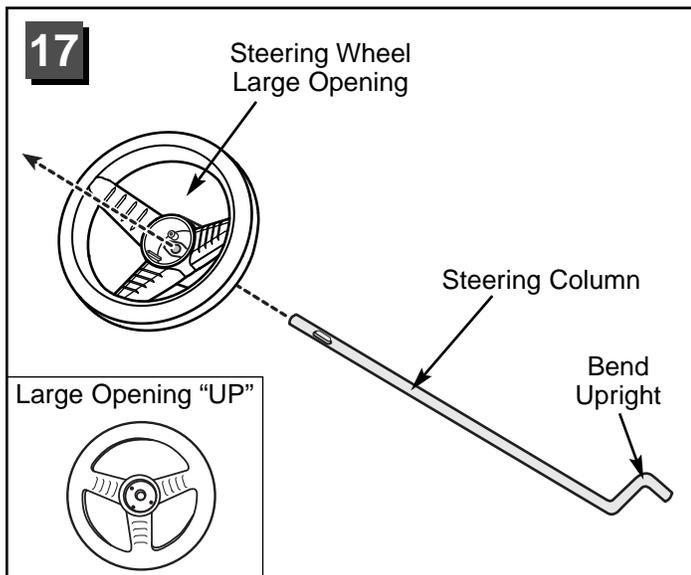

- Position the roll bar so that it **bends toward the back end** of the vehicle.
- Insert and **"snap"** the roll bar into the large holes in the top side of the vehicle body, as shown.
- Pull up on the roll bar to be sure it is secure.

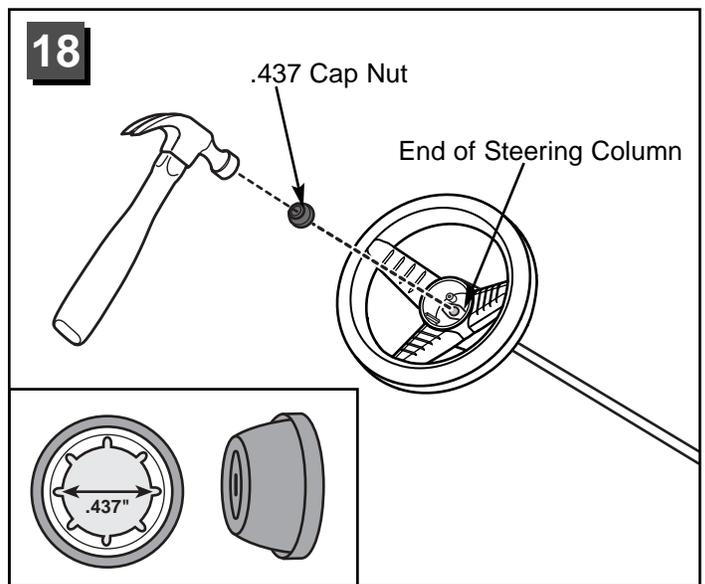

# Assembly

- Place the dashboard on the top side of the vehicle body, as shown.
- Insert five #10 x 1" screws through the dashboard and into the vehicle body.
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.

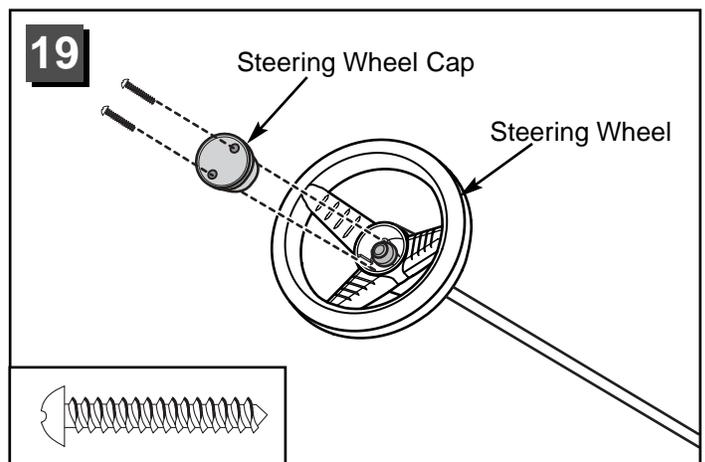

- Position the steering wheel with the large opening **upright**.
- Position the steering column so that the bend is **upright**, as shown.
- Fit the steering column through the center hole in the steering wheel.

- Fit a .437 cap nut on the end of the steering column.
- Tap the cap nut with a hammer to secure the cap nut on the steering column. Pull on the cap nut to be sure it is secure.

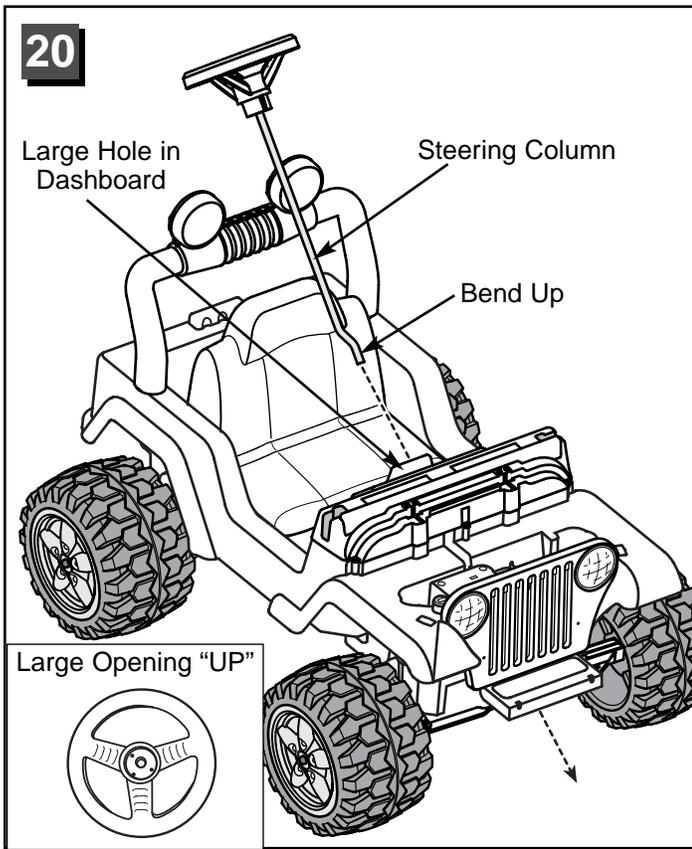

### Hints:

- You may need the help of another adult to keep these two parts in the correct position.
- You may want to position the steering column on a scrap block of wood to protect the assembly surface.

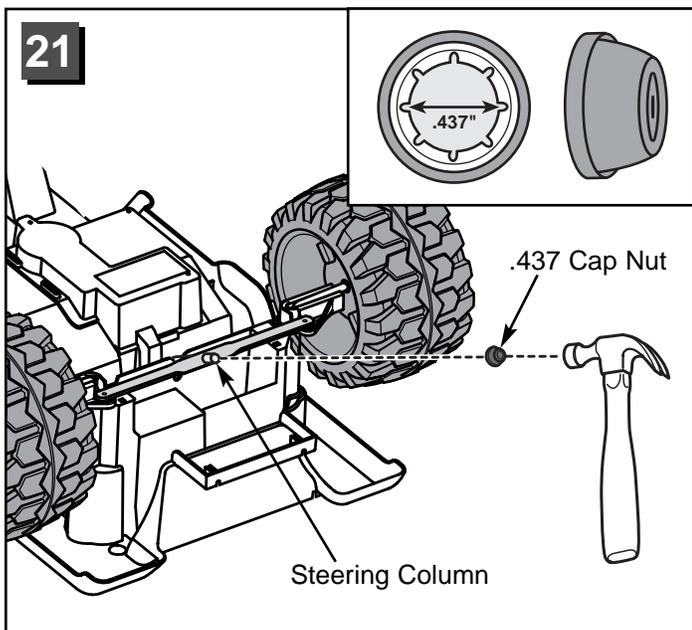

- Fit the steering wheel cap into the center of the steering wheel. Be sure to align the notch in the steering wheel cap with the tab in the center of the steering wheel.
- Insert two #8 x 1" screws through the steering wheel cap and into the steering wheel.
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.

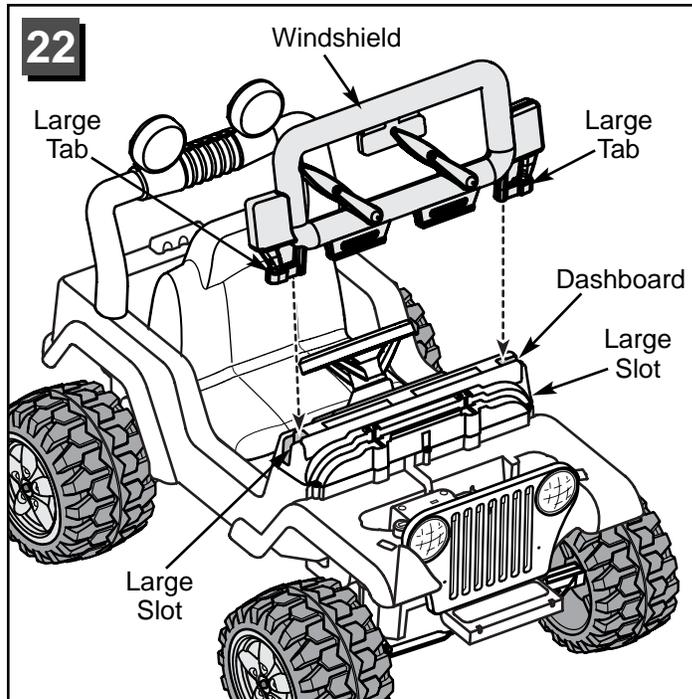

# Assembly

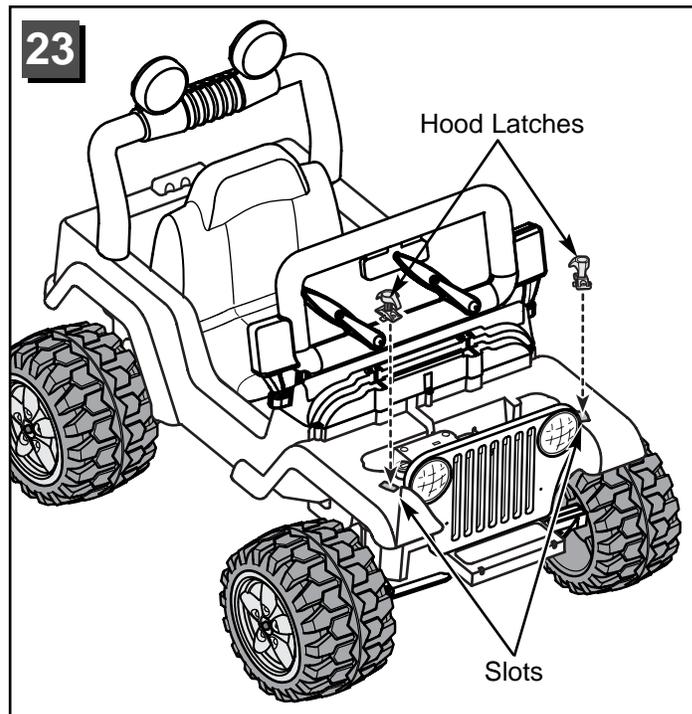

- Insert the steering column (with steering wheel) into the large hole in the dashboard. Make sure the large opening in the steering wheel and the bend in the steering column are facing UP.

- Carefully, turn the vehicle over, keeping the steering wheel and steering column in place.
- Fit a .437 cap nut on the end of the steering column.
- Tap the cap nut with a hammer to secure the cap nut on the steering column. Pull on the cap nut to be sure it is secure.

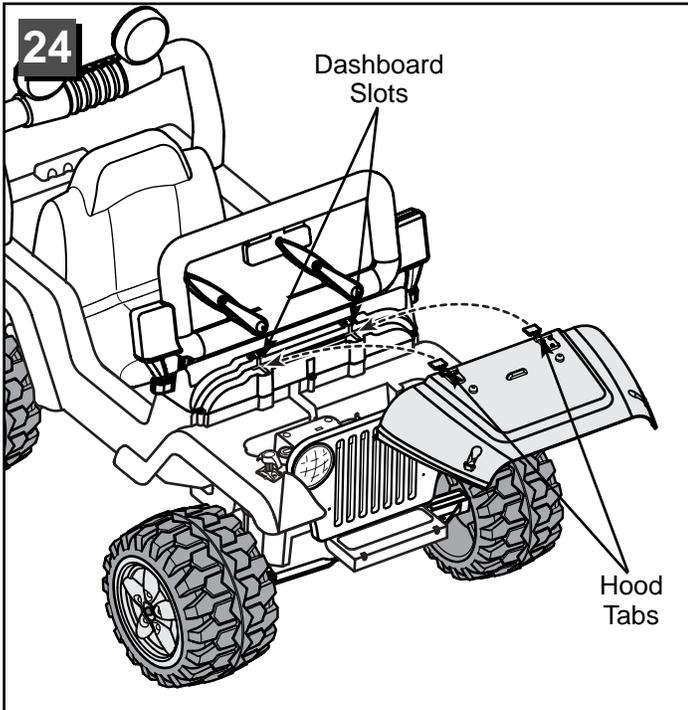

- Turn the vehicle upright.
- Position the windshield so that the **wipers face the front** end of the vehicle.
- Insert and "**snap**" the two large tabs on the windshield into the large slots in the dashboard.
- Pull up on the windshield to be sure it is secure.

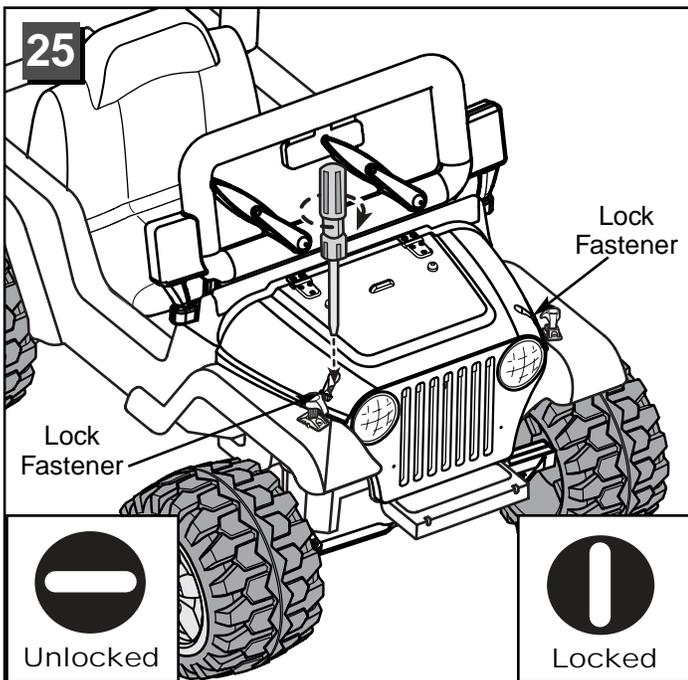

- Insert a hood latch into the slots in the front end of the vehicle body.
- Turn each hood latch a  $\frac{1}{4}$  turn to secure in place. Pull up on the hood latches to be sure they are secure.

# Assembly

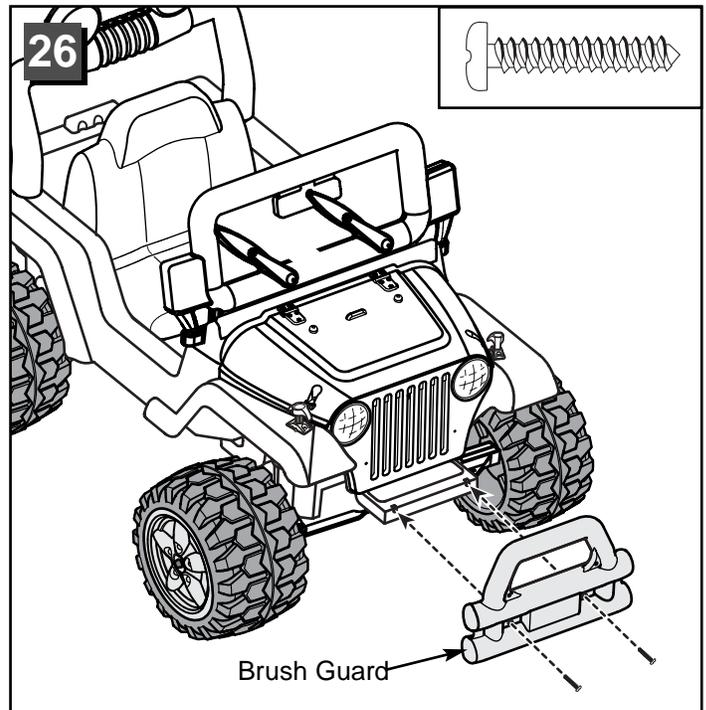

- Insert the tabs on the rear edge of the hood into the slots in the front of the dashboard.

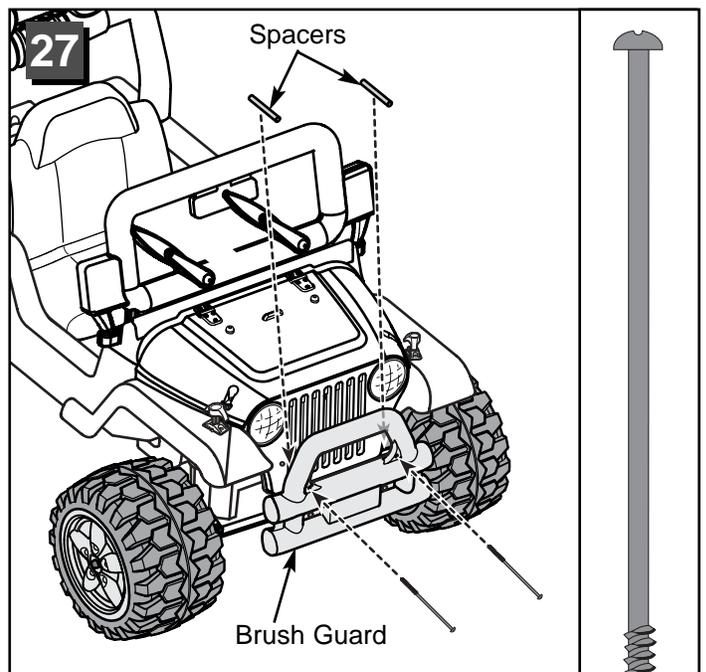

- Using a slotted screwdriver, turn each lock fastener in the hood  $\frac{1}{4}$  turn to the locked  position.

**IMPORTANT!** Remember to keep the lock fasteners locked at all times to prevent children from accessing the vehicle battery compartment.

- Fit the brush guard on the front end of the vehicle.
- Insert two #10 x 1" screws through the **lower** holes in the brush guard and into the front end of the vehicle.
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.

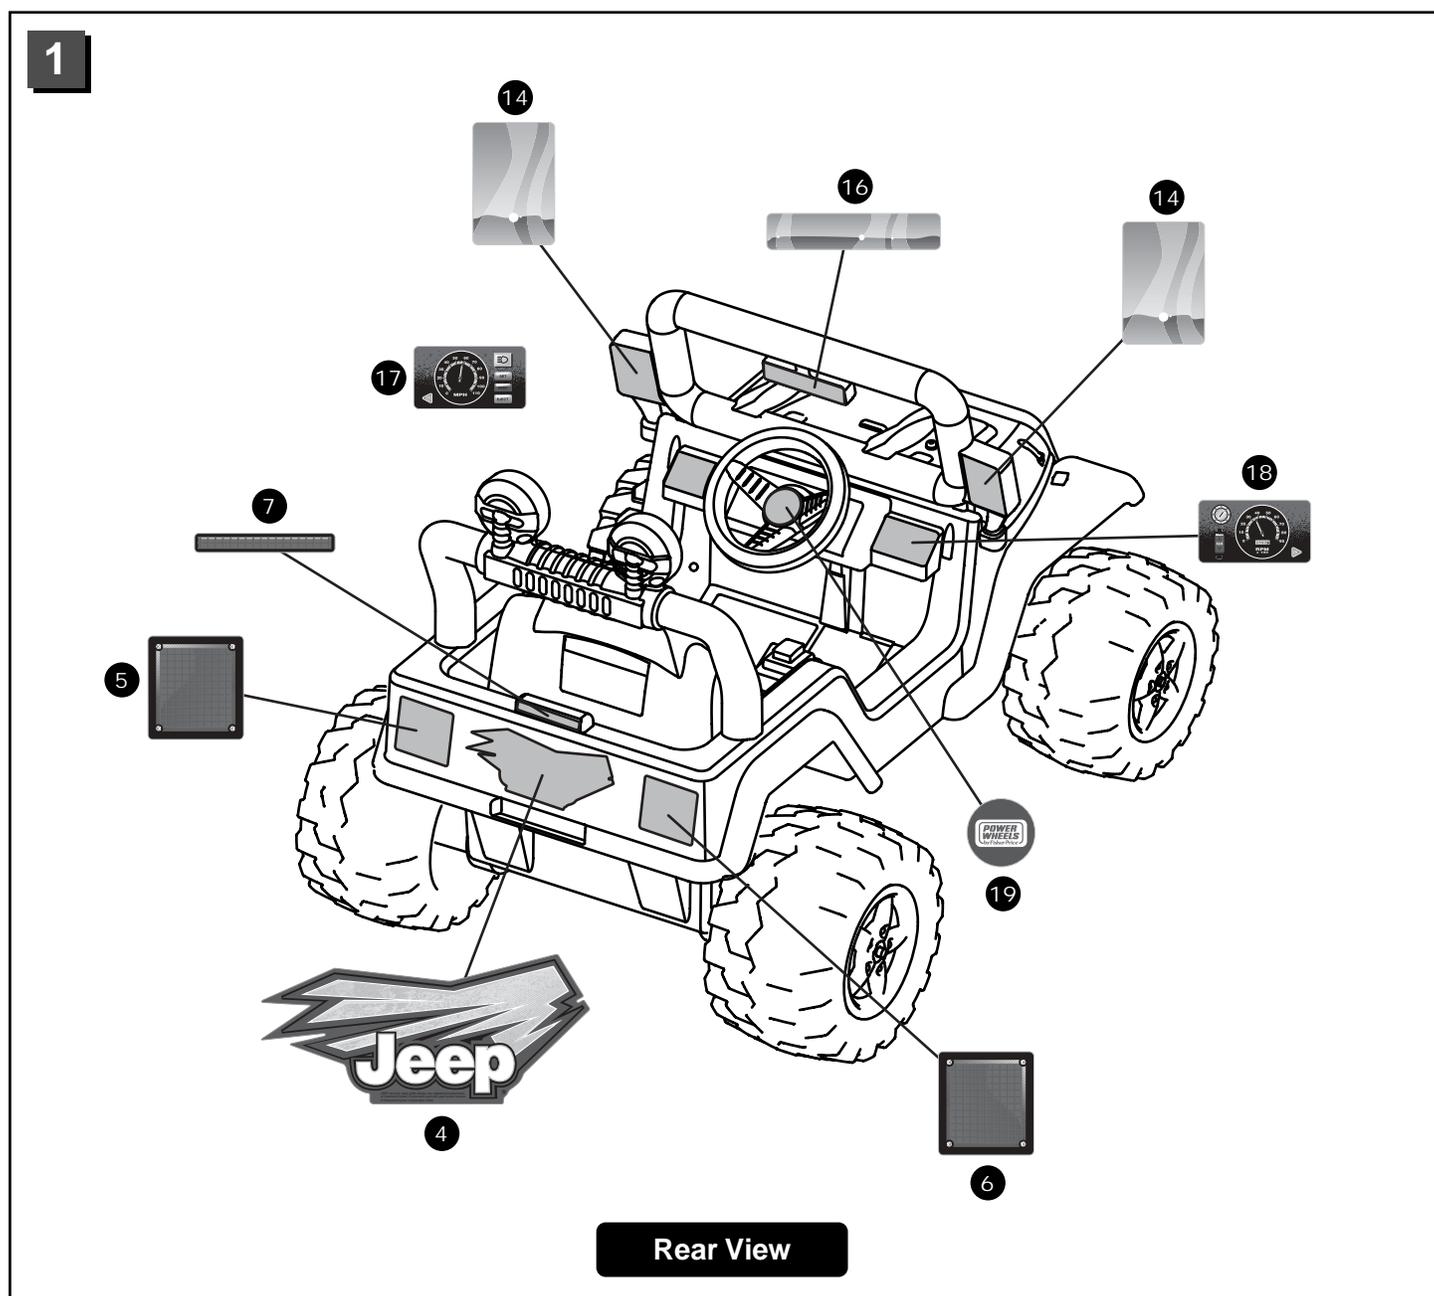

- Fit the spacers **between** the top of the brush guard and the front end of the vehicle.
- Insert two #8 x 4" screws through the two **upper** holes in the brush guard, through the spacers and into the front end of the vehicle.
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.

# G

## Label Decoration

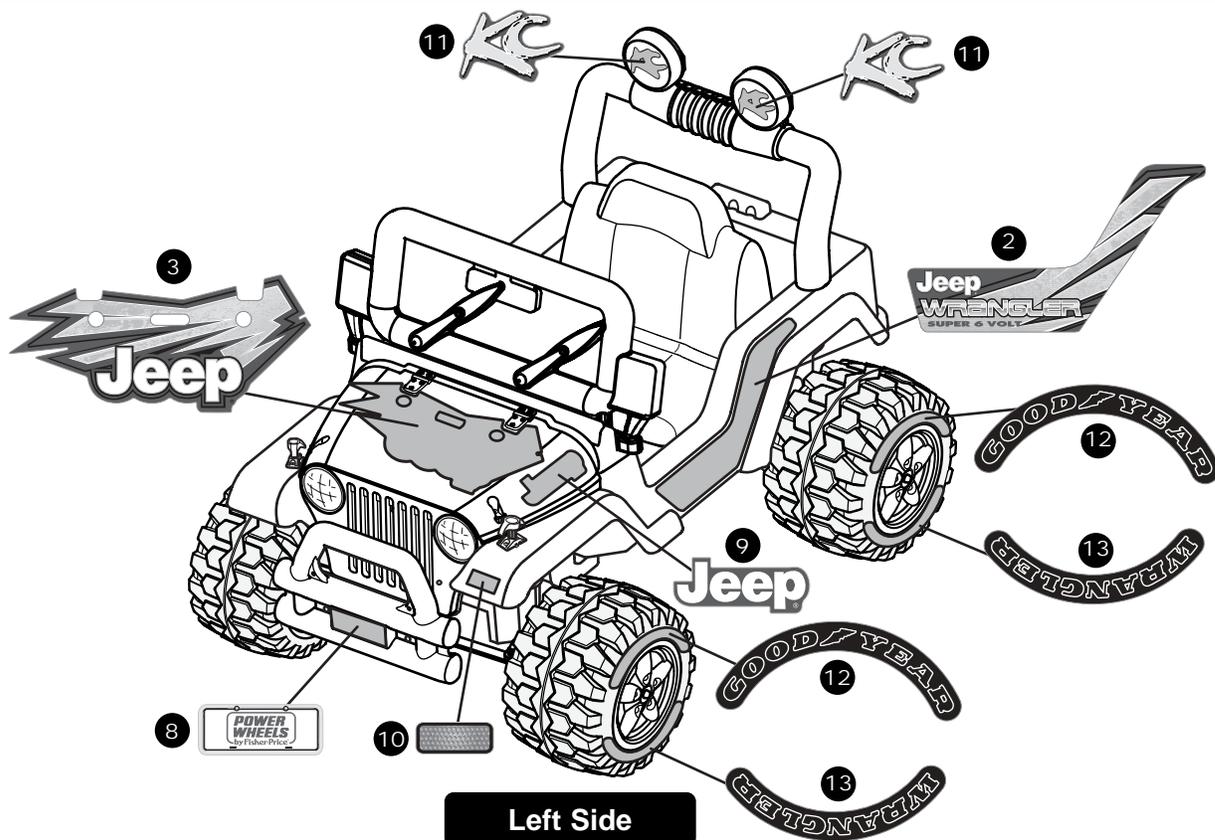

Proper label application will help to keep the labels looking their best! When applying labels, keep the following guidelines in mind:

- Wash your hands before applying the labels.
- Before applying the labels, wipe the surface of the vehicle with a clean, dry cloth to remove any dust or oils.
- Place the labels exactly as shown in the illustrations.
- For best results, avoid repositioning a label once it has been applied to the vehicle.
- After applying a label, rub the label firmly with a clean, dry cloth to make sure the label is adhered to your vehicle. Start at the center of a label, and smooth towards the outer edges to remove air bubbles.

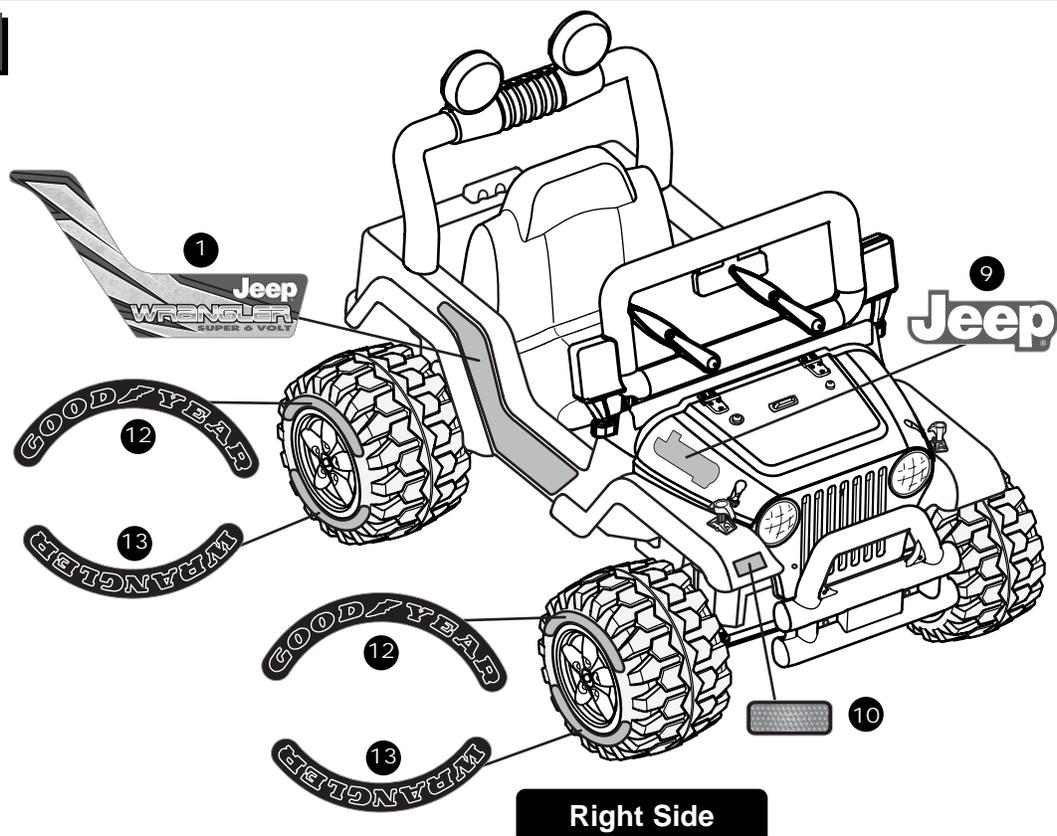

# Label Decoration

# H

## Battery Installation

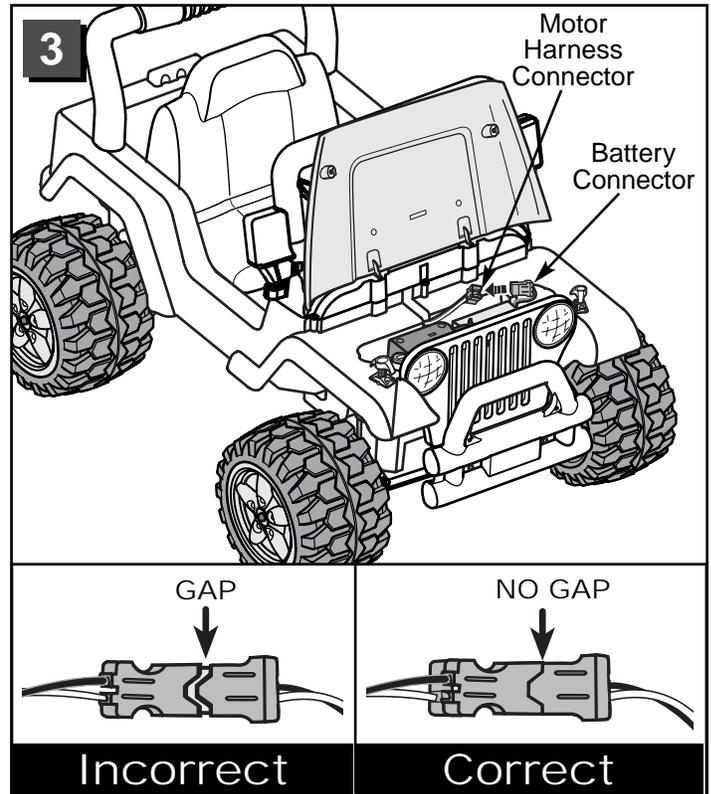

**IMPORTANT!** Use only a Power Wheels® 6 volt battery with A-style connector and built-in thermal fuse. Use of any other battery will damage your vehicle. Make sure that you charge the battery for at least 18 hours using the enclosed Power Wheels® Super 6™ volt charger **before operating your vehicle for the first time**. Charge the battery for at least 14 hours after each use of the vehicle. Never charge the battery longer than 30 hours. Failure to follow these instructions may damage your battery and will void your warranty.

- Using a slotted screwdriver, turn each lock fastener  $\frac{1}{4}$  turn to the unlocked  position.
- Lift the hood to access the battery compartment.

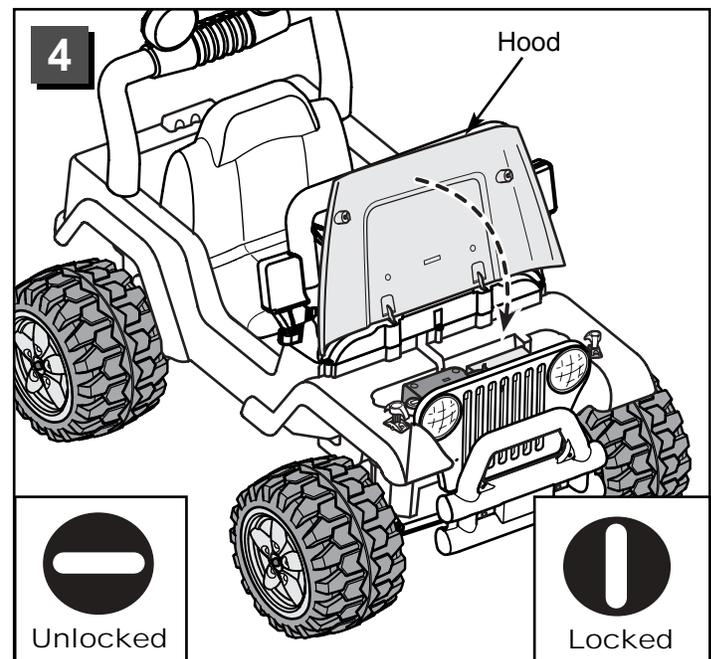

- Slide the battery clamp open.
- Place the battery in the battery compartment and release the battery clamp.

- Plug the battery connector into the motor harness connector.

**Note:** If the battery connector will not plug into the motor harness connector, turn it over and try again! Do not force the battery connector into the motor harness connector.

- Lower the hood on the vehicle. Using a slotted screwdriver, turn each lock fastener  $\frac{1}{4}$  turn to the locked  position.

**IMPORTANT!** Remember to keep the lock fasteners locked at all times to prevent children from accessing the battery compartment.

# I

## Battery Care and Disposal

### Care

**If a battery leak develops**, avoid contact with the leaking acid and place the damaged battery in a plastic bag. See information below for proper disposal.

**If acid comes in contact with skin or eyes**, flush with cool water for at least 15 minutes and call a physician.

**If acid is internally ingested**, give water, milk of magnesia or egg whites immediately. Never give emetics or induce vomiting. Call a physician.

- Charge a new battery for at least 18 hours before first use. Never charge the battery longer than 30 hours. Overcharging or undercharging the battery may shorten battery life and decrease vehicle running time.
- After the first charge, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours. Charge the battery after each use, regardless of how long the vehicle was used.
- The battery must be upright while charging.
- Do not allow the battery to run down completely before charging.
- Charge the battery before storing the vehicle.
- Charge the battery at least once per month, even if the vehicle has not been used.
- Leaving the battery in a discharged condition will ruin it.
- Always remove an exhausted battery from the vehicle. Battery leakage and corrosion can damage the vehicle.
- Do not store the battery on a surface (such as kitchen counter tops) which could be damaged by the acid contained inside the battery. Take precautions to protect the surface on which you store the battery.
- Do not store the battery in temperatures above 75° F or below -10° F.
- Use only a Power Wheels® 6 volt battery. Remember to charge the new battery for at least 18 hours before first use.
- Prevent the battery from moving freely inside the battery compartment. Always use the battery clamp to secure the battery in the battery compartment.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage is detected, do not use the charger or the battery until you have replaced the worn or damaged part.

## Battery Care and Disposal

### Disposal

- Your Power Wheels® battery is sealed lead-acid battery. It must be recycled or disposed of in an environmentally sound manner.
- Do not dispose of a lead-acid battery in a fire. The battery may explode or leak.
- Do not dispose of a lead-acid battery in your regular, household trash. The incineration, landfilling or mixing of sealed lead-acid batteries with household trash is prohibited by law in most areas.
- Return an exhausted battery to a federal or state approved lead-acid battery recycler, such as a Power Wheels® authorized service center or a local seller of automotive batteries. For the authorized service center location nearest to you, please call **1-800-348-0751**. Contact your local waste management officials for other information regarding the environmentally sound collection, recycling and disposal of lead-acid batteries. If you live in the State of Florida or the State of Minnesota, it is prohibited by law for anyone to throw away lead-acid batteries in the municipal waste stream.

# J

## Caring For Your Vehicle

- Check all screws, cap nuts and their protective coverings regularly and tighten as required. Check plastic parts on a regular basis for cracks or broken pieces.
- During snowy or rainy weather, the vehicle should be stored inside or under a protective cover. Remember to charge the battery at least once per month while your vehicle is not in regular use.
- Avoid operating the vehicle in wet or snowy conditions, and do not spray the vehicle with a hose. Do not wash the vehicle with soap and water. Water or moisture in the motors or electrical switches can cause them to corrode, and could cause switch or motor failure.
- Avoid operating the vehicle on sand, loose dirt or gravel. Sand, loose dirt or gravel in the motors or electrical switches can cause them to jam, and could cause switch or motor failure.
- The vehicle can be wiped down with a soft, dry cloth. For a shiny finish, you can wipe plastic parts with a non-wax furniture polish applied to a soft-cloth. Do not use automotive wax. Do not use soap and water or spray the vehicle with a hose.
- To ensure that your vehicle stays in good operating order, we recommend that you periodically have your vehicle checked by a Power Wheels® authorized service center. See page 27 for the list of authorized service centers or call **1-800-348-0751** for the location of the authorized service center nearest to you.

## RIDING HAZARD

**WARNING****Prevent Injuries and Deaths**

- Direct Adult Supervision Required.
- Keep Children Within Safe Riding Areas

These areas must be:

- away from swimming pools and other bodies of water to prevent drownings.
- generally level to prevent tipovers.
- away from steps, driveways, roads and alleys.

**Teach Safety Rules to Children**

While children can quickly develop the skill necessary to drive this vehicle, it is important to remember that their judgment skills are still very immature. Unsupervised driving by children can lead to serious injury. Before children use this vehicle, an adult should carefully evaluate the driving area as well as the children's skill level and ability to drive this vehicle safely. Children are not always able to recognize or anticipate hazards, even when they have been taught about them. **THERE IS NO ACCEPTABLE SUBSTITUTE FOR DIRECT ADULT SUPERVISION.**

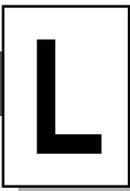

Teach appropriate safety rules to your child before allowing operation of this vehicle. These rules should also be reviewed with neighborhood children or other playmates who want to drive this vehicle.

**Riding Rules**

**Make sure children know and follow these rules for safe driving:**

1. Always sit on the seat.
2. Always wear shoes.
3. Only 1 (one) rider at a time. A child who is not sitting on the seat or who is standing on the vehicle could fall off, cause a tip-over or block the driver's view. A child could be seriously injured.
4. Do not allow any child to drive the vehicle in the street or near moving (motorized) vehicles.
5. Do not allow any child to drive near bodies of water (such as pools or creeks), obstructions (such as furniture, low tree limbs or play equipment), or drop-offs (such as stairs or decks).
6. Do not allow any child to drive the vehicle in the dark. A child could encounter unexpected obstacles and have an accident. Operate the vehicle only in the daytime or a well-lit area.

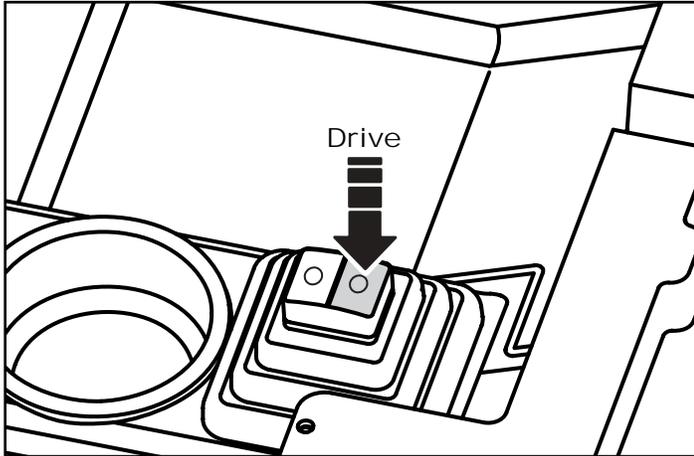

7. Do not allow your child to drive on sloped or inclined surfaces. **Restrict your child's driving to generally level ground ONLY!**
8. Do not allow your child to drive down or across a steep slope.
  - The vehicle may gain unsafe speed, even if the pedal is released to stop.
  - The vehicle may tilt and tip over.
  - The wheels could lose traction, causing the vehicle to slip.
9. Do not allow your child to drive up steep inclines. The motor may stop and the vehicle could roll backwards at an unsafe speed.
10. Never put anything near any moving parts. Rotating parts such as motors, gear boxes and wheels can snag fingers, hair, etc., causing serious injury. Do not allow operation of the vehicle when it is on its side or in an upside-down position.
11. Do not operate the vehicle near flammable vapors (gasoline, paint thinner, acetone, liquid wax, etc.). The vehicle's electrical switches, like most electrical switches, emit an internal spark when first turned on or turned off. The presence of flammable liquids or vapors could cause an explosion or a fire. Keep all flammable products in tightly sealed containers and away from the vehicle.
12. Do not allow a child to operate the vehicle without direct adult supervision. To prevent unsupervised use of the vehicle, disconnect the motor harness from the battery when the vehicle is not in use.

# How to Operate Your Vehicle

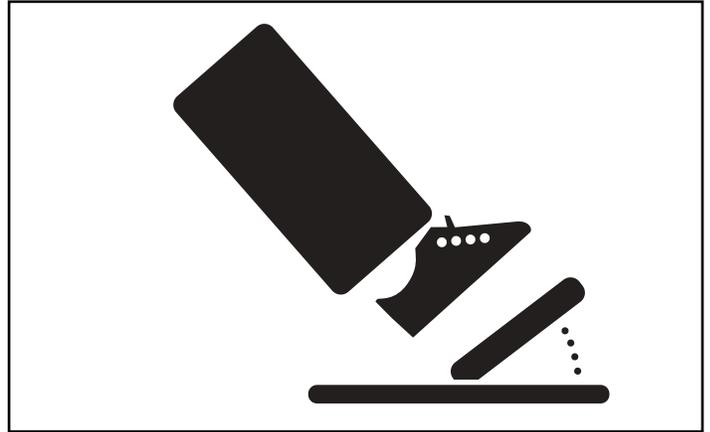

**IMPORTANT!** Use this vehicle **ONLY** outdoors. Most interior flooring can be damaged by riding this vehicle indoors. Fisher-Price® will not be responsible for damage to the floor if the vehicle is used indoors.

## FORWARD

- Press the **FORWARD** button on the floor of the vehicle.
- Press the foot pedal. The vehicle drives forward at a maximum of 3½ mph.
- Help your child practice steering to learn how far and how quickly to turn the wheel when driving forward.

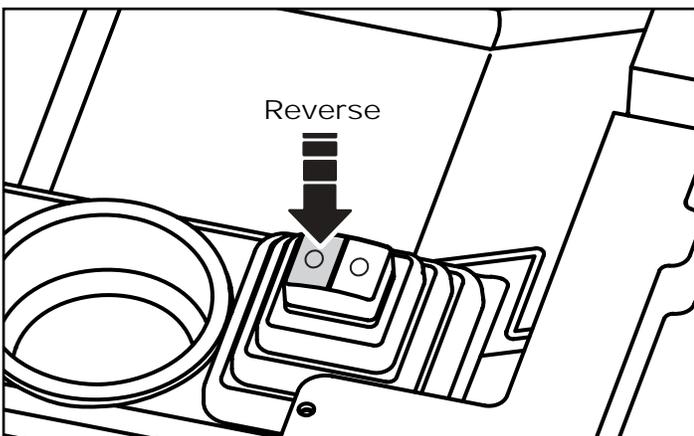

## To Stop

- Your vehicle has a patented, electronic braking system that automatically stops the vehicle when your child's foot is lifted from the pedal.
- Make sure your child is comfortable with steering the vehicle and automatically knows how to stop.

## REVERSE

**IMPORTANT!** To prevent damaging the motors and gears, teach your child to **stop the vehicle before switching direction**. Never shift from forward to reverse, or from reverse to forward, without stopping.

- Press the **REVERSE** button on the floor of the vehicle.
- Press the foot pedal. The vehicle backs-up at a maximum of 3½ mph.
- Help your child practice steering to learn how far and how quickly to turn the wheel when driving in reverse.

# M

## FCC Statement (United States Only)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

# N

## Bumper-to-Bumper\* Limited Warranty

**\*One year limited warranty from the date of purchase on the Power Wheels® vehicle.**

**Six month limited warranty on the 6 volt battery.**

For the original purchaser, this one year limited warranty covers the Power Wheels® ride-on vehicle (purchased from Power Wheels®) against defects in materials and workmanship. The six month limited warranty applies only to the 6 volt battery included by Power Wheels® with the original purchase of the vehicle.

This warranty covers normal use and does not cover the Power Wheels® vehicle or battery if damaged by unreasonable use, neglect, accident, abuse, misuse, improper service or other causes not arising out of defects in materials or workmanship. Evidence of any attempt at consumer repair will void this warranty. THIS WARRANTY DOES NOT COVER, AND IS INTENDED TO EXCLUDE, ANY LIABILITY ON THE PART OF POWER WHEELS®, WHETHER UNDER THIS WARRANTY OR IMPLIED BY LAW FOR ANY INDIRECT OR CONSEQUENTIAL DAMAGES FOR BREACH OF WARRANTY. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION SO THIS LIMITATION MAY NOT APPLY TO YOU.

Should you need service or assistance with your vehicle during the warranty period, **do not return the vehicle to the store.** Power Wheels® has provided a nationwide network of authorized service centers. Please refer to the list in this manual. Power Wheels® is continually expanding our Authorized Service Center Network. If there is not an authorized service center in your area, please call Consumer Relations for information, **1-800-348-0751**.

THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH MAY VARY FROM STATE TO STATE.

**PLEASE SAVE YOUR ORIGINAL SALES RECEIPT.**

## Problems and Solutions Guide

**IMPORTANT!** If you experience a problem with your vehicle, first check the Problems and Solutions Guide below. If you still experience a problem, please contact Power Wheels® Consumer Relations, toll-free at **1-800-348-0751** between 8 AM and 6 PM (EST) Monday through Friday. Or, contact your local Power Wheels® authorized service center. For the location nearest you, please refer to the Authorized Service Center list beginning on page 27, or register on-line at [www.powerwheels.com](http://www.powerwheels.com).

Problem	Possible Cause	Solution
Vehicle does not run	Undercharged battery	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours.
		Check all connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is "ON".
	Charger is not working	There is no sure way to tell if your charger is working unless you have a volt meter. If you suspect there is a problem with your charger, contact your local Power Wheels® authorized service center. They can test your charger for you.
	Tripped thermal fuse	The built-in thermal fuse may "trip" and shut down operation of the vehicle if the vehicle is overloaded or the driving conditions too severe. The fuse will automatically reset itself after approximately 25 seconds, allowing the vehicle to resume normal operation. To avoid repeated automatic shutdowns, do not overload the vehicle by exceeding the 65 lb maximum weight capacity or by towing anything behind the vehicle. Do not drive up hills or run into fixed objects, which can cause the wheels to stop spinning while power is still being supplied to the motors. If a thermal fuse continually trips, contact your local Power Wheels® authorized service center.
	Loose wire or loose connectors	Check all wires and connectors. Make sure the battery connector is tightly plugged into the motor harness connector and that there are no loose wires around the motors.
	Dead battery	If your battery is old or if you have not followed Battery Care instructions, your battery may be dead. If you are unsure whether or not the battery are dead, you can have it tested at your local Power Wheels® authorized service center.
	Electrical switch damage	The electrical switches can become corroded due to exposure to water or moisture, or can jam due to loose dirt, sand or gravel. Contact your local Power Wheels® authorized service center for diagnosis and repair.
Motor damage	Contact your local Power Wheels® authorized service center for diagnosis and repair.	

# Problems and Solutions Guide

Problem	Possible Cause	Solution
Vehicle was running but suddenly stopped	Loose wire or loose connectors	Check all wires and connectors. Make sure the battery connector is tightly plugged into the motor harness connector, and that there are no loose wires around the motors.
	Tripped thermal fuse	The built-in thermal fuse may "trip" and shut down operation of the vehicle if the vehicle is overloaded or the driving conditions too severe. The fuse will automatically reset itself after approximately 25 seconds, allowing the vehicle to resume normal operation. To avoid repeated automatic shutdowns, do not overload the vehicle by exceeding the 65 lb maximum weight capacity or by towing anything behind the vehicle. Do not drive up hills or run into fixed objects, which can cause the wheels to stop spinning while power is still being supplied to the motors. If a thermal fuse continually trips, contact your local Power Wheels® authorized service center.
Short run time (Less than 1 - 3 hours per charge)	Undercharged battery	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours.
		Check all wires and connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is "ON".
	Overcharged battery	Do not charge the battery longer than 30 hours. If you suspect that your battery is damaged as a result of overcharging, contact your local Power Wheels® authorized service center. They can test the battery for you.
	Battery is old and will not accept full charge	Even with proper care, a rechargeable battery does not last forever. Average battery life is 1 to 3 years depending on vehicle use and use conditions. Replace only with a Power Wheels® 6 Volt battery with A-style connector and built-in thermal fuse. <b>Do not substitute parts.</b>
	Tripped thermal fuse	The built-in thermal fuse may "trip" and shut down operation of the vehicle if the vehicle is overloaded or the driving conditions too severe. The fuse will automatically reset itself after approximately 25 seconds, allowing the vehicle to resume normal operation. To avoid repeated automatic shutdowns, do not overload the vehicle by exceeding the 65 lb maximum weight capacity or by towing anything behind the vehicle. Do not drive up hills or run into fixed objects, which can cause the wheels to stop spinning while power is still being supplied to the motors. If a thermal fuse continually trips, contact your local Power Wheels® authorized service center.
Vehicle runs sluggishly	Undercharged battery	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours.
		Check all connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is "ON".

# Problems and Solutions Guide

Problem	Possible Cause	Solution
Vehicle runs sluggishly (cont.)	Battery needs charging	Be sure to charge the battery after each use.
	Battery is old and will not accept full charge	Even with proper care, a rechargeable battery does not last forever. Average battery life is 1 to 3 years depending on vehicle use and use conditions. Replace only with a Power Wheels® 6 Volt battery with A-style connector and built-in thermal fuse. <b>Do not substitute parts.</b>
	Vehicle is overloaded	Make sure you do not overload the vehicle by allowing more than one rider at one time, exceeding the 65 lb. maximum weight capacity, or by towing objects behind the vehicle. If the vehicle is overloaded, the built-in thermal fuse in the battery may "trip", and automatically shut down operation of the for approximately 25 seconds. Adjust the driving conditions to prevent repeated automatic shutdowns.
	Driving conditions are too stressful	Use only on generally level ground.
Sometimes the vehicle doesn't run, but other times it does	Loose wire or connector	Check all wires around the motors and all connectors to make sure they are tight.
	Motor or electrical switch damage	Contact your local Power Wheels® authorized service center for diagnosis and repair.
When the foot pedal is pressed, the vehicle won't run without a push	Loose wire or connector	Check all wires around the motors and all connectors to make sure they are tight.
	"Dead Spot" on motor	Contact your local Power Wheels® authorized service center for diagnosis and repair.
Battery's thermal fuse constantly "trips", but the vehicle is not overloaded nor the driving conditions too severe	Damaged battery	Contact your local Power Wheels® authorized service center for diagnosis and repair.
	Child is switching between FORWARD and REVERSE without stopping	Teach your child to stop the vehicle before switching direction.
Loud clacking or grinding noise from a motor-gearbox	Broken gears	Contact your local Power Wheels® authorized service center for diagnosis and repair.
Charger gets warm during use	It is normal for some chargers to get warm during use and is not reason for concern. Some chargers do not get warm during use.	No action required.
		If your charger does not get warm during use, it does not mean that it is not working properly.
Battery makes a sizzling or gurgling noise when charging	It is normal for some batteries to make noise and swell slightly while charging and is not reason for concern.	No action required.
		If your battery does not make noise or swell slightly during charging, it does not mean that it is not accepting the charge.

If, after reviewing the Problems and Solutions Guide, the vehicle still fails to operate, please contact your nearest authorized service center (see page 27) or contact Power Wheels® Consumer Relations toll-free at **1-800-348-0751**.

# IMPORTANT!

**DO NOT use this vehicle for the first time until you have charged the battery for 18 hours.**

Remember to...

- ✓ Charge the battery immediately after each use.
- ✓ Charge the battery once a month during storage, even if the vehicle has not been used.

Failure to follow these instructions will permanently damage your battery and void your warranty. Please refer to the Battery Care Section in this manual for more information.

For high speed operation, please refer to the "How to Operate Your Vehicle" section in this manual for more information.

# DO NOT Return your Vehicle to the Store!
