P. Rechargeable Battery Installation and Use

The player utilizes a set of long-life Ni-Mh batteries for a portable power supply. Ni-Mh batteries feature high storage capacity and low level of degradation. This means the Ni-Mh batteries do not have "Memory Effect" and thus can be recharged safely regardless of whether the battery is fully or only partially discharged. Please fully charge the battery prior to first use. Ensure that the battery has been charged for at least eight hours prior to connecting it to the DVD player for the first time.

NOTE:

If you plan not to use the battery for an extended period of time (one week or longer), we recommend that you first fully charge the battery and store it away properly. For longer periods of storage, please recharge the battery at least once every two months to maintain the

battery in optimum condition. Under no circumstances short the battery terminals, store the battery in a metal container, or leave the battery in a humid or damp environment. Ideally, store the battery in an airtight container with desiccant or other dehumidifying agent. Each full recharge takes approximately five-hours and one full charge can provide power to the player for at least 2 hours.

During recharge, the red indicator will stay on. Once fully recharged, the indicated LED on the right side of the unit will turn off. At this point you may remove the wall plug and stop charging.

Precautions related to Battery Recharge:

1. Once the battery is fully discharged, immediately recharge (regardless of whether you plan to use battery or not) in order to maximize battery life.

2.Recharge efficiency will degrade when environmental temperatures drop below 50°F (10°C) or exceed 95°F (35°C).

3. Please remove battery from the player and store it properly if the player is not to be used for long time. During this period, please recharge the battery at least once two months to avoid irreparable damage to the battery.

Using your Rechargeable Batteries

1. Please make sure you always use **only** the AC adapter included with the player to recharge your batteries, the DC power adapter can't be used to recharge the battery.

2. To charge the battery, please connect the power jack directly into the DVD player and leave the POWER switch in the OFF position.

Installing the Battery Pack:

1. First, make sure the player is in the "Power Off" mode and that the AC power supply has been disconnected.
2. Flip down the monitor.
3. Push the battery towards the rear of the player until it locks into position. The lock position is indicated by a click. The battery will fit snugly to the player.
