- **Storage temperature range:** -20 to 60 deg.C °C

Product highlights

Zero interference

Thanks to high-quality digital DECT technology originally developed for cordless telephones, you'll hear your baby via a clear interference-free link. And there'll be no interruptions, because other wireless devices will not disturb the link - and no one else can listen in either.

Privacy guaranteed

A secure channel between your baby and parent unit means privacy is guaranteed. It keeps your precious moments with your baby private.

Battery-low indication

To know in time when the batteries need to be recharged or replaced.

120 Channels

The baby monitor continuously searches for and automatically selects a channel that is free from other baby monitors, taxis, police radios, etc.

DECT System Link

The continuous 100% digital two-way system link shows that you have contact and sounds alarm if the contact is lost.

Two AC power adapters

With the two AC power adapters, you can use both the baby unit and parent unit on the mains power to save on batteries.

Battery back up

You can use the baby unit with batteries and on the mains. In case of mains failure, the baby unit automatically switches to batteries (if batteries are installed).

Single point control

Unique and revolutionary new way of controlling the baby monitor from your location. It allows control of the baby monitor from wherever you are for maximum convenience.

Sound-level lights

Sometimes it's a great help to 'see' when your baby makes a sound. This row of lights provide you with a clear visual indication.

Volume control

A handy rotary control sets the volume to the ideal level to suit your preference.

Adjust Microphone sensitivity

Possibility to set the sensitivity of the microphone so you only hear the sounds you want to hear.

Rechargeable batteries

Enjoy the convenience of rechargeable batteries.

Paging

If the parent unit is misplaced and the volume is off, you can use the page button on the baby unit to locate the parent unit.

Talk-back to comfort baby

Not every situation means you have to go to your baby. The talk-back feature from parent unit to baby unit lets you comfort your baby with the soothing tones of your voice.

Night light

A soft, glowing light is reassuring and provides a focal point in the dark.

5 Lullabies

Choose from 5 lullabies to soothe baby in to sleep.
