

High Efficiency Front-Loading Washer

Shown with dryer 26-8/92826

HE3t™ Washer

- 26-42922 – White
- 26-42924 – Bisque
- 26-42926 – Graphite

- ▮ Front-loading convenience
- ▮ Uses 68% less water and 67% less energy than a conventional washer²
- ▮ Thermal optimization
- ▮ Catalyst™ Cleaning Action with direct inject
- ▮ Sensor Smart™ electronic controls
- ▮ Stainless steel wash drum
- ▮ Dynamic balancing system
- ▮ Automatic water level
- ▮ Detergent advantage system
- ▮ SUDs Saver
- ▮ Ultra Quiet Pak™ sound insulation
- ▮ Optional pedestal available

Mechanical and Electrical Parts	In Home	

¹Among leading brand front-loading washers, based on 20 lb. load.

²Compared to conventional washers using average water, sewer and electric rates and electric hot water heat, 10 loads per week, normal cycle.

ATC = Automatic Temperature Control

*Compared to conventional washers using average water, sewer and electric rates and electric hot water heat, 10 loads per week, normal cycle.

**The rinse system detects when too much detergent is interfering with performance and will clear the washer of suds. The console display will indicate "SUD" to alert the user.

†Per IEC 60456, washes the equivalent of a 3.7 cu. ft. agitator washer

††All energy \$/Yr. figures are calculated at the national average cost of \$0.0803/kWh and \$0.688 per therm. Energy rebates are offered and paid by the energy supplier in states where such programs exist. Criterion is based on percentage of energy efficiency attained beyond the 2001 standard. Dollar amounts may differ.

Because of our continuous program of product improvement, Sears reserves the right to change materials and specifications without notice. Consult installation instructions packed with the product for final dimensional data. For complete warranty information, contact your local Sears Contract Sales Account Manager.

High Efficiency Front-Loading Washer

OPTIONAL PEDESTAL

*The pedestal will add approximately 13" to the height of the washer and/or dryer; resulting in a total height of 51". Pedestal depth with drawer open is 42 3/16".

INSTALLATION OPTIONS

Installation Notes: Minimum spacing allowed. Additional spacing should be considered for ease of installation and servicing. Additional clearances might be required for wall, door and floor moldings. Additional spacing of 1" on all sides of the washer and dryer is recommended to reduce noise transfer.

Additional Notes for Stack Option: Floor may need reinforcement—must support 600 Lbs. Pedestal cannot be used with stack option. Depth with door open 51 3/4". The HE3™ dryer is set back 1 1/4" on top of the washer. The dryer door must be reversed (washer door cannot be reversed).

*For undercounter installations, an additional 1/2" height is recommended to allow for installation of the washer legs and proper leveling

*For closet installation with a door, the minimum ventilation openings in the top and bottom of the door are required. Louvered doors with equivalent ventilation openings are acceptable.
