Portable Media Player

Earphone

USB Cable

CD-ROM containing:

- Media player driver for Windows® 98
- Software for converting video files

Battery Charger

Your Pocket Guide

You'll need a computer with:

Windows® 98/2000/XP
Pentium Class or faster Processor
CD-ROM Drive
64MB RAM
30MB free hard disk space
USB Port

Software Utilities Installation

Insert the CD into the CD ROM drive of your PC.
Click **Setup.exe** to start driver installation.
Follow the on-screen-menu to complete the installation.

Click **Close** once you reach the **Installation Complete** screen.

For Windows® 98 users, please install the driver in the CD-ROM before downloading any files to your player.

Connect

Your player will be charged while being connected to PC through the USB cable.

! You will see the charging animation on the display.

The player is fully charged when the charging animation stops.

Synchronize songs to the player

You can use Windows Media Player 10 on Windows® XP SP2 to synchronize music which are downloaded from Internet legally and validly with license to the player. If the song is downloaded illegally without license, it cannot be synchronized.

Step 1:

Connect the player to your PC by USB cable.
And press **^ / v** to select the Online Device of the player as **MTP Device**, and press **m** to confirm.

(Note: The defaulted online device is USB Disk. If you don't set the online device, a removable disk would be found.)

Step 2:

A dialog box will appear, choose **Synchronize media files to this device using Windows Media Player**, and click **OK** to proceed.

Synchronize songs to the player

Step 3:
Windows Media Player will find device automatically.
And after a while, a dialog box of **Device Setup** will appear, choose **Manual** and click **Finish**.

Step 4:
Windows Media Player will be operating.
Drag and drop your downloaded songs into its Sync List, and press **Start Sync**. Then the songs will be synchronized to the player.

Synchronize songs to the player

Step 5:

The synchronized music can be found in the player.

Click into **My Computer** on the desktop, and you can see an Audio Device named as **media player**, click into it to view your synchronized songs.

Step 6:

Hold  long to turn on the player, then the MTP device will be removed.

Get Your Player Connected

Step 1:
Plug the USB cable to the USB ports of your PC and player. Once the connection is successfully made, the removable disk of the player will be found.

Step 2:
The above screen (1) would appear. (Apply only to Windows® XP)
Choose **Take no action** and click **OK** to close the window.

Double click **My Computer** on your desktop and the above window (2) would appear. Look for the **Removable Disk** icon.

Step 3:

Double click the **Removable Disk** icon.
Note: Do not disconnect the USB cable once you click into the removable disk window. Such action may cause data loss or problems to the player.

Drag and drop your media files into the removable disk.
Close the removable disk window and disconnect the player from your PC after the data transfer.

Transfer Music, Image, Movie & Ebook

Software Operation

You can convert your favorite video file in any other format into the .AVI format with the help of the **AVI Converter** (Start\Programs\MP3 Player Utilities 5.02 \AVI Converter).

After selecting the source video file and your preferred target file path. You can press the Convert button to start it. The converted .AVI file will be played automatically after conversion via Media Player.

Software Operation

You can enjoy songs from both PC and your player thru the **Media Manager** (Programs\MP3 Player Utilities 5.02\Media Manager).

If the updated firmware version is available, please use **MP3 Player Firmware Upgrade Tool** to upgrade it.

What should I do if...

Q: I cannot enter the MUSIC mode after using the player for a period of time.

A: You should format the memory of the player under connection to PC.

(Be sure you remember to backup the data in your player before performing the above action.)

Q: I cannot convert my video file into the .AVI format.

A: Please make sure that the media player software for video files has been installed on your PC. Then try to convert again.

Disposal of your old product

Electrical and electronic equipment (EEE) contains materials, parts and substances which can be dangerous to the environment and harmful to human health if wastes of electrical and electronic equipment (WEEE) are not disposed correctly.

Equipments which are marked with the WEEE logo (as shown on the right), should not be thrown away with your household waste. Contact your local Authority Waste Disposal Department as they will be able to provide details of the recycling options available in your area.
