

Snell Signature Series loudspeakers - K7

Is Bigger Always Better?...Can Speakers Be Beautiful
The Snell Series 7 loudspeakers reveal the depth, impact and nuance in every music and movie soundtrack without the obtrusive look and placement conflicts of typical speakers. Handcrafted in Massachusetts from real wood and solid aluminum, the elegant Series 7 with its soft lines and superb finish plays perfect host to the technology inside.

K7 Style and room architecture play a bigger role in home entertainment decisions than ever before. The smallest of the Series 7, the K7 is designed to perform, regardless of placement, and integrate with most decor. Based on newly developed, high performance drivers from SEAS, and (quite) a bit of magic from Snell's chief engineer, Joe D'Appolito Ph.D., the K7 betters its award winning predecessor, the K.5mk2, in half the physical size. Fine tuned with an individually calibrated crossover, the shoe-box sized K7 plays music and movies at concert hall levels, with startling dimension and clarity.

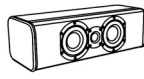

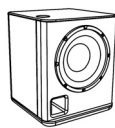

Dimensions:
12" High
7" Wide
10.5" Deep

Application Alternatives:

IW-K7 In Wall

System Suggestions:

Basis150 Subwoofer CR7 Center SR30 Surround

Like all Snell loudspeakers, each K7 is hand tuned for natural imaging and sonic depth.

Design:

Bass Reflex Monitor with Rear Port (port requires 1.5" to back-wall)

Frequency Response

54Hz-20kHz ± 3dB
77Hz-20kHz ± 3dB
@ 12dB Octave w/ Port Plug

Sensitivity

[1 Watt (2.83v) @ 1m]
87 dB

Impedance

Nominal 8 Ohms

Maximum Output

105 dB

Recommended Power

50 Watts minimum
150 Watts maximum

Tweeter

1-inch SEAS silk dome

Woofer

5.25-inch SEAS Treated Paper, 5 mm Excursion

Video Shielding

Yes

Crossover Frequency

2.5 kHz

Crossover

Discrete Tweeter and Woofer circuit boards. Time alignment and coherency are achieved through the transition region from driver to driver. Each crossover is individually tuned by our technicians to ± 0.5db of the Master Reference.

Boundary compensation

"Normal" – When placed on stands away from wall.
"Boundary" – When placed on shelf or near wall.

Wiring

Bi-amp, bi-wire ready

Connections

5-way, satin nickel-plated, brass terminals. Accepts 5/16's spades, pins, banana plugs and bare wire to 12 gauge.

Cabinet Construction

Hardwood veneer over 5/8-inch MDF Panels. Full length brace with integrated port flare. Radiused 1.25-inch satin-black MDF baffle.

End Caps

1/4" inch aluminum, anodized black

Grille

Perforated Steel with black powder-coat paint.

Finishes

Hand-sanded natural Cherry. Black-painted Walnut. Can be ordered in most wood and paint finishes.

Weight

17 lbs.
