What is an ES2600RG ?

The ES2600RG series was a single phase regenerative analog DC motor speed control manufactured by Emerson Industrial Controls from approximately 1985 to 1992. It was available as a chassis unit or within an enclosure to control DC Shunt Wound or Permanent Motors from 1/4 to 5HP from single phase 120vac or 240vac power.

What replaces the ES2600RG ?

Our Fincor 2230 series can replace most of the ES2600 applications. The Fincor 2230 drives use state-of-the-art SMT (Surface Mount Technology)- to provide a wealth of features within a compact package. Fincor 2230 Drives are available in a NEMA 4/12 Enclosure or basic chassis mount models. All models have a range of option kits available to extend functionality even further beyond standard features.

Consult with Technical Support to insure retrofit compatibility for your application.
